

Field Services

Welcome to Eurofins Agroscience Services

We are a leading provider of product development consultancy and technical support to the crop protection industry. Our technical activities involve conducting field and laboratory studies to determine the safety and efficacy of new agrochemicals and crop varieties. With over 30 years of experience, Eurofins Agroscience Services offers outstanding technical knowledge and project management skills. By acquiring a carefully selected range of CRO's, we have created a unique portfolio of expertise that provides analytical, regulatory and field support to plant breeders, agrochemical, biopesticide, biocide and fine chemical manufacturers.

Collaboration, partnership & trust for lasting solutions, ongoing success and improvement in field programs.

Field Services

Eurofins Agroscience Services offers the largest, 'in house' field trial capacity in the world. With unmatched global reach, we are confident that we can offer our clients a full range of services in key agricultural regions across the globe.

We continue to add to our vast network of geographically complimentary field stations, growing our capacity and capabilities across Europe, whilst focusing on growth in NAFTA, Central and South America, Asia and Australasia to complete a truly global field trials service.

In summary, our offering consists of:

- Conducting regulatory efficacy studies for local, international and global submissions
- Conducting global field and laboratory safety studies, including magnitude of residue, environmental fate & behaviour, operator exposure and re-entry & dislodgeable residues
- Specialist GLP field and analytical services to support genetically-modified (GM) crop variety development.

Our Promise

As a global service provider, Eurofins Agroscience Services can promise:

- Collaboration, Partnership and Trust for lasting solutions
- Ongoing success and improvement in field programs
- Project and Study Management from the industry's most respected individuals
- Experienced and dedicated professionals with specific areas of expertise

Portfolio of Capabilities

The following service guide details some of our primary activities but is not exhaustive.

In summary, our offering consists of:

- Crop Residue Studies (GLP)
- Crop efficacy and selectivity testing (GEP)
- EU & EPA import tolerance
- Exposure studies (Operator, worker re-entry, DFR)
- Resistance monitoring
- Resistance pressuring
- Insect and pathogen culturing
- Varietal evaluation for traditional and GM varieties
- ELISA and PCR identification and quantitation procedures
- Compilation & submission of dossiers
- Ecotoxicology
- Environmental fate & behaviour (dissipation/accumulation)
- Groundwater monitoring & field leaching

Eurofins Scientific Group

Eurofins Scientific is a life sciences company that serves a wide range of industries including the pharmaceutical, agricultural, food and environmental sectors.

Today the Eurofins Group is a leading provider of analytical services.
