

More than a lab.

Your local partner for all your agriculture and water testing

With laboratories throughout New Zealand, Eurofins Agro Testing NZ has been partnering with customers across the agriculture and horticulture sectors for over 35 years.

We offer easy access to world-leading independent analytical testing and use specific validated methods developed for the New Zealand environment.

We offer:

- **Soil Fertility, Biology and Soil Texture Analysis**
- **Herbage and Crop Leaf Mineral Analysis** (with specialised leaf reports)
- **Feed Quality Analysis** (hay, silage, baleage, maize, pasture, and compound feeds)
- **Fertiliser Analysis** (liquids, solid fertilisers, lime, manures, and organic material)
- **NIRS Technology** (for the analysis of forage, raw materials, soil and manure samples)
- **Water Analysis** (environmental, irrigation and drinking water)
- **Fruit Maturity and Quality Monitoring Services** (for local and export market clearance programmes)
- **Pesticide Residues Analysis** (covering over 550 compounds)

Really Local. Truly Global.

Really local. Truly global.

While our roots are local, our expertise is global. Eurofins Scientific is an international life science company and a world leader in food and environmental services. When you partner with Eurofins Agro Testing NZ, you are partnering with a leading international network of over 900 laboratories with over 62,000 employees across six continents.

Connecting agriculture with the most advanced analytical techniques

Our extensive testing solutions can underpin informed nutrient and farm management decisions - helping to control soil erosion and water pollution, and optimising your soil health and nutrient status for pasture, crops, and animal health.

Future-proofing your environmental impact

Eurofins Agro Testing NZ is passionate about helping farmers and growers find the gains needed to optimise efficiency and profitability, and farm with maximum benefit to the environment. We draw on our local and global network of expertise, to access and develop more specialist analyses and technologies to support your farm's future sustainability.

Choose the lab that offers:

- Independent and science-based IANZ-accredited testing
- A complete testing package at competitive rates
- Tailored analytical profiles to suit customer requirements
- Access to a global portfolio of over 200,000 analytical test methods
- An innovation capability to support new test methods and drive efficiencies
- Experienced Analytical Service Managers as a single point of contact for all enquiries
- Real-time visibility and sample tracking with our on-line portal (ESM)
- One laboratory for all your testing requirements
