

Eurofins North Malaya able to provide **Standard Reference Material (SRM)** which play an important role within a broader quality assurance program especially in rubber industry. It serves as an important tool for implementation of numerous aspects as following:

- Quality measurements
- Validation of methods
- Calibration
- Estimation of measurement uncertainty
- Training and internal quality control
- External proficiency testing or inter-laboratory testing

i) 6 x 8 cm of sheeted SRM

ii) 25g of unblended SRM

Specification of Standard Reference Materials as following:

Material	Stabilized Grade	Specification range	Remarks
Latex	CV 60	P0 : 27 - 35	Standard Rubber Materials are tested in accordance to ISO 17025 accredited methods and certificate of analysis will be provided.
		VR : 59 - 65	
	CV 50	P0 :25-30	
		VR :45-55
