

Grouped Analysis Suites

EnviroNote 1031

Eurofins | mgt have a series of Grouped Suites within our Price List that are discounted below the individual rates of the analysis that make up those Suites.

These Suite Rates provide very competitive pricing based on volume, quick sample processing and low administrative costs. However we can only make the required savings if our work is done as efficiently as possible. Sample management and invoicing are controlled by a LIMS which includes prescribed groups of analytes. If suite names are used on COC's then processing of your samples and preparation of invoices can be conducted quickly and efficiently allowing us to pass on the savings.

Where clients list individual analytes on the COC the Individual analyte rates will be applied on the Invoice.

Below is a list of Suites currently available under our Price List. Please use the suite names on your COCs. It means **Eurofins | mgt** can process your work quickly and can also afford to continue the very competitive rates that the Suites provide.
