

**Jonathon Angell & Scott Carroll join Eurofins | mgt**

**Eurofins | mgt – Business Development Queensland & New South Wales**

**Eurofins | mgt is delighted to announce that Jonathon Angell and Scott Carroll have joined our Business Development team in Queensland and New South Wales, respectively.**

Both Jonathon and Scott bring a wealth of experience to Eurofins | mgt and will be working alongside Rhonda Chouman, the National Business Development Manager who said: "I'm delighted to have both these experienced Environmental Chemists join our dynamic, high quality and fast growing BD team".

**Jonathon Angell** joined our Business Development team in February 2014 and will be located in our Brisbane laboratory.

**Scott Carroll** joins in April 2014 and will be located in our Sydney laboratory.

**Jonathon** joins us from ALS where he was the Head of the Inorganics Laboratory in Brisbane and was integral in the setup and operations of their Gladstone, Roma and Mackay Offices.

Jonathon has a strong background in Environmental Chemistry, along with an in depth knowledge of the logistical needs to service the analytical requirements of the northern regions of Queensland, specifically the CSG and Mining sites located throughout the Bowen, Surat & Galilee Basins.

Jonathon has recently married and together with his move to Eurofins is looking forward to exciting times and challenges ahead.

**Scott** joins us from Scientific Analysis Laboratories (SAL) in the UK who specialise in accredited analytical services for the Environmental, Health and Safety, Petrochemical and Food, market sectors he was based in Scotland where he was the Business Development Manager for the United Kingdom.

Prior to working for SAL Scott was the head of Eurofins Client Services (ASM) team at Eurofins UK Environmental & Food Laboratory in London.

Scott will bring to our Sydney laboratory an in depth knowledge of Eurofins Client Services (ASM) operations in Europe along with the BD activities that made his time with SAL such a success.

Scott originates from New Zealand and is eager to move back to the Southern Hemisphere with his Scottish partner to enjoy some warmer weather and beaches in Sydney.

**Sefton McGraw** our Managing Director in Australia said:

*"At Eurofins we are looking to grow our presence within both the New South Wales & Queensland market places and the addition of Jonathon & Scott to our current BD team nationally, is a great driver for our business in both states.*

*Additional to Scott and Jonathon's arrival at Eurofins we are setting up our Brisbane laboratory to be our centre of excellence throughout the South East Asian region for emerging chemicals of concern such as PFOS/PFOA, Glyphosate and Pharmaceutical & Personal Care Products (PPCPs) with analysis by LC-MS/MS. In addition, we are opening our centre of excellence for Acid Sulfate Soils (SPOCAS) analysis in April this year also in our Brisbane laboratory.*

*Added to this the amalgamation of Agrisearch Analytical with our Sydney laboratory brings unparalleled resources with respect to GLP Agrochemical Residue and Formulation studies conducted by experienced personnel using state-of-the art equipment such as LC-MS/MS and GC-MS/MS instrumentation.*

*These are indeed exciting times for us at Eurofins | mgt as we grow our company across Australia and the APAC region"*

Footnote – Analytical Service Manager (ASM) – Eurofins Global term for Client Services. In Australia we are currently transitioning to this title.

**Results You Can Trust**

**EnviroNote No. 1040 – February 2014**
