Eurofins:
Network of laboratories

Each laboratory offers analytical services and customer support, however, some services are centralised. Through excellent logistics and information technology, Eurofins can deliver a full range of expertise through any one of its laboratories.

In this directory, services listed are specific to the respective laboratories and are described as follows:

- **International Division/ International Business Line**
- **Country (by alphabetical order)**
- **Laboratory - Marketing name**
- **Laboratory description/ Services/ Analysis/ Offers**
- **Full contact information:**
  - **Legal name of the laboratory**
    - **Full address and phone number(s)**
    - **Email(s)**
    - **Website**

Eurofins is the world leading food and feed testing laboratory group, deploying a comprehensive range of state-of-the-art analytical techniques in order to support its clients' increasingly stringent quality and safety standards.

The Group has built up a global network of food testing laboratories and Competence Centres that perform more than 100 million assays per year to establish the safety, composition, authenticity, origin, traceability and purity of food.

Eurofins thus offers the broadest portfolio of any food testing lab and makes this unique offer available globally from any of our laboratories using optimised processes, logistics and IT.

AUSTRIA

Eurofins Lebensmittelanalytik Österreich

Eurofins Lebensmittelanalytik Österreich was founded in 2006 as a subsidiary of Eurofins Scientific and Österreichisches Forschungsinstitut – of, and was originally the "Milchwirtschaftsfond" in the middle of the last century. It is the direct descendant of QLab Austria (ownership: Agramarkt Austria - AMA Gütesiegel).

Eurofins-ofi is one of the leading laboratories in the field of food law and labelling within the CEE Region.

The site in Vienna carries out a broad range of chemical, biological and pesticide residue analyses and consultancy on foodstuffs, packaging materials, biopharmaceuticals, cosmetics and consumer goods, with a special focus on the area of retailing. In addition, a countrywide network for sampling and sample-shipment offers our customers a "one stop" service.

Furthermore Eurofins-ofi provides industrial partners with a full quality assurance programme for outsourcing their internal QA activities (e.g. shelf life testing, backup sample storage).

Services:
- General food Chemistry:
- Chemical and physical analysis: chromatography (pesticides, mycotoxins, preservatives etc.), chemistry (fat, protein, dry matter etc.), microbiology
- Marketability and Translation: in over 45 countries but with the main focus on CEE Europe
- Sensory Analysis: sensory panels for all market relevant product groups
- Accredited sensory methods
- Special panels for dairy products and wine
- Experts with DLG-sensory certificate
- Inspection/Hygiene:
- 3rd Party Audits
- Hygiene checks
- Expert sampling
- HACCP Consulting
- Issuance of a certificate
- Food Law: §73 experts with competence in food law, labelling and food supplements

Accreditations:

BELGIUM

BRAZIL

Eurofins São Paulo

Eurofins do Brasil has been offering a complete Eurofins GeneScan GMO portfolio since 2001. The analytical portfolio has increased to offer a wider and complete service solution to Brazilian market.

We offer analyses to the food, feed and agribusiness industries. Microbiology, pesticides and veterinary drug residues, mycotoxins, GMO and animal species identification are the main areas.

Technologies include PCRs and chromatographs - LC/MS-MS, GCs and HPLCs coupled with several different detectors.

Eurofins do Brasil combines the best practices and worldwide expertise of the Eurofins network, offering an
international portfolio locally, and delivering high quality services for its customers.

Accreditations:

• INMETRO ISO/IEC 17025:2005
• REBLAS (Brazilian Network of Laboratories, Healthy Ministry)
• MAPA (Ministry of Agriculture)

Eurofins GCL Santiago

Eurofins GCL joined the Eurofins Group in 2013. GCL companies have a long track record in the delivery of laboratory services, consulting and training, mainly focused on the food industry.

Services:

Testing services are offered in accordance with the Food Health Regulations for companies involved in food: cooked dishes, food processors and surfaces. GCL also offers testing for pathogens in raw materials and finished products: VIDAS Automated methods for Listeria monocytogenes, Salmonella, E. coli O157 H7.

Other services include:
• Water testing
• ILW and lifetime studies in real time.
• Residues of Pesticides
• Antibiotics
• Cholesterol and Fatty Acids
• Vitamins
• Mycotoxins
• Water and ILW
• Alcohol
• Preservatives and Antioxidants
• Composition of foods, nutrients and heavy metals
• Fertilizers
• Water and Waste Waters
• Sensory evaluations
• Nutritional labelling
• Testing of own brand products

Accreditations:

CHINA

Eurofins Food Testing Suzhou

Eurofins Technology Service (Suzhou) Co., Ltd. is a subsidiary in China wholly owned by Eurofins Scientific Group.

With a laboratory accredited by DAkkS (Germany), CNAS, CMA & AQSIQ (China) in Suzhou and sales offices in Dalian, Qingdao, Xiamen, Kunming, Tianjin, Chengdu, Guangzhou, Hong Kong and Taiwan, Eurofins offers the full spectrum of the Eurofins portfolio to its clients throughout Greater China.

Services:
- Pesticide analyses based on SPE-MS & LC-MS/MS
- Pesticide analyses for organic foods
- Organic contaminant analyses, including Melamine/ Cyanuric acid
- Veterinary Drug residue analyses
- Mycotoxins analyses in foods
- Nutritional fact analyses
- Physical & chemical analyses
- Microbiological analyses
- Heavy metals analyses
- Radioactivity analyses
- Allergens analyses
- Illegal dyes analyses
- Premix vitamin analyses
- GMO qualitative & quantitative analyses
- Identity Preservation/ Non-GMO Supply Chain Control Programme
Consulting and Certification
- Food Safety programmes (IFS, BRC, ISO 22000, etc.)
- Consulting / Auditing / Certifications
- Pre-shipment Inspections and hygiene auditing programme against recognised standards

Eurofins Food Testing Qingdao

Eurofins Technology Service (Qingdao) Co., Ltd., founded in 2016, is located in the North of China.

Business covers Shandong Province, Henan Province, Hebei Province, Beijing and Tianjin etc.

The laboratory focuses on chemical and microbiological analysis for food/feed and environmental samples on trace levels. With the rapid development of testing capability, the lab’s testing services on vet drugs, microbiology, allergen, pesticide, contaminant, mycotoxins, etc.

Services:
- Pesticide analyses for plant foods
- Organic contaminant analyses, including PAHs, and Melamine/ Cyanuric acid
- Veterinary Drug residue screening analyses
- Mycotoxins analyses in foods
- Physical & chemical analyses
- Microbiological analyses /Sterility Validations
- Allergens analyses
- Illegal dyes analyses
- Pre-shipment Inspections and hygiene auditing programme against recognised standards

Accreditations:
- CNAS in accordance with ISO/IEC 17025:2005

CROATIA

Eurofins Croatiakontrola Zagreb

Eurofins Croatiakontrola Ltd. is an inspection company which combines laboratory testing services and inspection of goods.

We have profiled ourselves as the strongest laboratory in Croatia in the field of pesticide residue analysis and
analysis of contaminants in food and feed.

Services:

Our services in general food, feed analyses and consultancy contain:

Microbiology - Testing for the complete range of microorganisms relevant to the food industry:
• Pathogenic organisms (e.g. Salmonella spp, Listeria monocytogenes, Staph. Aureus, E. Coli, Campylobacter spp, Vibrio spp)
• Spoilage organisms (e.g. Yeast and Mould, Bacillus spp, Clostridium spp, Pseudomonas spp)
• Technologically relevant microorganisms (e.g. Lactobacilli)
• Hygienic checks
• Microscopic analysis
• Sensory analysis
• Specialistic in the field of food law, labelling
• Preparing sampling

Chemical analysis of food and feed - Testing for complete range of analysis according with the requirements of the regulations and laws:
• Nutritional testing of food
• Sensory analysis of food and feed contact materials with a wide scope of different methods; highly experienced and trained experts
• Feed analysis (quality parameters)
• Vegetables
• Fruits
• Meat and meat products
• Oil seeds; oils and fats of vegetable and animal origin, including the analysis of all relevant fat attending compounds and profiles; ageing, oxidation;
• Olive oil
• Dried fruits
• Nuts
• Convenience products
• Cereals
• Coffee
• Sweets
• Novel food, food supplements and health food

Common use objects, Food contact material, Cosmetics - Testing for range of analysis according with the requirements of the regulations and laws; Making of EU Cosmetic Product Information File; Stability tests, Challenge testing, etc.

Agricultural soil and fertilizer analysis, agricultural advice - Testing for complete range of analysis according with the requirements of the regulations and laws:
• Soil quality analysis
• Fertilizers quality analysis

Environmental analysis services: - Performing sampling, chemical and microbiological analyses of various matrices. We provided services to government, science and private sector:
• Analysis of drinking water, mineral water, groundwater, surface water, wastewater for organic and inorganic contaminants, heavy metals, flame retardants, ecotoxicology testing
• Analysis of waste, soil, sludge, sediment, digestate and compost
• Analysis and classification of solid recovered fuels (SRF)

Consultancy
• Consultancy in respect of quality control systems/ HACCP/ hygienic checks
• Specialist in the field of food law, labelling

The laboratory is able to analyse all kinds of food with the following microbiology and chemical methods:
• Classic cultural methods
• PCR
• Petrifilm
• Inhibitory substance
• Classical methods
• Instrumental methods (liquid and gas chromatography, MS/MS, spectrophotometry, atomic absorption spectroscopy), etc. (ISO, AOAC, EuSalts, inhouse methods).

Accreditations:
Eurofins Croatiakontrola Ltd. is accredited according HRN EN ISO/IEC 17025:2007 and according GMP+B10 Laboratory Testing Scheme. Laboratory is designed for a high sample performance with short analytical times due to advanced equipment and a "lean management" methodology.

Membership:
• GAFTA Approved Analysts
• FOSFA Approved Analysts

**CZECH REPUBLIC**

**Eurofins Prague**

Eurofins CZ has a testing laboratory located in Prague accredited to ISO 17025. The laboratory is focusing on basic microbiological testing, including fast methods especially PCR. The chemical laboratory is focusing on basic tests including proximate and as well is focusing on authenticity testing based on markers analysis (meat content, fruit and vegetables content). The laboratory provides as well special services for retailers (inspection, audit, marketability certificates, labelling consultation).

The Group has a service offices in Prague and in Brno which they provide support in the Czech Republic and Slovakia for hardware and software products related to SNIF-NMR® and other isotopic analyses.

**Services:**

- Food and feed testing, more specifically consists of testing contents and contamination – vitamins, amino acids, mycotoxins, pesticides, heavy metals, medicine residues, pathogenic micro-organisms, etc.
- European Vitamin Competence Centre, BSE-testing and consultancy on hygiene - i.e. HACCP.

**Accreditations:**

- The laboratories are accredited according to the ISO 17025 standard.
- The laboratories are appointed as national reference laboratories within specific areas.

**Eurofins Steins Laboratorium**

Eurofins Steins performs sampling, laboratory analyses and consultancy services focusing on the food, feed, agro, and dairy industries. Our laboratory in Vejen services a broad range of companies, authorities and organisations.

**Services:**

- Food and feed testing, more specifically consists of testing contents and contamination – vitamins, amino acids, mycotoxins, pesticides, heavy metals, medicine residues, pathogenic micro-organisms, etc.
- European Vitamin Competence Centre, BSE-testing and consultancy on hygiene - i.e. HACCP.

**Accreditations:**

- The laboratories are accredited according to the ISO 17025 standard.
- The laboratories are appointed as national reference laboratories within specific areas.

**Eurofins GenoSkan A/S**

GenoSkan A/S uses a variety of advanced biotechnologies for genotyping and sequencing.

The Infinium HD assay technology from Illumina is a flexible platform which makes it possible to genotype a large amount of SNP markers for one individual at a time.

With this technology it is possible to use both customized SNP assays and to design own SNP assays. GenoSkan A/S offers customized SNP- assays for most species (human, cattle, pig, sheep, dog etc.)

**Services:**

- Genomics in animals/veterinary testing

**FINLAND**

**Eurofins Scientific Finland, Raisio Laboratory Site**

The Raisio laboratory unit is focused on food and feed testing, including microbiological and chemical laboratory testing and sensory analysis. Our specific competence area is fat related analyses. Additionally, the complete biopharmaceutical and food testing service offering of the Eurofins Scientific Group is available to our clients via the Raisio site.

**Services:**

- General food chemistry, fat analyses (including special analyses like sterol/stanol ester analyses, trans fatty acids, etc.)
- Microbiological analyses

**Accreditations:**

- ISO 17025
- Approval by Finnish Food Safety Authority (EVIRA)

FRANCE

Eurofins Analytics France
Services:
• Chemistry:
  • Chemical and nutritional testing of
    food products for industry and the
    retail sector
  • Determination of additives,
    preserving agents, colourings etc.
  • Determination of mycotoxins,
    detection of melamine and acrylamide
  • Determination of heavy metals (Pb,
    Cd, As, Hg)
• Determination of pesticides
  • Isotopic analyses by SNIF-NMR®
  • Determination of the composition and detection of atypical
    components
  • A complete offer for quality control of
    fruit juices and fruit products
    (including anthocyanin profile,
    oligosaccharides, flavour profile by
    enantioselective HRGC-MS etc.)
• Determination of the origin of bioethanol
• Chemical and nutritional testing of
  feed products (raw materials and
  finished products)

Molecular biology
• GMO testing from seeds to finished
  products across the food and
  agricultural chain (farm to fork
  concept) using the most innovative
  and proprietary technology including
  real-time PCR detection, identification
  and quantification of a complete range
  of genetically modified plants such as
  maize, canola, soybean and
  vegetables. A combination of
  optimised protocols, state-of-the-art
  technology and a highly skilled team
  enable rapid processing times tailored
  to the customers’ requirements.

• Genetic fingerprinting for tracing of
  beef supplies (Eurofins TAG™)
• Species identification by DNA chip:
  determination of the presence of 21
  meat species in one single analysis
• Allergen detection: Eurofins offers a
  comprehensive testing scheme
  covering all allergens listed on the
  “EU – Allergen Hit list”. Eurofins can
  offer both ELISA and PCR technology
  and advises customers which method
  is most appropriate for their products
  and production line Training and
  consulting concerning allergen
  analyses and risk management
  (Recognition by VITAL®)
• Detection of genetic resistance to
  scrapie
• Seed purity testing and quality
  control
• SSR / SNP development and routine
  analyses
• Marker Assisted Selection (MAS / MAB)
• Divergence studies (genetic
  resources management, varietal
  identification, EDV - Essentially
  Derived Varieties)
• Contract research (marker
  conversion, development of specific
  tests, project management)

Eurofins Cervac Sud

Eurofins Cervac Sud performs chemical and microbiological testing of food and water as well as sampling.

Services:
- Macroscopic analyses, metrology, determination of defects
- Microbiological analyses of food (salmonella by PCR, enterobacteriaceae...)
- Microbiological analyses of water.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, for programmes 60-80-81-82, LAB GTA23 and LAB GTA59 (accreditation reference 1-1822, scope available on www.cofrac.fr)

Eurofins Laboratoires de Microbiologie Ouest

Eurofins Laboratoires de Microbiologie Ouest is the biggest of the French Eurofins laboratories for microbiological testing, analysing several hundred thousand samples each year and conducting method development and R&D projects in the field of microbiological testing.

Services:
Microbiological analyses of all types of food products are performed for clients in the food industry, retailers and caterers. More than 160000 samples are analysed each year.

A wide range of methods are employed, including rapid methods with very short turn-around-times such as rapid methods with very short turn-around-times such as

Applications of new technology for germ identification by Matrix-Assisted Laser Desorption/Ionisation with Time-Of-Flight mass spectrometry (MALDI-TOF), with a very short Turn Around Time.

The laboratory has a nationwide network of technicians conducting sampling at production sites and delivering samples directly to the laboratory in less than 24 hours.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025 under the reference 1-1830 (accreditation scope available on www.cofrac.fr)

Eurofins Laboratoire de Microbiologie Est

Microbiological analyses of all types of food products are performed for clients in the food industry, retailers and caterers. Several hundred thousand samples are analysed each year. A wide range of methods are employed, including rapid methods with very short turn-around-times using immunoenzymatic techniques, molecular biology methods (PCR), especially for pathogenic bacteria e.g. Salmonella.

ELC is the competence centre for challenge tests within the food division, with a public recognition delivered by French agriculture ministry. The laboratory is also specialized in tailor made analytical solutions for specific needs, including off-site analyses.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2243 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire Centre

Eurofins Laboratoire Nord performs chemical and microbiological testing for the food and feed industries, retailers and caterers.

Services:
In microbiology, a wide range of methods are employed, including rapid methods with very short turn-around-times such as
immunoenzymatic techniques and molecular biology methods (PCR), especially for pathogenic bacteria e.g. Salmonella.

A nationwide network of technicians conducts sampling at production sites, delivering samples directly to the laboratory in less than 24 hours.

The laboratory also has specific expertise and experience for determinations on sugars and related products, for chemical testing and microbiology (including TAB – Thermophilic Acidophilic Bacteria).

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2241 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire Coeur de France
Eurofins Laboratoire Coeur de France is a private - public structure, the result of the takeover of IPL activities in 2011. It analyses several hundred thousand samples each year.

Services:
• Animal health testing: PCR for BSE and animal blood testing
• Environmental water testing
• Food safety using microbiology and territory monitoring. In that context, thousands of analyses are performed each year to comply with national surveillance programs of major plant quarantine diseases.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2452 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire Central d'Analyses de la Moselle
Eurofins LCAM is the result of the takeover of IPL activities in 2011. It is a former public laboratory. More than one hundred thousand samples are analysed each year.

Services:
• Food microbiology testing.
• Animal health testing: PCR for BSE, animal blood testing

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2286 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire de Pathologie Végétale
Eurofins Laboratoire de Pathologie Végétale specialises in plant pathology, pest detection on plants and territory monitoring. In that context, thousands of analyses are performed each year to comply with national surveillance programs of major plant quarantine diseases.

Services:
The laboratory offers diagnosis services, as well as expertise in the following fields;
• Nematology
• Mycology
• Bacteriology
• Virology

Using conventional methods of isolation and identification to advanced immunoenzymatic and molecular biology techniques, the laboratory can provide a wide range of services aimed at seed and agrochemical firms as well as co-operatives and food manufacturing companies.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-5364 (accreditation scope available on www.cofrac.fr).

Eurofins Biosciences
Hygiène Alimentaire

Eurofins Biosciences is dedicated to providing food safety support to our customers in retail, catering and warehousing.

A nationwide network of technicians conducts sampling at production sites, delivering samples directly to the laboratory in less than 24 hours.

Eurofins Biosciences also operates a large food safety consultancy department. About 100 auditors and sample takers perform audits at production sites, restaurants and retail outlets, checking compliance with current legislation in the field of food safety. They provide advice in implementing improvement plans and ensure that HACCP instructions are strictly implemented on site.

This unit conducts training sessions on hygiene and food safety for operators and professional managers in retail and catering. Several hundred thousand training/coaching/consulting hours are delivered each year.

Accreditations:
All sampling operations are done under full ISO 17025 accreditation delivered by the French accreditation organisation COFRAC. Impartial
Inspections are guaranteed by an ISO 17020 accreditation (accreditation reference 3-0826, scope available on www.cofrac.fr).

**Eurofins Consulting**

Eurofins provides outstanding supplier auditing and consulting for food safety management systems. Several hundred food manufacturer's sites are audited yearly in several countries on behalf of retailers, caterers or manufacturers.

A large network of experts provide training to the food industry and consulting to support food chain stakeholders in managing and controlling their processes and in order to comply with relevant international standards for food safety.

Eurofins Consulting is also offers expertise to the food industry for product labelling checks in compliance with food regulations in countries of destination.

**Eurofins Analytik**

Eurofins Analytik carries out chemical, sensory and molecular biological analyses and provides consultancy and certification on foodstuffs.

Being the competence centre for allergen, irradiation and sensory testing, Eurofins Analytik assists producers and retailers in questions regarding foodstuffs and pet food.

**Eurofins BioTesting Services Nord**

In autumn of 2013 Eurofins BioTesting Services Nord started to operate in Hamburg. The specialisation of the laboratory lies in microbiological analyses of food and feed, raw materials, final products, ingredients, food contact materials (FCS), water, packaging materials as well as commodities.

**Services:**

Testing for the complete range of microorganisms relevant to the food industry:

- Pathogenic organisms (e.g. Salmonella spp, Listeria spp, Staph. Aureus, Campylobacter spp, Vibrio spp)
- Spoilage organisms (e.g. Yeast and Mould, Bacillus spp, Clostridium spp, Pseudomonas spp)
- Technologically relevant microorganisms (e.g. Lactobacilli)
- Microscopic analysis
- Hygienic checks

The laboratory is able to analyse all kinds of food with the following methods:

- Classic cultural methods (ISO, §64 LFGB, ICUMSA)
- PCR
- Petrifilm
- Inhibitory substance
- Strain identification

**Accreditations:**

Eurofins BioTesting Service Nord is accredited according to DIN EN ISO/EC 17025 and is designed for a high sample performance with short analytical times due to advanced equipment and a "lean management" methodology.

labelling; Eurofins Analytik has a network for international labelling checks covering most EU countries, USA, Canada, China etc.
• Nutritional testing
• Molecular biology testing (determination of animal species and allergens)
• Irradiation testing (analysis for the application of ionising radiation on food and biopharmaceutical products); all 5 EU-methods are offered
• Sensory analysis of food and food contact materials with a wide scope of different methods; highly experienced and trained experts, including panels for various matrices as well as product-specific seminars

Specialist analyses and consultancy for following industry sectors:
• Oil seeds; oils and fats of vegetable and animal origin, including the analysis of all relevant fat attending compounds and profiles; determination of adulteration, ageing, oxidation;
• Olive oil
• Dried fruits
• Nuts
• Convenience products
• Cereals
• Coffee
• Sweets
• Retail
• Novel food, food supplements and health food
• Pet food

Eurofins Analytik also provides assistance to companies in the food business with respect to selecting and coordinating analyses for their special needs. This includes designing sampling and inspection plans as well as setting up testing schemes as a basis for the issue of a quality seal. In addition, Eurofins Analytik offers coordinated offers for sampling (also in the country of origin e.g. Turkey) and advice on individual products in the context of quality management.

Eurofins Analytik serves importers with rapid analyses of parameters needed for trade and import. The laboratory also has appointed and sworn chemists at its disposal to issue Free Sales and Health Certificates.

Eurofins Analytik is located in close proximity to major import-terminals in Northern Germany.

Accreditations:
Eurofins Analytik is accredited according to DIN EN ISO/IEC 17025 and engages authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code).

Eurofins WEJ Contaminants
With more than 180 employees, Eurofins WEJ Contaminants is the Competence Centre of the Eurofins Group for the analysis of organic and inorganic contaminants, mycotoxins & plant toxins and veterinary drug residues in food and feed.
Eurofins WEJ Contaminants is a well-equipped and highly-automated laboratory using state-of-the-art techniques. It is a member of many national and international associations and working groups such as DIN, § 64 Working Groups, CEN, AOAC Working Groups and participates in different national and international EU projects (AveQ, Biocops, Biocop, MoniQA, European certification campaigns, Mycotoxin Awareness Network, NanoDefine, KOMBISPEC).

**Services:**

Eurofins WEJ Contaminants hosts the following units:

1) **Mycotoxin & Plant Toxins Competence Centre:**

   Analysis of all regulated mycotoxins and as well as a broad spectrum of further relevant mycotoxins and plant toxins such as Alternaria toxins, ergot alkaloids, citrinin, moniliformin, sterigmatocystin, enniatins, beauvericin, pyrrolizidine alkaloids and tropane alkaloids.

2) **Veterinary Drug Residues Competence Centre:**

   Analysis of more than 250 different veterinary drugs, such as nitrofurans, CAP, macrolides, lactamtes, sulfonamides, tetracyclines, quinolones, coccidiostats, benzimidazoles, nitroimidazoles, phenylbutazone, fipronil, hormones and tranquilizers.

3) **Organic Contaminants Competence Centre:**

   Portfolio of more than 100 different parameters, such as PAHs, BTEX, furans and methyl furans, acrylamide, 3-MCPD and its esters, glycidylesters, nicotine, plasticisers, bisphenol A, sudan and other illegal dyes, residual solvents, low volatile chlorinated hydrocarbons and mineral oil hydrocarbons (MOSH/POSH/MOAH).

4) **Inorganic Contaminants Production Centre:**

   Analysis of a vast number of (heavy) metals and trace elements with lead, cadmium, mercury and (inorganic) arsenic amongst them, metal speciation and analysis of radionuclides (cesium 134 and 137 and iodine 131).

State-of-the-art laboratory equipment:

Gas chromatography with mass spectrometry (GC-MS, GC-MS/MS), flame ionisation detection (GC-FID), high performance liquid chromatography with fluorescence detection (HPLC-FLD), UV-Detection (HPLC-UV), diode-array detection (HPLC-DAD) or mass spectrometric detection (HPLC-MS/MS), high-resolution LC-MS, online-HPLC-GC-FID, online-HPLC-GC-MS, atomic absorption spectrometry (AAS), (high-resolution) inductive coupled plasma with mass spectrometric detection or optical emission spectroscopy ICP-MS, ICP-MS/MS, ICP-OES), LC-ICP-MS, gamma-spectrometry, single-particle-ICP-MS, Dynamic Light Scattering Detector (DLS), Field-Flow-Fractionation (FFF).

**Accreditations:**

- DIN EN ISO/IEC 17025:2005
- Authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code)

**Eurofins WEJ Contaminants GmbH**

**Eurofins GeneScan**

Eurofins GeneScan looks back at over 25 years of history in the field of molecular methods.

Eurofins GeneScan is recognised worldwide for its expertise and leading performance in the field of molecular testing for Genetically Modified Organisms (GMOs) and animal species identification, and the quantification of all relevant GM events. Specific analytical strategies are developed according to the individual needs of clients.

- **Species Identification**

   Eurofins GeneScan offers identification of plant and animal species and special customer requirements (e.g. testing for Halal compliance) are included in the scope of these services.
   - Residual DNA Testing

   Residual DNA testing services are offered for the food, feed and pharma industries.
   - Kits and Products

   Eurofins GeneScan test kits (PCR and ELISA) are the result of extensive experience in its own testing laboratories.
   - Method Development

   Contract projects for the development of analytical methods and custom-designed testing – also under GxP requirements – e.g.: method development in the context of EU regulatory approval of GMOs, molecular pathogen detection or residual DNA analysis.

**Accreditations:**

- ISO17025 certification
- ISO 9001 accreditation
- Approval for GLP/GMP compliant analysis
- QS-Approval

The high standards of the testing methods and test kits are readily confirmed internally and externally via participation in national and international ring trials and proficiency tests (e.g. USDA-GIPSA, JRC etc.).

Additionally, Eurofins GeneScan is audited regularly by major clients - many of them worldwide leaders in their markets. Last but not least, Eurofins GeneScan has been and continues to be an active member of...
Auditing services are offered in Ecuador. More countries on request. Audits are performed by trained personnel, e.g. IRCA certified lead auditors for ISO/FSSC 22000.

**Eurofins Global Control**

Eurofins Global Control is an international inspection company offering supply chain control solutions to achieve product quality and safety from the origin to the consumer. This applies to food, pet food, chemicals and non-food products.

Major control systems have been established in actual more than 100 countries worldwide. Inter alia Argentina, Australia, Bolivia, Brazil, Bulgaria, Cambodia, Chile, China, Costa Rica, Germany, Dominican Republic, Ecuador, Egypt, Greece, Guatemala, India, Indonesia, Israel, Italy, Japan, Kenya, Colombia, Mexico, Myanmar, Netherlands, Pakistan, Paraguay, Peru, Philippines, Poland, Romania, Sweden, Switzerland, Spain, Sri Lanka, South Africa, South Korea, Thailand, Taiwan, Turkey, UAE, Uganda, Ukraine, Uruguay, United States and Vietnam.

On request, tailor-made solutions can be provided in most countries worldwide. For identity control of the goods, innovative DNA-based methods are applied from start to finish.

**Services:**

- Pre-shipment inspections (PSI) and sampling, loading supervision, audits at outlet, factory and farm level and arrangement of analytical services in Eurofins laboratories worldwide.
- Audits within the criteria of international standards for quality and food safety management, Good Agricultural Practice and Organic Agriculture (ISO/FSSC 22000, IFS, BRC, SQF, GlobalGAP). Additional there are components regarding social standard (like SEDEX) or food defense available.
- Audits are performed by trained personnel, e.g. IRCA certified lead auditors for ISO/FSSC 22000.

**Accreditations:**

Eurofins Global Control is certified according ISO 9001/2015.

**Eurofins SOFIA**

SOFIA is a well-equipped laboratory using state-of-the-art technology.

The laboratory focuses on residue analysis, and the chemical analysis of organic contaminants, especially pesticides, mycotoxins, industrial chemicals, food born contaminants etc. SOFIA mainly analyses food, feed, water and soil but also many other matrices.

Our highly educated staff has a lot of experience in dealing with special analytical questions. SOFIA is able to develop the analysis of new substances very quickly.

**Accreditations:**

DIN EN ISO/IEC 17025:2005

**Eurofins CLF Specialised Nutrition Testing Services**

Eurofins CLF is a globally active laboratory located in the heart of Germany. The analysis of macro- and micronutrients such as vitamins, amino acids, probiotics and trace elements is just as much part of the portfolio as the specific analysis for permissible limits in the inorganic and organic trace analyses of residues and contaminants. Microbiological methods for the complete range of food-related bacteria, including special baby relevant microbes, complete the package.

Eurofins CLF analyses parameters in raw materials, intermediates and final products. Eurofins CLF is a specialist for complex matrices like baby foods, pet foods, dietary supplements as well as special medical nutrition, all of which require special care and expertise as well as experience in analysis.

**Services:**

- All-in-one analytical partner for nutrients, residues & contaminants and microbiology
- Special nutritional testing in complex food and pet food matrices
- Sensoric Panel
- Special lab environment where material with low level contamination is handled separately
- Compliance with baby food regulations regarding low limits for residues and contaminants (low LOQ-level)
- Tailor made consultancy services to improve food quality, safety and analytical performance

**Accreditations:**

- DIN EN ISO/IEC 17025:2005
**Eurofins Inlab**

Inlab was founded in 1992 as a food microbiology laboratory, and in 2017 celebrated its 25th anniversary. The laboratory and the team around business unit manager Dr. H.G. Leusch, are recognised for their proactive role in the development and implementation of new methods and techniques, as well as for their collaboration on national boards for microbiology.

**Services:**
- Microbiological testing, expert advice, sample drawing and further services in the following areas and segments:
  - Food (final, intermediate products and raw materials), feedstuff, articles of daily use including passing of rapid analyses
  - Drinks and dispensing equipment
  - Sanitary products, cosmetics and commercially available drugs
  - Drinking and mineral water, bath water etc.
  - Hygiene of companies
  - Challenge tests
  - Food relevant viruses (HAV, HEV, norovirus etc.)
  - Training courses, inspections, hygiene advice

**Accreditations:**
- DIN/EN ISO/IEC 17025 (DAkkS for second governmental samples)
- § 43 IfSG (permission for working with pathogens according to NRW-governmental permission) drinking water laboratory and admitted laboratory of the "compost quality control association" for analysis of salmonella.

**Eurofins Institut Dr. Rothe**

For more than 60 years, food and non-food products have been analyzed accompanied with excellent customer service. The laboratory offers a broad spectrum of analyses and the corresponding judgement of food, cosmetics and consumer goods (e.g. hygiene papers, detergents) for the retail business as well as for trading companies and for producers.

**Services:**
- Food
  - General food analysis
  - Analysis of nutritional values
  - Specializing in the chemical analysis of seafood and fish products (e.g. TVB-N, histamine, indole, nematodes, water/protein quotient etc.)
- Cosmetics
  - Analysis of ingredients such as active agents (e.g. organic and inorganic UV-filters, anti-dandruff agents, vitamins, deodorant agents)

**Consumer goods:**
- Hygiene Paper: Analysis of contaminants (e.g. formaldehyde, MCPD and DCP)
- Detergents: Analysis of ingredients such as active agents

**Accreditations:**
- Institut Dr. Rothe is accredited according to DIN EN ISO/EC 17025

**Eurofins Food Control Services**

Founded in 2015 but based on more than 20 years of experience Eurofins Food Control Services offers its services nationwide. Eurofins FCS provides food safety and hygiene audits as well as consultancy on food safety systems and related custom-tailored training to clients ranging from producer, logistics, retail to catering.

**Services:**
- Food safety audits
- Internal audits
- Supplier audits
- Food safety audits
- Consultancy and implementation of food safety management systems (eg HACCP, IFS, BRC ISO 22.000)
- Risk management
- Customized training
- Interim management
- Sample taking

**Accreditations:**
- DIN EN ISO/EC 17065

**Eurofins Genomics**

Eurofins Genomics’ expertise in DNA analysis of food and food products is regularly requested from clients all over the world.

Eurofins Genomics is internationally renowned for the quality and reliability of its services. Nearly all test methods are ISO 17025:2005 accredited.

Eurofins Genomics uniquely combines long-term expertise in food testing, veterinary testing and forensic/genetics making Eurofins Genomics an internationally leading European laboratory in “Food Forensics”.

The site comprises one of Europe’s largest providers for industrial scale production of oligonucleotides, gene synthesis, DNA sequencing, Applied Genetics, genotyping, Pharmacogenomics and DNA Forensics. We are further closely connected with other Eurofins Genomics sites in Europe, USA, India and Asia.

For food authenticity testing and other food testing applications, we work tightly with experts from other Eurofins Food testing laboratories to deliver optimal service packages and cost-efficient solutions. Our approach to our clients is highly service oriented.

**Services:**
- Food authenticity testing
- Compositional analysis including quantification
- Residual DNA Testing
- All sample materials from raw material to all processing stages up to instant meals or health products
• All species (animals, plants, microorganisms, human)
• (Semi-quantitative) Meat testing for products such as sausages, minced meat including quantification
• Fish and seafood testing
• Authenticity testing of Basmati and Thai rice with high quantitative accuracy
• Authenticity testing of pine nuts
• Assay setup and validation in all stages, from marker discovery up to ISO 17025
• Establishment of new methods as a contracted and collaborative laboratory
• Consultancy
• Court expert witness service from highly experienced scientists

**Accreditations:**

• ISO 17025
• ISO 9001
• The laboratory is regularly audited by clients, including the biopharmaceutical industry and the food & feed industry
• Regular and long-term participation in numerous ring trials

**Eurofins GfA Lab Service**

With over 30 years of experience, Eurofins GfA Lab Service is the world’s leading dioxin laboratory.

The main focus of the analytical portfolio is the analysis of persistent organic contaminants (e.g. dioxins, PCB, flame retardants, PFCs, Stockholm POPs) on ultra trace levels. Representative for a number of parameters, polychlorinated dibenzo-p-dioxins and -furans (PCDD/Fs), polychlorinated biphenyls (PCBs), brominated flame retardants, per- and polyfluorinated alkyl substances (PFAS) as well as organotin compounds are examined in almost every matrix as e.g. food/feed, biota, environmental samples (water, waste, soil etc.), emission and ambient air samples and even human matrices (blood, serum, tissue etc.)

Eurofins GfA Lab Service GmbH is one of the few worldwide laboratories that is able to analyse all 27 POP substances banned or regulated in the Stockholm Convention in its own laboratory. Eurofins GfA Lab Service GmbH is also able to analyse all 209 PCBs incl. dioxin-like PCBs (DL-PCBs) and non-dioxin-like PCBs (NDL-PCBs, also called ICES6-PCBs), as required by the California Proposition 65. The scientists of this laboratory are sought-after experts in national and international standardisation bodies or other working groups. Numerous publications in the field of POP-analyses have been written or co-authored by employees of Eurofins GfA Lab Service GmbH. This is one reason why Eurofins GfA Lab Service GmbH is the POPs Competence Centre of the international Eurofins Group.

Eurofins GfA Lab Service GmbH is accredited according to the international ISO/IEC 17025:2005 standard. The overall capacity of dioxin and POP measurements of the Eurofins GfA Lab Service GmbH has been raised to > 45,000 samples per year using high-end technical equipment (8 HRGC/HRMS systems (high resolution gas chromatography / high resolution mass spectrometers), 14 GC-MS/MS systems (gas chromatography / tandem mass spectrometers), 3 LC-MS/MS systems (liquid chromatography / tandem mass spectrometers), several GC-MS systems as well as the novel API-GC-MS-MS-technique). The highly experienced laboratory staff analyses all kinds of matrices both according to European guidelines and other regulations (US EPA etc.).

This state-of-the-art laboratory delivers rapid turn-around-times with the highest level of service and most advanced technologies (e.g. automated clean-up-systems) in line with the EU-Regulations No. 2017/644 and 152/2009 for analysis of dioxins and PCBs in food and feed samples. 48h-analytical services for dioxins and PCBs are possible for selected food and feed matrices.

In addition to the standardised services offered in our high performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures. Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

**Services:**

**Food & Feed Testing Services:**

• Dioxins and dioxinlike compounds
  o Fast processing times
  o In line with Regulation (EU) No. 2017/644 (food) and No. 2017/771 (feed)
• POPs such as brominated flame retardants (BFR), organochlorine pesticides, PFAS, organotin compounds, PAHs
  o Sensitive analysis, low limits of quantification
  o Competitive processing times

**Environmental Testing Services:**

• Water, soil, sediment, plants, waste and sewage sludge
• Air samples (emissions/ immissions, indoor air)
• Sensitive analysis, low limits of quantification
• Competitive processing times

**Human Biomonitoring Service:**

• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on humans
  o Assessing the effects of eating habits i.e. the impact of eating harmful substances on the human body
  o Special studies on humans who are extremely exposed to hazardous substances.

**Special Project-based Services:**

• In addition to the standardised services offered in our high performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing
special services beyond the established procedures.

Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

Provision of sampling kits:
- On top of carrying out different analyses, Eurofins GfA Lab Service GmbH also provides sampling material, especially for air-monitoring purposes such as cartridges filled with XAD resin, pre-spiked or non-spiked, following the requirements of EN 1948 (part 1 to 3 (dioxins) or part 4 (PCBs)) or CEN/TS 1948-5.

Data Access Options beyond Electronic Analytical Reports:
- On-line Data Access: 24 hours a day, seven days a week through Eurofins’ secure internet access, EOL, which offers clients immediate access to final verified analytical results as analyses are completed and verified in the lab.
- Electronic Data Deliverables: Standard and custom formats available.

Accreditations:
- Officially acknowledged measuring site according to §29b Federal Emission Control Act (BlmSchG), group I-Nr.1 and group IV for specific analysis of substances requiring special complexity for sampling or analysis.
- Examination laboratory for soil and sewage sludge according to § 3 Sewage Sludge Ordinance (AbfKlärV)
- Officially acknowledged by the French environmental ministry for the measurement of PCDD/F in emission samples
- Analysis in compliance with EU-guidelines, international recognised standards, e.g. EN 1948, EPA and other accredited methods
- GOED member (Global Organization for EPA and DHA Omega-3)
- IFFO member (International Fishmeal and Fish Oil Organisation)
- Expert for official counter samples according to §43 LFGB, chemical-physical and microbiological examination of food
- QS approval as laboratory in the field of feed monitoring for the

parameters, dioxins, PCBs, heavy metals, aflatoxins, DON, ZEA, PAH, animal ingredients, pesticides, salmonellae, ochratoxins and methanol.

Eurofins Institute Dr. Appelt Hilter

Eurofins Institut Dr. Appelt Hilter GmbH carries out chemical, physical, sensorial and microbiological analyses.

Furthermore Eurofins Institut Dr. Appelt Hilter provides consultancy, label and declaration checks, marketability checks and certification on foodstuffs.

Services:

Eurofins Institut Dr. Appelt Hilter assists producers, merchants, importers and exporters in questions regarding foodstuffs and animal fodder:
- General food analyses
- Hygiene testing
- Consultancy for marketability and storage durability
- Specialist analyses & consultancy for meat and meat products
- Specialist analyses & consultancy for convenience products
- Specialist analyses & consultancy for sweets and chocolates
- Specialist analyses & consultancy for ice-cream and frozen products
- Specialist analyses & consultancy for oils and fats and products derived from oils and fats (margarine) including the analysis of all relevant fat attending compounds and profiles; determination of adulteration, ageing, oxidation and microbial contamination
- Specialist in microbiology testing (cultural, Petrifilm, PCR, species identification) and extremely rush routine release analyses for food (or feed) (e.g. routine Salmonella PCR within 20 h) limited just to the minimum technically required time
- Specialist in the field of food law, labelling and questions concerning lab's duty of informing authorities.

Eurofins Institut Dr. Appelt Hilter also provides assistance to companies in the food business with respect to selecting and coordinating analyses for their special needs. This includes designing sampling and inspection plans as well as setting up testing schemes as a basis for marketability certification or retailer's needs.

The company offers services from its authorised experts for double and cross checks and offers the special competence to provide certificates and judgements from its appointed and sworn chemist.

The laboratory is located in the north-west region of Germany and can provide collection services in a radius of 100 km (65 miles).

Accreditations:
- DIN EN ISO/IEC 17025:2005
- Permission to work with pathogens according to § 44 IfSG
- Authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code)
- Appointed and sworn chemist

Eurofins Institute Dr. Appelt Leipzig

Eurofins Institute Dr. Appelt Leipzig provides analytical services through the whole supply chain. It is a testing laboratory for food, finished products, intermediates and raw products, drinking water and including release and rush analyses.

Services:

The laboratory offers a broad range of services to the manufacturing industry and food retailers including testing, expertise and sampling in the following fields:
- Chemical and microbiological testing of food
- Residue and contaminant analyses
Eurofins Institute Dr. Appelt Leipzig has experience in labelling checks, site specific organization of seminars, audits and in-house trainings.

Accreditations:

- DIN EN ISO 17025
- Official expert for control tests according to §43 LFGB (German Food and Feed Code),
- QS acknowledge laboratories for food monitoring, investigation body for the BNN-Monitoring for the food groups B 1 to B2
- Investigation body for drinking water according to §15 chapter 4 TrinkwV 2001 for microbiological, chemical (on-site-parameters)
- Sensory testing including sampling, investigation body according to §19 chapter 2 TrinkwV 2001
- Permission to work with pathogens according to § 44 InfektionsschutzG.

Eurofins BioPharma Product Testing Munich

Eurofins BioPharma Product Testing Munich GmbH is an internationally operating testing laboratory offering comprehensive capabilities in safety and activity testing. With more than 30 years of experience, our team of scientists offers a broad scope of biological studies, which meet the international regulatory requirements of safety testing for feed, novel food, food additives, food enzymes and flavourings.

The identification of hazardous ingredients is mandatory for consumer protection. Toxicological testing is used to determine, whether food or feed products would pose any kind of risk to the health of consumers.

Eurofins BioPharma Product Testing Munich provides the full service to assess the biological and toxicological data under GLP-compliance according to the current European regulations (EFSA) and further international relevant guidelines (Redbook 2000).

Safety data for food/feed need to be generated by a basic set of toxicological studies. In addition further studies might be required on a case by case basis.

Services:

- Genetic toxicity e.g. AMES Test (OECD 471) and Micronucleus Study (OECD 487)
- Sub chronic toxicity e.g. 90-Day Oral Toxicity Study (OECD 408) under consideration of specific adaptations laid down in more recent update of Guideline 407 (as required in EFSA Journal 2012; 10(7):2760: Guidance for submission for food additive evaluations)]
- Chronic toxicity / Carcinogenicity
- Reproductive and developmental toxicity (DART)
- Metabolism / Toxicokinetics

Besides the standard testing battery we offer individual advice concerning your specific project with regard to scientific and regulatory requirements. These customized test designs include neurotoxicity and immunotoxicity testing to address specific safety concerns.

Accreditations:

- Good Laboratory Practice (GLP)
- Good Manufacturing Practice (GMP)
- DIN EN ISO 17025
- FDA audited
- Listed by the World Health Organization (WHO)

Ökometric

Ökometric specialises in the analysis of dioxins, PCBs and related persistent organic pollutants (POPs) such as brominated flame retardants, PAH, HCB etc. in all relevant matrices covering both, food and feed, human, environmental, product testing and monitoring.

Eurofins Institut Nehring GmbH

Eurofins Institut Nehring GmbH looks back over a company history of over 100 years.
Apart from the analytical, microbiological and organoleptic analysis of food, the assessment of the results with regard to the marketability of the product belongs to the core competences. With the knowledge based on experience gathered over decades, the analysis and assessment of canned goods including technological issues still is an important part of the institute’s portfolio.

The evaluation of the composition of polymeric materials, in particular coatings and sealing compounds, with regard to food contact legislation and the related compliance work including migration tests is another core competence of Eurofins Institut Nehring GmbH. The assessments are based on European as well as international legislations.

**Services:**

The laboratory assists food producers, traders, retailers and importers in the following fields:

- Chemical-physical analyses
- Microbiological analyses
- Residue and contaminant analyses
- Organoleptic tests
- Labelling checks
- Support in food-related regulatory affairs, e.g. with expertises and statements responding to complaints from authorities or customers

For food contact material Eurofins Institut Nehring GmbH offers the following:

- Composition check
- Overall migration tests
- Specific migration tests
- Residual starting substance tests
- NIAS-Test
- Organoleptic tests
- Statements regarding legal conformity

**Accreditations:**

Eurofins Institut Nehring GmbH is accredited according to DIN EN ISO/IEC 17025:2005 and engages authorized experts for official counter samples according to § 43 LFGB (German Food and Feed Code).

---

**Eurofins Food Integrity Control Services**

In summer 2017 Eurofins Food Integrity Control Services (EFICS) started to operate in Ritterhude, near Bremen.

As the competence center for honey testing within the Eurofins Group EFICS offers a complete range of state-of-the-art techniques for authenticity testing, the determination of veterinary drugs, sensory testing, microscopic determination of the botanical and geographical origin of honey as well as quality parameters necessary for the international market.

Our experienced team of recognized experts actively partecipates in national and international working groups as DIN and gives guidance to the industry (e.g. German and European honey associations). EFICS offers an extensive and in line with demand service portfolio for the analysis, assessment and quality assurance of honey.

**Services:**

- Enzymatic, photometric, chromatographic, mass-spectrometry and high resolution mass spectrometry methods
- Stable isotope analysis (EA/LC-IRMS)
- Nuclear Magnetic Resonance Spectroscopy (NMR)
- Veterinary drugs (Multi methods by LC-HRMS)
- Botanical and geographical origin (Microscopy)
- Visual and organoleptic evaluation
- Compositional analysis according to Honey Directive 2001/110/EC
- Pyrrolizidine alkaloids
- Pesticides screening
- Heavy metals
- Genetically modified organisms (GMO)

**Accreditations:**

Eurofins Food Integrity Control Services is accredited according to DIN EN ISO/IEC 17025:2005

---

**Eurofins GeneScan Technologies**

Eurofins GeneScan Technologies is specialised in the production of kits and their application for the food and feed testing industry. Two decades of expertise in the development of molecular biology kits and their application in Eurofins laboratories on all continents have led to competitive products, which set standards worldwide.

Based on in depth knowledge of the current market situation and the requirements of the food and feed industry, Eurofins GeneScan Technologies adapts its kit portfolio to meet the most recent market demands. Laboratories all over the world trust in the quality of these products which help them to fulfill their customers’ demands.

**Services:**

- GMO testing kits: screening, identification, quantification with real-time PCR multiplex technology
- Plant pathogen detection kits
- Plant species identification kits: comprehensive screening and specific detection of defined plant species
- Animal species screening and identification kits: authenticity testing for most domestic animal species as well as taxonomic groups of animals
- Pathogen testing kits: fast and reliable detection of foodborne and waterborne pathogens
- Virus detection kits: complete workflow covering all steps for the specific detection of the most important food-related viruses
- DNA extraction kits: kits optimised for different food and feed matrices
- Application support on-site
- Customer trainings and webinars

**Accreditations:**

- ISO 9001:2015 certification
- AFNOR certified kits
- AOAC certified kits
- Eurofins GeneScan methods are
found in national and international standards

Eurofins Q-Bioanalytic GmbH

Q-Bioanalytic GmbH was established in 2003. It is specialized in the analysis of pathogenic organisms in food or feed, with microbiological and molecular-biological methods.

It is an approved lab for water analytics, as well as an approved lab for the diagnostics of the koi herpes virus.

The special competence of the company lies in the area of the molecular-biological diagnostics. A focus is the development, validation and distribution of Real-Time PCR-analysis kits.

Q-Bioanalytic GmbH is permanently developing new PCR- and real-time PCR-systems. As manufacturer of PCR-kits, Q-Bioanalytic GmbH owns the license for Real-Time PCR for the production and application of the kits in the food area.

The analysis kits are traded worldwide by VWR International as a main distributor or can be directly bought from our online store.

Q-Bioanalytic GmbH has profound knowledge in dealing with difficult food and feed matrices, different DNA-extraction methods as well as the PCR-analysis. Beside the kit production Q-Bioanalytic GmbH runs an ISO 17025 accredited service lab for food and water analytics with main focus on the PCR-analysis.

Furthermore, Q-Bioanalytic is involved in international research projects on food analytics. Development and validation of new qualitative and quantitative real time PCR-systems for the analysis of human-pathogens in food are one object of these projects. Q-Bioanalytic closely co-operates with national market leaders for fish and seafood.

Services:
- meat and sausages
- fish and seafood
- shellfish and shellfish products (seafood)
- poultry and poultry products
- eggs and egg products
- convenience foods and snacks
- milk and dairy products
- grain and bakery products (cereals)
- nuts, nut products and seeds
- herbs and spices
- soups, stock and sauces
- confectionery, honey and royal jelly
- desserts
- fruits and vegetables
- mineral-, tap- and drinking water
- Koi (Cyprinus carpio haematopterus, etc.)
- feed
- drugs

Eurofins Chemical Control

Eurofins Chemical Control carries out chemical, physico-chemical, microbiological and molecular biology analyses, research and consultancy on foodstuffs.

The laboratory is fully accredited by ACCREDIA in compliance with UNI CEI EN ISO/IEC 17025:2005 standard (laboratory no. 0490) and also by the Italian Ministry of Health, the Italian Ministry of University, Scientific and Technological Research and by the Japanese Ministry of Health, Laboratory certified by QS Fachgesellschaft for Fruit, Vegetables, Potatoes (residue monitoring).

Eurofins Chemical Control’s main clients are food industries and retailers.

Founded in 1979, Eurofins Chemical Control has a highly qualified staff (about 55 people) and technologically innovative analytical equipment with about 4,000 m² of well-organized laboratories.
Services:
- Nutritional aspects and micro constituents analyses (minerals, additives, characteristic molecules)
- Shelf life studies
- Chemical contaminants residue analyses (pesticides, mycotoxins, heavy metals, veterinary drugs residues, acrylamide, furan and methylfuran, glycoalkaloids, hydrocyanic acid)
- Microbiological testing and detection of extraneous materials (Filth test), merchandise quality tests
- ELISA determinations for allergens
- Molecular biology testing for allergens
- Setting up of new analytical methods (particular requirements, food alerts) and innovation of existing methods with validation of different food matrices
- Setting up of new analytical indexes for an unbiased evaluation of technological and process parameters
- Technological consulting
- Planning and management of quality control plans
- Interpretation of analytical results with reference to legislation, bibliography, technological-process parameters
- Service of rush analysis by request

Accreditations:
- UNI CEI EN ISO/IEC 17025:2005 (laboratory no. 0490)
- UNI EN ISO 9001:2008
- QS-residue monitoring certification

JAPAN

Eurofins Food and Product Testing Japan

Food and Product Testing Japan provides a wide range of reliable analytical food testing services to clients across multiple industries from food producers to ingredient producers, trading firms and retailers. As a unique unrivalled laboratory as the only one foreign owned independent laboratory authorized by Ministry of Health, Labour and Welfare (MHLW) in Japan and with ISO/IEC17025 accreditation, it is also able to offer testing services for exporting as well as importing foods and other products.

Services:
- Pesticides
- Heavy metals
- Radioactivity
- Mycotoxins
• Food contact materials
• Food additives
• Pet foods
• Food testing for import and export

Accreditations:
• ISO/IEC 17025, Ministry of Health, Labour and Welfare (MHLW) in Japan

**Eurofins Ecopro Research**
Eurofins Ecopro Research offers a wide range of food testing services in particular tea matrix related testing and testing for functional foods. As a laboratory authorized by Ministry of Health, Labour and Welfare (MHLW) in Japan, it provides clients with testing for importing foods/goods. With GLP laboratory recognized by Ministry of Agriculture, Forestry and Fisheries (MAFF), it also offers a pesticide residue testing on crop for agrochemical registration.

Services:
• Pesticides
• Nutrition
• Functional foods/Metabolomics
• Tea profile
• Microbiology
• Foreign object
• Heavy metals
• GLP pesticide for registration

Accreditations:
• Ministry of Health, Labour and Welfare (MHLW) in Japan
• Ministry of Agriculture, Forestry and Fisheries (MAFF) in Japan

**KOREA**

**Eurofins Korea Analytic Service Co., Ltd.**
Eurofins Korea Analytic Service is a laboratory that has been providing analytical services since 2000, performing chemical, microbiological, organic, inorganic and toxicological analyzes in environmental, food, cosmetics and consumer products.

Services:
Environmental Testing Services (water, soil, waste and atmospheric emissions):
• Dioxins and dioxin-like compounds, PCBs and related persistent organic pollutants (POPs)

Food and Livestock products Testing Services:
• Pesticide analyses for organic foods
• Pesticide analyses based on QUECHERS GC-MS & LC-MS/MS
• Nutritional fact analyses
• Microbiological analyses
• Heavy metals analyses

Cosmetics Testing Services:
• Chemical Testing
• Microbiology
• Safety Testing

Human Biomonitoring Service:
• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on humans

Accreditations:
The laboratory is accredited by KOLAS, the Korea accreditation organization, in accordance with ISO 17025.
• Ministry of Food and Drug Safety: Food, Livestock Products, Cosmetics
• National Institute of Environmental Research: POPs Sampling & Analysis, Waste Analysis (General, PCBs), Air pollutant
• National Agricultural Products Quality Management Service: Safety Inspections

**LITHUANIA**

**Eurofins Vilnius**
The main activities are chemical, microbiological and physical agriculture (grain and grain products, compound feed and raw materials for their manufacture, oilseed), food, water, solid biofuels tests.

The object of tests is determined: organic substances (protein, fat, fibre, vitamins, etc.), inorganic materials (ash, trace elements, heavy metals, etc.) and mycotoxins.

**MALAYSIA**

**Eurofins Food Testing Penang**
Our well-trained team and laboratory setup ensures proper handling, preservation (if required) and storage of your samples to avoid degradation and cross-contamination. Due to the complexity of food sample matrices, food analyses are performed by food chemist and microbiologist for they have detailed understanding of the samples nature and thus able to obtain accurate results of your samples whether they are fresh/raw, cooked, processed, canned or preserved.

Routinely we receive food and drugs samples which are inclusive of solid food, semi-solid food, beverages and drinks, food supplements, traditional herbs, cosmetics and pharmaceutical...
products etc. Some of the commonly tested parameters are nutrition facts, heavy metals, preservatives, colourings, vitamins, antibiotics, fat, tests for the fulfillment of halal requirements, banned substances (melamine, saccharin, cyclamate etc), GMO (Genetically Modified Organism), microbiological testing etc.

NML is an authorized commercial laboratory by Ministry of Health Malaysia (MOH) for food testing and the issuance of health certificates. Building upon years of experience in food testing, our food consultants are able to advise you on analyses needed in accordance with most updated local requirements. In the case of food for export which overseas requirements are to be fulfilled, in the presence of respective documents from the country of interest (written in languages understandable by our team), our consultants are prepared to walk the extra mile to provide assistance and technical advices to you and your organisation.

**Accreditations:**

- ISO/IEC 17025
- SAMM
- Ministry of Health Malaysia

**NEW ZEALAND**

**Eurofins Auckland**

Eurofins Auckland offers its customers a state-of-the-art laboratory which includes microbiology, chemistry and soil testing in a large, facility with a total laboratory surface of over 3,700m².

Its continuous investment underpins our commitment to support the food and dairy markets of New Zealand. The increase in laboratory size and the added analytical methods have enabled us to expand the laboratory's capabilities, focusing on a range of food and dairy matrices, including analyses for infant formula label claims for local and international markets.

**Services:**

- Dairy / Meat and Food microbiology
- Dairy / Meat and Food chemistry
- Stability testing
- Biopharmaceutical microbiology and chemistry testing
- Shellfish seawater testing
- Soil/Plant/Fertilizer testing
- Water testing
- Food Act Verification
- Dairy RMP Evaluation and Verification
- Engineering Evaluation and Verification
- Dairy Premises and Heat Treatment Evaluation
- Engineering Annual Heat Treatment Operational Checks & Tests
- Heat Treatment Training
- Non Regulatory Audits

Eurofins Food & Feed Testing Norway
The laboratories of Food Norway conduct a broad range of accredited chemical and bacteriological analyses of food and feed. We have specialists in aquaculture, and we perform tests for the fish farming industry, fish feed and fish oil producers.

We deliver all types of analyses to the Norwegian market. Many chemical analyses are performed at Eurofins competence centres and microbiology is performed closed to customers at both our main laboratory in Moss, and at all our local laboratories close to customers.

Eurofins Food & Feed Testing Norway arranges accredited proficiency testing programs of food and water microbiology. We have over 300 clients in more than 50 countries, and we are internationally acknowledged for our PT schemes

Eurofins Malbork

Eurofins Polska Sp. z o.o. is an independent and competent laboratory performing analyses of environmental samples, food and non-food products, and offering quality supervision and control services. We act in accordance with the PN EN ISO 17025:2005 quality management system, which has been certified by Accreditation Certificate No. AB 1334 by the Polish Centre for Accreditation.

Eurofins Polska Sp. Z o.o. is approved by the Chief Veterinary Officer for the analyses of animal feed and by the State District Inspector of the Department of Sanitation for water sample collection and analysis.

Services:

Microbiological and physicochemical analyses are performed both in raw materials, semi-finished products, finished products, and environmental samples for the producers of dairy, fish, meat, fruit and vegetables, bakery and confectionery as well as in non-food products (household chemicals and cosmetics).

Analyses are performed in accordance with applicable methodological standards, and to individual customer specifications.

Marking and verification of labelling of food products, household chemicals and cosmetics is offered as well. Our experts assess the compliance of labelling with applicable laws and with the requirements of GDA labelling.

Audits of suppliers are conducted by experienced and highly qualified auditors that confirm compliance with the rules and standards by IFS, ISO 22000, HACCP, GHP and GMP.

Training topics are adapted to the needs and expectations of our customers. They concern areas related to hazards in the production process, legal regulations, food labelling, sensory analysis and many others. Trainings are given by experienced professionals from the field, acclaimed throughout the country.

SPAIN

Eurofins Food Testing Spain

After acquiring in 2014 the first laboratories of the Group (Applus agrifood testing labs), the growth of Eurofins Análisis Alimentario Holding España S.L. has been exponential, being currently the reference laboratory of the food sector in Spain:
• 2015: acquisition Laboratorios Laia (North of Spain)
• 2016: acquisition SiCa AgriQ (South of Spain)
• 2017: acquisition LDG (Feed Testing, Northeast of Spain)
• 2018: acquisition BioAccali (Certification, Center of Spain)
• 2018: acquisition Mas Control 3 Canarias (Canary Islands)
• 2018: acquisition Ecosur (East of Spain)

With the recent acquisition of Ecosur agri-food testing labs, we have become number one in the country, focusing mainly in the food and agro market. In the last 25 years, the food laboratory has turned into a leading supplier of food tests, with a high penetration in the industry sectors of Meat, Baby Food, Non-Alcoholic Drinks, Cereals and Pastries. The agri-food testing laboratories are also a local reference in agro-environmental testing, with specific competence in pesticides testing.

We operate 6 laboratory sites in Spain (Madrid, Barcelona, Almería, Murcia, Pamplona and Tenerife) with 2 further satellite facilities in Spain and Portugal.

Services:
General Food Chemistry
• Trace and toxic elements
• Organoleptic tests

Eurofins Food & Feed Testing Lidköping
Eurofins in Sweden offers a wide range of accredited chemical and bacteriological tests in the food and feed sector.

Services:
• Pesticide residues
• Active & foreign substances in dietary supplements
• Contaminants
• Allergens
• Sugars & sugar alcohols
• Nutritional values
• Labelling
• Analysis of additives
• Microbiology
• Feed, Seed and Grain

**Accreditations:**
Accredited by SWEDAC (The Swedish board for Accreditation and Conformity Assessment) according to the ISO 17025 standard.

**Eurofins Steins Laboratorium AB**

**SWITZERLAND**

**Eurofins Food Testing Switzerland**

Eurofins Switzerland, founded in 2000, offers microbiological and chemical analyses of food, feed, as well as biopharmaceutical and environmental analyses. Important services are consulting and auditing-services for the food and feed industry, environment, cosmetics and the whole gastronomy segment.

Around 54 co-workers provide services in around 1000 m² lab-space. Labs are located in Schönenerw. The laboratory has strong expertise in microbiological analyses (classical quantitative determination, detection and taxonomic characterization) for a wide range of microorganisms.

Furthermore Eurofins Scientific AG has implemented analyses based on the technologies PCR and Maldi-TOF

**Services:**
• Microbiological and chemical analyses of food, feedstuffs, water (drinking water, waste water)
• Support in food-labelling and conformity checks according to Swiss and European law. Special expertise is the management of retailers' complex demands in the Swiss market.
• Consultancy and monitoring (food safety, restaurants, retailers, industrial production, biopharmaceutical industry etc.)

**Accreditations:**
• ISO 17025
• ISO 17020

• Mycotoxins
• Vitamins
THE NETHERLANDS

Eurofins Food Testing BV

Eurofins location in Heereneven, former name Eurofins Analytico Food, has an expertise on a wide range of parameters, including pathogens. Routine work is fully automated and highly efficient. Eurofins offers Legionella testing and risk-analysis. Focus on extensive nutritional analyses and contaminants including heavy metals and mineral additives.

Additional services are sampling, complete product labelling checks, hygiene inspections and training, courier services, on-line reporting and 24 hour availability.

Eurofins Carbohydrate Competence Centre is located in Heereneven and has highly qualified and experienced graduates, all possible carbohydrate tests like high and low molar dietary fibres, starches, sugar profiles and many others, have been upgraded, implemented or are in development.

Services:
Expertise on a wide range of parameters, including pathogens. Routine work is fully automated and highly efficient. Eurofins offers Legionella testing and risk-analysis.

Focus on extensive nutritional analyses and contaminants including heavy metals and mineral additives.

Accreditations:
• ISO/IEC 17025: 2005
• GMP10 + Feed Safety.

Eurofins Rotterdarm BV

Eurofins location in Barendrecht (near to Rotterdam), former name Eurofins LabCo, offers fast contaminant and nutrient analyses in food, feed, oils, fats, nuts, seeds, herbs and spices tailored to the needs of companies in the Port of Rotterdam and Amsterdam.

In addition, all Eurofins analyses are offered since the Rotterdam lab is your portal to the Eurofins network. The laboratory located in Barendrecht specializes in analyses with a very short TAT (generally 4-48 hours).

We use state-of-the-art laboratory equipment with methods such as: GCMS/MS, GC-FID, GC-ECD, GC-NPD, HPLC-FLD, HPLC-UV and GFAAS.

Services:
• Feed testing officially acknowledged by GAFTA (one of the four reference laboratories), VERNOF, CNGD, HAFU
• Edible oils and fats officially acknowledged by FOSFA and NOFOFA

They can also offer logistics services such as sample pick up and sampling according to EU or Codex Alimentarius regulations.
• Moisture, crude protein, crude fat, starch, raw fibre, ash, ash in HCl, fatty acid composition
• Mycotoxins: e.g. Aflatoxin, Ochratoxin, Deoxynivalenol, Zearalenone, Fumonisins
• Fat content, mineral oil, impurities, ash, FFA, peroxide number, melting point, solid fat content, 3-MCPD, PAH, BAP,

PCB’s, DPTG
• Organoleptic analyses as admixtures and damaged grain and seeds.

Accreditations:
• ISO17025
• GAFTA
• FOSFA
• NOFOFA
• VERNOF
• CNGD
• HAFU

TURKEY

Eurofins Istanbul Food Control Laboratories

The laboratory was initially established as Gözlem Food Control and Research Laboratories in 2002. It was acquired by Eurofins in 2017 and continues to work as Eurofins Istanbul Food Control laboratories. It is a private laboratory authorized by the Ministry of Agriculture.

Eurofins Food Istanbul's main clients are food industries and retailers, Ministry of Agriculture, exporters, importers and catering organisations. Physical, chemical, instrumental, microbiological and molecular biological analyzes are carried out in the raw materials, auxiliaries, intermediates and end products for the food industry.

Many of the parameters specified in the Food Legislation or in the technical specifications of the companies can be analyzed. Analyses are performed in accordance with international standart methods. Expert opinion on the results obtained are provided.

Services:
• Microbiology: including pathogens, indicator & spoilage organisms,
• Nutritional fact analyses
• Physical & chemical analyses
• Vitamin analyses
• Heavy metals and minerals analyses
• Contaminants
• Mycotoxins;
• Food additives
• GMO qualitative analyses
• Some animal species
• Allergens
• Physical and chemical analyzes specific to the product

In addition to analysis services, Training, Process Validation and Consulting Services are also provided.

Accreditations:
• The laboratory is accredited by TURKAK, the Turkish accreditation organisation, in accordance with DIN EN ISO/IEC 17025, under the reference AB-0529-T.
• Ministry of Agriculture and Forestry Turkey

Ukraine

Eurofins Agro Testing Ukraine

We are a young (opened August 2014) yet experienced (working in the Ukrainian market since 2012) branch of the Eurofins group.

Services:

SOIL:
• Soil sampling
• Agricultural and Environmental Testing
• Fertilization advisory
• Nutrients maps
• Nematodes
• Pesticides and heavy metal residue

GRAIN and OILSEEDS:
• Mycotoxins
• Dioxins, Pesticides
• GMO – quantitative and qualitative analysis
• NIT grain network program
• Heavy Metals

OTHER:
• Plant tissue analysis, fertilization advisory for the top dressing
• Forage analysis for nutrients, toxins, vitamins, minerals, etc.
• Food analysis
• Water analysis
• Consumer goods testing
• Pharma testing

Over 150 000 analyses available on request

All samples are sent to the Eurofins group laboratories worldwide according to the testing matrix. We take care of all your testing needs and the logistics of the samples.
Eurofins Food Testing UK has a network of 10 sites across the UK offering testing and advisory services to customers throughout the food and feed supply chains; from primary producers, processors and manufacturers, to retailers, wholesalers and caterers.

Our laboratories hold UKAS accreditations and ensure the requirements of ISO 17025 are met on a daily basis to maintain the highest standard of quality. We comply with approval schemes from major retailers Tesco and M&S for our methodologies.

We offer a comprehensive range of state-of-the-art analytical techniques to support our customers’ increasingly stringent quality and food safety standards.

Services:

• Microbiology: including pathogens, indicator & spoilage organisms, shelf-life studies and audit advice
• Full range of nutritional analysis for labelling
• Contaminants
• Allergens
• Inorganics

Accreditations:

• Eurofins Wolverhampton is accredited by UKAS under registration number 0342 for microbiology and chemistry. Accreditation is to ISO 17025
• Tesco Laboratory Approval (TLA) Scheme
• Marks & Spencer PLC Independent Supplementary Audit.

Eurofins Food Safety Solutions Wolverhampton

We offer certified audits mainly BRC, 2nd party supplier audits, food law advice, food label checks and a variety of training courses. https://www.eurofins.co.uk/events-training/training-calendar/. We also have a membership scheme where clients can buy units to spend on the services listed.

In addition to this we operate a laboratory accreditation scheme called Labcred and a GM desktop audit Valid IT for the UK retailers.

Together these services can provide a vendor assurance scheme for manufacturers and retailers alike.

Eurofins Nutrition Analysis Center

Recognised as a Centre of Excellence for Nutrition, the Des Moines laboratory specialises in analysing feed, commodities, pet food, human food and dietary supplements for nutritional content.

Services:
Areas of nutrition expertise include:
• Complete proximate testing (including total dietary fibre)
• Vitamins using LC, LC-MS/MS
• Amino Acids, Mineral and inorganic analyses using Atomic Absorption and ICP technology
• Lipid and fatty acid analyses using mainly wet chemistry and GC methodologies
• Centre of Excellence for enzyme testing for amylase, protease and phytase.

Accreditations:
This laboratory is one of only 13 Official Referee laboratories for soybean meal and oil certified by the AOCS and NOPA. It is an USDA inspected laboratory.

Eurofins Supplement Analysis Center

The Eurofins Supplement Analysis Centre was established in 1982 with a focus on natural product chemistry. It is a world leader in method applications for dietary supplements including the analysis of botanical, herbal, phyto-chemical, sports nutrition, and dietary supplement products.

It is also the Nutraceutical Centre of Excellence for Eurofins Scientific due to its highly recognised level of analytical expertise in the dietary supplement industry.

This facility is the contract laboratory leader in capillary electrophoresis method applications for dietary supplements. It operates under cGMP compliance guidelines.

Services:

• Determining the identity and purity of raw materials
• Quantifying active and target compounds in finished products (capsules, tablets, gel-caps, liquid extracts)
• Providing the biotechnology, biopharmaceutical and medical device industries with expertise in methods development and validation for R&D projects

Instrumentation utilised includes GC, HPLC, FTIR, UV-Vis, and CE instrumentation

Eurofins GeneScan

Eurofins GeneScan is an ISO 17025 accredited commercial testing laboratory that specialises in GMO detection and applied molecular biology for the food, feed and seed industries.

Eurofins GeneScan also offers allergen testing, and detection of non-approved materials in meat and bone meal.

The laboratory provides qualitative and quantitative PCR analyses and ELISA testing. Also offered are consulting and auditing services for non-GM and identity preservation process control systems.

The laboratory, located in suburban New Orleans, has several years’ experience providing GMO detection to the US food and agricultural market. It has consistently scored at the top of proficiency tests and ring trials and has been successfully audited by several large, multinational companies.

Services:

• GMO Testing
• Allergen Testing
• Gluten Testing
• Meat Species Identification
• Fish Authenticity
• Halal/Kosher Testing

Accreditations:

• ISO 17025

Eurofins BioDiagnostics - Longmont

Eurofins BioDiagnostics is the leading testing laboratory for seed and plant health, animal agrigenomics and probiotic ID services.

Services:
• Complete service for infrared method development and validation
• Hassle-free Implementation of infrared technology
• Implement Robust calibrations using patented Chingometrics
• Provide service to ensure the long term NIR/IR performance
• Centralized quality data management
• Remote method development, addition and modification

Eurofins BioDiagnostics - Gilroy

Eurofins Quality Trait Analysis (QTA) System utilizes both mid, and near infrared spectroscopy, to provide analyses of the broadest range of materials, components and properties.

The Eurofins QTA business handles all the technical development, configuration, management and monitoring behind the scenes, enabling accurate quality testing by non-technical personnel, and freeing you up to manage your business.

Eurofins SF Analytical Laboratory
ESFA is the “lab to call” when you don’t know who to call. ESFA is the center for excellence for:
- Foreign material identification
- Off-Flavor, Off Odor and Flavor
- Scalping Analysis by GCMS
- Chemical Verification of Ingredients, Excipients to USP, FCC, NF guidance
- Special Investigations including Product Recall, Insurance or LEGAL projects
- Specialty wastewater analysis including Micro Plastics in Water

Accreditations:
- ISO-17025
- Wisconsin DNR
- USDA for Soil, Meat Receipts
- Controlled Substance / DEA licensed
- GLP/GMP-compliant (FDA registration pending)

Eurofins Genomics
Eurofins Genomics offers industrial scale production of DNA/RNA oligonucleotides, gene synthesis, DNA sequencing, Next Generation Sequencing, applied genomics, genotyping, and gene expression.

We offer one of the fastest turnaround times for sequencing in the country, the lowest error rate in the industry for oligonucleotides, and our approach is highly service oriented.

Services:
- DNA / RNA Oligonucleotides with a variety of options, purifications and modifications available.
- DNA Sequencing in tubes, plates and kits.
- Gene Synthesis & Synthetic Biology
- Gene Fragments
- Next Generation Sequencing
- qPCR and MGB-eclipse probes
- Library Assays
- Applied Genetics: Genotyping, Gene Expression & Microarrays
- Species and breed/variety identification
- Residual DNA Testing
- All sample materials from raw material to all processing stages up to instant meals or health products
- All species (animals, plants, microorganisms, human)
- Meat, fish and seafood testing
- Authenticity testing of Basmati, Thai rice, and pine nuts with high quantitative accuracy
- Assay setup and validation in all stages, from marker discovery up to ISO 17025
- Establishment of new methods as a contracted and collaborative laboratory
- Consultancy

Accreditations:
- CLIA accredited
- CAP accredited
- ISO 9001:2008
- ISO 13485:2003
- FDA 3009882691 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD product

Eurofins Microbiology Inc. - New Berlin
Our state-of-the-art laboratories utilize the latest microbiology testing technologies that provide the robustness and sensitivity needed to rapidly quantify and detect pathogenic, spoilage, and probiotic microorganisms.

With substantial experience across all product categories, we deploy multiple advanced molecular methods for routine microbiology testing, including product screening and in-depth strain identification.

Our experts help customers resolve regulatory compliance and persistent contamination issues. We validate process and environmental controls, and help develop food safety management programs (HACCP, GMP, SSOP, FSMA, and EMP).

Services:
- Pathogen Tests
- Process Control, Quality & Spoilage
- Strain Identification
- FDA Detention Testing
- Environmental Monitoring Programs
- Shelf Life studies
- Special Projects

Accreditations:

**Eurofins Craft Technologies**
We specialize in the analysis of nutrients, vitamins, carotenoids, bioflavonoids and phytochemicals and we offer solid expertise in an ever-changing world of nutritional services.

This broad experience comes from years of testing a wide range of samples such as serum, tissue, dried blood spots, foods, feeds, raw materials, finished products and dietary supplements to the extreme, such as lizard eggs or bird feathers. Our ability to offer our clients this flexibility is one of our greatest assets.

Our experience provides our client’s and the public with confidence in label claims, quality consumer-products and accuracy in nutritional clinical studies. We are a client focused laboratory that prides itself in identifying the most appropriate and innovative methods of analysis. We strive to be the BEST at what we do.

**VIETNAM**

**Eurofins SAC KY HAI DANG**

Eurofins SKHD has invested in modern laboratory facilities in Ho Chi Minh City and Can Tho City, and a new laboratory newly opened in Ha Noi City, staffed with qualified technical personnel.

**Services:**
- Analyses for residues and contaminants: Pesticides; Antibiotics; Mycotoxins; Heavy metals
- Nutritional analyses: Vitamin testing; Carbohydrates testing; Amino acid profile analysis; Fatty acid analysis; Lipids; Inorganic components
- Microbiological
- Analysis of agro and aquatic products, processed food, animal and poultry feed...
- Environmental monitoring samples: water, air, soil, mud...
- Inspection & Audit services

**Accreditations:**
- Certificate of Accreditation No. VILAS 238 - ISO/IEC 17025:2017
- Ministry of Agriculture and Rural Development of the Socialist Republic of Vietnam assigned Eurofins Sac Ky Hai Dang as Food Safety Testing Laboratory according to the Decision No. 329/QĐ-CN-TÁCN
- A laboratory for agriculture and rural development in the field of fertilizer under the Decision No. 1754/QĐ-BTVTV-KH
- Ministry of Health of the Socialist Republic of Vietnam has assigned Eurofins Sac Ky Hai Dang as Food Safety Testing Laboratory under the Decision 265/QĐ-ATTP.
- The Ministry of Industry and Trade of the Socialist Republic of Vietnam has appointed Eurofins SKHD to perform food testing in charge of state management of food safety under the Decision 3070/QĐ-BCT.
- Certification of Ministry of Natural Resources and Environment of The Socialist Republic of Viet Nam about environmental monitoring (VIMCERT 020)
- Recognized as an inspection organization in accordance with ISO/IEC 17020:2012, VIAS 047.

**Eurofins SAC KY HAI DANG Can Tho Branch**

**Services:**
- Analyses for Fertilizer and Antibiotics
- Environment

**Accreditations:**
- Lab facilities are ISO/IEC 17025:2005 compliant according to Vietnam Laboratory Accreditation Scheme

NEW ZEALAND

Eurofins Food Analytics NZ

Eurofins New Zealand has over 30 years of experience in Agricultural and Horticultural testing. We currently work with clients across the agricultural and horticultural industries, including the commercial and research sectors, as well as direct to farmers.

Eurofins New Zealand testing services offer:
• Totally Independent and Science base testing - core testing performed have been thoroughly researched, developed and calibrated by industry scientists.
• Quality analysis – ISO 17025
• Flexible and Personalized to meet Consultant and Farmers testing needs
• Prompt turnaround times.

Services:
• Soil Fertility and Soil Texture Analysis
• Herbage and Crop Leaf Mineral Analysis.
• Feed Quality Analysis
• Fertiliser Analysis
• Soilless Media and NFT Analysis

Ukraine

Eurofins Agro Testing Ukraine

We are a young (opened August 2014) yet experienced (working in the Ukrainian market since 2012) branch of the Eurofins group.

**Services:**
- Soil sampling
- Agricultural and Environmental Testing
- Fertilization advisory
- Nutrients maps
- Nematodes
- Pesticides and heavy metal residue
GRAIN and OILSEEDS:

Sales parameters
• Mycotoxins
• Dioxins, Pesticides
• GMO – quantitative and qualitative analysis
• NIT grain network program
• Heavy Metals

OTHER:
• Plant tissue analysis, fertilization advisory for the top dressing
• Forage analysis for nutrients, toxins, vitamins, minerals, etc.
• Food analysis
• Water analysis
• Consumer goods testing
• Pharma testing

Over 150 000 analyses available on request

All samples are sent to the Eurofins group laboratories worldwide according to the testing matrix. We take care of all your testing needs and the logistics of the samples.

TECHNOLOGIES

Building on the experience and scientific excellence of the Eurofins Group, Eurofins Technologies is a fast growing provider of diagnostic technologies in the field of Food Safety and Environmental Safety. We currently offer solutions for Food Pathogens, GMO, Mycotoxins, Veterinary Drugs Residues, Allergens and Animal Species.

GERMANY

Eurofins GeneScan Technologies

Eurofins GeneScan Technologies is specialised in the production of kits and their application for the food and feed testing industry.

Two decades of expertise in the development of molecular biology kits and their application in Eurofins laboratories on all continents have led to competitive products, which set standards worldwide.

Based on in depth knowledge of the current market situation and the requirements of the food and feed industry, Eurofins GeneScan Technologies adapts its kit portfolio to meet the most recent market demands. Laboratories all over the world trust in the quality of these products which help them to fulfill their customers’ demands.

Services:

• GMO testing kits: screening, identification, quantification with real-time PCR multiplex technology
• Plant pathogen detection kits
• Plant species identification kits: comprehensive screening and specific detection of defined plant species
• Animal species screening and identification kits: authenticity testing for most domestic animal species as well as taxonomic groups of animals
• Pathogen testing kits: fast and reliable detection of foodborne and waterborne pathogens
• Virus detection kits: complete workflow covering all steps for the specific detection of the most important food-related viruses • DNA extraction kits: kits optimised for different food and feed matrices

Accreditations:

• ISO 9001:2015 certification
• AFNOR certified kits
• AOAC certified kits
• Eurofins GeneScan methods are found in national and international standards

Eurofins Tecna

Tecna® develops and produces immunoassay kits for the detection of chemical contaminants in food and feed products.

With more than 20 years experience in the food diagnostics field and
thanks to its internal R&D department, - ISO 9001 accredited since 2001 - Tecna® can provide any user with the most specific diagnostic solution as ELISA kits, lateral flow tests and immunoaffinity columns.

**Services:**

- Quantitative mycotoxins analysis in food and feed
- Veterinary drug residues detection in matrices of animal origin, food and feed
- Allergens detection in finished products and raw materials
- Quantitative detection of histamine in seafood

**Accreditations:**

ISO 9001

**Spain**

**Eurofins Ingenasa**

Ingenasa is a developer and manufacturer of diagnostic test kits with a wide range of applications in Veterinary Diagnostics and Food Safety. The company is based in Madrid, Spain and has 51 employees.

Over the last 30 years, Ingenasa has put a very strong focus on research and innovation and today provides its customers with a wide range of ELISA and PCR assays to detect viral and bacterial pathologies in both farm and companion animals.

In addition, Ingenasa further completes the offering of Eurofins Technologies in allergen detection.

**Services:**

- Veterinary diagnostics with the broadest catalogue in the market for diagnostic assays in veterinary medicine, with tools that help with both the health management of farms and the eradication of several diseases.
- Food safety: allergen detection with the ELISA-based Gluten detection method using the world renowned antibody R5, along with a range of Lateral Flow Devices and ELISA assays for the detection of Casein, Beta-Lactoglobulin and Ovoalbumin.
- Human diagnosis: development of a series of high interest reagents

**USA**

**Eurofins Abraxis**

Abraxis develops and manufactures rapid environmental, food, and life sciences test systems, including immunochemistry products and methods, to meet the testing needs of industry, government and research. Through continuous collaboration with leaders in each of these areas, Abraxis has built up a strong expertise in custom assay development for the food safety and environmental testing.

Many of Abraxis' methods are validated/verified by US federal agencies regulating food safety and environment protection, the Japanese Ministry of the Environment, and the World Health Organization (WHO).

Furthermore, Abraxis has created a wide product portfolio across different technologies, formats and applications including field and lab based testing solutions for both fresh and marine water algal toxins, pesticides, GMO detection and the novel magnetic separation technology AbraMag.

Many methods are validated/verified by regulatory agencies such as US federal agencies including the US Environmental Protection Agency (EPA), the US Department of Agriculture (USDA), the US Geological Survey (USGS), the US Food and Drug Administration (FDA), the Japanese Ministry of the Environment, and the World Health Organization (WHO).

Abraxis holds, or is exclusive licensee, of several key technology patents, with additional applications in process.

**Services:**

- Field and lab based testing solutions for both fresh and marine water algal toxins, pesticides, GMO detection, veterinary residues, mycotoxins and the novel magnetic separation technology AbraMagTM
- ELISA assay development
- Antibody and antigen purification
- Monoclonal and polyclonal antibody production
- Bulk and custom magnetic particles

**Eurofins Gold Standard Diagnostics**

Gold Standard Diagnostics is a developer and manufacturer of fully-automated diagnostic instruments for various test methods. The industry-leading ELISA-based instrument (Thunderbolt, Bolt) platforms have become the ‘gold standard’ for many of the food testing laboratories in the industry.

Gold Standard Diagnostics will be the standard platform for Eurofins Technologies ELISA-based food testing kits including food pathogens, allergens, mycotoxins, veterinary drug residues, and animal health kits. This combination will allow Eurofins Technologies to provide one of the most complete, integrated, and innovative test offerings in the market.

**Services:**

- A broad menu of fully-automated, user friendly and compact instruments from a proprietary instrument manufacturer
- Advanced technologies for onsite design, development and quality
- User-friendly and flexible software capable of programming a broad range of protocols
- Outstanding customer service
China

Eurofins Sensory Testing Shanghai

The Eurofins Sensory Lab Shanghai is your first Sensory Analysis partner in China.

With a solid Sensory analysis Community based in Europe (France, Italy, Spain and Germany), Eurofins China Sensory has a rich experience in Sensory Analysis and consumer test. The Sensory Lab in Shanghai specializes in connecting the best of both worlds and enables you to adapt your products to the local Chinese market. The lab offers professional consumer insight, sensory analysis and consultancy in the food and beverage industry. Besides food and beverage, Eurofins China Sensory is also experienced in applied Sensory Analysis to cosmetics, textiles and fragrances.

Services:

• Consumer tests
• Preference mapping
• Difference tests
• Training
• Consulting
• Identifying your target customer preferences
• Analysing competitor products
• Adapting and creating new ideas and new products

France

Eurofins Marketing Research Paris

Consumer testing, product development and consulting on Food and Cosmetics.

Services:

• Sensory studies, CLT, Home Use Tests
• Sensory analysis of food according to validated standards
• Marketing studies, consumer “ad hoc” qualitative and quantitative studies, usage & behaviour studies, web surveys, focus groups
• Consulting in product development and marketing strategy, product optimisation

Accreditations:

The Paris laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025 under the reference 1-2137 (accreditation scope available on www.cofrac.fr).

ENVIRONMENT

TESTING

A clean and safe environment is a pre-requisite for health and quality of life. Eurofins contributes to this by providing market-leading laboratory testing, monitoring and consultancy services to a wide range of industrial companies, environmental consultants, contractors, retailers and government authorities.

Our services comprise testing of water, air, soil, waste and other products to assess their quality and impact on health and the environment.

AUSTRALIA

Eurofins | mgt - Melbourne

Standard TAT is 5 Days with surcharges applied for same day, delivery before 9:30am, 24 hours, 2 Day & 3 Day TAT.

The Melbourne laboratory is also Head Office in Australia conducts a full range of Environmental Inorganic & Organic analysis utilising latest GC-MS, GC-FID, GC-ECD, ICP-OES, ICP-MS, FIMS, FIA, DA, SFA, TOC

Accreditations:

CANADA

Eurofins Environment Testing Pointe-Claire

Eurofins Environment Testing Canada (EETEC) is a group of full service and specialty laboratories located in Quebec and Ontario. EETC provides analytical analysis and stack testing services in support of environmental site assessments, remediation, drinking water quality, landfill monitoring, regulatory compliance, and more.

Since its inception in 1987, Eurofins Ontario, has participated in many projects involving monitoring and remediation, and has provided independent analytical service to all levels of government and the private sector. Our environmental services division processes hundreds of samples per week for a vast range of analytical parameters. The Ottawa Environmental lab occupies 11,000 square feet of customized space and employs roughly 50 dedicated specialists.

The Ottawa Laboratory is licensed by the Ministry of the Environment and Climate Change (MOECC) and accredited by the Canadian Association for Laboratory Accreditation (CALA), in accordance with the recognized International Standard ISO 17025:2005.

In addition, EETC has Ontario Environmental regional offices in the Greater Toronto Area, Thorold (Niagara Falls) and Kingston. Both locations are able to coordinate business development and client services for the Southern Ontario region.

EETC’s laboratories on the island of Montreal and near Quebec City carry a combined laboratory setting of nearly 45,000 square feet with roughly 150 dedicated employees.

EETC’s St. Bruno, stack sampling and emissions monitoring team provides world-leading technical support. These programs are tailored to meet each individual client’s specific needs and are overseen by field teams backed by engineers, chemists and technicians. With our comprehensive and state of the art range of testing equipment, we ensure stack sampling programs are based on internationally recognized protocols. St. Bruno’s mobile lab units provide a clean environment for the preparation and recovery of samples from sites, without interfering with the clients routine business operations. All stack sampling and emissions monitoring programs include modified methods for special applications.

EETC’s Quebec laboratories are recognized as one of the leaders in providing work that conforms to ISO-IEC 17025 along with the "Centre d’expertise en analyse environnementale du Quebec" (CEAEQ) which is an agent of the Minister of Sustainable Development, Environment and the fight against Climate Change (MDDELCC). This accreditation accompanies with it the ability to test for environmental contaminants across 60 domains which include drinking water, groundwater, surface and waste water, soil testing, sediments, solid waste, drilling water, ambient air quality testing, asbestos and stack testing.

Services:

EETC is recognized in the environmental industry for scientists who have a wide range of environmental expertise in testing soil, water, air and materials for organic and inorganic contaminants including:

- Routine analysis of potable water, ground water and waste water monitoring.
- Soil analysis related to oil and salt spills, petroleum storage tank sites, sulphur and contaminated materials, pipelines disturbances, soil reclamation and soil quality litigation.
- Analysis of lake and stream nutrients, effluent and groundwater monitoring, drilling sump treatment and tailing pond management.
- Toxicity bioassay services.
- Drilling waste analysis.
- Composting.
- Hazardous waste classification and landfill criteria.
- Environmental microbiology

CROATIA

Eurofins Croatiakontrola Zagreb

Eurofins Croatiakontrola Ltd. performs sampling, chemical and microbiological analyses of various matrices. We provided services to government, science and private sector.

Services:
• Analysis of drinking water, mineral water, groundwater, surface water, wastewater for organic and inorganic contaminants, heavy metals, flame retardants, ecotoxicology testing
• Analysis of waste, soil, sludge, sediment, digestate and compost
• Analysis and classification of solid recovered fuels (SRF) according to EN 15359:2011

Accreditations:
Most of our testing methods are accredited according HRN EN ISO/IEC 17025:2007

DENMARK

Eurofins Environment Galten

Eurofins Miljø and Eurofins VBM perform sampling, laboratory analyses and consultancy services focusing on the environment and geotechnical investigation. Modern laboratories in Vejen, Rødovre, Aabybro, and Galten service a broad range of companies, authorities and organisations. The laboratories are appointed as national reference laboratories within specific areas of expertise.

Services:

- Environment sampling and analyses: chemical and microbiological testing of air, water, contaminated soil, sludge, sediment and biota for routine parameters like heavy metals, TPH, PAH, PCB and VOCs, as well as non-standard parameters like pesticides, degradation products, glycols, phthalates, amines, polyamines, flame retardants and other POPs applying a range of modern techniques, including ICP-MS, HR-ICP/MS, GC/MS, GC/MS/MS, HPLC, LC-MS, LC-MS/MS.

- Air monitoring and occupational health and safety: monitoring analyses, tests, and consultancy within stack emission, occupational health, indoor air, personal protection, noise, handling of chemicals, recycling of chemicals, compressed air, ventilation etc. Geotechnical and Geo-environmental In-situ and Laboratory Investigations:
  - Compaction test, particle size distribution, quality and environmental control of recycled material

Accreditations:

- ISO 17025

ESTONIA

Eurofins Environment Testing Estonia

Eurofins Environment Testing Estonia OÜ joined the Eurofins Group in 2017 and mostly specializes in environmental chemical analyses, such as local testing of contaminants in soil, sediment, sludge, water and different other matrices, but also covers testing of food and feed, agro samples, construction materials, consumer products and many more by intercompany sales throughout the global network of Eurofins laboratories.

Lab phone: +372 58837202
Lab phone 2 (for Russian speakers): +372 58870132
Lab manager: +372 53002316

Services:

Example of analyses:

- Heavy metals and elements
- Polycyclic aromatic hydrocarbons (PAHs)
- Polychlorinated biphenyls (PCBs)
- Chlorobenzenes
- Benzene, toluene, ethylbenzene, xylenes (BTEX)
- Hydrocarbon oil index C10-C40
- Aliphatic and aromatic hydrocarbons C5-C35
- Total petroleum hydrocarbons C5-C35
- Volatile organic hydrocarbons (VOCs)

Accreditations:

The laboratory acts in accordance with EN ISO/IEC 17025 quality management system and is
accredited by Estonian Accrediation Centre (EAK).

Accreditation scope can be found at: http://www.eak.ee/dokumendid/pdf/kaitlusala/L272.pdf

FINLAND

Eurofins Ahma Rovaniemi
Eurofins Ahma Oy provides environmental analytical services and expert services for environmental monitoring. Laboratory units are located in Rovaniemi, Oulu and Seinäjoki.

Services:
• Inorganic and organic environmental testing of water, soil and sediment
• Microbiological testing of water
• Biological testing of water
• Environmental expert services incl. planning and monitoring
• Sampling and field services for environmental monitoring

Accreditations:
• T131 SFS-EN ISO/IEC 17025:2005 (FINAS)

Eurofins Environment Testing Lahti
With more than 100 years of experience Eurofins Environment Testing Finland Oy is an environmental laboratory including certified sampling services and industry, power plant laboratory and geo and material testing facility. We act in accordance with the FINAS T039 SFS-EN ISO/IEC 17025:2005 quality management system.

Approved by Finnish Food Safety Authority Evira, GLP approved by FIMEA ecotoxicological tests and approved by the Finnish PANK rock materials

Services:
Eurofins Environment Testing Finland Oy can offer wide range of physical, chemical, and microbiological analyses from water, ambient air, indoor air, soil, biota, waste material and by products and fuels.
In addition to analyses services our experience covers Biodegradability tests, Quality and Technical Audits, Cost efficiency Evaluations, Method Development and Transfers. Especially power plant laboratory offers also personnel leasing all over the world.

Eurofins Nab Labs Jyväskylä

Eurofins Labtium Oy (4-N77), Energy testing Jyväskylä, is located in Central Finland. Laboratory provides a comprehensive selection of analysis services for energy industry, since 1980’s. We offer to our international and national customers (e.g. the energy-, waste and forest industry, power and heat plants, consultants, universities and research centers) a wide range of tests for different energy business related purposes, e.g. R&D, commercial purposes, product quality control, product specification for combustion purposes, startups and trial runs and emission factor analysis and calculations.

Services:

• Physical and chemical properties of solid biofuels, solid recovered fuels, solid wastes, coal and peat, boiler sand, limestone, fly and bottom ashes, soil improvers and growing media.
• Emission factor analysis and calculations
• Laser diffraction (wet/dry) analysis for various materials and industries

Accreditations:

• T111 SFS-EN ISO/IEC 17025:2005 (FINAS)

Eurofins Nab Labs Kääsmäki

The Nab Labs Oulu sites add strong insight in chemical industry related services to Finnish Eurofins family. Nab Labs Oulu has two laboratory facilities in the main industrial areas of Oulu, Nuottasaari and Takalaanila. Both facilities are located inside industrial estates as a vital part of customers own operations. Nab Labs Oulu sites give fast-cycle customer service, not only in routine analytics but in demanding special analytics, to several industrial customers.

Services:

• R&D services incl. analytics of trial runs and method development
• Quality control of raw materials, process samples and products
• Occupational health related daily measurements in the production environment
• REACH and problem-solving services

Accreditations:

• T111 SFS-EN ISO/IEC 17025:2005 (FINAS) Typpitie 1
Our laboratory performs chemical analyses of soil, compost, sludge, manure and feed. Analyses of soil, compost, sludge, and Australian JORC codes. Requirements e.g. Canadian NI 43-101 approved best practices and reporting methods in line with internationally accepted standards. For the evaluation of mineral resources and mineral exploration, we have a comprehensive selection of sample preparation and analytical methods in line with internationally approved best practices and reporting requirements e.g. Canadian NI 43-101 and Australian JORC codes.

Eurofins Labtium Espoo

Eurofins Labtium Espoo provides expert and laboratory services for the bioforest industry. Our long experience in forest industry R&D projects related to pulping, bleaching and chemical recovery, to name a few has given us competence to support the industry with chemical means both in traditional applications and in new innovations.

Our versatile laboratory and expert services cover the needs for pulp and bio-product industry from raw materials to end products without forgetting the side streams and environmental aspects.

Eurofins Labtium Espoo

Eurofins Labtium Espoo provides a comprehensive selection of laboratory services and analytical packages for geochemical exploration, for research work supporting environmental geochemistry and monitoring as well as analytical methods for evaluation of mineral resources.

We have long experience in methodology for characterization and quality control of mining side-products with use of internationally standardized tests. Our versatile sample preparation equipments and methods for soils, sediments, vegetation and rock samples ensure.

Eurofins Labtium Kuopio

Eurofins Labtium Kuopio provides a comprehensive selection of laboratory services and analytical packages for geochemical exploration, for research work supporting environmental geochemistry and monitoring as well as analytical methods for evaluation of mineral resources.
the processing of sample material with most appropriate way according to the purpose.

**FRANCE**

**Eurofins Analyses pour l’Environnement France**
With laboratory space of 5,500 m², Eurofins in Saverne provides a large part of our environmental analytical capabilities in France.

Solid, air and ground water matrices are analysed and the nature of analyses performed is very diverse: contaminated soil, sludge, clinkers and sediment, air monitoring (emission air, work air, internal air), underground and waste water.

This laboratory also provides microbiology analyses like legionella, hospital hygiene or air parameters. We can also provide material testing (building materials, water, polymer expertise).

This laboratory also provides material testing (building materials, water, polymer expertise)

**Services:**
- Chemical and microbiological testing of air (emission, work, internal, ambient air)
- Contaminated soil, sludge, sediment, clinkers
- Underground water, waste water
- Microbiological testing of clean or waste water, Hospital Hygiene
- Materials testing

**Accreditations:**
- COFRAC on air (emission air, working air, soil gas and internal air), soil, sludge, sediments, clinkers, hospital hygiene, underground, clean and waste waters
- EXXON approval.

**Eurofins Analyses des Matériaux et Combustibles France**
This laboratory located in Saverne performs analysis on various materials:
- construction materials (aggregates, concrete, soil, rocks, cement),
- solid fuel (biocombustible, industrial waste, coal)
- expertise on various matrixes (concrete, polymer, food, wood, ceramic, glass)

**Accreditations:**
- Various tests accredited by COFRAC, the French accreditation organization, in accordance with ISO 17025
- LABOROUTE agreement

**Eurofins Expertises Environnementales**
The lab offers analysis and services in marine and continental ecotoxicology, biodegradability, hydrobiology and microbiology.

**Services:**
The lab offers analysis and services in marine and continental ecotoxicology, biodegradability, hydrobiology and microbiology.

**Accreditations:**
- COFRAC accreditation for various tests
- Recognised by the French Health Ministry for the approval of materials in contact with drinking water.

Eurofins Hydrobiologie France - Gradignan

Eurofins Hydrobiologie France offers a broad range of specific analytical services to evaluate and monitor aquatic environments.

Our services cover various aquatic ecosystem (running/stagnant water, marine and coastal environment) with expertise on different compartments: benthic and pelagic microalgae, macrophytes, microinvertebrates and fish.

Services:
The lab offers analysis and services in marine and continental hydrobiology

Accreditations:
• COFRAC accreditation for various tests.
• Recognised by the French Environment Ministry.

Eurofins Hydrobiologie France - Moulins

Eurofins Hydrobiologie France offers a broad range of specific analytical services to evaluate and monitor aquatic environments.

Our services cover various aquatic ecosystem (running/stagnant water, marine and coastal environment) with expertise on different compartments: benthic and pelagic microalgae, macrophytes, microinvertebrates and fish.

Services:
The lab offers analysis and services in marine and continental hydrobiology

Accreditations:
• COFRAC accreditation for various tests.
• Recognised by the French Environment Ministry.

Eurofins Hydrobiologie France - Marseille

Eurofins Hydrobiologie France offers a broad range of specific analytical services to evaluate and monitor aquatic environments.

Our services cover various aquatic ecosystem (running/stagnant water, marine and coastal environment) with expertise on different compartments: benthic and pelagic microalgae, macrophytes, microinvertebrates and fish.

Services:
The lab offers analysis and services in marine and continental hydrobiology

Accreditations:
Eurofins Analyses pour le Bâtiment Nord

This 1,000 m² laboratory specialises in asbestos analysis in building materials. With more than 10 years of experience, the laboratory staff also has expertise in the analysis of asbestos in air for which it serves the market in Northern France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins CEBAT

Since 2002, this laboratory has developed a strong expertise in the analysis of asbestos in air and also in building materials.

Services:
Analysis of asbestos in air and materials

Accreditations:
• COFRAC
• ISO14001 & OHSAS18001

Eurofins Analyses pour le Bâtiment Sud-Est

This laboratory specialises in asbestos analysis in building materials. With more than 10 years of experience, the laboratory staff also has expertise in the analysis of asbestos in air for which it serves the market in the South East of France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Ouest

This laboratory specialises in asbestos analysis in building materials. The laboratory staff also has expertise in the sampling and analysis of asbestos in air for which it serves the market in the West of France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Sud-Ouest

This brand-new laboratory specializes in asbestos analysis in building materials. The laboratory staff also has expertise in the analysis of asbestos in air for which it serves the market in the West of France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Biotech Germande
This lab specialises in the management of the infectious risk associated with the use of complex reusable medical devices and hospital environment, Eurofins Biotech-Germande is the essential partner for healthcare facilities.

Services:
Education / Training
Our education/training programs in hygiene are designed for all medical and paramedical staff including:
• Physicians
• Pharmacists
• Nurses, Hygienists

Microbiological sampling
Healthcare facilities and some structures receiving public have an obligation to monitor and control infectious risk. We assist you in the process of microbiological surveillance of the environment:
• Microbiological monitoring of the environment (air, water, surface…)
• Medical devices sampling

(endoscopes, endoscope drying/storage cabinets, automatic endoscope reprocessors)

Medical Device Evaluation
In collaboration with the health industry, we act as an independent testing laboratory for the analysis of the risk factors in the design and validation stages of a medical device:
• Medical Devic Safety
• Type Testing
• Performance Qualification

Eurofins Hydrologie Centre Est
With a laboratory of 4,500m², this high-performance production environment offers a broad spectrum of water analyses with the best possible delivery times

Services:
Eurofins Hydrologie Centre Est specialises in water analysis, focusing on sanitary water, groundwater, surface waters, residual waters and also industrial waste water.

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for the approval of materials in contact with drinking water
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Est
Eurofins Hydrologie Est specialises in water analysis, focusing on sanitary water, groundwater, surface waters, residual waters and also industrial waste water.

Furthermore, Eurofins Hydrologie Est has expertise in the testing of pesticide and drug residue research in freshwater, groundwater, waste water and has significant experience in dealing with official testing regimes for water quality.

With a laboratory of 4,500m², this high-performance production environment offers a broad spectrum of water analyses with the best possible delivery times

Services:
Sample taking and analysis for:
• Ground and surface water
• Drinking water
• Technical water
• Bottled water / Mineral water / Sparkling water
• Waste water

Accreditations:
• NF EN ISO/IEC 17025:2005_COFRAC

Eurofins Hydrologie Est - Dijon
Eurofins Hydrologie Est - Dijon is a regional sample taking and sample analysis regional lab providing proximity services to its clients

Services:
Sample taking and analysis for:
• Drinking water
• Technical water
• Waste water

Accreditations:
COFRAC on water matrices

Eurofins LCDI
Since 1991, this laboratory ensures quality service, thanks to its highly qualified staff and advanced equipment.
Our very comprehensive range of services includes water collection and water testing.
Eurofins LCDI specialises in industrial sites.
Services:
Sample taking (including 24h sample taking) and analysis for waste water and underground water
Accreditations:
COFRAC on water matrices

Eurofins Hydrologie Ile de France - Vennecey
Services:
Physico-chemical analysis for water samples
Accreditations:
Accreditation COFRAC n° 1-5977

Eurofins Hydrologie Ile de France - Caen
Services:
Potability
Search for Legionella
Enterobacteriaceae
Pesticides and other chemicals
Accreditations:
COFRAC accreditation for various tests
French Health Ministry agreement for sanitary control on water
French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Nord
Eurofins Hydrologie Nord provides a wide range of analysis for all kind of water and microbiology specialities.
Services:
Potability
Search for Legionella
Enterobacteriaceae
Pesticides and other chemicals
Accreditations:
COFRAC accreditation for various tests
French Health Ministry agreement for sanitary control on water
French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Sud Ouest - Poitiers
This laboratory specialises in water analysis (sampling, microbiology, and basic chemistry), for waste water, drinking water quality testing, water hygiene (legionella). 
Services:
Sampling and chemical and microbiological testing of water, air and surfaces
Accreditations:
COFRAC accreditation for various tests
French Environment Ministry agreement for various tests on water
Eurofins Hydrologie Ouest - Nantes

This laboratory specialises in water analysis (sampling and basic chemistry), for waste water, drinking water quality testing, water hygiene (legionella).

Services:
Sampling and chemical testing of water

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for the approval of materials in contact with drinking water.
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Sud

With its 3 proximity labs dedicated to water testing, Eurofins Hydrologie Sud provides a wide range of analysis : sanitary testing, environment & natural resources monitoring, clinical environment testing and dialysis water analysis.

Services:
• Chemical testing
• Microbiological testing
• "Same-day" analysis delivery
• Tests on all kind of water
• Water sampling
• Specialized on mineral & thermal types of water

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for sanitary testing on drinking water
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Sud - Blagnac

Water Testing laboratory

Services:
• Chemical testing
• Microbiological testing
• "Same-day" analysis delivery
• Tests on all kind of water
• Water sampling
• Specialized on mineral & thermal types of water

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for sanitary testing on drinking water

Eurofins Hydrologie Sud - Grasse

Water Testing laboratory

Services:
• Chemical testing
• Microbiological testing
• "Same-day" analysis delivery
• Tests on all kind of water
• Water sampling
• Specialized on mineral & thermal types of water

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for sanitary testing on drinking water

Eurofins Hydrologie Sud-Ouest

Eurofins Hydrologie Sud Ouest is a regional sample taking and sample analysis lab offering a local service in the South West of France.

Services:
Laboratory specialised in water analysis (basic chemistry and microbiology) on all water matrices.
Also specialising in Hospital Hygiene.

Accreditations:
COFRAC on all water matrices

Eurofins Prélèvement pour le Bâtiment Ouest

Services:
Dust measure strategy, onsite sampling and laboratory determination of asbestos levels

Accreditations:
• COFRAC
Eurofins Prélèvement pour le Bâtiment Sud-Est

Dust measure strategy, onsite sampling and laboratory determination of asbestos levels

The BU consists of 6 agencies situated in the Southeast of France (Lyon, Clermont-Ferrand, Saint-Etienne, Vergèze, Grasse and Chambéry)

Accreditations:
• COFRAC

Eurofins Prélèvement pour le Bâtiment Est

Dust measure strategy, onsite sampling and laboratory determination of asbestos levels

Accreditations:
• COFRAC
• MASE certification

Eurofins Prélèvement pour le Bâtiment Nord - Dunkerque

Dust measure strategy, onsite sampling and laboratory determination of asbestos levels

Accreditations:
• COFRAC

Eurofins Eichrom Radioactivity

Services:
• Radiological measurements (gross alpha, gross beta, gamma emitters, 3H, 14C, 90Sr, uranium, plutonium...)
• asbestos on radioactive (or potentially radioactive) samples and in
a near future chemistry on radioactive samples

**Accreditations:**
• ISO 17025 Equivalence COFRAC

**Eurofins Eichrom Asbestos**
Eurofins Eichrom Asbestos was created in 2015 within Eurofins Eichrom laboratories.

Eurofins Eichrom Asbestos are recognized for the quality of their asbestos analyses on radioactive and potentially radioactive samples.

**Services:**
Eurofins Eichrom Asbestos performs asbestos analyses, on various matrices such as:
• Mixes
• Materials
• Filters

**Accreditations:**
• ISO 17025 Equivalence COFRAC

Eurofins Institut Jäger

Institut Prof. Dr. Jäger was founded in Tübingen in 1977 by Prof. Dr. Walter Jäger and is one of the leading providers of environmental services in Southern Germany. Institut Prof. Dr. Jäger is prepared to solve almost any kind of problem in the environmental sector. The Environmental Analysis Competence Centre is your partner for all issues in this field.

Institut Prof. Dr. Jäger is accredited for more than 390 testing procedures according to the international ISO/IEC 17025 standard

Services:
• Mineral water: Support and advice for the development of wells and the concurring authorisation process; full analytical service
• Analysis of drinking water, water for industrial use, water used for swimming pools
• Calculations needed for the mixing of different types of well waters intended for human use
• Federal programmes on the analysis of subsoil waters
• Microbiology
• Analysis of communal and industrial waste waters, refuse analysis
• Elemental analysis
• PFT analysis
• Pesticides in water
• Biopharmaceutical residues in water
• Legionella
• Microbiology in water
• Indoor air measurement

Accreditations:
• ISO/IEC 1702
• Investigating body according to §15, subsection 4, sentence 2 of the German drinking water regulation of 2001
• Board of experts in water management (subject module water) for the fields of waste water, surface water and ground water
• Admission of the French ministry of Environment for investigations of water quality by sanitary inspection
• Investigating body for the analysis of perfluorated tensides (PFT) in water and sewage sludge
• Acceptance as a testing agency in waste management (waste module) for the sewage sludge section, soil and waste oil
• Acceptance of QS society of fruit-vegetables-potatoes GmbH as investigating body for the QS residue monitoring section
• GMP-confirmation of inspection activities as provided for § 14 subsection 4 No 3 Medicines Ordinance
• Permission for activities with pathogens due to § 44 German Law on the Prevention and Control of Infectious Diseases
• Acceptance as a testing agency for tests of products as part of the certification procedure DIN CERTCO

Eurofins Hygiene Institut Berg

For 50 years Eurofins Hygiene Institut Berg GmbH has been a free and independent water analysis laboratory for microbiology, environment analysis and hygiene.

Services:

• Analysis of swimming and bathing pool water
• Microbiological analysis of bathing water and industrial water
• Microbiological and selected chemical and sensory parameters according to German drinking water regulation
• Sampling of raw and drinking water
• Sampling of swimming and bathing pool water

Eurofins Umwelt Ost Jena

With more than 25 years of experience in environment analysis today Eurofins Umwelt Ost GmbH offers a wide range of chemical, physical and biological analyses.

Services:

• Industrial waste, drinking, surface, ground and sewage water
• Analyses of soil, sludge, waste, compost
• Special experience in analyses for agriculture
• Special analysis of priority substances corresponding to the EU water framework programme
• Bio and solid fuels
• Coal, bio fuels, bio ethanol, and wood pellets
• Bio-toxicity tests
• Tests of bio-gas formation (GB21): material waste, agriculture products and animal excrement
• Test of AT4 (activity of breathing in 4 days for waste and soil)
• Degradability tests
• In-Situ chemical oxidation (ISCO)
• Nmin

Accreditations:

• Drinking water regulation
• Self-control regulation for waste water
• Self-control regulation of Landfill Ordinance
• Waste sewage sludge ordinance
• Bio-waste ordinance
• Fertilizer ordinance
• Federal soil protection regulation
• § 25 Regional waste law NRW
• Federal Quality Association Compost

Eurofins Umwelt West Wesseling

Eurofins Umwelt West, formerly known as Analytis, was founded in 1980 and has been performing environmental analysis for more than 20 years.

The laboratory performs chemical, physical, biological, microbiological and toxicological analyses of soil, water and air.

Eurofins Umwelt West also performs analyses of specialty samples according to the needs of industrial customers.

Services:
Sampling and analysis of a large range of organic and inorganic parameters:
• NSO-heterocycles,
• Soil gas analysis
• PFC

Accreditations:
• Accreditation by DIN EN ISO/IEC 17025 by DAKKS
• Evidence for confirmation of competence within the framework of the BAM-OFD agreement on the investigation of contaminated sites
• Listed as investigating body according to § 15 section 4 of the German Drinking Water Ordinance (TrinkwV 2001)
• Admission pursuant to § 25 LAbfG NRW for different subsections
• Admission as investigating body pursuant to § 18 sentence 1 BBodSchG and § 17 section 1 LbodSchG NRW
• Admission as investigating body within the sense of § 3 section 5 and 6 of the sewage sludge regulation
• Admission as investigation body according to self-inspection guidelines (EKVO) of the Saarland
• Admission as federally recognized investigative body for waste water analysis for the subfield “carrying out laboratory tests” (self-inspection guidelines laboratory - EKVO laboratory)
• Admission as federally recognized investigative body for waste water analysis for the subsection “EKVO Überwachungsstelle” according to § 10(4) No 4 EKVO in Hessen
• Approval as inspection body for aptitude and verification tests and referee purposes and external monitoring for water management characteristics of road construction materials (RAP Stra)
• Admission pursuant to the law of 21 April 1993 for the implementation of technical research and control data in the environment section in Luxembourg

Eurofins GfA Lab Service
With over 30 years of experience, Eurofins GfA Lab Service is the world’s leading dioxin laboratory.

The main focus of the analytical portfolio is the analysis of persistent organic contaminants (e.g. dioxins, PCB, flame retardants, PFCs, Stockholm POPs) on ultra trace levels. Representative for a number of parameters, polychlorinated dibenzodioxins and –furans (PCDD/Fs), polychlorinated biphenyls (PCBs), brominated flame retardants, per- and polyfluorinated alkyl substances (PFAS) as well as organotin compounds are examined in almost every matrix as e.g. food/feed, biota, environmental samples (water, waste, soil etc.), emission and ambient air samples and even human matrices (blood, serum, tissue etc.)

Eurofins GfA Lab Service GmbH is one of the few worldwide laboratory that is able to analyse all 27 POP substances banned or regulated in the Stockholm Convention in its own laboratory. Eurofins GfA Lab Service GmbH is also able to analyse all 209 PCBs incl. dioxin-like PCBs (DL-PCBs) and non-dioxin-like PCBs (NDL-PCBs, also called ICE66-PCBs), as required by the California Proposition 65. The scientists of this laboratory are sought-after experts in national and international standardisation bodies or other working groups. Numerous publications in the field of POP- analyses have been written or co-authored by employees of Eurofins GfA Lab Service GmbH. This is one reason why Eurofins GfA Lab Service GmbH is the POPs Competence Centre of the international Eurofins Group.

Eurofins GfA Lab Service GmbH is accredited according to the international ISO/IEC 17025:2005 standard. The overall capacity of dioxin and POP measurements of the Eurofins GfA Lab Service GmbH has been raised to > 45,000 samples per year using high-end technical equipment (8 HRGC/HRMS systems (high resolution gas chromatography / high resolution mass spectrometers), 14 GC-MS/MS systems (gas chromatography / tandem mass spectrometers), 3 LC-MS/MS systems (liquid chromatography / tandem mass spectrometers), several GC-MS systems as well as the novel API-GC-MS/MS-technique. The highly experienced laboratory staff analyses all kinds of matrices both according to European guidelines and other regulations (US EPA etc.).

This state-of-the-art-laboratory delivers rapid turn-around-times with the highest level of service and most advanced technologies (e.g. automated clean-up-systems) in line with the EU-Regulations No. 2017/644 and 152/2009 for analysis of dioxins and PCBs in food and feed samples. 48h-analytical services for dioxins and PCBs are possible for selected food and feed matrices.

In addition to the standardised services offered in our high performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures. Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

Services:
Food & Feed Testing Services:
• Dioxins and dioxinlike compounds
  o Fast processing times
  o In line with Regulation (EU) No. 2017/644 (food) and No. 2017/771 (feed)
• POPs such as brominated flame retardants (BFR), organochlorine pesticides, PFAS, organotin compounds, PAHs
o Sensitive analysis, low limits of quantification
o Competitive processing times

Environmental Testing Services:
- Water, soil, sediment, plants, waste and sewage sludge
- Air samples (emissions/immissions, indoor air)
- Sensitive analysis, low limits of quantification
- Competitive processing times

Human Biomonitoring Service:
- Blood/serum, breast milk, adipose tissue
- Investigation on regional background concentrations
- Assessing the impact of harmful substances on humans
o Assessing the effects of eating habits i.e. the impact of eating harmful substances on the human body
o Special studies on humans who are extremely exposed to hazardous substances.

Special Project-based Services:
- In addition to the standardised services offered in our high performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures.

Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

Provision of sampling kits:
- On top of carrying out different analyses, Eurofins GfA Lab Service GmbH also provides sampling material, especially for air-monitoring purposes such as cartridges filled with XAD resin, pre-spiked or non-spiked, following the requirements of EN 1948 (part 1 to 3 (dioxins) or part 4 (PCBs)) or CEN/TS 1948-5.

Data Access Options beyond Electronic Analytical Reports:
- On-line Data Access: 24 hours a day, seven days a week through Eurofins’ secure internet access, EOL, which offers clients immediate access to final verified analytical results as analyses are completed and verified in the lab.
- Electronic Data Deliverables: Standard and custom formats available.

Accreditations:
- Officially acknowledged measuring site according to §29b Federal Emission Control Act (BImSchG), group I-Nr.1 and group IV for specific analysis of substances requiring special complexity for sampling or analysis
- Examination laboratory for soil and sewage sludge according to § 3 Sewage Sludge Ordinance (AbfKlärV)
- Officially acknowledged by the French environmental ministry for the measurement of PCDD/F in emission samples
- Analysis in compliance with EU-guidelines, international recognised standards, e.g. EN 1948, EPA and other accredited methods
- GOED member (Global Organization for EPA and DHA Omega-3)
- IFFO member (International Fishmeal and Fish Oil Organisation)
- Expert for official counter samples according to §43 LFGB, chemical-physical and microbiological examination of food
- QS approval as laboratory in the field of feed monitoring for the parameters, dioxins, PCBs, heavy metals, aflatoxins, DON, ZEA, PAH, animal ingredients, pesticides, salmonellae, ochratoxins and methanol.

Eurofins City Analysts
Dublin
City Analysts has rapidly grown over the last 16 years into Ireland's leading environmental analysis laboratory. Now operating from two main labs in Dublin and Shannon we provide a full range of accredited chemistry and microbiology analysis for three key areas of water, soil, food. Our Shannon facility has recently been accredited for Legionella testing. This site has also our main hub for toxicological testing. Through both facilities we are able to reach a countrywide client base while also maintaining the highest standards achievable.

Accreditations:
• INAB
• ISO14001
• OHSAS 18001

Eurofins Nihon Soken
Founded in 1971, Nihon Soken is one of Japan’s leading environmental testing service providers with a strong focus in pollution analysis, and is the largest laboratory serving the Fukushima prefecture. Nihon Soken employs 112 staff.

Services:
• Asbestos
• Air and exhaust gas
• Noise and Vibration
• Water quality
• Soil
• Radiation testing
• Infrared outer wall diagnosis
• Environmental Assessment

Eurofins Environment Testing Penang

In 1997, NML engaged in providing an environmental monitoring and industrial hygiene service to the manufacturing industries in Penang.

Today, our customers are not limited to the manufacturing companies from various industries nationwide but they are inclusive of water treatment companies, properties development and land exploration firms, as well as new investors in Malaysia.

NML has a team of highly experience consultants, highly-skilled technical team to carry out field works and competent chemists to analyse the environmental samples. NML consultants inclusive of Registered Assessors, Hygiene Technicians, Noise Competent Persons etc, are not only well-verse in respective technical knowledge and regulations but they are also keeping abreast of the new regulations development and new enforcements in the country.

Services:

• Sampling and analysis of natural water, processed water, waste water
• Industrial effluents (Industrial Effluent Characteristic Study, IECS)
• Solid waste, contaminated soils
• Ambient air, chimney and stack gas emission (iso-kinetic and non-isokinetic)
• Boundary noise, vibration test
• Chemical Health Risk Assessment (CHRA)
• Chemical Exposure Monitoring
• Local Exhaust Ventilation (LEV) Inspection & Testing
• Noise Exposure Monitoring
• Indoor Air Quality Assessment

Accreditations:

• ISO/IEC 17025
• SAMM
• Ministry of Health Malaysia

Eurofins RadonLab

Radonlab was started by Dr. scient. Aleksandar Birovljev, who previously established laboratories at the Statens strålevern and Teknologisk institutt.

Radonlab offers reliable radon measurements, investigations, products, and solutions for the protection against radon and moisture, including track-etch detectors and electronic instruments for measuring radiation from radon.

In terms of radon mitigation, we have many years of experience in remediation of buildings with elevated radon levels. We have a selection of proven solutions and products, such as our RadonSug, Guard MiniVent and climate systems.

Secondly, we develop and test new ideas for reducing radon levels indoors. We offer courses and training in radon monitoring and mitigation. Our services and products can be used by both professionals and others, who wish to carry out cost-effective measurements and action against radon.

Our track-etch laboratory is classified as class A by the HPA (former National Radiological Protection Board) in the UK, which performs international comparison tests annually.

SLOVAKIA

Eurofins Bel/Novamann

Eurofins Bel/Novamann performs sampling, chemical, microbiological and sensory laboratory analyses, certification, training and consultancy services focusing on foodstuffs, ambient and working environments, cosmetics, cleaning and washing preparations, fuels and lubricants, biopharmaceutical products and food safety management systems (HACCP, ISO 22000). The services are offered to a broad range of companies, authorities and organisations.

Own logistic system for sample collection (20 pickup cars with temperature control)

Services:
- Physical-chemical analyses, determination of heavy metals, pesticides, silicone analysis, polynuclear aromatic hydrocarbons, polychlorinated biphenyls, extractable and non-polar extractable compounds in all kinds of water samples, solid samples: soil, earth, sludge, waste, fertilizer, compost, peat, minerals, rocks
- Life and working environment: noise in the environment and work environment, vibrations transmitted to hands and whole body, heat-moisture microclimate, artificial light intensiveness, solid aerosol, chemical and carcinogenic factor, concentrations of toxic gases (NO, NO2, CO, CO2, SO2, H2S, CI2, O3), samples taken using a sampling bio-impactor.

Accreditations:
- STN EN ISO 17 025:2005 accredited by SNAS (SK) accreditation bodies

SPAIN

Eurofins Analytico Spain

Eurofins Analytico is a fully accredited, high-tech production driven laboratory that can deliver a wide range of environmental analytical tests in soils, groundwater, wastewater, construction materials and residues.

Eurofins Analytico can test for routine parameters like heavy metals, TPH, PAH, EOX, aromatics, VOCs and pesticides, as well as non-standard parameters like glycols, phthalates using a wide range of modern techniques including ICP-AES, ICP-MS, (LVI)-GC/MS, HPLC and LC-MS.

A personal approach and high quality service are top priority at Eurofins Analytico. Delivery time, reliability, sophisticated logistic solutions and electronic data exchange are important issues. The standard delivery time is 5 working days, but results can be supplied in as fast as 48 or 24 hours, even overnight if required. Clients have the opportunity to use the Internet-based PAIS (Professional Analytical Information System) for full digital communication with the laboratories of Eurofins Analytico.

Over time Eurofins Analytico has become a leading environmental testing laboratory, serving major engineering consultants, project developers, and industries and building contractors all over the world.

Accreditations:

• Eurofins Analytico is accredited against ISO/IEC 17025 by the Dutch Accreditation Council RvA.
• Eurofins Analytico is recognized by the Netherlands Ministry of Housing, Spatial Planning and the Environment (VROM) as a qualified analytical laboratory for the "Analysis of soil with respect to environmental hygiene" (AS 3000) and for the "Analysis of building materials" (AP04).

**C-mark**
C-mark provides companies with advice on complex water installations. We consult in the following fields; government, industries, healthcare organizations, sports, wellness and recreation.

**Services:**
- Water analyses (drinking water, process water and swimming water)
- Legionella analyses
- Risk management
- Consultancy

**Accreditations:**
Eurofins AquaSense

Eurofins AquaSense provides advice to governments, research institutes, water managers and nature managers to deal with water and ecology in a sustainable and integrated way. We look for opportunities for maintaining, restoring and strengthening water systems. Important instruments for this are area-specific planning and management plans, policy support studies and monitoring programs.

Services:

As one of the few agencies in the Netherlands, we have accredited field workers and laboratories to carry out biological analyzes of sediments, land soils, surface water and waste water.

We have expertise in the area of human health, ecotoxicology and ecology and we provide research and advice in areas such as monitoring, water quality, water assessment, the Water Framework Directive and water storage.

- Water quality
- Water rating
- Monitoring
- Water Framework Directive
- Water storage
- Ecotoxicology
- Ecology
- Microbiology
- Aquaculture
- Human health
- E-PRTR (emission registration)

Eurofins Lab Zeeuws-Vlaanderen (LVZ) BV

Laboratorium Zeeuws-Vlaanderen (LVZ) was founded in 1991 and joined Eurofins in 2013. LVZ has over 90 employees.

The chemical analyses offered are: agricultural, environmental and food and feed testing. Because of the broad scope they can supply the entire food chain with analyses. Besides analyses, LVZ also takes care of sampling and has an advisory department.

Technologies used: GC-MS (MS), LC-MSMS, GC-FID, Head-space, NIR-analyser, Flow Injection Analysers, spectrophotometer, vlam-AAS, AES, ICP-AES, ICP-MS, Coulometer, calorimeter, titrators and CHNS-analysers.

Services:

Environmental testing (sampling, analysis and advice):

- Soil, sludge
- Water
- Analyses (amongst others): dry matter, organic matter, heavy metals, PAH, mineral oil, OCB, PCB, pH, EC, (un)dissolved particles, BOD, COD, head and trace elements

Accreditations:

- ISO 17025
-Acknowledged by: QS, BNN and FAVV
EUROFINS TURKEY

Eurofins Turkey

Eurofins Turkey was founded in Istanbul in 2012, while Eurofins SOFIA continues to offer its services in the Izmir area. The Istanbul office offers a complete service solutions to the Turkish market with a constantly increasing portfolio of analyses for the food, feed, environmental, agricultural and product testing industries. The Izmir office offers complete service solutions to the food and feed markets.

Eurofins Turkey combines the best practices and worldwide expertise of the Eurofins network for its customers not only inside Turkey, but also in Turkic countries and Middle East such as Azerbaijan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan, and also Georgia, Jordan, Saudi Arabia, UAE and Oman.

Services:

- Project management
- Sample registration
- Customer Support after reporting
- Cooperation with inspection and certification bodies

Eurofins Air Toxics

Eurofins Air Toxics, Inc. is an analytical laboratory, founded in 1989, specialising in the analysis of vapour-phase organic chemicals in a wide range of EPA, ASTM and in-house developed methods. Our capabilities extend from trace level measurements required for indoor air testing to identifying and quantifying organics in high-level sources.

An on-going investment in media and instrumentation, a continuing commitment to customer service and quality, and a team of experienced chemists have made Eurofins Air Toxics the premiere test facility for the analysis of air samples.

With over 4,400 Summa canisters and 1,800 flow controllers, we maintain the largest single location canister inventory of any laboratory in the United States. In addition to our canister capabilities, Eurofins Air Toxics is the industry leader in both passive and active sorbent-based methods supporting regulatory development and industry acceptance with on-going research and performance evaluation.

Services:

• Soil gas surveys
• Vapour intrusion investigations
• Ambient air monitoring programs
• Indoor air quality assessments
• EPA Method 325/Fence line Monitoring

Our routine analyses include: EPA TO-Compendium Air Methods such as TO-15, TO-3, TO-17, TO-13A and ASTM methods, such as ASTM D1945 and ASTM D1946. Specially developed products include a modified TO-15 method using a custom GC equipped with multiple columns to chromatographically isolate trace level compounds from interference and using a TOF-MS for target compound detection. In addition, our laboratory has developed passive sorbent methods using samplers such as the Radiello and Waterloo Membrane Sampler (WMS).

Accreditations:

Eurofins Air Toxics operates under NAICS code 541380 and holds NELAP accreditation through Oregon Environmental Laboratory Accreditation Program and DoD-ELAP and ISO/IEC 17025 accreditation through ANAB. The laboratory also participates in the following state accreditation programs: Arizona DOH, Florida DOH, Louisiana DEQ, New Jersey DEP, New York DOH, Texas CEQ, Utah DOH, Virginia and Washington DEC.

Eurofins Calscience

Eurofins Calscience, Inc. has been providing quality analytical services to consultants, private industry and government agencies since 1986. Eurofins Calscience operates out of three facilities which incorporate 70,000 square feet of laboratory and office space.

We are an industry leader in California, employing nearly 180 professionals and technicians. As a full-service environmental testing company, we offer analysis of groundwater, storm water, soil, hazardous waste, marine chemistry, and soil vapor/ambient air/indoor air.

We pride ourselves in providing the highest level of customer service in the industry because we truly believe “the difference is service”.

All of our operations are focused on meeting the demands of our customers, in terms of quality, deliverables, schedules and costs. We are organized and staffed to be able to respond to quick turnaround-time projects and we pride ourselves on our on-time delivery.

Eurofins Calscience focuses on servicing the environmental engineering community, not only to provide reliable data, but to help our customers meet their goals in terms of project profitability and timely completion.

We offer a full range of analytical methods and data deliverable products to meet the requirements of numerous environmental regulatory programs. Our staff of environmental professionals and project managers can assist clients with regulatory issues and are available to consult with clients to choose the appropriate test methods for their projects. We are committed to staying current with new technologies, adding instrumentation and expanding capabilities to meet the needs of our clients.

With our expansive instrument inventory we have the capacity to meet the demands of the most rigorous field schedules.

Eurofins Calscience has gained expertise in testing for constituents of concern for various regulatory programs and emergent chemicals.

Throughout our history, we have always been committed to quality, high ethical standards, and operating in a socially responsible manner.

Services:

• Air/Vapour
• Emergent Chemicals
• Hazardous Waste
• Landfill Monitoring
• Marine Chemistry

Accreditations:

Eurofins Calscience is certified under the National Environmental Laboratory Accreditation Program and
Eurofins Eaton Analytical provides clients with high quality, low reporting limit data to assess water quality. Eurofins Eaton Analytical also assists clients with quality assurance consulting and development of internal quality standards. Eurofins Eaton Analytical is NELAP and ISO17025 accredited and offers formal certification programs for air, soil and non-potable water samples. We continue to add certifications to meet the needs of our clients.

Analytical services include:
- Volatiles (EPA 524.2, 524.3, edb/dbcp, ethylchlorohydrin, 1,2,3-trichloropropane)
- Semi volatiles (EPA 525.2, 525.3, 626)
- Pesticides / Herbicides (EPA 505, 515.3, 515.4, 531.2, 547, 548.1, 549.2, 356, 538, 540)
- Metals (EPA 200.8, EPA 200.7, EPA 245.1)
- Anions and other inorganics
- Nutrients (nitrogen, phosphorus, silica, total organic carbon)
- Asbestos by TEM (EPA 100.2)
- Microbiological (coliforms, plate count, Giardia/Cryptosporidium by EPA 1623, coliphage, pseudomonas, yeast and mold, Legionella)
- Radionuclides (alpha/beta, radium 226/228, uranium, tritium, radon)
- Dioxin (EPA 1613)
- Disinfection by-products (Bromate, chloride, chlorite, THMs, Haloacetic acids -HAA, Chloral hydrate, aldehydes, haloacetonitriles, total organic carbon-TOC, total organic halogen-TOX)

Specialty analytical and consulting services include:
- Algae and algal toxins including microcystins, anatoxin-a, and cylindrospermopsin (by flow cytometry, ELISA, and LC-MS-MS)
- Biopharmaceuticals, hormones, artificial sweeteners, and personal care products (LC-MS-MS)
- Emerging Contaminates (1,4-dioxane, chromium-6, chloride, hormones and PFAS compounds; EPA 537 and 537.1)
- UCMR4 compounds (alcohols, pesticides, semivolatilites, brominated HAAs, metals, algal toxins)
- Taste & Odor (MIB and Geosmin)
- EDTA / NTA
- Acrylamide
- Nitrosamines, including NDMA
- Perchlorate (by IC and LC-MS-MS)
- Quality Assurance consulting
- Sampler training
- LIMS consulting
- Regulatory consulting
- Development of water quality standards

Services:

Accreditations:
Accredited under the National Environmental Accreditation Program in multiple states and holds drinking water approval in 50 US states and Puerto Rico.

Eurofins Frontier Global Sciences
Eurofins Frontier Global Sciences is an analytical laboratory specializing in mercury, trace metals and metals speciation analysis. Since 1991, our expertise in measuring metals has produced innovative and reliable analytical methods that are currently utilized around the world.

Our services cover multiple industries including: Environmental, Power Plant Emissions, Consumer Products, Dietary Supplements, Food Products, Biological Tissue (fish/animal), and Natural Gas and Petroleum, making us experts in the field of metals speciation including Arsenic, Selenium, Mercury, Chromium, Cobalt, Vanadium and Molybdenum

Services:

- ICPMS (inductively coupled plasma mass spectrometry) analysis
- CVAFS (cold vapour atomic fluorescence spectrometry) analysis
- Elemental metals analysis
- Metals speciation
- Metals in fish and other tissues
- Metals in emissions monitoring
- Trace level metals analysis
- Fast TAT (turnaround time)
- Metals in consumer products
- Metals in blood & clinical trials

in the States of California, Arizona (air/ vapor only), Hawaii, Nevada, Oregon and Washington as well as in Guam. In addition to these accreditations and certifications, we also accept and analyse samples from other U.S. States, Territories and Foreign Entities which do not have formal certification programs for air, soil and non-potable water samples. We continue to add certifications to meet the needs of our clients.

Eurofins Lancaster Laboratories Environmental

With more than 50 years of delivering comprehensive laboratory services, Eurofins Lancaster Laboratories Environmental provides unmatched regulatory compliance, capacity and technical expertise in environmental testing services, including air, water, soil, sediment and biota. With a proven track record for providing the highest quality NELAP-accredited scientific services, Eurofins Lancaster Laboratories Environmental offers more methods than any other laboratory in the US.

For a seamless service experience, customers team with scientists and project managers throughout the outsourcing process from testing to monthly reports to 24-hour online data access at myEOL.com.

Located on a 49-acre campus in Lancaster, PA, Eurofins Lancaster Laboratories Environmental is the largest single-site environmental laboratory in the US with state-of-the-art technology and instrumentation housed in a 330,000 square-foot modern facility.

Services:

Environmental Testing Services
- Vapor & Air Analyses
- Petroleum-Related Analyses
- Drinking Water
- Volatiles
- Semi volatiles
- Metals
- Pesticides / PCBs / Herbicides
- Waste Characterization
- Water Quality

Environmental Specialty Services
- Sediment & Tissue Testing
- Method Development
- PFAS (Per and Poly fluorinated compounds)
- 1,4-Dioxane
- Method 25D
- Alkyl PAHs
- Dioxins and Furans
- PCB Congeners
- Explosives

Data Access Options

On-line Data Access—24 hours a day, seven days a week through Eurofins Lancaster Laboratories’ secure internet access, myEOL, which offers clients immediate access to final verified analytical results as analyses are completed and verified in the lab.

Electronic Data Deliverables—Over 200 standard and custom formats available.

Electronic Analysis Reports—Data reporting system reports analytical results with information needed to meet regulatory guidelines for Superfund, RCRA, UST, or State programs.

Data Packages on CD—Eurofins Lancaster Laboratories offers a wide range of data packages to meet reporting and data validation needs with several state specific formats, including NJDEP, TRRP-13, as well as, CLP Level 4 equivalent packages.

Markets Served

Holding NELAP, A2LA and DoD ELAP accreditations and more than 40 state certifications, Eurofins Lancaster Laboratories successfully completes the most demanding environmental testing projects for leading private-sector engineering and consulting firms and Fortune 100 Industrial companies. With one of the lowest employee turnover rates in the industry, Eurofins Lancaster Laboratories gives clients confidence that they receive the same consistent level of expertise and service year after year.

Service Models

Eurofins QC

Eurofins QC, Inc. is a full-service environmental testing laboratory that has been providing analytical chemistry, microbiological and field services and aquatic toxicology testing to a diverse range of clients since 1943.

Conducting operations in Horsham, PA, Eurofins QC is focused on providing testing services that enable clients to meet their regulatory and monitoring commitments. Analytical data is produced within a quality system framework that provides clients with an accurate and representative portrayal of a sample’s constituents.

Housed in an 25,000 square ft facility, Eurofins QC provides chemistry and microbiology capabilities in support of the federal water, waste water and solid and hazardous waste regulations and derivative state regulations in PA, NJ, NY, DE, MD and VA.

Eurofins Spectrum Analytical Massachusetts

Eurofins Spectrum Analytical, Inc. specializes in providing quality analytical data and exceptional customer service for a wide variety of environmental interests.

We offer a full range of test methods for sediments, soils, sludge, solid waste, hazardous waste, drinking water, groundwater, industrial wastewater, plant and animal tissue and air.

Our labs, located in Agawam, MA, are equipped with state-of-the-art technology to automate analysis deliverables, ensure data accuracy and make results readily available to clients.

Eurofins Spectrum Analytical is committed to providing clients prompt, reliable results. Our commitment to quality includes the utilization of reliable and technically sound instrumentation, the employment of experienced chemists and the use of a highly trained support staff.

Our laboratory has been an active participant in the EPA CLP program for over a decade and is consistently ranked as one of the best laboratories in the program by EPA contracted auditors and quarterly blind proficiency test studies.

Eurofins Spectrum Analytical is committed to providing clients prompt, reliable results. Our commitment to quality includes the utilization of reliable and technically sound instrumentation, the employment of experienced chemists and the use of a highly trained support staff.

BIOANALYTICAL SERVICES

Eurofins Pharma Bioanalytical Services is a biologics-focused, global leader in bioanalytical solutions providing over 15 years of industry-leading scientific expertise. We specialize in comprehensive PK/TX, ADA, Nab, Biomarker assays and sample analysis for the world’s largest pharmaceutical and biopharmaceutical companies.

Our mission is to extend our clients' capabilities of improving global health by combining scientific knowledge, capacity, regulatory expertise and flexibility to provide the trusted, relevant information required for the drug approval process.

At the forefront of employing novel approaches to overcome the most complex assay challenges and industry-leadership in developing and performing immunoassays on human and animal specimens, we offer trusted bioanalytical solutions to support studies ranging from preclinical non-GLP to IND enabling Tox studies to multi-national Phase III clinical trials. We can take your biologic drug from research through development to FDA regulatory submission.

- Over 15 years of industry-leading global Scientific Expertise supporting the widest breadth of Biologics’ clinical trials with PK/TX, ADA, Nab and Biomarker assays and sample analyses.
- Versatile Performance to adapt to a client’s specific needs. Clinical or preclinical, regulated or non-regulated, assay development, qualification or validation; we custom design our support to match the client’s program.
- State-of-the-art laboratory facilities in Oxford, UK and St. Louis, USA providing Global Reach and Capacity to address clients' needs while simultaneously offering regionally-based solutions.

FRANCE

Eurofins ADME BIOANALYSES

Eurofins ADME BIOANALYSES is a powerful and complete laboratory for bioanalysis, pharmacokinetics and immunogenicity.

Our bio-analytical team supports discovery, preclinical and clinical studies with method development, validation, and sample analysis in biological matrices for both small and large molecules (proteins, Peptides, Antibodies) with LC-MS/MS, Immunoassays and Immunogenicity assessment studies.

The laboratory is equipped with a LIMS Watson® coupled with ReportDesigner®.

Services:
- Analytical method development using LC-MS/MS or ligand binding assays
- Validation of analytical methods for the determination of small and large molecules
- Bioanalysis to support discovery, preclinical and clinical development
- Pharmacokinetic calculation and interpretation
- Immunogenicity assessment studies (ADA)
- Cell based assay for neutralising test
- Complete platform for ADC (LC-MS/MS and immunoassays available on site)

Accreditations:
- Good Laboratory Practices (GLP)
- FDA inspected

PHARMA DISCOVERY

SERVICES

The Eurofins Pharma Discovery Services business cluster, of Eurofins Scientific, was built by bringing together the market leading expertise of Panlabs (acquired in 2012 from Ricerca), Cerep (acquired in 2013) and EMD Millipore’s Discovery & Development Solutions business (acquired from Merck KGaA in 2014). The combined expertise, knowledge and skill set of these companies brings our clients the additional benefit of a comprehensive portfolio of potency/efficacy, safety, and ADME-Tox assays supplied by a single provider. For >40 years, Eurofins Pharma Discovery Services has been a trusted CRO supporting Drug Discovery from Target Id through to Candidate Selection by offering a comprehensive package of >3000 drug discovery products and services, including in vitro pharmacology products & services, cell-based phenotypic assays, in vitro ADME-Tox, in vivo drug safety & efficacy services, and custom proteins & assay development services.

FRANCE

Eurofins Cerep

Eurofins Cerep was founded in December 1989 in Poitiers, France, as a service company to provide solutions for drug profiling and drug screening in pharmacology, allowing faster and cost-effective drug discovery by identifying at early stages the most promising drug candidates, as well as eliminating those compounds likely to fail in development. Eurofins acquired Cerep in March 2013. Since 2014, Cerep, Panlabs and Discovery Services have merged into Eurofins Pharma Discovery Services.

Services:
- Target profiling
- GPCR Binding, activity and cell based assays Center of Excellence
- Other targets binding, activity & cell based assays
- Custom assay development

Bioinformatics - BioPrint™
- Screening
- Medium throughput capacity
- Discovery research products
- Recombinant epigenetic proteins & enzymes
- ADME

TAIWAN

Eurofins Panlabs Taiwan

Eurofins Panlabs Taiwan Ltd was founded in Taiwan in 1970, and is a pioneer global contract research organisation focused on providing drug discovery services using molecular/cellular and pharmacology assays.

Our scientific portfolio consists of over 1,350 biological tests ranging from molecular assays, to cell-based models, through proof of concept determinations. Eurofins acquired this entity in 2012. Since 2014, Cerep, Panlabs and Discovery Services have merged into Eurofins Pharma Discovery Services.

Services:
- Target profiling
- Molecular Pharmacology (Enzyme, Radioligand binding, cellular biology, functional tissue pharmacology, and Microbiology)
- Preclinical
- Pharmacology (Exposure/Safety, Anti-infective, CNS/Pain, Oncology, Inflammation/Allergy, Cardiovascular, Metabolic, PK, Renal, GI Pulmonary/Respiratory, Hepatics and Metabolic Disease Models)

Tox and DMPK

Accreditations:
- AAALAC-accredited and ISO 9001 compliant, Japanese JRS, International Guiding Principles for Biomedical Research (CIOMS), Agricultural Council (Taiwan) and NIH OLAW compliant (Foreign Assurance #A5890-01)

INDIA

Eurofins Advinus

A premier preclinical contract research company for regulatory Toxicology (Safety Assessment), CMC services, DMPK and Analytical R&D Services. With over 30 years of GLP compliance and certification, Eurofins Advinus serves diverse industries such as Biotech, Pharmaceutical, Biological, Agrochemical, Nutraceutical and Cosmetic. Eurofins Advinus has submitted over 60+ end-to-end IND enabling packages to global regulators such as USFDA, EMA, MHRA, Health Canada and others.

Outsourcing of drug discovery efforts shorten development timelines by reducing the need to dedicate in-house resources to design and validate a multitude of assays.

To fully assist drug discovery and development, Eurofins DiscoverX provides unique and proprietary assay solutions that span the entire drug discovery continuum and support both target-based and phenotypic discovery.

Preclinical drug development is a complex, regulatory and strategy-driven process. The most important element of the preclinical process is to select the best new molecular entities to enter into the clinical trials and to limit failure in full development. With its countless years of professional experience in drug development, Eurofins is well positioned to offer a holistic approach of the compound development in order to maximize the chances of success in the clinical phases.

Our network of expertise and full service is not only a matter of convenience but also an issue of confidence and security to succeed with your project. Our clients select Eurofins for this distinctive match of expertise, flexibility and full service. This beneficial setting explains why we work for 8 out of the 10 biggest Pharma companies.

Eurofins ADME BIOANALYSES

Eurofins ADME BIOANALYSES has been a Eurofins expert in pharmacokinetics and metabolism since 1987.

The laboratory is equipped with a LIMS Watson® coupled with ReportDesigner®.

Our bio-analytical team supports discovery, preclinical and clinical studies with method development, validation, and sample analysis in biological matrices for both small and large molecules (proteins, Peptides, Antibodies) with LC-MS/MS, Immunoassays and Immunogenicity assessment studies.

Services:
- Bioavailability and Blood Brain Barrier permeability screening tests
- ADME studies with radiolabelled molecules (14C or 3H)
- Development and validation of analytical methods in biological fluids and tissues according to FDA and EMA guidelines
- Bioanalysis to support pre-clinical and clinical trials for both small and large molecules
- Pharmacokinetics calculation and interpretation

Immunogenicity
- Specific expertise on bioequivalence studies and drug-drug interaction studies
- Dermal distribution and absorption studies on Franz cells or Bronaugh cells

Specific expertise:
- Analysis of Nicotine, Analysis of vitamins such as Calcitriol, 25-OH D2 and 25-OH D3
- Dermal distribution and absorption studies

Accreditations:
GLP compliant - successfully inspected by FDA on a bioequivalence study and inspected every two years by EMA.

Eurofins OPTIMED

Eurofins OPTIMED is located in the South East of France (Grenoble & Lyon). Since 1990, the company has offered services in Early Clinical Development (phase I/II) including Site Management Organisation & Biometrics.

Eurofins OPTIMED follows all international requirements to carry out clinical studies – ICH recommendation, Good Clinical Practices - and is certified ISO 9001:2000.

Eurofins BioPharma Product Testing Munich

Eurofins BioPharma Product Testing Munich supports your drug development project in all phases from early development to commercialization. Our services during development include ADME, IND-enabling toxicology / PK studies, microbiology and clinical sample analysis. In late-phase and after market approval, Eurofins BioPharma Product Testing Munich provides immunogenicity assessment and bioassays for batch release.

Services:
- Process and Product Related Impurities
- Bioassays
- Method Development & Validation
- Stability & Release Testing
- Sterile & Non-Sterile Product Testing
- Leachables & Extractables Testing
- Immunoanalytical studies
- Bioanalytical studies
- Toxicology studies
- Pharmacology studies

Accreditations:
- Good Laboratory Practice (GLP)
- Good Manufacturing Practice (GMP)
- DIN EN ISO 17025
• FDA audited
• Listed by the World Health Organization (WHO)

Eurofins Genomics

Eurofins Genomics offers a comprehensive services portfolio for the entire drug development process, from preclinical research to clinical phase III trials.

The drug development service portfolio for the modern biopharmaceutical industry includes an exclusive marker set for the general identification of responders/non-responders in the scope of clinical studies and expert consultation by an academic partner in pharmacogenomics. In the field of GMP manufacturing we also offer solutions that can be addressed with genomics technology.

Together with other Eurofins companies like Eurofins Global Central Laboratory, Eurofins Optimed Clinical Research, and Eurofins BioPharma Testing Services a complete service package for even worldwide multi-central registration studies is offered.

Services:

• DNA/ RNA-extraction, e. g. for biobanking
• GLP compliant genotyping and sequencing
• High-throughput genotyping
• SNP, mutation and biomarker analysis
• Analysis of candidate genes
• Expression analysis by Real Time PCR
• Microarrays, e. g. SNP analysis and gene expression
• Biological safety testing, e. g. residual DNA testing or analysis of production strains and cell banks
• Next Generation Sequencing (NGS), like adventitious virus testing, tumour profiling/cancer sequencing, exome sequencing, whole genome sequencing, transcriptome analysis
• Bioinformatics
• Virus and microbiological diagnostics: Virus load determination, genotyping, sequencing and quantitative analyses of viruses and bacteria
• Metagenomic analysis
• Oligo and Gene Synthesis
• Assay development and validation
• Scientific consultancy
• Comprehensive and well-founded consultancy prior to all projects/studies
• Professional project management during the complete project/study
• Dedicated project managers and study directors as competent and reliable contact persons

Accreditations:
The QM/QA-system of Eurofins Genomics is certified according to ISO 9001, including the requirements of ISO 13485 (medical devices requirements). Furthermore we are accredited according to ISO 17025 covering molecular testing methods like Sanger sequencing (e. g. for genotyping within clinical trials), quantitative Real-Time PCR, fragment length polymorphisms analysis and mass spectrometry-based DNA analysis. In addition ISO 17025 accreditation covers next generation sequencing with Illumina technologies.

Eurofins Genomics is also certified for the principals of Good Laboratory Practice (GLP) and compliant with Good Clinical Practice (GCP). We are consistently audited by clients from the pharmaceutical industry according to these GxP regulations. We also regularly perform facility and process audits. We are participating in external proficiency testing (ring trials) on a regular basis.

For further information on the broad portfolio of Eurofins Genomics please have a look on the International Business Line "Genomic Services" section/ Germany in this Group Directory.

PHA RFINS CENTRAL  
LABORATORY  

Reliable, high quality laboratory data is pivotal to the success of clinical trials. Since laboratory testing is our sole focus, we go above and beyond to provide an array of services to ensure that any clinical trial sample is collected, transported, managed, analysed, reported and stored to meet the objectives and purpose of your study. We are dedicated to providing the most cost effective and efficient solutions to pharmaceutical and biotech companies, and CROs alike.

Eurofins Central Laboratory supports its customers across its wholly-owned CAP accredited laboratory facilities in the United States, Europe and Asia. Our harmonized laboratories operate as one. All of our laboratories are connected to one global LIMS and are using the same global standard operating procedures and global reference ranges through the deployment of uniform instruments, reagents, and analytical methods to provide one global data set for submission to health authorities worldwide.

Services:

- Global Clinical Safety and Specialized Testing

A full package of routine and non-routine laboratory testing, including:

- Allergy Testing
- Biomarkers
- Chemistry
- Coagulation
- Endocrinology
- Flow Cytometry
- Genomics
- Haematology
- Immunology
- Immunohistochemistry
- LCMS/MS
- Microbiology
- Molecular Diagnostics
- Pathology
- Serology/Virology
- Spectrophotometry
- Toxicology
- Biomarker Services
- PD - target engagement biomarkers, proof-of-mechanism and proof-of-concept biomarkers
- Biomarkers in clinical trials (exploratory and clinical end-point)
- Fit-for-purpose validation and analysis of commercially available biomarker assays
- Biomarker analysis in non-conventional biological matrices
- A broad range of applied technologies: ELISA, MSD, Luminex, Flow cytometry and LC-MS/MS
- Global Infectious Disease Services
- Central laboratory microbiology to support clinical trials
- Clinical virology services
- Scientific consultancy

Clinical trial supporting services
- Logistics Support and Courier Management
- Global footprint to ensure specimen integrity and optimal turnaround time
- One logistical operating procedure for all laboratory testing applications
- Dedicated specimen kit production facility

Customized collection kits
- Electronic requisition forms
- Customized Investigator Manuals
- Specimen shipping procedure, materials and courier contact information
- Track and trace
- Import and export license coordination
- Investigator Site Support
- Study specific investigator laboratory manual
- Study and visit specific specimen collection kits
- Summary flow charts for experienced users
- Visit specific test schedules
- Multilingual helpdesk for global support
- Daily results reporting by web, email or fax
- Access to real-time global results database via secured Eurofins Medinet Data Portal (EMDP)
- Data cleaning
- Study priming in global LIMS
- Data management
- Sample management and Storage
- Dedicated sample management department
- Registration in LIMS (double entry)
- Barcode labelling for sample tracking
- Automated results reporting into LIMS
- Third party lab shipment management
- Sample storage at 2-8°C, -20°C and -80°C and liquid nitrogen storage
- Short and long term storage
- Project Management
- Global study set-up
- Study specific materials including investigator laboratory manual, specimen kits, shipping materials
- Training investigator sites
- Single point of contact for Monitor
- Monitoring timelines
- Issue management, query solving
- Budget management

Ensure all key deliverables are met

This allows us to combine safety and efficacy analysis with Biomarker Services embedded within one laboratory, introducing cost efficiencies into Sponsor study budgets, and increasing specimen integrity by reducing unnecessary transport. Reliable, high quality laboratory data is pivotal to the success of clinical trials.

It’s the RESULTS THAT MATTER.

Since laboratory testing is our sole focus, we go above and beyond to provide an array of services to ensure that any clinical trial sample is collected, transported, managed, analyzed, reported and stored to meet the objectives and purpose of each study. We are dedicated to providing the most cost effective and efficient solutions to pharmaceutical and biotech companies, and CROs alike.

What differentiates Eurofins from the rest?

Innovation. Whether that is our specimen visibility tool, EzRF (web based requisition), our home based, virtual trial patient specimen collection kits or our mobile laboratory technician service for standardized CAP certified on-site analysis of rapid analytical TAT requirements (PBMC, semen analysis, virology specimen processing), Eurofins Central Laboratory is your analytical solution for Phase 1 to 4 clinical trials.

Services:

- Safety Testing
- Efficacy Testing
- Biomarkers
- Microbiology
- Flow Cytometry
- PBMCs
- Mobile Lab Techs (onsite, standardized analytical services)
- Kits & Logistics
- Sample Management
- Data Management
- Investigator Services.

**BIOPHARMA**

**PRODUCT TESTING**

Eurofins BioPharma Product Testing is the largest network of harmonized bio/pharmaceutical GMP product testing laboratories worldwide providing comprehensive laboratory services for the world’s largest pharmaceutical, biopharmaceutical and medical device companies.

Our service offerings are fully comprehensive and include testing of drug substance, final product, intermediates, and starting materials for both small and large molecule drug products.

Our laboratories offer a broad range of methodologies under GMP authorization, ISO 17025 accreditation and ISO 9000 certification. All analyses are performed according to European and British Pharmacopoeia (EP), United States Pharmacopeia (USP) and Japanese Pharmacopeia (JP), as well as specific customer methods.

With a global capacity of more than 1,600,000 square feet/ 150,000 square meters and facilities located in Australia, Belgium, Canada, Denmark, France, Germany, India, Ireland, Italy, Japan, Netherlands, New Zealand, Spain, Sweden, Switzerland, UK and US, our network of GMP laboratories operates under the same strict quality procedures, LIMS and centralized billing system across 34 locations worldwide.

**Services:**

Biochemistry
- Method Development & Validation
- Residual Impurity Testing
- Protein Characterization

Chemistry
- Extractables & Leachables
- Container Closure Testing
- Metals Analysis
- Method Development & Validation
- Impurities Testing

Facility Validation Support
- Pharmaceutical Water Testing
- Pharmaceutical Gas Testing
- Environmental Monitoring
- Disinfectant Validation
- Cleaning & Other/GMP Process Validations

Microbiology
- Non-Sterile Products Testing
- Sterility Testing
- Endotoxins Determination
- Identification of Microorganisms
- Mycoplasma Testing
- Antibiotic Potency Testing

Molecular & Cell Biology
- Potency Assays/ Bioassays
- qPCR Assays
- Host Cell Protein & ELISA Assays

Stability Storage & testing
- Full ICH Stability Studies
- GMP Storage

Toxicology Services
- Alternative Toxicology
- Genetic Toxicology

Other Specialty Services
- Viral Safety Testing
- Viral Clearance
- Release Testing
- Raw Materials Testing
- Cell Bank Characterization
- Container Testing
- GMP NMR

GMP Manufacturing & Support
- GMP Aseptic Manufacturing (Fill/Finish)
- GMP Non-Sterile Manufacturing
- Formulation
- Clinical Trial Material, Packaging & Logistics

Antimicrobial/ Biocides/ Virucides
- Efficacy Testing
- Physico-Chemical & Analytical Studies

Cosmetics
- Chemical & Physico-Chemical Testing
- Microbiology

CLINICAL DIAGNOSTIC SERVICES

A shared ambition: to offer all our patients the best possible care

Clinical diagnostics at the heart of the healthcare system

Clinical diagnostic tests are a key factor in 70% of medical decisions.

A central element in healthcare, clinical diagnostic testing today contributes to every stage of patient care: predisposition testing, prevention, diagnostics, theranostics and of course monitoring of treatments.

Innovating today for the health of all tomorrow

Eurofins stands for a conception of clinical diagnostics entirely focused on excellence, innovation and technological investment.

Genetics and genomics are gradually marking out the new outlines of tomorrow’s clinical diagnostics and our labs are investing heavily in these advanced technologies (NGS, i.e. Next Generation Sequencing), which already have a large number of applications for many people from NIPT (Non Invasive Prenatal Testing) to predictive genetics of cancers or in personalized medicine that can offer patients individualized treatment based on their genetic and metabolic profiles.

The commitment of our laboratories: to work for public health

A healthcare service available to all

With tens of thousands of clinical diagnostic tests every day, the laboratories of the Clinical Diagnostics division strive to ensure that every patient, wherever he or she lives, is assured of access to the most specialized and most innovative techniques for diagnosis, monitoring and therapeutic adjustment.

With our logistics expertise and our daily sample collection and delivery network, we can guarantee perfect continuity in the provision of care, the same quality and the same access to innovation across all the regions that we serve, to the benefit of patients and the medical profession.

Our local laboratories, our technical platforms and our high specialized clinical testing platforms are thus working in the service of public health, focusing on improving the quality and effectiveness of clinical diagnostics and giving all our partners access to state-of-the-art clinical biology, the biology of today and tomorrow in the service of a more personalized medicine.

Enabling equal access to the most innovative tests

Offering the most innovative tests to the wider population at a cost that is affordable for society, this is our mission.

While promoting prevention and screening, earlier and more accurate diagnoses, more efficient, faster and safer therapeutic management, and at the same time reducing diagnostic and therapeutic error and side effects of treatments, our laboratories also respond to the need to control health spending.

We therefore work closely with the health authorities, clinical pathology professionals and clinicians as well as with public and private hospitals to monitor developments in medicine and to reflect on the positioning, financing and innovation in clinical biology in the service of public health.

GERMANY

Eurofins Genomics

Eurofins Genomics offers a comprehensive services portfolio for the entire drug development process, from preclinical research to clinical phase III trials.

The drug development service portfolio for the modern biopharmaceutical industry includes an exclusive marker set for the general identification of responders/non-responders in the scope of clinical studies and expert consultation by an academic partner in pharmacogenetics. In the field of GMP manufacturing we also offer solutions that can be addressed with genomics technology.

Together with other Eurofins companies like Eurofins Global Central Laboratory, Eurofins Optimed Clinical Research, and Eurofins BioPharma Testing Services a complete service package for even worldwide multi-central registration studies is offered.

Services:
- DNA/RNA-extraction, e.g. for biobanking
- GLP compliant genotyping and sequencing
- High-throughput genotyping
- SNP, mutation and biomarker analysis
- Analysis of candidate genes
- Expression analysis by Real Time PCR
- Microarrays, e. g. SNP analysis and gene expression
- Biological safety testing, e. g. residual DNA testing or analysis of production strains and cell banks
- Next Generation Sequencing (NGS), like adventitious virus testing, tumour profiling/cancer sequencing, exome sequencing, whole genome sequencing, transcriptome analysis
- Bioinformatics
- Virus and microbiological diagnostics: Virus load determination, genotyping, sequencing and quantitative analyses of viruses and bacteria
- Metagenomic analysis
- Oligo and Gene Synthesis
- Assay development and validation
- Scientific consultancy
- Comprehensive and well-founded consultancy prior to all projects/studies
- Dedicated project managers and study directors as competent and reliable contact persons
- Expert advice on the evaluation and interpretation of results
Accreditations:
The QM/QA-system of Eurofins Genomics is certified according to ISO 9001, including the requirements of ISO 13485 (medical devices requirements). Furthermore we are accredited according to ISO 17025 covering molecular testing methods like Sanger sequencing (e.g. for genotyping within clinical trials), quantitative Real-Time PCR, fragment length polymorphisms analysis and mass spectrometry-based DNA analysis. In addition ISO 17025 accreditation covers next generation sequencing with Illumina technologies.

Eurofins Genomics is also certified for the principals of Good Laboratory Practice (GLP) and compliant with Good Clinical Practice (GCP). We are consistently audited by clients from the pharmaceutical industry according to these GxP regulations. We also regularly perform facility and process audits. We are participating in external proficiency testing (ring trials) on a regular basis.

For further information on the broad portfolio of Eurofins Genomics please have a look on the International Business Line "Genomic Services" section/ Germany in this Group Directory.

Eurofins LifeCodexx
Headquartered in Konstanz (Germany), Eurofins LifeCodexx has been developing innovative and clinically validated non-invasive diagnostic tests based on the newest molecular analytical methods since 2010.

With the PrenaTest®, Europe’s first non-invasive prenatal test (NIPT) for the determination of the most common chromosomal disorders in unborn children, launched in 2012, Eurofins LifeCodexx has been changing prenatal diagnostics considerably.

The test is performed within Germany in strict conformity with the highest quality standards as per the European Directive on In-vitro Diagnostic Medical Devices.

INDIA

Eurofins Clinical Genetics India

Eurofins Clinical Genetics India (ECGI) is working with Next Generation Technologies for molecular genetic testing and carrier screening for patients care.

Over the past decade, next-generation sequencing (NGS) has led to an exponential increase in our understanding of the genetic basis of disease, which has provided insights into molecular based prognosis & diagnosis.

ECGI's integrated approach is to create comprehensive map of genetic disease using automations and high through-put sequencing, genotyping & microarray tools to revolutionize the patient care. ECGI strive to make the genetic testing process affordable, efficient with actionable information to our researchers, clinicians and patients.

The ECGI team and its collaborators across the globe have rich expertise and experience in implementation of Omics technologies to create innovative solutions for Clinical Genomics and Genetics.

Services:
• Non-Invasive Prenatal Testing (NIPT)
• Medical Exome Sequencing
• Multigene NGS panel for Molecular Genetics Testing
• Genetic Carrier Screening

Accreditations:
(In Process)
• ISO 9001: 2015
• ISO/IEC 17025 (NABL Accredited Medical Testing)
IRELAND

Eurofins Biomnis Ireland

Accredited to the ISO 15189 medical testing standard, Biomnis Ireland Medical testing (formerly Claymon Laboratories) is the leading independent provider of medical laboratory testing services in Ireland.

We are proud to offer our clients an accredited pathology service which uses the most sophisticated diagnostic equipment and techniques in all fields of pathology, including a dedicated pathology transport service, expert medical pathologist support and novel IT connectivity solutions to meet all of your pathology needs.

Biomnis processes over 250,000 patient tests per week, providing rapid turnaround times for over 2,500 clinical tests across all biomedical disciplines.

Services:
- Autoimmunity
- Allergy
- Microbiology
- Infectious serology
- Haematology
- Specialised biochemistry, physical chemistry and toxicology
- Immunochemistry
- Endocrinology
- Antenatal diagnostics
- Cytogenetics
- Histopathology & Cytopathology
- Fertility Testing

Accreditations:
- ISO 15189

JAPAN

Eurofins Clinical Genetics Japan

Eurofins Clinical Genetics K.K. is a clinical laboratory working with cutting-edge technology and providing new testing services in Japan. The company was established in 2015 and started a non-invasive prenatal genetic testing (NIPT) service in 2016 by next generation sequencing (NGS).

Eurofins Clinical Genetics K.K. always offers the best quality service to support our customers.

Services:
- Eurofins Clinical Genetics K.K. is providing NIPT services. We can handle samples from all over the world in our laboratory.

Accreditations:
- Our laboratory is accredited by the College of American Pathologists (CAP). We also obtain the PrivacyMark system of Japan Information Processing Development Corporation (JIPDEC).

ITALY

Eurofins Genoma

With 20 years of clinical testing innovation, Genoma offers a wide range of specialty diagnostic testing services, and has developed a strong reputation in molecular biology and cytogenetics.

Specifically, the company is a pioneer in non-invasive pre-natal testing (NIPT) in Italy, and leads the industry in innovative diagnostic tests in oncology.
Since our inception in 1988, we have worked to consolidate day as a large clinical laboratory. After 25 years of experience and a proven track record, Megalab is currently one of the largest laboratories in Spain.

We are a national leader in services, information, management and diagnostic tests clinical analysis and pathology. We also lead the management of intra-hospital laboratories in the country, with presence in 54 private hospitals that serve more than 4,500 beds.

We have a network of 60 laboratories covering the entire national territory and offer our services to all medical societies, health centers and hospital management companies. More than 500 centers send samples to our headquarters in Madrid, where we carry out about 10,000 tests per day.

We provide our customers with the latest technological advances in order to provide an effective response and quality service to our patients.

Accreditations:
- ISO 9001
- ISO 14001

**Eurofins Diatherix**
Based in Huntsville, Alabama, Diatherix Eurofins is a highly-specialised laboratory providing cutting-edge molecular diagnostic testing services to hospitals and physicians using proprietary TEM-PCR™ (Target Enriched Multiplex Polymerase Chain Reaction) technology for precise detection of infectious diseases at high levels of sensitivity and specificity, and at very short turnaround times.

TEM-PCR™ is a breakthrough molecular multiplex technology that allows not only rapid DNA/RNA identification of multiple pathogens in a single sample, but also specific genetic drug resistance diagnostic, in as little as 6 hours. Diatherix has developed several diagnostic panels to identify multiple organisms in samples quickly and accurately, helping physicians and healthcare providers choose more effective antimicrobial therapy and improve patient outcomes. The company’s service offering and expertise therefore fits perfectly with Eurofins’ recent acquisition of ViraCor and its core competence in infectious diseases, immunology and transplant cases.

Eurofins Genomics
Eurofins Genomics is accredited for ASRs and IVD applications through our cGMP facility in Louisville. We offer cGMP certified DNA/RNA oligonucleotides, and CLIA and CAP accredited sanger sequencing. In addition, our products and services include library assays, Next Generation Sequencing, gene synthesis, gene fragments, applied genomics, genotyping, and gene expression.

For GMP projects, we work with the client to provide custom solutions and custom down-stream processes to meet your regulatory needs.

Services:
• cGMP DNA / RNA Oligonucleotides
• Each GMP project receives a devoted project manager
• Kit packing
• DNA Sequencing in tubes, plates and kits.
• Gene Synthesis & Synthetic Biology
• Gene Fragments
• Next Generation Sequencing
• qPCR and MGB-eclipse probes
• Library Assays
• Applied Genetics: Genotyping, Gene Expression & Microarrays

Accreditations:
• ISO 9001:2008
• ISO 13485:2003
• CLIA accredited
• CAP accredited

Eurofins Clinical Molecular Testing Services

Eurofins Clinical Molecular Testing Services Laboratory provides clinical Sanger sequencing and clinical next generation sequencing for the identification and confirmation of human genetic variants.

Services:
- DNA extraction from whole blood, buccal swabs and saliva; design and validation of Sanger sequencing assays for SNPs and small insertion or deletion variants; design and validation of fragment size and microsatellite assays; next generation sequencing cystic fibrosis mutation panel. Fast turn-around-time; customized patient reports.

Accreditations:
- CLIA, CAP; New York, California, Pennsylvania, Maryland and Rhode Island state CLIA licenses

MEDICAL DEVICE TESTING

From implants and instruments, to single-use and combination products, as well as active electronic devices, Eurofins Medical Device Testing provides the optimal strategy for all types of medical devices and delivers rapid turnaround times with the highest level of service and most advanced technologies.

With extensive knowledge of the commercialization process, regulatory requirements and scientific trends in the Medical Device Industry, our scientists and engineers have been assisting companies, large and small, with developmental testing and regulatory submissions for more than 25 years.

Our 16 state-of-the-art facilities throughout North America, Europe and Asia Pacific offer extensive capacity and the highest level of instrument technology, enabling us to provide the full scope of testing services required by the Medical Device Industry.

Eurofins Medical Device Testing can help develop and execute your test plans and navigate the regulatory pathway to market anywhere in the world. Our laboratories maintain quality systems compliant with cGMP, GLP, and ISO 17025, and conducts testing in accordance with ISO, ASTM, ANSI, AAMI standards, as well as custom test methodologies to meet the unique needs of our customers.

For a complete list of testing services for each country, please visit our website www.eurofins.com/medical-device/services/

EUROFINS CDMO

Eurofins CDMO (Contract Development & Manufacturing Organization) helps pharmaceutical and biopharmaceutical companies move rapidly from research stage of NCE/NBE development to clinical stages with integrated and time-efficient services to help compress timelines to market.

From formulation screening and development, analytical development, stability studies and pre-clinical safety assessment studies to sterile and non-sterile manufacturing, IND/IMPD and NDA/CTD services, as well as clinical trial material including packaging and logistics, Eurofins CDMO delivers comprehensive solutions to streamline the development and manufacturing of a variety of product types, delivery systems and dosage forms.

With 13 state-of-the-art facilities in the US, Europe and India and global regulatory expertise, Eurofins CDMO provides high-quality, customized solutions for complex products and unique production processes, specializing in the development of innovative formulation technologies and solutions to enhance bioavailability and control drug release for difficult-to-formulate drug candidates.

For nearly 20 years, Abraxis has been developing, manufacturing, and marketing rapid environmental, food, and life sciences test systems, including immunochemistry products and methods, to meet the testing needs of industry and research.

Through continuous collaboration with global government, industry, and academic leaders, Abraxis has built up a strong expertise in custom assay development for the food and environmental industries.

Furthermore, Abraxis has created a wide product portfolio across different technologies, formats and applications including field and lab based testing solutions for both fresh and marine water algal toxins, pesticides, GMO detection and the novel magnetic separation technology AbraMag™.

Many methods are validated/verified by regulatory agencies such as US federal agencies including the US Environmental Protection Agency (EPA), the US Department of Agriculture (USDA), the US Geological Survey (USGS), the US Food and Drug Administration (FDA), the Japanese Ministry of the Environment, and the World Health Organization (WHO).

Abraxis holds, or is exclusive licensee, of several key technology patents, with additional applications in process.

Eurofins Korea Analytic Service Co., Ltd.

Eurofins Korea Analytic Service is a laboratory that has been providing analytical services since 2000, performing chemical, microbiological, organic, inorganic and toxicological analyzes in environmental, food, cosmetics and consumer products.

Services:

Environmental Testing Services (water, soil, waste and atmospheric emissions):
• Dioxins and dioxin-like compounds, PCBs and related persistent organic pollutants (POPs)

Food and Livestock products Testing Services:
• Pesticide analyses for organic foods
• Pesticide analyses based on QUECHERS GC-MS & LC-MS/MS
• Nutritional fact analyses
• Microbiological analyses
• Heavy metals analyses

Cosmetics Testing Services:
• Chemical Testing
• Microbiology
• Safety Testing

Human Biomonitoring Service:
• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on humans

Accreditations:
The laboratory is accredited by KOLAS, the Korea accreditation organization, in accordance with ISO 17025.
• Ministry of Food and Drug Safety: Food, Livestock Products, Cosmetics
• National Institute of Environmental Research: POPs Sampling & Analysis, Waste Analysis (General, PCBs), Air pollutant
• National Agricultural Products Quality Management Service: Safety Inspections

EUROFINS EVIC PRODUCT TESTING ROMANIA SRL

Eurofins EVIC Romania was founded in 2004 in Bucharest and it is ever since a reference center in the area for testing topical products.

Currently, the lab is a pharma-oriented experimentation center having 15 years of experience and characterized by continuous education and pursuing new developments. The center is specialized in testing borderline products and applied research, known and appreciated for the capacity of developing and performing customizable and high complexity projects.

SPAIN

Eurofins Product Testing, Cosmetics & Personal Care Spain

Eurofins Product Testing, Cosmetics & Personal Care Spain is one of the largest and leading independent laboratories in Europe in the field of Clinical Testing and Toxicological Expertise, mainly servicing the cosmetic and dermo-pharmaceutical industries. The company employs more than 100 staff across Europe and, with over 40 years of specialised experience, has earned a very strong reputation for its expertise and experienced team.

Eurofins Product Testing, Cosmetics & Personal Care Spain works with major European cosmetic and dermo-pharmaceutical manufacturers. The laboratory’s main field of expertise is the development of toxicological Clinical Tests and safety assessment of each formulation.

Eurofins Product Testing, Cosmetics & Personal Care Spain offers a broad spectrum of clinical tests for cosmetics, as well as hygiene products and detergents. Alongside tolerance and efficacy clinical tests and in vitro tests, our service portfolio includes chemical, physical and microbiological analyses.

Services:

Clinical Testing (Safety & Efficacy)

Safety:
• Patch Test
• Open Test
• Sensitisation Test (Human Repeated Insult Patch Test)
• Photo-toxicity Test
• In-use Test under Medical Control: dermatologist, ophthalmologist, dentist, gynaecologist, pediatrician, etc.
• Efficacy / Claim Substantiation:
  • Moisturising: Corneometer®
  • Skin barrier: Tewameter®
  • Anti-ageing: Silicone Replicas & Fringe Projection
  • Skin Elasticity, fFirmness: Cutometer®
  • Skin Color: Colorimeter® and Chromameter®
  • Hair Care: Antidandruff, hair loss (PTG), sebum
  • Sun Protection: SPF in vivo ISO 24443, UVA in vivo ISO 24442, UVA

in vitro ISO 24443
• Water Resistance
• Make-up: Long-lasting
• Clinical Scoring by Experts
• Tailor-made Protocols
• Toxicological Expertise & Safety Assessments
• Safety Assessment Compliant with EU Cosmetic Regulation 1223/2009 by toxicologists (EUROTOX)

Accreditations:

• ISO 9001: 2015

**Eurofins Bactimm**

Eurofins Bactimm is a microbiological contract laboratory with a focus on the pharmaceutical and medical device industry. Eurofins Bactimm also provides microbiological testing services to the health care and cosmetics industry.

Eurofins Bactimm was founded in the eighties, originally as a manufacturer of microbiological culture media, specifically for clinical purposes.

Over the years, Eurofins Bactimm introduced testing services for the medical devices, food and veterinary industries as well as for hospitals. In 2000, EU-GMP certification was acquired in Nijmegen and a broad range of microbiological tests were introduced to the market, including testing of pharmaceuticals, suitability testing, qualification of irradiation processes, disinfectant testing and container closure testing.

In 2010, Eurofins Bactimm moved to newly build cleanroom facilities.

**Services:**

- Microbiological Quality Control Testing - AI’s, raw materials, finished products and medical devices in compliance with cGMP
- Analytical Method Development and Validation
- Disinfectant Efficacy Studies
- Microbiological Contamination Control in Cleanrooms

**Accreditations:**

- GMP compliant
- ISO 9001: 2008
- ISO 13485: 2003
- GGO

**Eurofins Product Testing Services UK**

Eurofins Product Testing Services UK is highly-experienced in helping suppliers of non-food products meet their own safety criteria as well as those imposed by customers and the law.

Our reputation for providing an efficient and cost-effective service is unparalleled, and we count many of the largest consumer product companies as our customers. In addition to our reliable testing services, we also provide advisory and support services to our customers to solve problems and interpret testing results in the light of recent developments and regulations.

Our experts are involved in many areas of safety and so we can provide our customers with authoritative interpretation of results.

**Eurofins CRL (Piscataway)**

Eurofins CRL operates as an independent contract laboratory providing a wide range of clinical safety and efficacy testing to the cosmetic, beauty products, personal care and pharmaceutical industries.

Located in central New Jersey, CRL is dedicated to conducting human clinical test procedures to determine the safety and efficacy of cosmetic, personal care, and OTC drug products. The company focuses its clinical expertise in the areas of...
dermatology, photobiology, ophthalmology, bioinstrumentation, microbiology, cosmetology, clinical trials, and associated services.

CRL operates a 22,000 square foot clinical testing facility with approximately 75 employees in Piscataway, NJ.

CRL was founded in 1992. The objective in starting the business was to develop a leading independent laboratory for in vivo clinical testing, providing clients with customised safety and efficacy testing programs for consumer and pharmaceutical products.

The company maintains a database containing over 25,000 panelists, each having completed a comprehensive medical history and product usage survey. CRL can design clinical trials utilising over 30 different study-related variables, which include age, race, sex, skin type, and product usage practices using its existing panelist relationships.

CRL has completed over 20,000 clinical testing studies for more than 300 different businesses and has established long-term contracts with some of the largest consumer product companies in the world. The company routinely conducts studies in relation to anti-aging claims, SPF efficacy, acne treatment and a variety of other cosmetic product categories. The company has established a reputation for excellence in clinical studies and testing.

CRL performs a wide range of clinical safety and efficacy testing which can be categorised into three primary areas including: (i) Repeated Insult Patch Test ("RIPT") which is the industry standard for dermal sensitisation testing; RIPT is used predominately for skin care products, color cosmetics, woven and non-woven fabrics and fragrances, (ii) In-Use Safety Studies which allow product vendors to make dermatological safety in-use claims such as "Dermatologist Tested" and "Safe for Sensitive Skin" or any other substantive safety claims, and (iii) traditional efficacy and safety assessments that provide evidence of the efficacy of a particular consumer product and product claim substantiation and authentication.
GENOMIC SERVICES

With facilities in Europe, the United States and Asia, Eurofins’ genomic services deliver frequently used services such as DNA & RNA oligos and synthetic genes right through to genotyping, next generation sequencing and transcriptomics. The Eurofins’ genomic services stand out for innovative technologies in the life science arena especially for pharma, diagnostics, food, agriculture, biotechnological and research markets.

Eurofins Genomics

Eurofins Genomics offers a wide array of genomics services including DNA sequencing, DNA / RNA synthesis and bioinformatics for academic and industrial research.

We offer one of the fastest turnaround times for sequencing in the country, the lowest error rate in the industry for Sanger sequencing and oligonucleotides, and our approach is highly service oriented.

Services:
• DNA extraction and Purification available
• DNA / RNA Oligonucleotides with a variety of options, purifications and modifications available.
• DNA Sequencing in tubes, plates and kits.

GERMANY

Eurofins Genomics Germany

Eurofins Genomics is globally known for its innovative technologies in the life science arena including academic institutions, biotech and the pharmaceutical industry. The company has established an outstanding team of more than 600 talented genomics experts and a broad range of technologies in the field of genomic services, forensics, agroscience, pharmaceutical, environmental, food and feed testing at our fully automated production facilities in Europe, USA, Japan and India.

This unique team supports Eurofins Genomics' approach to offer best practices and flexibility for all clients – from academic institutions to large companies around the world.

Services:
Eurofins Genomic Markets
Pharma & Diagnostics

Eurofins Genomics has extensive experience in applying the different genetic analysis methods and techniques which are crucial for the entire drug development and production process:
• Preclinical phase through all phases of clinical trials (phases I, II and III)
• Quality control for production of biologicals

Comprehensive services are available for all your study or project needs in the field of analysis, research and development. Amongst others the Eurofins Genomics services portfolio covers DNA/RNA extraction for biobanking, GLP-compliant genotyping
and sequencing, biomarker analysis, residual DNA testing, adventitious agent testing via NGS or analysis of production strains and cell banks. These services are available from single sample analysis all the way through to the high throughput levels involving several thousand samples.

Agriculture & Food

Important traits in agricultural plants and livestock such as yield, drought resistance, pathogen resistance, feed efficiency and quality linked parameters are genetically encoded. Eurofins Genomics agrigenomics services support:

- Plant breeding
- Farm animal & pet breeding
- Food production & authenticity testing

Eurofins Genomics provides a flexible, competent service with global reach, high industry standards and scalable capacity. One of the in-house experts will be assigned as your project manager ensuring excellent support and communication. Together you will find the perfect solution for your genomic characterisation and marker identification projects by integrating the latest technologies for sequencing and genotyping.

Industrial Biotechnology

Eurofins Genomics can offer you individual genomics solutions from the companies' industry leading service portfolio. These include:

- DNA & RNA extraction services
- Genomic, metagenomic & genetic characterisation
- Characterisation of genetic variability
- Residual host cell and pathogen DNA & RNA analysis
- Design and production of synthetic genes, gene fragments and gene evolution libraries
- GMO & genetic insert characterisation
- Assay design & validation

Research

From frequently used services such as DNA & RNA oligos and synthetic genes right through to genotyping, next generation sequencing and transcriptomics, Eurofins Genomics can offer you a broad portfolio of solutions and services for your research:

- DNA & RNA Oligonucleotides
- Custom DNA Sequencing
- Next Generation Sequencing (NGS)
- Gene Synthesis & Molecular Biology
- Genotyping & Gene Expression Services

With a great deal of expertise and experience in handling all types of research projects, the Eurofins Genomics expert team employs more than 80 Ph.D’s in all disciplines related to genomics to make your project a success.

Accreditations:

Focusing on providing excellent customer support, together with highest quality services, Eurofins Genomics ensures to remain as one of the world’s leading genomic service providers. The company’s QM/QA System is ISO 13485 certified. As an ISO 17025 accredited DNA-testing laboratory approved by DAkkS, Eurofins Genomics also offers testing services that are compliant to the principles of Good Laboratory Practice (GLP) and Good Clinical Practice (GCP).

Blue Heron Biotech
Blue Heron Biotech has been leading the gene synthesis industry since the very beginning. In 1999 we had one goal, to make gene synthesis an accessible service for the research community and beyond. Our sole focus is gene synthesis and cloning, providing you with a fully customizable experience and a dedicated team who specializes in difficult to build genes.

Our proprietary GeneMaker multi-technology platform enables us to synthesize nearly any construct, while online ordering and flat rate pricing provide a straight-forward process.

Services:
Blue Heron Biotech has been providing customers solutions for complex DNA synthesis for nearly two decades. Since 1999, Blue Heron has delivered millions of base pairs of perfectly accurate genes to customers worldwide.

Using our proprietary GeneMaker® multi-technology platform, Blue Heron will synthesize nearly any gene. Our history of delivering high quality DNA
synthesis products to our customers, including top 20 pharma and biotech companies, has established Blue Heron as the gold standard in gene synthesis.

Our partnership with OriGene allows us to use their collection of expression vectors combined with Blue Heron’s gene synthesis capacity. Located in Bothell, Washington, Blue Heron Biotech provides dedicated customer service, strict confidentiality, exceptional synthesis standards, and products made entirely in the U.S. Whether you need one gene or one thousand, the simplest sequence or comprehensive codon substitutions, our experts will deliver.

Utilizing multiple design techniques, we provide the right synthesis solution for challenging sequences. Blue Heron Biotech specializes in synthesis of complex DNA, including designs with hairpins, repeats, GC rich regions, and lengths over 20Kb.

We provide an unmatched level of service and attention to detail to give you the assurance that your project will be delivered as ordered and on time.

FORENSIC SERVICES

Our ISO 17025 accredited DNA laboratories offer a full range of testing services - from DNA extraction to high throughput DNA sequencing, SNP and scene of crime analysis.

From the analysis of conventional samples (blood, urine and oral fluids) through to the development and analysis of specialist samples (hair and nails), our range of detectable drugs and chemicals is unsurpassed across Europe.

BELGIUM

Eurofins Forensics Belgium

Eurofins Forensics Belgium is a multidisciplinary lab using many different analytical techniques. While the forensic team is usually involved in work for the police, the coroner and the criminal courts, the counter analyses of biopharmaceuticals or control of agricultural products and environmental waste are also aspects of forensic toxicological work.

Our team consists of specialists who are the best in their field and always up-to-date on national and European regulations.

Services:

Services offered: analytical toxicology in body fluids and tissues (gases, solvents, medicines and drugs, pesticides, heavy metals, toxins), toxicokinetics, DNA genotyping (STR and sequencing), kinship and paternity testing, arson analysis, drugs prone to abuse, drowning analysis, risk analysis (REACH), and legal testimony.

Accreditations:

FRANCE

Biomnis

Biomnis has a specialised genetic fingerprinting laboratory with all the equipment and accreditations necessary to perform such tests (which are subject to very particular legal constraints). Legal experts from the genetic fingerprinting laboratory are consulted in a variety of different fields, including evidence samples analyses (exhibits), profiles for the Criminal Registry, mitochondrial DNA sequencing and paternity tests.

Services:

The Biomnis Genetic Fingerprinting Department has special skills in a number of areas:

• Trace analysis: this activity consists of simple isolated trace amounts (officially sealed exhibit samples) specimens follow orientated testing to define the human biological nature of the traces (with BlueStar® staining and specific CrimeScope® illumination); Genotyping of the trace on at least 15 sequences; Contact traces (material which cannot be seen by the naked eye) are harvested and their genetic material is concentrated to determine its nuclear DNA and genotype.

• Profiling for the Criminal Registry (the national genetic fingerprint data base) and of other individuals: double amplification and genotyping in distinct reactions for all identifications, even of homozygotes and those with a mutation in a priming sequence.

• Mitochondrial DNA: MtDNA sequencing from an isolated trace or from a sample of saliva or blood.

• Paternity tests: civil and criminal cases with direct genotyping to confirm or rule out direct parentage, brother- or sisterhood and even more distant relationships.

• Material from a prematurely terminated pregnancy to confirm or rule out direct relationships.

• Complex evaluations, specific procedures, emergency treatment, etc.

Laboratoire Toxlab

Toxlab is one of the leading independent analytical laboratories within France specialising in the provision of an unparalleled range of toxicology testing and support services to police & governmental institutions:

• Post-mortem toxicology

• Road Traffic Accidents

• Doping

• Investigation in Drug-Facilitated Crimes and Drug-Facilitated Sexual Assault

• Expert Witness interpretation in toxicology

• Analysis of seized street drugs. Detection of traces of narcotics on different materials (banknotes, cell phones, clothes)

• Workplace drug testing and toxicological analysis in occupational medicine (metals in blood, urine and hair, solvents)

With over 20 years’ experience in toxicological analysis in a variety of matrices, especially for forensic cases, our ISO/CEI 17025:2005 accredited laboratory undertakes a comprehensive range of scientific analysis in accordance with international criminal justice standards.
State-of-the-art technologies: gas chromatography coupled with flame ionization (GC-FID), with mass spectrometry (GC-MS, GC-MS/MS). Liquid chromatography coupled with diode array detector (LC-DAD), mass spectrometry (LC-MS/MS), refractometry (LC-Ref). Ultra high pressure liquid chromatography coupled with diode array detector (UHPLC-DAD), mass spectrometry (UHPLC-MS/MS), head-space gas chromatography (HS-GC-MS).

Clients: French Justice and Police departments; British and American Coroners; French, British and American Lawyers; National Forensic Laboratories from Ireland, Norway; Private clients from France and all over the world.

Services:

- Toxicological investigation to establish the cause of death: General Unknown Toxicology (GUT), Post-mortem Toxicology
- Analysis in Road Traffic Accidents (RTAs): blood alcohol determination (BAC) and urine alcohol determination
- Characterisation of the use of performance-enhancing human and animal sports (Doping)
- Investigation in Drug-Facilitated Crimes (DFC) and Drug-Facilitated Sexual Assault (DFSA): blood, urine and hair analysis
- Expert Witness interpretation in toxicology. Testifying in Court
- Determination of heavy metals in blood, urine and hair (Occupational Medicine)
- Workplace drug testing (WDT): alcohol, narcotics, benzodiazepines, antidepressants. Toxicological analysis in occupational medicine (mainly metals and solvents)
- Analysis of seized street drugs
- Detection of traces of narcotics on different materials (banknotes, cell phones, clothes)

Accreditations:

- NF EN ISO/CEI 17025:2005

Laboratoire Chemtox

Chemtox is a pioneer in the toxicological analysis of blood, urine, oral fluids and hair for the characterization and determination of a wide range of chemical compounds.

The ISO 17025 accredited laboratory provides services to the criminal justice and industrial clients throughout Europe, and delivers solutions and expertise with:

- Toxicological analysis for forensic investigation
- Expert Witness interpretation in toxicology
- Detection and quantification of pesticides
- Analyses of biopharmaceutical drugs, hormones and therapeutic agents
- Detection and quantification of volatiles substances (solvents, hydrocarbons) and gases
- Detection and quantification of metals and trace elements in blood, urine and hair

Services:

At the heart of the activity of the laboratory are forensic activities for French and European police and Courts of Justice in order to determine cause of death, screen for various toxins, alcohol use, drug searches or highlighting doping or food contamination.

Skills and experience in forensics allows for diversification of analyses to suit industrial sectors:

- Cosmetics: traces of heavy metals, toxicity
- Biopharmaceuticals: identification of undesirable compounds
- Food: detection of toxic contaminants, controlled substances (drugs, doping)
- Environment: environmental toxins and exposure of employees

Accreditations:

- NF EN ISO 17025

Eurofins IFEG

Eurofins IFEG is involved in DNA Forensic analysis for the justice as well as evidences from crime scene and paternity testing.

Accreditations:

Services:

Our services are demanded by a wide range of national and international clients such as police forces, courts, lawyers, the legal system, industry, R&D organisations, academia and private persons.

- DNA profiling for inclusion into national DNA databases
- DNA profile interpretation and comparison for suspects - scene linkage and multiple scenes - incident
linkage
- Analysis of Crime Scene Stains and evidences including court-compliant expert witness reports and court appearance
- Paternity Testing and complex relationship testing
- Ancestry Testing
- Court-compliant DNA sampling
- R&D Services
- Validation and optimisation of machinery and consumables used in DNA forensics
- Testing of consumables and devices for traces of human DNA, e.g. medical consumables, swabs, micro titre plates, pipette tips, syringes.
- Disaster Victim Identification
- Animal parentage testing
- Non-human DNA forensics, for example with food, animals, plant and unknown biological materials

Accreditations:
- Comprehensive ISO 17025 for Forensic Genetics
- Staff security vetted by the German Police
- Lab is regularly audited by Police forces for quality and security.
- Regular and long-term participation in numerous ring trials.
- Eurofins Medigenomix Forensics GmbH has been accredited by the Ministry of Justice as a body that may carry out parentage tests directed by the civil courts in England and Wales under section 20 of the Family Law Reform Act 1968.

Eurofins Workplace Drug Testing

Eurofins Workplace Drug Testing offers a complete service for pre-employment, random, for cause workplace screening, and abstinence monitoring, with expert interpretation, and the ability to find and associate other important signs to substantiate results.

We provide our services across a wide range of markets including construction, aviation, utility, maritime, ground transportation and defence. In addition, our forensic science business provides the majority of the Toxicology analysis for Police and Courts. As a result, we are able to apply a wealth of experience,
scientific techniques, skills, and expertise to help organisations minimise the risk in the workplace from drug and alcohol misuse

Services:

• Drug and alcohol testing
• Drug and alcohol policy advice
• Sample collection network
• Point of Care Testing Collection Kits
• Training and education
• Medical Review Officer (MRO) provision
• Forensic expert witness

Accreditations:

• ISO 17025
• RISQ's

CONSUMER PRODUCT TESTING

The Eurofins Group provides testing, certification, and consulting on the quality and safety of products to manufacturers, distributors and retailers. Our expertise encompasses a multitude of national and international specifications and regulations. The Group applies the highest technical standard to ensure impartial testing and independent judgement.

The Consumer Product Testing (CPT) Division covers the needs of retailers, brand owners, manufacturers and providers of raw materials, components and any other economic agent throughout the supply chain. The service scope of the Division ranges from regulatory support or assessment during the product development stage, to factory audits facilitating manufacturer consideration, all the way through testing, product validation, documentary checks, and certification during the pre-production and mass-production stages, down to inspections and pre-shipment testing before expedition or warehouse inspections, control plans and failure analysis once the products are in market.

The Consumer Product Testing Division comprises several separately-managed “International Business Lines”. These International Business Lines group together laboratories that are focused on the same specific industries, for example:
- Cosmetics & Personal Care
- Digital Media
- Electrical & Electronics and Industrial Services
- Softlines & Leather

For information on laboratories serving the above listed business lines, please refer to the corresponding section in this Directory.

In this section, named “Consumer Product Testing”, you will find the laboratories in the Division which are not specific to any of the above business lines, but instead serve multiple industries and therefore cover a vast array of consumer products, including most product ranges in industries including:
- Household products (furniture, decoration, bazaar, hygiene, detergency, appliances, lighting, kitchen and tableware, etc.)
- Toys and childcare
- Outdoor (camping, luggage, sports, garden products, etc.)
- DIY / Home improvement

In other words the Eurofins CPT Division cares for the safety, quality and compliance of any product you might find in your house or garden.

CHINA

Eurofins Product Testing Service (Shanghai) Co., Ltd.

Eurofins Consumer Product Testing Shanghai provides a variety of different tests supporting the activities of international buyers when they source from China.

The main product categories covered by Eurofins Consumer Product Testing Shanghai include:
- Construction & DIY
- Cosmetics
- Detergents, Maintenance Chemicals, Biocides
- Garden
- Household & Bazaar
- Hygiene, Paper & Pulp
- Miscellaneous, Raw materials, Natural, Synthetic
- Packaging
- Personal Protective Equipment
- Sport & Leisure

Eurofins Testing Technology (Shenzhen)

Eurofins Product Testing Shenzhen provides a variety of different tests supporting the activities of international buyers when they source from China.

The main product categories covered by Eurofins Product Testing Shenzhen include:
- Toys
- Hardlines
- Textiles & Footwear
- Food Contact Products
- Cosmetics
- Household Electrical Products
- Writing & Marking Instruments
- CeramicWare
- Candles & Candle Containers
- Indoor Air

Services:
- Physical & Chemical Analysis
- Flammability Testing
- VOC Emission
- Electrical Safety
- Inspection & Audit Services

Accreditations:
- CNAS ISO/IEC 17025
- CMA Accreditation
- CPSC approval for the US market
- Mutual acceptance with many national certification bodies worldwide
DENMARK

Eurofins Product Testing Denmark

Eurofins Product Testing A/S specialises in the testing, consultancy and certification of the chemical safety of consumer products all over the world.

The laboratory offers a broad range of services to the manufacturing industry and importers including:
- Building Materials
- Furniture
- Food Packaging Materials
- Polymers & Rubber
- Gloves
- Toys
- Detergents, Hygiene Products & Cosmetics
- Non-food & DIY Retail

Services:

VOC emission testing is the main focus of Eurofins Product Testing Denmark (A/S). The laboratory is a global market leader both in its field and within the Eurofins Group network. Eurofins Product Testing Denmark’s internationally-recognised experts operate the highest number of emission test chambers world-wide, documenting product performance relative to national VOC regulations and various labels, e.g. EMICODE, Blue Angel, LEED, AFISSET, Ü Mark/AgBB and Eurofins Indoor Air Comfort.

Other services include:
- Factory Inspection, Auditing & Certification
- Migration Analysis
- Chemical Content Analysis
- Troubleshooting
- Consultancy in relation to food contact materials, product marketability and labelling, GHS/CLP, Reach, toys, cosmetics, eco-labelling, environmental declarations and chemical risk assessment.

Accreditations:

- ISO 17025 accreditation (DANAK)
- CPSC (Pb analysis)

VOC testing:
- DiBt
- BIFMA
- CDPH
- Cradle-to-Cradle
- Blue Angel

FRANCE

Eurofins ATS

Eurofins ATS specialises in Consumer Product Testing, having worked with major European retailers, manufacturers (national brands, raw materials and private label) and consumer organisations for over 30 years.

The laboratory’s main field of expertise is the development of “in-use aptitude and performance tests” with a focus on “perceived quality by the consumer”.

Product categories:
- Cosmetics & Toiletries
- DIY
- Toys
- Paints, Coatings, Varnishes, Adhesives, Glues
- Detergents
- Hygiene & Paper
- Hardlines & Household Product

Services:

- Performance Tests
- Chemical & Physical Analyses
- Clinical Studies
- Expert Panels & Consumer Studies
- Technical Assistance, Consultancy and Complementary Services in Legal/Regulatory Assistance

Accreditations:

- NF EN ISO/CEI 17025 (accreditation n°1-2465 & n°1-6639, scope of accreditation visible on: www.cofrac.fr)
GERMANY

Eurofins Consumer Product Testing Germany

Eurofins Consumer Product Testing (CPT) GmbH specialises in the analysis of products for the following industries:

- Cosmetics
- Hygiene & Paper Products
- Biocides
- Detergents
- Toys
- Food Contact Materials (FCM)
- Household Products

A highly skilled and experienced team of chemists, food chemists, biochemists, and engineers is specialised in analysing samples using accredited methods. The laboratory focuses on chemical testing by applying state-of-the-art techniques such as GC-MS/MS and LC-MS/MS. CPT’s expert team evaluates your testing results in order to meet the current national, international, and European legislation.

Furthermore, CPT’s experts provide solutions tailor-made to your specific needs. Due to analytical test reports CPT supports the complete international supply chain: supplier of raw materials, producers, importers, as well as retailers, consumer organisations, and authorities.

Services:

- Chemical & Physical Analysis
- Migration Tests (OML, SML, NIAS)
- Regulatory Affairs, Consultancy
- Customised Test Plans
- Webinars, Trainings
- International Marketability Certificates

Accreditations:

- DIN EN ISO/IEC 17025:2005 (DAkkS)
- ILAC-MRA (DAkkS) • CPSC
- Authorised Expert for Cross Checks for Cosmetics and Detergents

INDIA

SPAIN

Eurofins Product Testing, Cosmetics & Personal Care Spain

Eurofins Product Testing, Cosmetics & Personal Care Spain, S.L.U has over 25 years’ experience in providing analytical control services to raw material manufacturers, suppliers, finished article producers (brand and private label) and retailers.

Our highly skilled and experienced team of chemists and engineers is specialised in analysing samples using accredited methods and evaluating the results according to relevant Spanish and European legislation, including respective guidelines and recommendations.

Eurofins Product Testing, Cosmetics & Personal Care Spain, S.L.U has specialised experience in Cosmetics, Detergents, Food Contact Material, Sensory Analysis and Technical Regulatory Consultancy.

Services:

1. TESTING:
- Food Contact (overall migrations)
- Performance Testing - Detergents
- Eco-label Performance Testing
- Performance Testing - Household
- Cosmetics Testing - Performance, Security & Control
- Detergent, Paper & Polymeric Materials Biodegradability
- Qualitative Studies
- Packaging Testing
- Concept Acceptance Testing
- Developing Consumer Insight
- Screening Testing

2. LEGAL AND TECHNICAL CONSULTANCY FOR PRODUCT LABELLING:
- Adaptation of the DSD/DPD classification and labelling system to the new CLP requirements; reducing adaptation process costs to the retail sector
• Labelling development based on MSDS
• Technical label translation to Spanish and Portuguese
• Label revision to detect and ensure that any national requirements shall be applied to commercialize in the Spanish and Portuguese market.
• MSDS (Material Safety Data Sheet)
• MSDS adaptation to CLP regulation
• Classification of chemical substances and mixtures
• Technical MSDS translation to Spanish and Portuguese
• Revision to detect and ensure that all national label requirements for the Spanish and Portuguese markets are applied.

3. INSPECTION AND AUDIT:
• Product inspection and auditing of suppliers’ quality system

Eurofins Consumer Product Testing Turkey

Eurofins Consumer Product Testing Turkey, located in Mahmutbey, Istanbul, is a one-of-a-kind testing laboratory focused on a complete range of product categories within the fashion and retail industry including: apparel, footwear, toy safety, accessories and the safety of children’s products, from raw material stage to ready-to-wear/use stage.

As is required by law, consumer products must be safe for users. Eurofins has extensive knowledge of the legislation which is required and applicable to various products across many markets.

Eurofins Consumer Product Testing Turkey has the required accreditation to provide technical competence and perform textile, leather, footwear and fashion accessories products testing.

Ministry of Trade Footwear Testing

Eurofins Consumer Product Testing Turkey facilitates Phthalates, Chromium VI and Organic Tin Compound testing on behalf of the Turkish Republic Ministry of Trade according to Communiqué on Import Supervision of Some Consumer Products (Product Safety and Inspection: 2018/18) by the Ministry of Economy General Directorate of Product Safety and Inspection, published in the Official Gazette (Issue 30286 Reps) on 31 December 2017 by the Import Inspections Department.

Services:
• Chemical
• Azo Dyes
• Formaldehyde
• Allergenic Disperse Dyes
• Lead & Cadmium Content
• Nickel Release
• Heavy Metals
• Phthalates
• Chromium VI
• Chlorinated Phenols
• Organic Tin Compounds
• Polycyclic Aromatic Hydrocarbons (PAH)
• Alkylphenols / Alkylphenol Ethoxylates (APEO)
• Chlorinated Organic Carriers (COC)
• Others
• Mechanical
• Fibre Content
• Colour Fastness Tests
• Pilling Resistance
• Abrasion Resistance
• Tear Strength
• Tensile Strength
• Flammability
• Seam Slippage
• Dimensional Stability
• Zipper Slide Fasteners
• Flammability

Accreditations:
• Nº AB-1356-T for textile and leather materials, issued by the Turkish Accreditation Body (TÜRKAK), according to the ISO/IEC 17025:2012 standard

ELECTRICAL & ELECTRONICS AND INDUSTRIAL SERVICES

CHINA

Eurofins Product Testing Service (Shanghai) Co., Ltd.

Eurofins Consumer Product Testing Shanghai provides a variety of different tests supporting the activities of international buyers when they source from China. The main product categories covered by Eurofins Consumer Product Testing Shanghai include:
- Lighting & Luminaires
- Household Appliances
- Power Tools
- Power Supply
- Information Technology Equipment
- Audio & Video Products
- Industrial Equipment
- New Energy
- Textiles & Footwear
- Toys
- Juvenile Products
- Food Contact Materials
- Hardlines
- Construction Material

Services:
- Electrical Safety
- EMC Test
- Performance Testing
- Chemical Analysis
- Physical & Mechanical Analysis
- Flammability Testing
- Inspection & Audit Service
- Energy efficiency and ERP testing

Accreditations:
- Large scope under ISO17025
- IECEE CB Scheme
- ZLS approval for GS certification
- UKAS approval for the EU market
- Mutual acceptance with many national certification bodies worldwide

Eurofins MET China

Eurofins MET

Accreditations:
- FINAS (Finish Accreditation Service)
  - T001 (EN ISO/IEC 17025)
  - K024 (EN ISO/IEC 17025)
  - S017 (EN ISO/IEC 17065)
  - S021 (EN ISO/IEC 17021)

FINLAND

Eurofins Expert Services

Eurofins Expert Services provides comprehensive service coverage allowing customers to respond quickly to the challenges of changing markets, during product development, market entry and maintenance.

Many Eurofins Expert Services’ certification, testing and inspection services have been accredited by the national accreditation body FINAS. Our accreditations cover over 1000 standards. Eurofins Expert Services also operate as a Notified Body in several directives and the Construction Products Regulation, and as an issuer of product and type approvals.

Services:
- Expert Services
  - Boat Technical Expert Services
  - Electronics Expert Services
  - Fire Safety Statements
  - Healthy Buildings
  - Product Safety – Packaging
  - System and Software Safety
  - Certification and Product Approval Services
  - Building Products
  - CE Certification of Recreational Craft
  - Conformity of Machines and CE Marking
  - Environmental Technology

FRANCE

Eurofins 3 Ohms

Eurofins 3 Ohms facilitates electrical product performance and benchmarking, audit and inspections.

Services:
- Conformity assessment
- Technical File Validation
- Markings & Instruction Manual Validation
- Construction Check
- Risk analysis/Safety Assessment
- Performance
  - Benchmarking, Claim Substantiation
  - Protocol Development
  - After-sales Service Expertise / Complaint Investigation
  - Failure Analysis
  - Specifications Assessment
  - Safety Check

Audits
- Technical Audit of Process (Factory/importer)
  - Product Inspections and On-site Testing

GERMANY

Eurofins Product Service Germany

Eurofins Product Service GmbH is a test laboratory and certification body for electric and electronic products.

Our service includes tests according to various standards and customer specifications as well as certification and approval support for more than 180 countries.

Services:

• conformity assessment (CE-mark) according to European Directives: R&TTE (RED), EMC, LVD, MDD, ErP-direc
• environmental simulation e.g. vibration, temperature, shock, salt fog, flammability, humidity, dust and water density tests
• tests according to DO-160
• tests of active medical devices (e.g. IEC 60601)
• PTCRB-tests
• Bluetooth SIG
• E1-mark
• MET-mark
• GS-mark (Geprüfte Sicherheit)
• TCB-Service for FCC
• FCB-Service for ISED (IC) Canada
• Test and Certification according to CB-Scheme
• International Type Approval support in over 180 countries worldwide (e.g. Russia, China, Brazil)
• Notified Body (0681) services according to RED (Radio Equipment Directive) and MDD (Medical Device Directive)

Accreditations:

• Accredited test laboratory DIN EN ISO/IEC 17025 by DAKKS (German Accreditation Body)
• Notified Body for Medical Devices Directive 93/42/EEC
• TCB (Telecommunication Certification Body) for USA and FCB (Foreign Certification Body) for Canada
• GS-Body authorised for granting GS-Mark (Geprüfte Sicherheit)
• NCB (National Certification Body) within the IECCE CB-Scheme
• KBA/NSAI recognised Technical Service

ITALY

Eurofins Product Testing Italy

Eurofins Product Testing Italy is a leading Italian laboratory which specialises in many sectors of product safety conformity assessment, specifically Electrical & Electronic, Mechanical & Environmental and Acoustic testing and phonometers and accelerometers calibration testing. Eurofins Product Testing Italy has been acknowledged as a Product Testing & Certification Center of Excellence according to International regulation & standard and European Directives.

Services:

• Medical Device
• Personnel Protective Equipment
• ATEX and IECEx, Machinery
• Pressure Equipment
• Transportable Pressure Equipment
• Lift Safety and Conformity Testing
• Noise Emission
• EMC
• Radio

Accreditations:

• UNI CEI EN ISO/IEC 1702
• UNI EN ISO 9001:2008

**KOREA**

**Eurofins MET Labs Korea**

Eurofins MET Laboratories has come to be synonymous with outstanding customer service and an unwavering commitment to excellence in our over 50 years of existence.

Eurofins MET Labs Korea continues that tradition by providing excellent customer oriented service in the Korean market. We understand the importance of time when it comes to exporting your products to the market outside of Korea.

At Eurofins MET Labs Korea, our goal is not to meet our customers’ expectations, it’s to exceed them. We view our customers as our partners and we have succeeded in providing them a place to fill all of their compliance needs. I invite you to learn more about our company through the pages of this website. We will continue to strive to make a difference in the testing industry and to Certify the World, One Product at a Time.

**Services:**

- Product Safety Certification for North America
- NRLT, Canada SCC, and IECEE-CB Scheme and EU-CE
- Field Evaluation service
- SEMI S2, S8, S22 and F47 for evaluation report
- Reliability test Service
- EMC and FCC

**Accreditations:**

- Nationally Recognized Testing Laboratory (NRTL) – OSHA
- Inspection Body for Product Safety and Certification Body – SCC
- CB Scheme accredited Safety Test Laboratory (CBTL)

**UNITED KINGDOM**

**Eurofins York Ltd**

Eurofins York Ltd was founded in 1995, with its origins in the University of York’s Department of Electronics, is a trusted global provider of product testing, certification, consultancy, training and instrumentation services. Eurofins York Ltd operates across four sites in the UK which include three United Kingdom Accreditation Service (UKAS) accredited test laboratories and our York office which is home to our Expert Services and Test Instrumentation businesses.

**Services:**
1) Testing (Bristol, Castleford and Grangemouth Laboratories)
   - Accredited testing services to enable CE marking and global market access
   - Electromagnetic Compatibility (EMC Directive)
   - Wireless (Radio Equipment Directive)
   - Electrical Safety (Low Voltage Directive)
   - Electromagnetic Fields (EMF Directive and Health and Safety at Work legislation)
   - Shielding Effectiveness Measurements
   - On-site EMC and EMF Testing at Customers’ Premises
   - Electromagnetic Site Surveys (UK-wide and globally)
   - Railway Specific Measurements
2) Expert Services (York Office)
   - Consultancy and research in the fields of regulatory compliance and management, bespoke testing and RF engineering:
     - EMC Management
     - Railway EMC Compliance
     - Bespoke Electromagnetic (EM) Measurements
     - RF Research including Novel and Bespoke Solutions
     - Standards Gap Analyses
     - Technical Documentation
     - Electromagnetic Modelling
     - Product Compliance Reviews
     - Test and Measurement Facility Reviews
     - Notified Body services for 2014/30/EU
3) Test Instrumentation (York Office)
   - A range of Radio Frequency (RF) verification and measurement equipment:
     - Dual Mode Comb and Continuous Broadband Noise Sources
     - Continuous Broadband Noise Emitters
     - Comb Generators
     - Harmonics and Flicker Generators
     - Compact Emissions Measurement Antenna
     - Cable Coupling Clamp
4) Training Courses (York Office)
   - Training for a range of regulatory aspects associated with CE Marking directives and RF engineering; available as scheduled, in-house, bespoke and online courses:
     - EMC Management and Control
     - EMC Testing
     - EMC Design
     - Railway EMC Management
     - Understanding Antennas and Electromagnetic Theory
     - EMC Directive 2014/30/EU
     - Low Voltage Directive 2014/35/EU
     - EMF Directive 2013/35/EU

**Accreditations:**
- ISO/EN 17025 (UKAS)
- IECEE CB Scheme
- FCC
- MET Laboratories (including factory audits)
- VCCI
- Mutual acceptance with many National Certification Bodies
- ISO 9001
- RISQS, CIRAS, PTS (Transport industry)

Certification Management Limited

Certification Management Limited (CML) was established in June 2013. Offering a complete range of compliance services, we are an EU Notified Body (No 2503) for the European Union Directive 2014/34/EU (ATEX). This is supported by our UKAS accreditation (No 8175) to ISO/IEC 17025 and ISO/IEC 17065 and our full scope of accreditation allows us to issue any type of certificate. Appointed in 2014, we are also an IECEx Certification Body (ExCB) and Test Laboratory (ExTL) with the full scope of standards.

Additionally, CML B.V. a subsidiary of CML UK, is an EU Notified Body (No 2776) for the European Union Directive 2014/34/EU (ATEX). It is supported by its RvA Accreditation (No C640) to ISO/IEC 17065. CML B.V.’s full scope of ATEX notification can be found on the EU Nando website.

In line with our growth we maintain the right technical mix and number of staff and this has grown from the initial 2 founding directors to 33, including 16 certification engineers and 7 laboratory technicians. A vital part of our growth is played by our large laboratory capacity with highly accurate and high quality equipment.

Our first ATEX and IECEx certificates were issued in September 2013 and April 2014 respectively and we have issued over 2,500 certificates to date.

GERMANY

Eurofins WKS Labservice

Eurofins WKS Lab service GmbH is a joint-venture between Eurofins and WKS Textile solutions, located in Wilsum, Germany. Eurofins WKS Labservice provides lab testing for the textile and clothing industry, namely testing of fibres, yarns, fabrics, clothing/apparel and similar products. The laboratory is accredited according to DIN EN ISO/IEC 17025. Eurofins WKS Labservice customers benefit from the combined knowledge of the global Eurofins textile laboratory network and the unique and deep textile knowledge of WKS Textile solution, which goes far beyond routine textile testing and includes specialised textile know-how, damage analysis and troubleshooting and repair services on fabrics and ready-made articles.

Services:
Testing
• Physical Tests
• Colour Fastness Tests
• Washing Trials
• Dimensional Stability to Washing/Ironing
• Abrasion & Pilling
• Fibre Composition Tests
• Strength Tests, Elongation, Elasticity
• Fit-for-use Tests
• Standardised Chemical Dry Cleaning
• Labelling
• Fabric Inspection (length and defect control on fabrics)
• Certification Approval

Accreditations:
• DAkkS (ISO 17025)
• Members of Industry Associations:
German Fashion, DTB, DTV, BSR, DGQ, VDTF
• Member of DIN Standardization Committees

INDIA

Eurofins Product Testing India

Eurofins is a leading international third-party testing, inspection and certification body and a provider of risk control management solutions. Relying on our internationally authoritative, elite technical team, Eurofins is specialized in localized innovative services, providing expert quality management support for “Make in India” and “Made in India” products.

It is our endeavour to be a Quality Assurance and Quality Control solution provider for the business involved in retail, import and manufacturing of wide variety of consumer products.

Services:
Relevant tests in textile, shoes and fashion complements:
• Physical Tests: Evaluation of the aspect of the fabrics and garment during the life cycle
• Pilling Resistance
• Abrasion Resistance
• Water Repellence Test
• Absorption Capacity
• Tensile Strength
• Tear Strength
• Bursting Strength
• Elasticity and Remaining Deformation
• Seams Resistance and Slippage
• Mechanical Test: evaluation of the strength and durability
• Laundering: evaluation of the behaviour of articles on domestic laundry processes
• Colour Fastness: evaluation of colour against physical and chemical agents
• Accessories Testing
• Flammability: evaluation of fire behaviour on fabrics and garments
• Inspections

Accreditations:
• NABL (ISO 17025)
• CPSC

TURKEY

Eurofins Consumer Product Testing Turkey

Eurofins Consumer Product Testing Turkey, located in Mahmutbey, Istanbul, is a one-of-a-kind testing laboratory focused on a complete range of product categories within the fashion and retail industry including; apparel, footwear, toy safety, accessories and the safety of children’s products, from raw material stage to ready-to-wear/use stage.

As is required by law, consumer products must be safe for users. Eurofins has extensive knowledge of the legislation which is required and applicable to various products across many markets.

Eurofins Consumer Product Testing Turkey has the required accreditation to provide technical competence and perform textile, leather, footwear and fashion accessories products testing.

Ministry of Trade Footwear Testing

Eurofins Consumer Product Testing Turkey facilitates Phthalates, Chromium VI and Organic Tin Compound testing on behalf of the Turkish Republic Ministry of Trade according to Communiqué on Import Supervision of Some Consumer Products (Product Safety and Inspection; 2018/18) by the Ministry of Economy General Directorate of Product Safety and Inspection, published in the Official Gazette (Issue 30286 Reps) on 31 December 2017 by the Import Inspections Department.

Services:
• Chemical
• Azo Dyes
• Formaldehyde
• Allergenic Disperse Dyes
• Lead & Cadmium Content
• Nickel Release
• Heavy Metals
Phthalates
Chromium VI
Chlorinated Phenols
Organic Tin Compounds
Polycyclic Aromatic Hydrocarbons (PAH)
Alkylphenols / Alkylphenol Ethoxylates (APEO)
Chlorinated Organic Carriers (COC)
Others
Mechanical
Fibre Content
Colour Fastness Tests
Pilling Resistance
Abrasion Resistance
Tear Strength
Tensile Strength
Flammability
Seam Slippage
Dimensional Stability
Zipper Slide Fasteners
Flammability

Accreditations:
- Nº AB-1356-T for textile and leather materials, issued by the Turkish Accreditation Body (TÜRKAK), according to the ISO/IEC 17025:2012 standard
- ILAC Mutual Recognition Arrangement with UKAS
- CPSC Laboratory accreditation reference: 1049
- LWG (Leather Working Group) Environmental Audit Protocol

Services:
- Chemical Testing
- Cadmium Testing
- Azo Dyes Testing
- Chrome VI Testing
- Formaldehyde Testing
- International Chemical Legislation & Compliance Testing
- Lead Testing
- MRSL Testing
- Nickel Testing
- PFOS Testing
- REACH Testing
- RSL Testing
- Wet Blue Testing
- Physical Testing
- Fault Diagnosis & Problem Solving
- Consulting & Auditing
- Chem-MAP – Chemical Verification Systems
- Sustainability
- Research & Innovation
- UK & International Training

Accreditations:
- United Kingdom Accreditation Service (UKAS) 0076
- ILAC Mutual Recognition Arrangement with UKAS
- CPSC Laboratory accreditation reference: 1049
- LWG (Leather Working Group) Environmental Audit Protocol

USA
Eurofins Product Testing USA

Eurofins Consumer Product Testing USA provides testing, certification, and consulting services in relation to regulatory compliance as well as quality and safety of products to manufacturers, distributors and retailers.

Eurofins Consumer Product Testing US is located in North-western USA, is part of Eurofins Scientific Group. With over 650 global testing labs and is one of the world leaders in the testing, inspection and certification industry.

Eurofins Consumer Product Testing US has extensive analytical testing capabilities onsite in Bothell, WA, as well as the benefit of the Eurofins global network. Eurofins Product Testing USA specialises in material characterisation, design evaluation and accelerated aging consultancy, but also offers support in relation to food, microbiology, VOC, bio analytics and electronics tests in collaboration with sister labs.

Services:
- Testing
  - Chemical Testing: Lead, Heavy Metals, Phthalates, Formaldehyde Chemical Testing, etc.
  - On site HDXRF & FTIR Screening Services; for heavy metals and phthalates (non-destructive)
  - Mechanical
  - Dimensional Stability & Shrinkage
  - Colour Fastness; to various conditions including UV aging testing
  - Durability & Abrasiveness Testing
  - Fibre content & Labelling Review
  - Tensile Strength, Pilling, Crocking
  - Wash & Care Instructions
  - Flammability Testing
  - Inspections (During production & pre-shipment product inspections)

United Kingdom

Eurofins BLC Leather Technology Centre Ltd

Eurofins BLC Leather Technology Centre Ltd. (Eurofins | BLC) is a world leading technology centre and testing laboratory based in Northampton, United Kingdom. Established over 95 years ago, Eurofins | BLC provides a complete range of supply chain services to the leather industry, covering all areas from raw material through to finished product. Eurofins | BLC works closely with brands, retailers, product manufacturers and tanneries in many countries around the world.

As the only laboratory dedicated to leather, footwear, chemical, and leather product testing, Eurofins | BLC has the technical pedigree to ensure fast and accurate solutions to technical, environmental or management issues in the leather supply chain. As a Eurofins competence centre, Eurofins | BLC provides local expertise in their specific field to the international Eurofins laboratory network, contributing to the Group’s global offering. As such, Eurofins | BLC is well-positioned to provide a compelling offering to its clients, providing a one-stop, customised and seamless service.

Eurofins EAG Shanghai

Our laboratory in Shanghai is located at Zhongdian Green Science and Technology Park. Formerly known as Advanced Materials Engineering Research (AMER), this 1176.73 m² facility offers materials analysis (SIMS, SEM, GDMS, GC-MS techniques) and engineering testing services, including failure analysis (Circuit Edit, ESD, Decap).

Services:
- Surface Analysis
- Materials Characterization
- Composition & Materials ID
- Failure Analysis

Eurofins EAG Tokyo

This 177.78 m² laboratory features surface analysis and electronics testing services for a wide variety of industries.

Services:
- Electronics
- Data Storage
- Energy Storage & Batteries
- Lighting & LED
- Semiconductors
- Solar/PV

Eurofins EAG Toulouse

Our facility in Toulouse, France specializes in trace and ultra-trace analysis of inorganic materials.

Services:
- Trace Elemental Analysis
- Materials Characterization
- Composition & Materials ID
- Surface Analysis

Eurofins EAG Labs Korea

Eurofins MET Laboratories has come to be synonymous with outstanding customer service and an unwavering commitment to excellence in our over 50 years of existence.

Eurofins MET Labs Korea continues that tradition by providing excellent customer oriented service in the Korean market. We understand the importance of time when it comes to exporting your products to the market outside of Korea.

At Eurofins MET Labs Korea, our goal is not to meet our customers’ expectations, it’s to exceed them. We view our customers as our partners and we have succeeded in providing them a place to fill all of their compliance needs. I invite you to learn more about our company through the pages of this website. We will continue to strive to make a difference in the testing industry and to Certify the World, One Product at a Time.

Services:
- Product Safety Certification for North America
- NRLT, Canada SCC, and IECEE-CB Scheme and EU-CE
- Field Evaluation service
- SEMI S2, S8, S22 and F47 for evaluation report
- Reliability test Service
- EMC and FCC

Accreditations:
- Nationally Recognized Testing Laboratory (NRTL) – OSHA
- Inspection Body for Product Safety and Certification Body – SCC
- CB Scheme accredited Safety Test Laboratory (CBTL)

Eurofins EAG Singapore

EAG has maintained an active presence in Singapore since 2008, with a sales office for assisting clients utilizing our materials science and engineering testing services.

Services:
- Electronics
- Data Storage
- Energy Storage & Batteries
- Lighting & LED
- Semiconductors
- Solar/PV
Taiwan

Eurofins EAG Taiwan
This 3,689 square foot facility features SIMS capabilities and has been involved in helping clients across a variety of industries since 1999.

USA

Eurofins Nanolab
Using cutting edge technology and expertise, Nanolab Technologies provides Knowledge Based Analytical Services for Advanced Microscopy, Chemical Analysis, Electrical Failure Analysis, Materials Analysis, FIB Circuit Edit, and Defect Analysis

Services:
• We analyze the chemical and physical structures of:
  Defects, Materials, Wafers, Polymers, Thin Films, Thick Films, Semiconductors, Ceramics, Glasses, Powders, Alloys, Complete Unknowns …
• We perform electrical failure analysis, circuit-editing, design debug, non-destructive imaging…
• We use surface chemical analysis, structure analysis, chemical analysis, spectroscopy, advanced electron microscopy…
• We use X-ray beams, electron beams, metal ion beams, Ar+ ion beams, NIR laser beams…
• We measure film thickness, chemistry uniformity, critical dimensions, locate defects…

The Netherlands

Eurofins Materials Science Netherlands
The facility in Eindhoven specializes in the materials analysis and reliability investigation of consumer products, medical equipment, lighting products and other high technology products. It also has specific expertise in the areas of gas analysis and facility cleanliness for high technology manufacturing.

It was purchased by Eurofins in December 2018 and was formerly the central research lab of Royal Philips and Philips Lighting (now Signify).

The floor space is over 2400m2, shared over 2 locations within Eindhoven’s High Tech Campus.

Eurofins EAG Sunnyvale
Our Sunnyvale laboratory opened in 2000 as Charles Evans and Associates. With over 75,000 sq. ft. of laboratory space, this EAG Silicon Valley location serves the semiconductor and other high tech industries, as well as medical device, pharmaceutical and consumer electronics industries and the legal field.

Services:
• Trace Elemental Analysis
• Surface Analysis
• Advanced Microscopy
• Materials Characterization
• Failure Analysis
• Composition & Materials ID
• Contaminant Identification
• Deformulation
• Metallurgical Analysis
• Polymer Chemistry

Eurofins EAG St Louis
Formerly known as CHEMIR Analytical Services, this 20,000 sq. ft. laboratory was founded in 1959. EAG scientists at this location specialize in investigative analytical chemistry to solve difficult problems, including deformation, plastic testing and coatings testing. They are also experienced with providing litigation support and expert witness services.

The St. Louis laboratory offers scientific solutions to a wide variety of industries, including consumer products, industrial goods, pharmaceuticals, medical devices and basic materials.

Accreditations:
This location is cGMP Compliant, ISO 9001:2008 Registered, FDA Registered and DEA Licensed.

Eurofins EAG Raleigh
Featuring advanced microscopy techniques, our Raleigh, NC laboratory is 9,600 sq. ft. It began in 1989 as Materials Analytical Services (MAS) – Semiconductor and Microelectronics Services Operations and was acquired by EAG in 2006.

This facility serves the semiconductor, aerospace/defense, medical device industries and more.

Services:
• Custom Synthesis
• Surface Analysis
• Materials Characterization
• Composition & Materials ID
• Contaminant Identification
• Trace Elemental Analysis
• Advanced Microscopy
• Failure Analysis
• Deformation
• Metallurgical Analysis
• Polymer Chemistry

Eurofins EAG Minneapolis
Our laboratory in the Minneapolis, MN area (located in Chanhassen) began in 1999 and is over 11,000 sq. ft. in size. The facility offers surface analysis and materials characterization for many industries, including medical devices, semiconductors, aerospace and more.

Services:
• Surface Analysis
• Materials Characterization
• Failure Analysis
• Contaminant Identification
• Custom Synthesis
• Composition & Materials ID
• Trace Elemental Analysis

Eurofins EAG Princeton
Our Princeton location sits in East Windsor NJ and offers surface analysis and materials characterization services to many industries.

Founded in 1987, this laboratory is 20,000 sq. ft. in size and serves a wide variety of industries including semiconductors, medical devices, aerospace/defense and more.

Services:
• Surface Analysis
• Materials Characterization
• Failure Analysis
• Contaminant Identification
• Custom Synthesis
• Composition & Materials ID
• Trace Elemental Analysis
• Advanced Microscopy
• Deformation
• Metallurgical Analysis
• Polymer Chemistry

Eurofins EAG Los Angeles
Formerly known as SEAL Laboratories, this location in the Los Angeles (El Segundo) area has been solving challenging projects requiring expertise in materials science, electronics, failure analysis, metallurgical testing, residual gas analysis (RGA), and destructive physical analysis (DPA) since 1972. Scientists and engineers at our Los Angeles and other locations offer years of experience providing litigation support and expert witness services.

We perform failure analysis and product improvement for metal components in the aerospace, transportation, consumer products, construction and medical device industries. Our experts utilize multiple techniques for metallurgical analysis to solve problems as:
• Fractures fracture and failure modes and origins
• Fatigue and other slow crack growth mechanisms
• Brittle and ductile overload failures
• Stress corrosion and hydrogen embrittlement failures
• Corrosion/oxidation problems
• Contamination problems
• Wear failures
• Heat treatment problems
• Design/stress related failures
• Plating problems

Additionally, we have assisted with product design, material selection, product improvement, and quality assurance programs for metal components.

Legal Consulting: Product Liability and Patent Infringement Cases From investigating defective aircraft landing gear to determining cause of airbag failures, our engineers and scientists have been at the forefront of providing scientific expertise, data interpretation and expert testimony for hundreds of legal cases, including:
• Product defect investigations
• Determination of initiating causes of failure
• Product construction analysis and specifications
• Materials and contamination analysis
• Fire investigations
• Manufacturing/quality control issues

The Los Angeles location (formerly SEAL Laboratories) also has specialized services for the electronics and aerospace industries. As experts in Residual Gas Analysis (RGA) of electronics components, we not only provides internal gas and water vapor content in microelectronic components, but also troubleshoots “problem” internal gasses and provide corrective actions. We support MIL-STD-883, Method 1018 and MIL-STD-750, Method 1018. Destructive physical analysis (DPA) is performed on materials used in aerospace, commercial, military, and government applications. As DLA (Defense Logistics Agency) certified for various MIL-STD testing requirements, our DPA capabilities include Fine Leak, Gross Leak, Die Shear, Bond Strength, P.I.N.D. Testing, Radiography, SEM inspection, Microsectioning, and DLA Certified RGA Testing.

Services:
• DPA
• RGA
• Metallurgical Analysis
• Consulting & Expert Testimony
• Failure Analysis - Materials
• Materials Characterization
• Surface Analysis

We are qualified to NRTL certify products in over 200 UL Standard categories and can test up to an additional 230+ standards for the U.S. market. For Canada, we maintain a wide scope of SCC accreditations and also offer expert third-party testing to almost any product safety standard for the European Union or Asia Pacific.

Services:
• Failure Analysis
• Burn-in & Reliability
• ATE Test & Engineering
• ESD & Latch-up Testing
• FIB Circuit Edit & Debug
• Advanced Microscopy
• PCB Design & Assembly

AGROSCIENCE
SERVICES
With over 25 years of experience in the crop protection industry, Eurofins Agroscience Services offers outstanding technical knowledge and project management skills. Our service offering is continuously developed by knowledge transfer initiatives between the Group’s various centres of expertise across the globe.

By acquiring a carefully selected range of CRO’s, Eurofins Agroscience Services has created a unique portfolio of expertise that provides analytical, regulatory and field support to plant breeders, agrochemical, biopesticide, biocide and fine chemical manufacturers.

Eurofins Agroscience Testing
Eurofins Agroscience Testing is a contract laboratory specialising in the analysis of agrochemicals, veterinary medicines and their residues in crops, animal tissues and environmental samples.

The team at Eurofins Agroscience Testing has experience with the analysis of most developmental agrochemicals and hence is in a position to offer sound advice for the analysis of the same compounds in food and environmental samples.

Services:
- Residue Field studies (GLP)
- Veterinary Drug Residue studies (GLP)
- Method Development and validation
- Pesticide analysis of fruit, vegetables
- Formulation analysis (GLP)
- Storage Stability studies (GLP)
- Physical Parameter Testing (GLP)

Accreditations:
- OECD GLP
- ISO 17025
- APVMA licensed
- AQIS facility

Eurofins Animal Health
We are a leading provider of veterinary research services and technical support to the global animal health industry. We conduct preclinical and clinical studies to GCP and GLP standards, as dictated by the regulatory authorities. Our technical activities involve the conduct of clinical field, pen and laboratory studies to determine the safety and efficacy of new products designed to improve animal health and welfare.

Our company has experience and expertise in veterinary chemicals, pharmaceuticals, therapeutic and prophylactic veterinary medicines, in planning and conducting of R&D programs, primary screening, individual field, pen and laboratory experiments, and out-of-season field and laboratory testing for northern hemisphere clients. We specialise in the design, management and execution of preclinical and clinical studies in Production and Companion animals.

Accreditations:
- Eurofins Agroscience Australia is GLP recognised by NATA and conducts residue and safety studies to the OECD Principles of Good Laboratory Practice where required by the relevant regulatory bodies. Clinical efficacy studies are conducted according to the VICH guidelines on Good Clinical Practice (GCP).

All studies are authorised and approved by the SAEC or our internal AEC (Animal Ethics Committee)

Eurofins Agrisearch
Eurofins Agrisearch is part of the Eurofins Agroscience Services global network. It has provided services to agrochemical, biopharmaceutical and veterinary health industries since 1970.

There are ten field research facilities spread across all agricultural and climatic zones of Australia. They are located at: Orange, Gosford, and Narrabri in New South Wales; Toowoomba, Bundaberg and Innisfail in Queensland; Shepparton and Horsham in Victoria, Adelaide in South Australia and York in Western Australia.

Core activities include efficacy, safety and residue studies in plants and animals, crop and variety evaluation including GMOs, “off-season” testing and regulatory science consulting.

In late 2013, Eurofins Agrisearch opened a new state-of-the-art PC2 quarantine facility located at Toowoomba. The facility is equipped with the latest environmental monitoring and control features and has a 10,000 plant capacity. The facility mainly caters for corn, cotton, sorghum, sunflower and pulse seeds.

Eurofins Agrisearch is the only CRO in Australia that is able to conduct GLP compliant research for both the field and analytical phases of crop and animal residue studies.

Services:
- Crop and animal efficacy studies
- Variety evaluation including GMOs
- Regulatory science consulting
- Residue and safety studies

Accreditations:
- AQIS facility
- APVMA licensed
- ISO 17025
- OECD GLP
• Pharmacokinetic studies
• Soil dissipation/accumulation studies
• Worker exposure studies
• Field technical services
• Project and study management
• Processing studies
• Glasshouse/quarantine studies
• Public/environmental health studies

Accreditations:
• GLP (crops, animals)
• GCP (animals)

Eurofins Agroscience Toowoomba

Services:
From the Toowoomba facility we can conduct a range of different trials including:
• Winter and summer crops - efficacy, safety and residue studies
• Plant variety evaluation for winter and summer crop types
• Agronomic field studies
• Horticulture efficacy, safety and residue studies
• Animal health efficacy studies
• Post entry quarantine studies with summer crops in a newly built glasshouse
• Work health and safety studies (mixer, loader, applicator)

A variety of equipment is available, including a range of sprayers, precision trial-plot seeders, harvesters and all the equipment necessary to conduct high quality studies that simulate most agricultural practices.

BRAZIL

Eurofins Agroscience Services LATAM

Eurofins Agroscience Services LATAM is part of the Eurofins Agroscience Services global network, performing field and laboratory studies to support the screening, development and registration of agrochemicals, biostimulants, professional products and new plant varieties.

The site was established in 2008 and is based in Indaiatuba/SP, near important airports and easy access to agricultural areas. Full “in house” GLP field and laboratory studies can be provided.
Experience in conducting studies in Brazil, Chile, Peru, Costa Rica, Guatemala, Ecuador and Mexico, and able to work in any LATAM country.

Services:
- Open and semi field ecotox studies
- Feeding studies
- Extended Laboratory studies
- Efficacy studies
- Soil dissipation studies
- Processing studies
- Residue studies
- Rotational Crops
- Pollinator Studies
- Analysis of Pesticide Residues
- Analytical method development and validation
- Sample homogenisation
- Study Management
- General Consulting
- Logistic

Accreditations:
- GLP

**Germany**

**Eurofins Agroscience Services Stade**

Eurofins Agroscience Services GmbH in Germany forms part of the Eurofins Agroscience Services Global network. There are six strategically based field locations in Germany offering full geographical coverage.

We serve the agrochemical, fertiliser, biocide and seed industries. Our services include regulatory services (BAD), study management, selectivity trials, biological trials, screening trials, residue trials, soil dissipation and accumulation trials, eco-toxicological trials and different types of monitoring (groundwater, bioaccumulation).

**Services:**
- Crop Residue Studies (GLP)
- Crop Efficacy Testing (GEP)
- Glass House Studies
- Groundwater Monitoring
- Field Leaching Studies
- Selectivity Trials
- Rotational Crop
- Field Volatilisation
- Soil Dissipation / Accumulation
- EU and National Biological Dossier

**Accreditations:**
- GEP
- GLP

**Eurofins Agroscience Services Bernau**

**Services:**
- Field trials of crop protection compounds for efficacy, selectivity, vigor and residual activity (GEP)
- Field part of residue studies (OECD GLP)
- Soil dissipation studies
- Project Management

**Eurofins Agroscience Services Detmold**

Services:

- Eurofins Agroscience Services in Detmold is specialised in efficacy trials covering herbicide, fungicide, insecticide, crop safety and seed treatment trials.

**Eurofins Agroscience Services Gross Schenkenberg**

Eurofins Agroscience Services Groß Schenkenberg was established in 2012. The field station is based in Groß Schenkenberg near Lübeck in the South West of Schleswig Holstein, the most Northern German federal state, with access to Western Mecklenburg-Vorpommern.

---

**Eurofins Agroscience Services Markgröningen**

**Services:**
- Crop Residue Studies (GLP)
- Crop Efficacy Testing (GEP)
- Equipment for seeding and harvesting
- Greenhouse Studies
- Soil Dissipation Studies
- Ground Water Monitoring Studies

**Eurofins Agroscience Services Osnabrück**

Services:

- Eurofins Agroscience Services in Osnabrück is specialised in efficacy trials including crop safety, herbicide, insecticide and fungicide trials.

The station is supported by the facility in Stade for residue trials, ecotox studies, groundwater monitoring, rotational crop and soil dissipation studies, which are often conducted in the Netherlands.

Eurofins Agroscience Services Ecotox

Eurofins Agroscience Services Ecotox GmbH is part of the Eurofins Agroscience Services global network, providing laboratory and field ecotoxicological studies to support the worldwide development, registration and stewardship of test substances.

The company offers all ecotoxicological studies and scientific services required for the registration of agrochemicals, chemicals, biocides, cosmetic and veterinary/human medicinal products globally. All studies are performed in compliance with GLP certified by the respective national authorities.

Services:

- Non-Target Arthropods, Honeybees, Bumble Bees, Solitary Bees, Non-Target Plant, Earthworms and Soil Organisms, Aquatic-Toxicology and microbiological testing
- Standard laboratory to field testing with NTA and soil organisms
- Aged residue and semi-field NTA studies
- Residue studies with several bee and bird food matrixes
- Honeybees, bumble bees and solitary bees lab, brood, tunnel and field studies
- Predatory mite field studies
- Full fauna NTA and soil organism in-field and off-crop studies
- Earthworm and soil organism lab and field studies
- Algae & aquatic macrophytes
- Aquatic Invertebrates (Daphnia and Chironomus)
- Aquatic vertebrates: fish acute (5 species) as well as early life stage, juvenile growth and bioaccumulation studies
- Biodegradation
- Micro-cosm (indoor) and mesocosm (outdoor in cooperation with a partner) studies
- Lumbriculus testing
- Microbiological testing

Eurofins Agroscience Services Chem GmbH

Eurofins Agroscience Services Chem GmbH provides comprehensive analytical support for crop residue studies, soil studies and bee-related matrices.

Environment, the US and beyond according to international guidelines.

The company offers all analytical studies and scientific services required for the registration of agrochemicals, chemicals, biocides and veterinary/human medicinal products globally. Every study is performed in compliance with GLP certified by the national authorities.

Services:

Physico-Chemistry:
- Determination of physico-chemical properties of Active Substances and Formulations
- Storage Stability studies
- 5-batch studies, Change Control Analytics
- Inorganic Analysis by ICP-MS

Residue Analytics:
- EFate Residue Analysis for field studies in soil, water and groundwater
- Crop Residue Analysis, multi-residue and analyte specific
- Method development and validation, including ILV
- Analytical exposure analysis for all ecotoxicological studies in laboratory and field

Environmental Fate & Metabolism:
- 14C / environmental fate and metabolism studies in water, soil, air
- Metabolism studies in plants and animals
- Leaching, persistence, accumulation in soil and water
- Bioaccumulation studies

Our Ulm location is a full service analytical laboratory focusing primarily on pesticide, pharmaceutical, biocide and chemical registration studies (OECD, EPA, REACH, etc.) performed under GLP. Newly relocated and expanded (2,800 sqm or 30,000 sq. ft), we are conveniently located near the A8 Autobahn, midway between Munich and Stuttgart.

Founded in 1992 as PTRL Europe, the laboratory became a part of EAG in 2012. Recognized as the premier provider of residue chemistry and non-radiolabeled fate and metabolism studies within the European Market, the Ulm, Germany laboratory has been delivering first-in-class service for over 25 years. More recently, the Ulm laboratory has become a key supplier for target compound and multiple residue analysis of pesticides in pollinators and testing of biocides.

INDIA

Eurofins Agroscience Services India

The site was established in Q1 2014 and is based near Coimbatore in Tamil Nadu State. From here, a wide range of crops are available including plantation crops like tea, coffee, cardamom.

Services:
• Field trials for bio-efficacy, selectivity, vigour and residual activity
• Soil Dissipation
• Resistance Monitoring
• Residue studies
• Ecotoxicology studies
• Green House / Pot culture studies
• Insecticide Resistance Monitoring / Management
• Mass rearing of insects viz., Helicoverpa / Spodoptera /DBM / BPH for R-Monitoring

Eurofins Advinus

Eurofins Advinus is one of India’s leading Contract Research Organizations. We support the development and testing of all varieties of insecticides, pesticides, herbicides, fungicides, industrial chemicals and other specialty chemicals for global registration. We have 25+ years of proven track record in offering agrochemical development services to our clients worldwide.

Services:
The range of services include conducting physico-chemical studies, 5 batch analysis, e-fate studies, safety assessment, ecotoxicology, field trials, residue/persistence studies, plant/animal metabolism studies and process development/optimization and scale up of active ingredients.

We also provide REACH compliance testing services.

ITALY

Eurofins Agroscience Services Italy

Eurofins Agroscience Services Srl in Italy is part of the Eurofins Agroscience Services global network, providing field, post-harvest and analytical studies to support the screening, development and registration of agrochemicals in Italy.

In total, there are three facilities in Italy, including the headquarters in San Giorgio di Piano (Bologna) Fondi (Latina) and Catania (Sicily).

Services:
• Crop Residue Studies (GLP)
• Crop Efficacy Testing (GEP)
• Fruit Post Harvest
• Soil dissipation and Accumulation Study
• Selectivity Study
• Ecotox Study
• Herbicide Study
• Biostimulants
• Demo Trial

Accreditations:
• GEP
• GLP

Eurofins Agroscience Services Catania
The south of Italy is well known for its cropping capabilities. Due to Sicily’s particular climatic conditions, the island is able to produce a wide range of crops such as citrus, vineyards, olives, vegetables and cereals.

The Catania base was inaugurated in 2011 with the aim of exploiting good weather almost all year round. This extended season allows increased trial periods, thus allowing more data availability and the opportunity to offer out of season trials to clients.

JAPAN

Eurofins JACC
JACC is one of the largest Japanese independent GLP pesticide residue laboratories for agrochemical registration, with more than 40 years of chemical testing experience and know-how.

JACC has accreditation from the Japanese Ministry of Agriculture, Forestry and Fisheries (MAFF), and serves chemical and agrochemical clients by offering pesticide analyses for river water, air and soil samples as well as analyses for active agrochemical ingredients and formulations.

MOROCCO

Eurofins Agroscience Services Maroc
Services offered from our Moroccan facility include Screening, Demonstration and Registration trials. These are conducted with insecticides, fungicides, herbicides and nematicides and as root, foliar, fruit or soil treatments.

Specialist fertiliser services are also offered: effect on germination, vigor of growth, photosynthesis, yield, fruit quality, protein quality and more.

NEW ZEALAND

Eurofins Agroscience Services NZ
Eurofins Agroscience Services NZ is a contract research organisation that offers a range of scientific research and development, consulting and testing services in agriculture and horticulture.

The main facility is located at Hastings, in the southeast of the North Island, but there is the ability to conduct field research throughout New Zealand.

Core activities include efficacy, safety and residue studies in plants, crop and variety evaluation, “off-season” testing and regulatory science consulting.

Eurofins Agroscience Services NZ is the only CRO in New Zealand that is able to conduct GLP compliant research for the field and analytical phases of crop residue studies.

Services:
• Crop efficacy studies
• Variety evaluation
• Regulatory science consulting
• Residue and safety studies
• Pharmacokinetic studies
• Soil dissipation/accumulation studies
• Worker exposure studies
• Field technical services
• Project and study management
• Processing studies

Accreditations:
GLP (crops)

Eurofins Agroscience Testing NZ
Eurofins Agroscience Testing New Zealand specialises in the analysis of agrochemicals and veterinary medicines and their residues in animal tissues, crops, soil, and foodstuffs

Services:
- Residue Field studies (GLP)
- Veterinary Drug Residue studies (GLP)
- Method Development and validation
- Pesticide analysis of fruit, vegetables
- Formulation analysis (GLP)
- Storage Stability studies (GLP)
- Physical Parameter Testing (GLP)

Accreditations:
- OECD GLP
- ISO 17025
- MPI Approved facility

Eurofins Agroscience Services Portugal
The facility at Moncao was established in 2004. Initially offering field trials, mainly GEP trials, the facility now has extensive and broad experience in field studies such as efficacy, residue, ecotoxicology, soil dissipation and ground water monitoring.

Services:
- Crop Residue studies (GLP)
- Crop Efficacy Testing (GEP)
• Ecotox Trials - earth worms
• Downy mildew and late blight trials
• Soil dissipation studies
• Ground water studies
• OPEX studies
• Post harvest studies
• Study Management

Accreditations:
• GEP
• GLP

**SPAIN**

**Eurofins Agroscience Services Zaragoza**

Our offices are easily accessible and feature an equipment store, contamination free room, freezer, the chemical store and weighing room. On the first floor, there are offices for the staff, a meeting room and storage area for office supplies, dedicated field equipment, processing area and GM and non GM seeds storage area.

Services:
• Operator Exposure Studies
• GMO Studies (non-target organisms, composition and expression trials with maize and sugar beet)
• Study Management
• Yield trials (specialized equipment for maize, cereals and other crops)
• Greenhouse studies
• Post Harvest trials

Accreditations:
• GEP
• GLP

Eurofins Agroscience Services Seville

The facility was set up in 1996 with two staff who mainly carried out GLP trials. The site was officially recognised by the Spanish Ministry of Agriculture for efficacy trials in 1997 and in 1998 was fully accredited for GLP trials by ENAC. In July 2014, the facility moved to the new site which saw increased capacity and improved our service offering. The facility is located in Camas which is in the farming heartland of Seville, Spain and also has easy access to most of the public transportation such as railway station and airport.

Services:
- Operator Exposure Studies
- GMO Studies
- Project Management
- Ecotox studies
- GEP and GLP in greenhouse or field conditions
- Ground water monitoring studies
- Soil dissipation studies
- Study management

Accreditations:
- GEP
- GLP

Eurofins Agroscience Services Valencia

The base was opened in 1996 with three people. The site was officially recognised by the Spanish Ministry of Agriculture for efficacy trials in 1997 and in 1998 was fully accredited for GLP trials by ENAC. In April 2018, the facility moved to the new site increasing capacity and resources to our service offering. The facility is located in Beneixida which is strategy located to cover a broad range of crops including cereals, citrus, vegetable crops (indoor and outdoor), grape (table and wine) and some others.

Services:
- Efficacy trials, open field and greenhouse conditions.
- Biostimulants trials, open field and greenhouse condition.
- Dumping-off trials in control conditions.
- Residue trials, open field and greenhouse conditions.
- OPEX trials.
- Groundwater monitoring studies
- Soil dissipation studies
- Study Management
- Post-Harvest efficacy and residue trials
- Dust drift residue trials

Accreditations:
- GEP

Eurofins Agroscience Services Regulatory Spain SL

In a dynamic and complex regulatory environment, our priority is to support clients through every stage of their registration requirements. EAR is supported by a global network of field stations, laboratories and carefully selected partners. We are committed to advising on the best registration strategies and to compile registration documentation in line with current and upcoming regulatory guidelines.

EAR is constantly expanding its capacity and capabilities across the globe. With extensive experience in the various regulatory arenas, the team have worked under a range of partnership models over many years of active operation.

EAR are able to provide support in the following industries:
- Crop Protection
- Biocides (including microbial)
- Biocides
- Environmental Risk Assessment

(Pharmaceutical and veterinary medicine)

Services:
- Regulatory consultancy for agrochemicals, biological and biocides

**De Bredelaar**

De Bredelaar was founded in 1988 and is an independent research institute specialised in crop protection in agriculture and horticulture. Areas of expertise include efficacy, phytotoxicity and residue studies in various crops along with demonstration trials. De Bredelaar is both GEP and GLP certified.

Field trials are carried out either on-site (fields and glasshouses) or at nurseries and arable farms throughout the Netherlands.

**Services:**
• Efficacy & Crop safety research
• Residue & Exposure studies
• Demonstration & Platform trials
• Tuber- and seed treatment trial

**Accreditations:**
• GEP
• GLP

**THAILAND**

**Eurofins Agoscience Services Thailand**

Eurofins Agoscience Services Ltd in Thailand forms part of the Eurofins Agoscience Services global network, providing field and analytical studies to support the screening, development and registration of agrochemicals in Thailand.

**Services:**
• Crop Residue studies (GLP)
• Crop Efficacy Testing (GEP)
• Glass House studies
• Operator Exposure studies
• Insecticide Resistance Monitoring / Management
• DBM / BPH Mass Rearing for R-Monitoring

**UNITED KINGDOM**

**Eurofins Agoscience Services UK**

Eurofins Agoscience Services in the UK forms part of the Eurofins Agoscience Services global network.

There are six strategically based field locations in the UK offering full geographical coverage and a state of the art analytical laboratory in Derbyshire.

EAS has the following field locations in the UK:
• Headquarters in Wilson, Derbyshire
• Beverley, East Yorkshire
• Downham Market, Norfolk
• Colchester, Essex
• Mawdesley, Lancashire
• Willand, Devon

**Services:**
• Laboratory, growth room, glasshouse and field screening
• Crop Efficacy studies (GEP)
• Biological Assessment Dossiers
• Project and Study management
• Crop Residue studies (GLP)
• Full analytical services for analysis of residues in crops, water, soil, and air and other matrices
• Analytical method development
• Independent Laboratory Validations
• Import tolerance studies
• Baseline resistance monitoring
• Insect and pathogen cultures
• Effects of pesticides on rotational and replacement crops
• Soil dissipation/ accumulation
• OECD 208 studies
• Varietal evaluation
• ELISA [protein expression & viral quantification]
• Real time PCR
• Nematode laboratory
• Evaluation of the rainfastness and wash-off of products
• Exposure studies including operator, worker re-entry, and dislodgeable
foliar residues
• Ecotoxicology field studies
• Independent Laboratory Validations

Accreditations:
• GEP
• GLP

Eurofins Agroscience Services Devon

The South West Base is a new addition to Eurofins Agroscience Services Ltd and since its inception in November 2012 work has concentrated on GEP efficacy trials.

Eurofins Agroscience Services Suffolk

The South East base was opened in autumn 2008 and expanded in summer 2011 to increase office, storage and freezer space.

Eurofins Agroscience Services Prospect Hill Research Facility

The Prospect Hill Research facility consists of offices and laboratories. It is the primary location for honey bee, non-target organism lab studies, urban entomology research and new formulations/products development.

Services:
• EU and EPA import tolerance studies
• Quantification of dislodgable foliar residues
• Baseline resistance monitoring
• Effects of pesticides on rotational and replacement crops
• Quantification of dissipation/accumulation of pesticides in soil
• Evaluation of the rain fastness of products
• Ecotoxicology studies
• Independent Laboratory Validations
• Study management

Eurofins Agroscience Services Jeffersonville Research Facility
The Georgia research station located in Jeffersonville has soils typical of the southern growing region. The station is located in the EPA growing region 2. The Georgia research station is located in Twiggs County and is close to the geographic center of the state of Georgia. We conduct work with all major southern crops and turf.

Services:
• GLP/ Residue Studies
• Efficacy studies
• Environmental Fate Studies
• C14 Studies- field and greenhouse
• GMO studies
• Pollinator studies
• DFR Studies
• Worker Exposure Studies
• TTR Studies

Accreditations:
• GLP

Eurofins Agroscience Services Sanger Research Facility
The Sanger research station located in Sanger, CA has soils typical of the Central Valley in California. Only 8 miles East of Fresno, it conducts work with all major California crops.

Services:
• GLP/ Residue Studies
• Efficacy studies
• Environmental Fate Studies
• GMO studies
• Pollinator studies
• DFR Studies
• Worker Exposure Studies

Accreditations:
• GLP

Eurofins Agroscience Services Cedar Grove Research Facility
Cedar Grove Research Facility (CGRF) is located in Orange County, North Carolina and features three offices, two laboratories, a monitored freezer room for sample storage, common equipment room, two growth rooms and two greenhouses.

CGRF maintains a group of well trained research scientists with working knowledge of beekeeping. The team leads the honey bee ecotoxicity studies in the US. Currently, approximately 500 bee hives are kept across apiaries in Cedar Grove.

Field work at CGRF is comprised of several different types of studies. The most common studies are honeybee ecotoxicity studies and residue studies. GLP studies are conducted at the request of the sponsor.

The common field crops are corn, cotton, soybeans and sunflowers. Our common vegetables include tomato, pepper, potatoes, cucurbits and broccoli.

The CGRF greenhouses are used most frequently to grow crops needed for transplant in the field, or to maintain arthropod cultures. Other studies maintained in a greenhouse setting include germination studies, pollination studies, water management studies, and caged insect studies.

The laboratory houses several growth chambers used to maintain arthropod cultures in isolation. The laboratory is used for efficacy screening, bioassays, disease culture maintenance, algal cultures and germination studies. Laboratory work at Cedar Grove specializes in pesticide efficacy, including translational work with field-to-lab samples, as well as consumer products and urban entomology.

Eurofins Genomics
Eurofins Genomics offers a wide array of products and services for the agroscience industry. We work with many companies in this industry for plant and seed related applications. Related products and services include DNA / RNA synthesis, Synthetic Biology, Next Generation Sequencing, Genotyping, Gene Expression, Microarrays, and bioinformatics for academic and industrial research.

We offer competitive prices, one of the fastest turnaround times for sequencing in the country, and the lowest error rate in the industry for oligonucleotides.

Services:
• DNA / RNA Oligonucleotides with a variety of options, purifications and modifications available.
• DNA Sequencing in tubes, plates and kits
• Gene Synthesis & Synthetic Biology
• Gene Fragments
• Next Generation Sequencing
• qPCR and MGB-eclipse probes
• Applied Genetics: Genotyping, Gene Expression & Microarrays

Accreditations:
• CLIA accredited
• CAP accredited
• ISO 9001:2008
• ISO 13485:2003
• FDA 3009882691 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD product

Eurofins EAG Easton

Formerly known as PTRL West, this San Francisco Bay area laboratory features studies to meet regulatory requirements in the areas of environmental fate, metabolism, and analysis of agrochemicals, industrial chemicals and pharmaceuticals. Our Hercules, CA 19,000 sq. ft. facility was built in 1987.

Services:
• Environmental Fate
• Plant & Animal Metabolism
• Residue Chemistry
• MD & MV
• Product Chemistry
• Aquatic Toxicology
• Terrestrial Toxicology
• Avian Toxicology
• Pollinator Testing
• Field Management

Eurofins EAG Gainsville

Our newest laboratory offers pollinator testing capabilities, featuring honeybee hives and bumble bee colonies, with ample capacity for culturing quality larval stock. Located in Florida, this optimal latitude allows almost year round pollinator testing. Capabilities at this site include all five core studies required by the EPA, with developing capabilities to work with native species.

Eurofins EAG Easton

Formerly known as Wildlife International, Ltd., this facility is located on Maryland’s Eastern Shore. Started in 1985, the Easton location offers aquatic and avian toxicology services, testing programs for terrestrial plants, insects and services to evaluate environmental fate and biodegradation. The laboratory is almost 120,000 sq. ft. in size.

We serve and provide support to a global clientele with GLP studies to meet global regulatory requirements for the testing of agrochemicals, industrial chemicals, pharmaceuticals, biocides and animal health products. Our highly experienced and talented team of scientists and technicians focuses on quality, timeliness, innovation and flexibility to meet the complex needs of diverse markets, each of which are confronted with ever more complex regulations.

Our experts are intimately involved in the development of guidance and constantly engage in scientific exchanges in OECD, EPA, EU and other regulatory programs.

Services:
• Aquatic toxicology
• Avian toxicology
• Terrestrial toxicology
• Environmental fate studies
• Product chemistry under GLP

Europeans EAG Columbia (ABC Lane)

Our newest laboratory offers pollinator testing capabilities, featuring honeybee hives and bumble bee colonies, with ample capacity for culturing quality larval stock. Located in Florida, this optimal latitude allows almost year round pollinator testing. Capabilities at this site include all five core studies required by the EPA, with developing capabilities to work with native species.

European EAG Easton

Formerly known as PTRL West, this San Francisco Bay area laboratory features studies to meet regulatory requirements in the areas of environmental fate, metabolism, and analysis of agrochemicals, industrial chemicals and pharmaceuticals. Our Hercules, CA 19,000 sq. ft. facility was built in 1987.

Services:
• Environmental Fate
• Plant & Animal Metabolism
• Residue Chemistry
• MD & MV
• Product Chemistry
• Aquatic Toxicology
• Terrestrial Toxicology
• Avian Toxicology
• Pollinator Testing
• Field Management

European EAG Easton

Formerly known as Wildlife International, Ltd., this facility is located on Maryland’s Eastern Shore. Started in 1985, the Easton location offers aquatic and avian toxicology services, testing programs for terrestrial plants, insects and services to evaluate environmental fate and biodegradation. The laboratory is almost 120,000 sq. ft. in size.

We serve and provide support to a global clientele with GLP studies to meet global regulatory requirements for the testing of agrochemicals, industrial chemicals, pharmaceuticals, biocides and animal health products. Our highly experienced and talented team of scientists and technicians focuses on quality, timeliness, innovation and flexibility to meet the complex needs of diverse markets, each of which are confronted with ever more complex regulations.

Our experts are intimately involved in the development of guidance and constantly engage in scientific exchanges in OECD, EPA, EU and other regulatory programs.

Services:
• Aquatic toxicology
• Avian toxicology
• Terrestrial toxicology
• Environmental fate studies
• Product chemistry under GLP

Located in Florida, this optimal latitude allows almost year round pollinator testing. Capabilities at this site include all five core studies required by the EPA, with developing capabilities to work with native species.
REACH SERVICES

Eurofins is a global service provider to the chemical industry, offering a comprehensive range of testing and consulting services for REACH and its worldwide relatives.

Eurofins REACH Services covers the full testing portfolio according to Annex VII-X of the REACH directive, as required for the registration of chemicals within the EU. All studies are performed in compliance with GLP for which we have a certificate since many years. In addition, our experienced regulatory team provides support for all steps of the regulatory and registration process. This includes both phase-in and non-phase-in substances.

For clients dealing with articles or finished goods, the following services can be provided from Eurofins Consumer Product Testing Division (Check section “Consumer Products Testing” in this directory):

• BOM/BOS Chemical Assessment (HENZ System): our laboratories can help to manage and monitor your supply chain by helping to collect BOM (Bill of Materials) and BOS (Bill of Substances) from your suppliers. This information is essential in the process of controlling the occurrence of any SVHC or other chemical restricted substance through your supply chain. Based on collected BOM/BOS information, our Chemical Assessment Service (HENZ System) can help to assess your product and evaluate the likelihood of containing any SVHC or any restricted chemical in any of the components of the product, hence, helping companies to optimize testing efforts and quality budgets by creating targeted testing plans focusing on those specific components that would have been evaluated as risk materials during the assessment.

• SVHC and Restricted Substances Testing: Either in conjunction with the Chemical assessment service (for targeted testing programs after assessment) or independently, Eurofins offers a wide range of analytical tests to screen for candidate list substances (SVHC) and to cover specific restricted substances under REACH Annex XVII.

General contact for services regarding REACH in articles: product-testing_reach@eurofins.com

Services:
Physico-chemical properties
Toxicology
• Skin and eye irritation/corrosion
• Sensitisation
• Genotoxicity
• Acute and repeated dose toxicity
• Reproductive and developmental toxicity (DART)
• Carcinogenicity
• Toxicokinetic behaviour
Ecotoxicology
• Aquatic toxicology
• Terrestrial toxicology
• Environmental fate/Biodegradability
Analytical services
• Product testing for SVHC’s
Consulting services
• Advice on registration and testing
• Waiving strategies
• Literature searches, data evaluation and data gap analysis
• Technical dossier preparation & submission in IUCLID 5
• Member dossier preparation
• Risk assessments, Chemical Safety Reports (CSR), Higher tier assessments
• Post submission support

Accreditations:
• GLP
• AAALAC (Partner Laboratory)
