

Safety and Toxicity tests

— Substances such as chemical, cosmetics, agrochemical

Eurofins has provided research and testing services to the agrichemical, chemical, dietary supplement/functional foods, biotechnology and household product industries. We offer a broad range of services including toxicology, analytical and bioanalytical and chemistry.

Eurofins offers competitively priced acute and subchronic toxicity studies that comply with international regulatory test guideline, including the OECD, EPA and FDA toxicity protocols.

● Acute Toxicology

- Eye, skin and oral mucosal irritation
- Oral, dermal, inhalation and systemic toxicity
- Skin sensitization
- Penile and vaginal irritation
- Skin corrosion
- Comedogenicity
- Implantation/extraction studies for medical devices

Routes of Administration

- Dermal
- Oral
 - Ocular
- Inhalation
 - Infusion
 - Intra-articular
 - Intranasal
 - Parenteral
 - Rectal

● Subchronic / Chronic Studies

- Repeat Dose (14, 28, 90 days), Reproductive
- Oral, Dietary, Dermal

Our dedicated team of professionals is available to assist with the development of a research and testing program to meet your demands.
