

# WORLDWIDE LOCATIONS

STRONGER TOGETHER

- ✓ Biological Evaluation
- ✓ Consumer Safety
- ✓ Product Chemistry
- ✓ Environmental Safety
- ✓ Regulatory Support

## North America

EAS has an advanced portfolio of services in North America to include all field studies, ecotoxicology studies, E-fate and metabolism studies in the lab and field. Our residue laboratory is dedicated to GLP residue and metabolism analytical services. In addition, our public health department provides a full range of services on mosquitos and other pests.

Regional contact: Martin Feyerabend

## Europe

Europe is home to a highly developed network of Eurofins field facilities and laboratories. All field and laboratory services for development, registration, and post-registration support can be provided in the European zone. Animal health and public health services are also available and rapidly growing.

- Analytical: Susan McKeon  
[SusanMcKeon@eurofins.com](mailto:SusanMcKeon@eurofins.com) Tel: +61 401 673 917
- Animal Health: Sally Colgan SCEC  
[Sally@scec.net.au](mailto:Sally@scec.net.au) Tel: +61 299581108
- Regulatory: Kathryn Adams  
[KathrynAdams@eurofins.com](mailto:KathrynAdams@eurofins.com) Tel: +61 428601049

## Asia

With facilities in Thailand, India & the Philippines, and partners in Vietnam and Indonesia, EAS Group conducts GLP field trials to test crop protection compounds for bio-efficacy, selectivity, vigour and residual activity. In addition to field trials, public health services, resistance monitoring and ecotoxicology studies are offered throughout the region.
