

Chemistry and Analytical Services

Welcome to Eurofins Agroscience Services

We are a leading provider of product development consultancy and technical support to the crop protection industry. Our technical activities involve conducting field and laboratory studies to determine the safety and efficacy of new agrochemicals and crop varieties. With over 30 years of experience, Eurofins Agroscience Services offers outstanding technical knowledge and project management skills. By acquiring a carefully selected range of CRO's, we have created a unique portfolio of expertise that provides analytical, regulatory and field support to plant breeders, agrochemical, biopesticide, biocide and fine chemical manufacturers.

Analytical Services

Eurofins Agroscience Services offers a broad spectrum of analytical services needed for the registration of your substances. These include crop residue studies, processed fractions, environmental fate, ecotoxicology, plant / soil metabolism, product chemistry, and operator exposure studies using state of the art instrumentation.

We offer complete support throughout your analytical program providing an integrated approach between our laboratory, field and regulatory services. Using our facilities around the globe allows us to run analytical methods simultaneously, and provides flexibility to share resources and expertise.

Portfolio of Capabilities

Analytical Support

Residue Studies

- Field Residue Trials: Harvest Trials, Decline Trials
- Animal feeding Studies
- Processing Studies
- Rotational Crop Studies
- Post Harvest Treatment Studies
- Environmental Fate & Metabolism
- Soil Dissipation / Accumulation / Degradation Operator or Worker Exposure Studies Ecotoxicology Studies

Service Portfolio

- Residue Analysis: Crops, Processing Matrices, Soil, Biological Matrices
- Method Development and Validation: Crops, Soil, Air, Water, Biological Matrices
- Storage Stability Studies
- Independent lab validations across four independent GLP testing laboratories
- Monitoring Analysis (Ground Water)
- Accompanying Analytical Support for Ecotox
- Multi-Residue Analysis

Eurofins Agrosience Services can also provide specialist GLP field and analytical services in support of genetically-modified (GM) crop varieties development.

Our Promise

- Reliability, efficiency and delivery for timely results in analytical programs
- Solutions to meet new regulatory requirements
- Global service provider offering laboratory support around the globe
- Continuous investments in People and Instrumentation

Eurofins Scientific Group

Eurofins Scientific is a life sciences company that serves a wide range of industries including the pharmaceutical, agricultural, food and environmental sectors.

Today the Eurofins Group is a leading provider of analytical services.

“We will work with you to develop and deliver timely and reliable services”
