

Services Portfolio

Data-driven Supply
Chain Assurance

An agile partner in consumer product assurance

Through our comprehensive services in supplier qualification, product inspection and people empowerment, powered by digital intelligence, buyers and suppliers are facilitated to meet increasingly complex benchmarks and standards in consumer product industry.

After being established in 2005, Eurofins | AQM possesses a strong presence in the traditional sourcing hub of China and the newly emerging sourcing markets. To serve the dynamic sourcing landscape and shifting market demands, our teams are based in Southeast Asia, South Asia, Europe and North Africa. The acquisition of Eurofins | AQM by Eurofins Consumer Product Testing (CPT) in 2019 has enabled further expansion of our capabilities and services portfolio for the industry.

Why Eurofins | AQM?

AQM Online is a digital inspection platform which strengthens modern day sourcing with essential data intelligence.

Digital intelligence

To meet the requirements of hectic sourcing schedules, inspection reporting and audit reporting are completed in 1 working day and 3.5 working days, respectively.

Fast reporting times

Our professional inspectors and auditors cover key consumer product manufacturing markets.

Geographic coverage

Flexibility and agility

Agility is in our DNA. We are committed to developing tailored solutions to make sourcing easier, faster and more transparent for our customers.

Consistency and alignment

Eurofins | AQM's stringent quality, process and ethics management systems mean that our customers can expect the highest levels of consistency and integrity.

Robust experience

With over a decade and a half of industry experience, and particular expertise in fashion and footwear, Eurofins | AQM's team is committed to serving our customers with pride and professionalism.

Supplier qualification

Aimed at risks management and mitigation, our audit services are conducted with a focus on the related management processes providing corrective action plans (CAP), enabling your suppliers to implement continuous improvement measures and fostering long term relationships.

Social Compliance Audit

Objective measurement of the factory's performance against social compliance requirements of market standards, customers' own standards, ICS standards or amfori BSCI standards

Environmental Audit

Quantitative reporting on the factory's conformance with industry or local regulatory environmental requirements

Chemical Management Audit

ETP/ Wastewater Audit

Selected modules from Environmental Audit to focus on chemical management and Effluent Treatment Plant (EPT)/ wastewater facility management

Technical Audit

An evaluation of the production capacity, capability (organisation, process, policy and management), and quality management systems of the factory

Production Verification Services

Authentication of source of a shipment from the factory to address unauthorised subcontracting

People empowerment

To keep up with rapidly developing industry trends, both buyers and suppliers must continuously keep on top of industry developments. At Eurofins | AQM, our customers can leverage our trainers' expertise and experience in the industry to build up their own teams' or suppliers' competency.

Classroom/ on-site training

Delivered in small classes to ensure better results. Visit our website for training schedules, or approach us for tailored training programmes.

Online learning

Transcend geographical boundaries and time constraints, determine the pace of training or arrange training courses for your suppliers on relevant topics

Wastewater ETP Management and Operator Certification

Certification programme specially set up for ETP operation management training to ensure a facility is operated safely, efficiently and compliantly

Factory QC Certification

Tailored certification program on the competency of QC in factories for product inspection

Product inspection

Quality of products is always fundamental to consumer loyalty and brand reputation. To help monitor the production and manufacturing quality of suppliers for brands and retailers, Eurofins | AQM has developed a series of inspection services to safeguard product quality on-site for buyers.

Pre-production, During Production and Final Random Inspection

Inspection of raw materials, semi-finished products and finished products at different stages of production to ensure product quality

Fabric Inspection

The 4-point system is deployed to inspect fabric pre-production

Inline Inspection

Inspection of semi-finished articles and production lines throughout production and development of corrective action plans

Loading Supervision

Supervising goods loading to ensure the shipment matches the order in term of integrity

Inspection Studio

Eurofins | AQM manages customers' inspection centres at designated warehouses, shortening reporting time to just 0.5 day and maximising cost-effectiveness

Inspection Combo

Fast inspection with hand-picked inspection parameters out of full inspection designed for small quantity or re-order purchases

Self-Inspection Certification Program

Certification program with assessment, training and on-going monitoring designed for retailers to implement self-inspection by factories

AQM Online

From supplier performance benchmarking and risk management to supply chain optimisation, data intelligence helps to maximise productivity and minimise costs. The AQM Online platform has been established in-house by our IT and operations teams to keep our customers virtually connected to the assurance information collated by our inspection teams.

AQM Online is being extended to include auditing services to provide comprehensive digital assurance to our customers. Explore and unlock the power of data with AQM Online!
