Responsible Chemical
Management

Chem-M-A-P[®]

Reducing Risk, Increasing Confidence

Chemical Management Systems for the Entire Supply Chain

Chem-MAP® is a Suite of Chemical Management and Verification Systems for the Entire Supply Chain

Chem-MAP® is a **ZDHC approved** programme focused on the implementation of robust chemical management systems in the **leather, textile** and **synthetic materials** supply chains. This multi-module programme is fully aligned with ZDHC objectives and offers ZDHC Conformance Level 1 to 3. Chem-MAP® supports businesses with MRSL and RSL management, actively reducing chemical risk within their supply chain.

Developed by Eurofins | BLC in partnership with Vert-Tex, Chem-MAP® prevents harmful chemicals from entering the materials supply chains, thereby protecting workers, consumers and the environment.

Chemical companies, materials manufacturers, brands and retailers achieve an internationally recognised award through one of three programmes in the Chem-MAP® family. Achieving a Chem-MAP® award signifies the use of responsible chemicals in the production of consumer goods.

Chem-MAP® is the future of chemical management in leather, textile and synthetic materials supply chains.

Chem-MAP[®]

Reducing Risk, Increasing Confidence

Chem-MAP[®] chemical management programmes have a structured approach and are tailored to your business needs. They effectively help you manage chemical inputs across leather, textile and synthetic materials.

C-MAP Programme

Chemical Manufacturers and Suppliers

Benefit from becoming Chem-MAP[®] certified through the c-MAP Programme, gaining ZDHC Conformance Level 1 to 3 and verification of chemical formulations to the ZDHC MRSL, enabling them to be listed on the Gateway.

m-MAP Programme

Manufacturers of Materials and Products

Reduce RSL failures and gain Chem-MAP[®] Approved Manufacturer status for your facility and Chem-MAP[®] Approved Technician awards for your staff with m-MAP for manufacturers of leather, textile and synthetic materials.

b-MAP Programme

Brand and Retailer Chemical Management

Implement a robust chemical management system in your materials supply chain and build responsible chemical sourcing strategies with b-MAP. Benchmark your systems with industry leaders and reduce RSL failures.

Chem-MAP[®]

Reducing Risk, Increasing Confidence

Our team of experts have developed standalone testing and verification services for chemical inputs, providing your business with certified assurance of chemical contents to specifications.

M-R-S-L Testing

Testing of Chemicals to a Range of MRSLs

Minimise RSL failures with MRSL testing to the ZDHC or other industry/brand MRSL, further reducing chemical risk to your customers and the supply chain, as well as providing a long-term financial benefit for your business.

Ve-M-A-P Certification

Vegan Certification of Chemicals for Use in Materials

DNA analysis of chemicals used in the manufacture of materials to establish whether any animal products or by-products have been used. This enables brands and manufacturers to achieve vegan verification through Ve-MAP.

Achieve ZDHC Conformance Level 1 to 3 Through the c-MAP Programme

Chemical companies around the world will benefit from becoming Chem-MAP® certified through the c-MAP Programme. Completion of the c-MAP programme enables chemical manufacturers to gain ZDHC Conformance Level 1 to 3, providing verification of chemical formulations to the ZDHC MRSL. Thereby, demonstrating their commitment to responsible upstream chemical management.

c-MAP Programme Modules

Module 1:
c-MAP On-Site
Chemical Management
Audit

Module 2:
c-MAP MRSL Testing

Module 3:
c-MAP Chemical
Supply Chain
Transparency

Benefits of c-MAP for Chemical Manufacturers

- ZDHC Conformance Level 1 to 3
- ZDHC compliant chemical formulations listed on the ZDHC Gateway updated to show certification of ZDHC Conformance Level 1 to 3
- Assurance of chemical supply chain transparency through on-site audits and MRSL testing (ZDHC Conformance Level 3 only)
- Recognition of the chemical company's commitment to responsible chemistry

Become a Chem-MAP® Approved Manufacturer Through m-MAP

Manufacturers of leather, textile and synthetic materials can achieve Chem-MAP® Approved Manufacturer status for the implementation of responsible chemical management in the supply chain. m-MAP equips manufacturers with a range of capacity building tools including online training programmes, chemical inventory management and chemical management audits of manufacturing facilities.

m-MAP Programme Modules

Module 1:
m-MAP On-Site
Chemical Management
Audit

Module 2:
Chem-MAP® Approved
Technician (CAT)
Award

Benefits of m-MAP for Manufacturers of Products and Materials

- A chemical management audit of the manufacturing site(s)
- Becoming a Chem-MAP® Approved Manufacturer (CAM)
- Staff achieving the Level 1/Level 2 Chem-MAP® Approved Technician (CAT) award through access to expert chemical management training online
- Attracting brands and retailers by supporting ZDHC goals and objectives

Developing Chemical Management Systems for Brands and Retailers

b-MAP is a specially designed Programme within Chem-MAP® to support brands and retailers with implementing responsible chemical management in their materials supply chains for leather, textile and synthetic products. b-MAP provides a flexible approach to capacity building and ultimately positions brands and retailers to implement responsible chemical sourcing strategies within their material supply chains.

b-MAP Programme Modules

Module 1:
b-MAP Chemical
Management Audit

Module 2:
Benchmarking and
Gap Analysis

Benefits of b-MAP for Brands and Retailers

- An independent technical review of current chemical management systems
- Help with developing a responsible chemical management programme and implementing this in the materials supply chain
- Benchmarking and gap analysis against industry leaders
- An action plan for improvement
- Support to help brands and retailers satisfy ZDHC goals and objectives

MRSL Testing: Testing Upstream to Reduce RSL Failures in Manufacturing

Manufacturing Restricted Substances List (MRSL) testing is an essential component of chemical risk management, focusing upstream in the supply chain, beyond Restricted Substance Lists (RSL) testing. MRSL testing through Chem-MAP® can help to minimise RSL failures, providing a long-term financial benefit for your business and further reducing chemical risk to your customers, and the rest of the supply chain.

MRSL Testing Packages

Package 1:
Complete MRSL Testing of
Chemical Formulations

Package 2:
Smart Testing of Chemical
Formulations

Package 3:
MRSL Testing of Individual
Analytes or Chemical Groups

Package 4:
MRSL Testing to Customer
Specifications

Ensure your products meet a recognised industry standard

Laboratory specialists at Eurofins I BLC have developed the testing of chemicals to an MRSL which includes a series of fully validated test methods, that are used in Chem-MAP®. The test methods are then used to determine the quantity of individual chemicals within a supplied chemical formulation, against those listed on the **Zero Discharge of Hazardous Chemicals (ZDHC) MRSL**.

Ve-MAP: A New Programme for the Certification of Vegan Materials

Ve-MAP is a new innovative programme within the Chem-MAP® family which tests chemicals used in the manufacture of materials, to establish whether any animal products or by-products have been used. Ve-MAP helps brands and retailers to correctly specify materials using a phased approach, covering the manufacture of materials, chemical management, risk assessment and testing to achieve vegan certification of materials.

5x Phases of Vegan Verification

Benefits of Ve-MAP Certification

- Assurance that any chemistry used in the production of products/materials have not been derived from animal origin
- Independent third party verification and certification process supported by DNA testing
- Development of chemical management systems for vegan materials which goes beyond the absence of animal-derived material such as leather, feathers and fur
- Support for brands and retailers to endorse products as 'animal-free' and 'vegan friendly'
- Training and awareness for manufacturers, brands and retailers

Next Steps: Start Your Journey to Responsible Chemical Management

If your business is looking to develop chemical management systems, you can discuss your needs with one of our technical experts today.

Our team has a wide range of experience in chemical risk management in the materials supply chain for the footwear and apparel sectors. Their specialist knowledge includes conducting chemical management audits and risk assessments, reviewing chemical handling procedures, raw material processing (leather, textiles, and synthetics), chemical testing, MRSL testing of formulations, RSL testing and chemical compliance.
