

Online Data Access with LabAccess.comSM

LabAccess.com, Eurofins Medical Device Testing's innovative online data access tool, offers you a timely and secure window into comprehensive laboratory information as your project progresses. With LabAccess.com, you can view extensive, live project information such as submitted samples, analyst's notebooks, chromatograms, approved test results, Certificates of Analysis, raw data packages and invoices.

Choose Eurofins Medical Device Testing to help you:

- Gain 24/7 Secure access to your data
- Retrieve past project information as easily as your current data
- Access an exclusive Shelf Life Study management tool

Eurofins Medical Device Testing provides you with the most innovative, comprehensive and user-friendly data management tool in the industry, giving you the ability to save valuable time and manage your projects with maximum efficiency. With more than 6,000 registered users, LabAccess.com offers:

The Stability Calendar

This exclusive feature allows you to view your shelf life studies in progress. Calendar items have detailed links to information posted; you can link to a sample number and see live data. Additionally, you can link to your overall protocol plan in our document control system, ensuring perfect synchronicity to your requirements and scientific procedures.

Exporting of Results

LabAccess.com enables you to view the results for multiple tests and download them as either a Microsoft Excel Workbook or a Comma Separated

Value (CSV) file. You can export your data to perform your own comparisons or to study trends. This enables you to evaluate your product performance over time and compare data sets to statistically evaluate data points. LabAccess.com is designed to give you the information necessary to look at your performance over time and compare data sets to statistically evaluate data points.
