Eurofins: 
Network of laboratories

Each laboratory offers analytical services and customer support, however, some services are centralised. Through excellent logistics and information technology, Eurofins can deliver a full range of expertise through any one of its laboratories.

In this directory, services listed are specific to the respective laboratories and are described as follows:

- International Division/ International Business Line
- Country (by alphabetical order)
- Laboratory - Marketing name
- Laboratory description/ Services/ Analysis/ Offers
- Full contact information:
  - Legal name of the laboratory
    - Full address and phone number(s)
    - Email(s)
    - Website

FOOD & FEED TESTING

Eurofins is the world leading food and feed testing laboratory group, deploying a comprehensive range of state-of-the-art analytical techniques in order to support its clients' increasingly stringent quality and safety standards.

The Group has built up a global network of food testing laboratories and Competence Centres that perform more than 100 million assays per year to establish the safety, composition, authenticity, origin, traceability and purity of food.

Eurofins thus offers the broadest portfolio of any food testing lab and makes this unique offer available globally from any of our laboratories using optimised processes, logistics and IT.

AUSTRIA

Eurofins Lebensmittelanalytik Österreich

Eurofins Lebensmittelanalytik Österreich was founded in 2006 as a subsidiary of Eurofins Scientific and Österreichisches Forschungsinstitut – of, and was originally the "Milchwirtschaftsfond" in the middle of the last century. It is the direct descendant of QLab Austria (ownership: Agrarmarkt Austria - AMA Gütesiegel).

Eurofins-ofi is one of the leading laboratories in the field of food law and labelling within the CEE Region.

The site in Vienna carries out a broad range of chemical, biological and pesticide residue analyses and consultancy on foodstuffs, packaging materials, biopharmaceuticals, cosmetics and consumer goods, with a special focus on the area of retailing. In addition, a countrywide network for sampling and sample-shipment offers our customers a "one stop" service.

Furthermore Eurofins-ofi provides industrial partners with a full quality assurance programme for outsourcing their internal QA activities (e.g. shelf life testing, backup sample storage).

Services:
• General food Chemistry:
• Chemical and physical analysis: chromatography (pesticides, mycotoxins, preservatives etc.), chemistry (fat, protein, dry matter etc.), microbiology
• Marketability and Translation: in over 45 countries but with the main focus on CEE Europe
• Sensory Analysis: sensory panels for all market relevant product groups
• Accredited sensory methods
• Special panels for dairy products and wine
• Experts with DLG-sensory certificate
• Inspection/Hygiene:
• 3rd Party Audits
• Hygiene checks
• Expert sampling
• HACCP Consulting
• Issuance of a certificate
• Food Law: §73 experts with competence in food law, labelling and food supplements

Accreditations:
• ÖVE/ÖNORM EN ISO/IEC 17025:2007

BELGIUM

Eurofins Food Testing Belgium

Services:
Routine microbiological parameters on food and feed for industry and retail, diversity of methods (ISO, PCR), food and water sampling under accreditation, labelling checks.

Accreditations:

BRAZIL

Eurofins São Paulo

Eurofins do Brasil has been offering a complete Eurofins GeneScan GMO portfolio since 2001. The analytical portfolio has increased to offer a wider and complete service solution to Brazilian market.

We offer analyses to the food, feed and agribusiness industries. Microbiology, pesticides and veterinary drug residues, mycotoxins, GMO and animal species identification are the main areas.

Technologies include PCRs and chromatographs - LC/MS-MS, GCs and HPLCs coupled with several different detectors.

Eurofins do Brasil combines the best practices and worldwide expertise of the Eurofins network, offering an
international portfolio locally, and delivering high quality services for its customers.

Accreditations:
• INMETRO ISO/IEC 17025:2005
• REBLAS (Brazilian Network of Laboratories, Healthy Ministry)
• MAPA (Ministry of Agriculture)

Eurofins GCL Santiago

Eurofins GCL joined the Eurofins Group in 2013. GCL companies have a long track record in the delivery of laboratory services, consulting and training, mainly focused on the food industry.

Services:
Testing services are offered in accordance with the Food Health Regulations for companies involved in food: cooked dishes, food processors and surfaces. GCL also offers testing for pathogens in raw materials and finished products: VIDAS Automated methods for Listeria monocytogenes, Salmonella, E. coli O157 H7.

Other services include:
• Water testing
• ILW and lifetime studies in real time.
• Residues of Pesticides
• Antibiotics
• Cholesterol and Fatty Acids
• Vitamins
• Mycotoxins
• Water and ILW
• Alcohol
• Preservatives and Antioxidants
• Composition of foods, nutrients and heavy metals
• Fertilizers
• Water and Waste Waters
• Sensory evaluations
• Nutritional labelling
• Testing of own brand products

Accreditations:

**CHINA**

**Eurofins Food Testing Suzhou**

Eurofins Technology Service (Suzhou) Co., Ltd. is a subsidiary in China wholly owned by Eurofins Scientific Group.

With a laboratory accredited by DAkkS (Germany), CNAS, CMA & AQSIQ (China) in Suzhou and sales offices in Dalian, Qingdao, Xiamen, Kunming, Tianjin, Chengdu, Guangzhou, Hong Kong and Taiwan, Eurofins offers the full spectrum of the Eurofins portfolio to its clients throughout Greater China.

**Services:**
- Pesticide analyses based on QUECHERS GC-MS & LC-MS/MS
- Pesticide analyses for organic foods
- Organic contaminant analyses, including Melamine/ Cyanuric acid
- Veterinary Drug residue analyses
- Mycotoxins analyses in foods
- Nutritional fact analyses
- Physical & chemical analyses
- Microbiological analyses
- Heavy metals analyses
- Radioactivity analyses
- Allergens analyses
- Illegal dyes analyses
- Premix vitamin analyses
- GMO qualitative & quantitative analyses
- Identity Preservation/ Non-GMO Supply Chain Control Programme Consulting and Certification
- Food Safety programmes (IFS, BRC, ISO 22000, etc.)
- Consulting / Auditing / Certifications
- Pre-shipment Inspections and hygiene auditing programme against recognised standards

**Accreditations:**
- DAkkS (Germany)
- CNAS
- CMA
- AQSIQ (China)

**Eurofins Food Testing Qingdao**

Eurofins Technology Service (Qingdao) Co., Ltd., founded in 2016, is located in the North of China.

Business covers Shandong Province, Henan Province, Hebei Province, Beijing and Tianjin etc.

The laboratory focuses on chemical and microbiological analysis for food/feed and environmental samples on trace levels. With the rapid development of testing capability, the lab’s testing services on vet drugs, microbiology, allergen, pesticide, contaminant, mycotoxins, etc.

**Services:**
- Pesticide analyses for plant foods
- Organic contaminant analyses, including PAHs, and Melamine/ Cyanuric acid
- Veterinary Drug residue screening analyses
- Mycotoxins analyses in foods
- Physical & chemical analyses
- Microbiological analyses
- Allergens analyses
- Illegal dyes analyses
- Pre-shipment Inspections and hygiene auditing programme against recognised standards

**Accreditations:**
- CNAS in accordance with ISO/IEC 17025:2005
- China Metrology Accreditation

**CROATIA**

**Eurofins Croatiakontrola Zagreb**

Eurofins Croatiakontrola Ltd. is an inspection company which combines laboratory testing services and inspection of goods.

We have profiled ourselves as the strongest laboratory in Croatia in the field of pesticide residue analysis and
analyses and consultancy contain:

Microbiology - Testing for the complete range of microorganisms relevant to the food industry:
- Pathogenic organisms (e.g. Salmonella spp, Listeria monocytogenes, Staph. Aureus, E. Coli, Campylobacter spp, Vibrio spp)
- Spoilage organisms (e.g. Yeast and Mould, Bacillus spp, Clostridium spp, Pseudomonas spp)
- Technologically relevant (e.g. Lactobacilli, Pseudomonas spp)
- Mould, Bacillus spp, Clostridium spp,
- Spoliation organisms (e.g. Yeast and Mould, Bacillus spp, Clostridium spp, Pseudomonas spp)
- Microscopic analysis
- Microorganism
- Microbiological analysis

Chemical analysis of food and feed - Testing for complete range of analysis according with the requirements of the regulations and laws:
- Nutritional testing of food
- Sensory analysis of food and food contact materials with a wide scope of different methods; highly experienced and trained experts
- Feed analysis (quality parameters)
- Vegetables
- Fruits
- Meat and meat products
- Oil seeds; oils and fats of vegetable and animal origin, including the analysis of all relevant fat attending compounds and profiles; ageing, oxidation;
- Olive oil
- Dried fruits
- Nuts
- Convenience products
- Cereals
- Coffee
- Sweets
- Novel food, food supplements and health food

Common use objects, Food contact material, Cosmetics - Testing for range of analysis according with the requirements of the regulations and laws; Making of EU Cosmetic Product Information File; Stability tests, Challenge testing, etc.

Agricultural soil and fertilizer analysis, agricultural advice - Testing for complete range of analysis according with the requirements of the regulations and laws:
- Soil quality analysis
- Fertilizers quality analysis

Environmental analysis services: - Performing sampling, chemical and microbiological analyses of various matrices. We provided services to government, science and private sector:
- Analysis of drinking water, mineral water, groundwater, surface water, wastewater for organic and inorganic contaminants, heavy metals, flame retardants, ecotoxicology testing
- Analysis of waste, soil, sludge, sediment, digestate and compost
- Analysis and classification of solid recovered fuels (SRF)

Consultancy
- Consultancy in respect of quality control systems/ HACCP/ hygienic checks
- Specialist in the field of food law, labelling

The laboratory is able to analyse all kinds of food with the following microbiology and chemical methods:
- Classic cultural methods
- PCR
- Petrifilm
- Inhibitory substance
- Classical methods
- Instrumental methods (liquid and gas chromatography, MS/MS, spectrophotometry, atomic absorption spectroscopy), etc. (ISO, AOAC, EuSalts, inhouse methods).

Accreditations:
- Eurofins Croatiakontrola Ltd. is accredited according HRN EN ISO/IEC 17025:2007 and according GMP+B10 Laboratory Testing Scheme. Laboratory is designed for a high sample performance with short analytical times due to advanced equipment and a "lean management" methodology.

Membership:
- GAFTA Approved Analysts
- FOSFA Approved Analysts

Services:
- Supervision of loading/discharging
- Sampling
- Quality inspection and conditions of goods – oil, moisture, TW, Foreign matters, broken kernels, damaged kernels, gluten, protein, falling number, W and P/L, quick test of Toxins, quick test on GMO CP 4, poisonous seeds etc.
- Infestation inspection
- Cleanliness inspection
- Damaged survey and expert evaluation of the damages
- Sealing of vessel holds/containers
- Inspection on Slaughtering line – includes procedure of classification and labelling of beef, sheep and pig halves
- Consulting services – label check and translations, interpretation of the regulations

Eurofins Croatiakontrola Rijeka
Eurofins Croatiakontrola Ltd. is an inspection company engaged in inspection of quality and quantity of goods, specialized in inspection of agricultural and food products, in particular grains, oilseeds and feedstuffs. We provide an independent and expert testing and analysis of goods in ports, warehouses, vessels, containers, trucks/wagons.
DENMARK

Eurofins Steins Laboratorium

Eurofins Steins performs sampling, laboratory analyses and consultancy services focusing on the food, feed, agro, and dairy industries. Our laboratory in Vejen services a broad range of companies, authorities and organisations.

Services:

Food and feed testing, more specifically consists of testing contents and contamination – vitamins, amino acids, mycotoxins, pesticides, heavy metals, medicine residues, pathogenic microorganisms, etc.

European Vitamin Competence Centre, BSE-testing and consultancy on hygiene - i.e. HACCP.

Accreditations:

The laboratories are accredited according to the ISO 17025 standard. The laboratories are appointed as national reference laboratories within specific areas.

Eurofins GenoSkan A/S

GenoSkan A/S uses a variety of advanced biotechnologies for genotyping and sequencing.

The Infinium HD assay technology from Illumina is a flexible platform which makes it possible to genotype a large amount of SNP markers for one individual at a time.

With this technology it is possible to use both customized SNP assays and to design own SNP assays. GenoSkan A/S offers customized SNP- assays for most species (human, cattle, pig, sheep, dog etc.)

FINLAND

Eurofins Scientific Finland, Raisio Laboratory Site

The Raisio laboratory unit is focused on food and feed testing, including microbiological and chemical laboratory testing and sensory analysis. Our specific competence area is fat related analyses. Additionally, the complete biopharmaceutical and food testing service offering of the Eurofins Scientific Group is available to our clients via the Raisio site.

Services:

• General food chemistry, fat analyses (including special analyses like sterol/stanol ester analyses, trans fatty acids, etc.)
• Microbiological analyses

Accreditations:

• ISO 17025
• Approval by Finnish Food Safety Authority (EVIRA)

FRANCE

Eurofins Analytics France

Services:
Chemistry:
• Chemical and nutritional testing of food products for industry and the retail sector
• Determination of additives, preserving agents, colourings etc.
• Determination of mycotoxins, detection of melamine and acrylamide
• Determination of heavy metals (Pb, Cd, As, Hg)
• Determination of pesticides
• Isotopic analyses by SNIF-NMR® and IRMS – powerful tools in the detection of adulteration of fruit juices, alcoholic beverages, vinegar, honey, flavours, caffeine, e.g. added sugar in fruit juices or sugar-containing products, such as honey and maple syrup; added vitamin C in orange juice; added malic acid in apple juice, tartaric acid in grape juice, citric acid in lemon juice; mislabelling of alcohol origin in alcoholic beverages; fraud concerning the natural origin of flavours such as vanillin, benzaldehyde, anethole and linalool.
• Product profiling by 1H-NMR allowing monitoring of large numbers of samples for validation of the composition and detection of atypical components
• A complete offer for quality control of fruit juices and fruit products (including anthocyanin profile, oligosaccharides, flavour profile by enantioselective HRGC-MS etc.)
• Validation of the origin of bioethanol
• Chemical and nutritional testing of feed products (raw materials and finished products)

Molecular biology
• GMO testing from seeds to finished products across the food and agricultural chain (farm to fork concept) using the most innovative and proprietary technology including real-time PCR detection, identification and quantification of a complete range of genetically modified plants such as maize, canola, soybean and vegetables. A combination of optimised protocols, state-of-the-art technology and a highly skilled team enable rapid processing times tailored to the customers’ requirements.
• Genetic fingerprinting for tracing of beef supplies (Eurofins TAG™)
• Species identification by DNA chip: determination of the presence of 21 meat species in one single analysis
• Allergen detection: Eurofins offers a comprehensive testing scheme covering all allergens listed on the “EU – Allergen Hit list”. Eurofins can offer both ELISA and PCR technology and advises customers which method is most appropriate for their products and production line Training and consulting concerning allergen analyses and risk management (Recognition by VITAL®)
• Detection of genetic resistance to scrapie
• Seed purity testing and quality control
• SSR / SNP development and routine analyses
• Marker Assisted Selection (MAS / MAB)
• Divergence studies (genetic resources management, varietal identification, EDV - Essentially Derived Varieties)
• Contract research (marker conversion, development of specific tests, project management)

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-0287 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire Contaminants Sud

Eurofins Laboratoire Contaminants Sud specialises in determination of pesticide residues in fruit and vegetables.

Services:
Pesticide analysis with short turnaround time

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-5766 (accreditation scope available on www.cofrac.fr).

Eurofins Cervac Sud

Eurofins Cervac Sud performs chemical and microbiological testing of food and water as well as sampling.

Services:
• Macroscopic analyses, metrology, determination of defects
• Microbiological analyses of food (salmonella by PCR, enterobacteriaceae…)
• Microbiological analyses of water.
**Accreditations:**
The laboratory is accredited by COFRAC, the French accreditation organisation, for programmes 60-80-81-82, LAB GTA23 and LAB GTA59 (accreditation reference 1-1822, scope available on www.cofrac.fr)

**Eurofins Laboratoires de Microbiologie Ouest**
Eurofins Laboratoires de Microbiologie Ouest is the biggest of the French Eurofins laboratories for microbiological testing, analysing several hundred thousand samples each year and conducting method development and R&D projects in the field of microbiological testing.

**Services:**
Microbiological analyses of all types of food products are performed for clients in the food industry, retailers and caterers.

A wide range of methods are employed, including rapid methods with very short turn-around-times using immunoenzymatic techniques, molecular biology methods (PCR), especially for pathogenic bacteria e.g. Salmonella.

Application of new technology for germ identification by Matrix-Assisted Laser Desorption/Ionisation with Time-Of-Flight mass spectrometry (MALDI-TOF), with a very short Turn Around Time.

The laboratory has a nationwide network of technicians conducting sampling at production sites and delivering samples directly to the laboratory in less than 24 hours.

**Accreditations:**
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025 under the reference 1-1830 (accreditation scope available on www.cofrac.fr)

**Eurofins Laboratoire de Microbiologie Ouest**

info@eurofins.fr
www.eurofins.fr

**Eurofins Laboratoire de Microbiologie Est**
Microbiological analyses of all types of food products are performed for clients in the food industry, retailers and caterers. More than 160000 samples are analysed each year.

A wide range of methods are employed, including rapid methods with very short turn-around-times using immunoenzymatic techniques, especially for pathogenic bacteria e.g. Salmonella and molecular biology methods (PCR Salmonella and Listeria).

A network of technicians conducts sampling at production sites, delivering samples directly to the laboratory in less than 24 hours.

**Accreditations:**
The laboratory is accredited by COFRAC, the French accreditation organisation in accordance with ISO 17025, under the reference 1-1147 (accreditation scope available on www.cofrac.fr)

**Eurofins Laboratoire Nord**
Eurofins Laboratoire Nord performs chemical and microbiological testing for the food and feed industries, retailers and caterers.

**Services:**
In microbiology, a wide range of methods are employed, including rapid methods with very short turn-around-times such as immunoenzymatic techniques and molecular biology methods (PCR), especially for pathogenic bacteria e.g. Salmonella.

A nationwide network of technicians conducts sampling at production sites, delivering samples directly to the laboratory in less than 24 hours.

The laboratory also has specific expertise and experience for determinations on sugars and related products, for chemical testing and microbiology (including TAB – Thermophilic Acidophilic Bacteria)

**Accreditations:**
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2241

Eurofins Laboratoire Coeur de France
is a private - public structure, the result of the takeover of IPL activities by Eurofins in 2011. It analyses several hundred thousand samples each year.

Services:
• Animal health testing: microbiology, PCR for BSE and animal blood testing
• Environmental water testing
• Food safety using microbiology testing and PCR virus detection

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2452 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire de Pathologie Végétale
specialises in plant pathology, pest detection on plants and territory monitoring. In that context, thousands of analyses are performed each year to comply with national surveillance programs of major plant quarantine diseases.

Services:
The laboratory offers diagnosis services, as well as expertise in the following fields;
• Nematology
• Mycology
• Bacteriology
• Virology

Using conventional methods of isolation and identification to advanced immunoenzymatic and molecular biology techniques, the laboratory can provide a wide range of services aimed at seed and agrochemical firms as well as co-operatives and food manufacturing companies.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-5364 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire de Hygiène Alimentaire
is dedicated to providing food safety support to our customers in retail, catering and warehousing.

A nationwide network of technicians conducts sampling at production sites, delivering samples directly to the laboratory in less than 24 hours.

Eurofins Biosciences also operates a large food safety consultancy department. About 100 auditors and sample takers perform audits at production sites, restaurants and retail outlets, checking compliance with current legislation in the field of food safety. They provide advice in implementing improvement plans and ensure that HACCP instructions are strictly implemented on site.

This unit conducts training sessions on hygiene and food safety for operators and professional managers in retail and catering. Several hundred thousand training/coaching/consulting hours are delivered each year.

Accreditations:
All sampling operations are done under full ISO 17025 accreditation delivered by the French accreditation organisation COFRAC. Impartial inspections are guaranteed by an ISO 17020 accreditation (accreditation reference 3-0826, scope available on www.cofrac.fr).

Eurofins Analytik

Eurofins Analytik carries out chemical, sensory and molecular biological analyses and provides consultancy and certification on foodstuffs.

Being the competence centre for allergen, irradiation and sensory testing, Eurofins Analytik assists producers and retailers in questions regarding foodstuffs and pet food.

Services:
Our services in general food analyses and consultancy contain packaging materials as well as commodities.

Services:
Testing for the complete range of microorganisms relevant to the food industry:
• Pathogenic organisms (e.g. Salmonella spp, Listeria spp, Staph. Aureus, Campylobacter spp, Vibrio spp)
• Spoilage organisms (e.g. Yeast and Mould, Bacillus spp, Clostridium spp, Pseudomonas spp)
• Technologically relevant microorganisms (e.g. Lactobacilli)
• Microscopic analysis
• Hygienic checks

The laboratory is able to analyse all kinds of food with the following methods:
• Classic cultural methods (ISO, §64 LFGB, ICUMSA)
• PCR
• Petrifilm
• Inhibitory substance
• Strain identification

Accreditations:
Eurofins BioTesting Service Nord is accredited according to DIN EN ISO/EC 17025 and is designed for a high sample performance with short analytical times due to advanced equipment and a "lean management" methodology.

Eurofins BioTesting Service Nord is accredited according to DIN EN ISO/EC 17025 and is designed for a high sample performance with short analytical times due to advanced equipment and a "lean management" methodology.
Consultancy for marketability and storage durability

Testing and consultancy in respect of quality control systems/ HACCP/ plant inspections / hygienic checks, audits according to ISO 22000

Specialist in the field of food law, labelling; Eurofins Analytik has a network for international labelling checks covering most EU countries, USA, Canada, China etc.

Nutritional testing

Molecular biology testing (determination of animal species and allergens)

Irradiation testing (analysis for the application of ionising radiation on food and biopharmaceutical products); all 5 EU-methods are offered

Sensory analysis of food and food contact materials with a wide scope of different methods; highly experienced and trained experts, including panels for various matrices as well as product-specific seminars

Specialist analyses and consultancy for following industry sectors:

- Oil seeds; oils and fats of vegetable and animal origin, including the analysis of all relevant fat attending compounds and profiles; determination of adulteration, ageing, oxidation;
- Olive oil
- Dried fruits
- Nuts
- Convenience products
- Cereals
- Coffee
- Sweets
- Retail
- Novel food, food supplements and health food
- Pet food

Eurofins Analytik also provides assistance to companies in the food business with respect to selecting and coordinating analyses for their special needs. This includes designing sampling and inspection plans as well as setting up testing schemes as a basis for the issue of a quality seal. In addition, Eurofins Analytik offers coordinated offers for sampling (also in the country of origin e.g. Turkey) and advice on individual products in the context of quality management.

Eurofins Analytik serves importers with rapid analyses of parameters needed for trade and import. The laboratory also has appointed and sworn chemists at its disposal to issue Free Sales and Health Certificates.

Eurofins Analytik is located in close proximity to major import-terminals in Northern Germany.

Accreditations:

Eurofins Analytik is accredited according to DIN EN ISO/IEC 17025:2005 and engages authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code).

**Eurofins WEJ Contaminants**

With more than 180 employees, Eurofins WEJ Contaminants is the Competence Centre of the Eurofins Group for the analysis of organic and inorganic contaminants, mycotoxins & plant toxins and veterinary drug residues in food and feed.

Eurofins WEJ Contaminants is a well-equipped and highly-automated laboratory using state-of-the-art techniques. It is a member of many national and international associations and working groups such as DIN, § 64 Working Groups, CEN, AOAC

Working Groups and participates in different national and international EU projects (AveQ, Biofocos, Biocop, MoniQA, European certification campaigns, Mycotoxin Awareness Network, KOMBISPEC)

**Services:**

Eurofins WEJ Contaminants hosts the following units:

1) **Mycotoxin & Plant Toxins**

   Competence Centre:
   
   Analysis of all regulated mycotoxins and as well as a broad spectrum of further relevant mycotoxins and plant toxins such as Alternaria toxins, ergot alkaloids, citrinin, moniliformin, sterigmatocystin, enniatins, beauvericin, pyrrolizidine alkaloids and tropine alkaloids.

2) **Veterinary Drug Residues**

   Competence Centre:
   
   Analysis of more than 250 different veterinary drugs, such as nitrofurans, CAP, macrolides, lactames, sulfonamides, tetracyclines, quinolones, coccidiostats, benzimidazoles, nitroimidazoles, phenylbutazone, fipronil, hormones and tranquilizers.

3) **Organic Contaminants**

   Competence Centre:
   
   Portfolio of more than 100 different parameters, such as PAHs, BTEX, furans and methyl furans, acrylamide, 3-MCPD and its esters, glycidylesters, nicotine, plasticisers, bisphenol A, Sudan and other illegal dyes, residual solvents, low volatile chlorinated hydrocarbons and mineral oil hydrocarbons (MOSH/POSH/MOAH).

4) **Inorganic Contaminants Production Centre:**

   Analysis of a vast number of (heavy) metals and trace elements with lead, cadmium, mercury and (inorganic) arsenic amongst them, metal speciation and analysis of radionuclides (caesium 134 and 137 and iodine 131).

**State-of-the-art laboratory equipment:**

- Gas chromatography with mass spectrometry (GC-MS, GC-MS/MS), flame ionisation detection (GC-FID), high performance liquid chromatography with fluorescence detection (HPLC-FLD), UV-Detection (HPLC-UV), diode-array detection (HPLC-DAD) or mass spectrometric detection (HPLC-MS/MS).
- High-resolution LC-MS, online-HPLC-MS, online-HPLC-MS/MS, atomic absorption spectrometry (AAS), (high-resolution) inductive coupled plasma with mass spectrometric detection or optical emission spectroscopy (ICP-MS, ICP-MS/MS, ICP-OES).
- LC-I/CP-MS, gamma-spectrometry, single-particle-ICP-MS, Dynamic Light Scattering Detector (DLS), Field-Flow-Fractionation (FFF).

**Accreditations:**

- DIN EN ISO/IEC 17025:2005
- Authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code)

**Eurofins GeneScan**

Eurofins GeneScan looks back at over 25 years of history in the field of molecular methods.

Eurofins GeneScan is recognised worldwide for its expertise and leading performance in the field of molecular testing for Genetically Modified Organisms (GMOs) and animal species identification in food, feed and agricultural raw materials.

The company offers the broadest portfolio of GMO testing services, testing kits and GMO related consulting worldwide. Eurofins GeneScan has a global presence with its network of partners in the USA, Brazil and China as well as with further partner laboratories in Australia and South Africa.

Therefore, Eurofins GeneScan is able to cover the whole agricultural value chain and to offer its high quality portfolio wherever it is most efficient for clients.

**Services:**

- **GMO Testing**

Eurofins GeneScan is the Competence Centre for GMO analyses within the Eurofins Group. GMO testing services cover the qualitative screening, the qualitative identification, and the quantification of all relevant GM events. Specific analytical strategies are developed individually according to the individual needs of clients.

- **Species Identification**

Eurofins GeneScan offers identification of plant and animal species and special customer requirements (e.g. testing for Halal compliance) are included in the scope of these services.

- **Residual DNA Testing**

Residual DNA testing services are offered for the food, feed and pharma industries.

- **Kits and Products**

Eurofins GeneScan test kits (PCR and ELISA) are the result of extensive experience in its own testing laboratories.

- **Method Development**

Contract projects for the development of analytical methods and custom-designed testing – also under GxP requirements – e.g.: method development in the context of EU regulatory approval of GMOs, molecular pathogen detection or residual DNA analysis.

**Accreditations:**

- ISO17025 certification
- ISO 9001 accreditation
- Approval for GLP/GMP compliant analysis
- QS-Approval

The high standards of the testing methods and test kits are readily confirmed internally and externally via participation in national and

Eurofins Global Control

Eurofins Global Control is an international inspection company offering supply chain control solutions to achieve product quality and safety from the origin to the consumer. This applies to food, pet food, chemicals and non-food products.

Major control systems have been established in actual more than 100 countries worldwide. Inter alia Argentina, Australia, Bolivia, Brazil, Bulgaria, Cambodia, Chile, China, Costa Rica, Germany, Dominican Republic, Ecuador, Egypt, Greece, Guatemala, India, Indonesia, Israel, Italy, Japan, Kenya, Colombia, Mexico, Myanmar, Netherlands, Pakistan, Paraguay, Peru, Philippines, Poland, Romania, Sweden, Switzerland, Spain, Sri Lanka, South Africa, South Korea, Thailand, Taiwan, Turkey, UAE, Uganda, Ukraine, Uruguay, United States and Vietnam.

On request, tailor-made solutions can be provided in most countries worldwide. For identity control of the goods, innovative DNA-based methods are applied from start to finish.

Services:
Pre-shipment inspections (PSI) and sampling, loading supervision, audits at outlet, factory and farm level and arrangement of analytical services in Eurofins laboratories worldwide.

Eurofins Global Control is listed by SFDA (Saudi Food and Drug Administration) for PSI for Exports to KSA.

Auditing services are offered in Central Europe, China, Pakistan, India, Sri Lanka, Philippines and Ecuador. More countries on request. These cover internal and second party audits within the criteria of international standards for quality and food safety management, Good Agricultural Practice and Organic Agriculture (ISO/FSSC 22000, IFS, BRC, SQF, GlobalGAP). Additional there are components regarding social standard (like SEDEX) or food defense available.

Audits are performed by trained personnel, e.g. IRCA certified lead auditors for ISO/FSSC 22000.

Accreditations:
Eurofins Global Control is certified according ISO 9001:2015.

Eurofins CLF Specialised Nutrition Testing Services

Eurofins CLF is a globally active laboratory located in the heart of Germany.

The analysis of macro- and micronutrients such as vitamins, amino acids, probiotics and trace elements is just as much part of the portfolio as the specific analysis for permissible limits in the inorganic and organic trace analyses of residues and contaminants. Microbiological methods for the complete range of food-related bacteria, including special baby relevant microbes, complete the package.

Eurofins CLF analyses parameters in raw materials, intermediates and final products. Eurofins CLF is a specialist for complex matrices like baby foods, pet foods, dietary supplements as well as special medical nutrition, all of which require special care and expertise as well as experience in analysis.

Services:
• All-in-one analytical partner for nutrients, residues & contaminants and microbiology
• Special nutritional testing in complex food and pet food matrices
• Sensoric Panel
• Special lab environment where material with low level contamination is handled separately
• Compliance with baby food regulations regarding low limits for residues and contaminants (low LOQ-level)
• Tailor made consultancy services to improve food quality, safety and analytical performance

Accreditations:
• DIN EN ISO/IEC 17025:2005

Eurofins CLF
Inlab was founded in 1992 as a food microbiology laboratory, and in 2017 celebrated its 25th anniversary. The laboratory and the team around business unit manager Dr. H.G. Leusch, are recognised for their proactive role in the development and implementation of new methods and techniques, as well as for their collaboration on national boards for microbiology.

Services:
Microbiological testing, expert advice, sample drawing and further services in the following areas and segments:
- Food (final, intermediate products and raw materials), feedstuff, articles of daily use including passing of rapid analyses
- Drinks and dispensing equipment
- Sanitary products, cosmetics and commercially available drugs
- Drinking and mineral water, bath water etc.
- Hygiene of companies
- Challenge tests
- Food relevant viruses (HAV, HEV, norovirus etc.)
- Training courses, inspections, hygiene advice

Accreditations:
- DIN/EN ISO/IEC 17025 (DAkkS for second governmental samples)
- § 43 IfSG (permission for working with pathogens according to NRW-governmental permission) drinking water laboratory and admitted laboratory of the “compost quality control association” for analysis of salmonella.

Eurofins Institut Dr. Rothe
For more than 60 years, food and non-food products have been analyzed accompanied with excellent customer service. The laboratory offers a broad spectrum of analyses and the corresponding judgement of food, cosmetics and consumer goods (e.g. hygiene papers, detergents) for the retail business as well as for trading companies and for producers.

Services:
Food:
- General food analysis
- Analysis of nutritional values
- Specializing in the chemical analysis of seafood and fish products (e.g. TVB-N, histamine, indole, nematodes, water/protein quotient etc.)

Cosmetics:
- Analysis of ingredients such as active agents (e.g. organic and inorganic UV-filters, anti-dandruff agents, vitamins, deodorant agents)

Consumer goods:
- Hygiene Paper: Analysis of parameters which reflect the price-performance ratio (e.g. mass, thickness, water absorption, tensile strength)
- Analysis of organic residues and contaminants (e.g. formaldehyde, MCPC and DCP)
- Detergents: Analysis of ingredients such as active agents

Accreditations:
- Institut Dr. Rothe is accredited according to DIN EN ISO/EC 17025

Eurofins Genomics
Eurofins Genomics’ expertise in DNA analysis of food and food products is regularly requested from clients all over the world.

Eurofins Genomics is internationally renowned for the quality and reliability of its services. Nearly all test methods are ISO 17025:2005 accredited.

Eurofins Genomics uniquely combines long-term expertise in food testing, veterinary testing and forensic genetics making Eurofins Genomics an internationally leading European laboratory in "Food Forensics".

The site comprises one of Europe’s largest providers for industrial scale production of oligonucleotides, gene synthesis, DNA sequencing, Applied Genetics, genotyping, Pharmacogenomics and DNA Forensics. We are further closely connected with other Eurofins Genomics sites in Europe, USA, India and Asia.

For food authenticity testing and other food testing applications, we work tightly with experts from other Eurofins Food testing laboratories to deliver optimal service packages and cost-efficient solutions. Our approach to our clients is highly service oriented.

Services:
Food authenticity testing
- Species and breed/variety identification
- Compositional analysis including quantification
- Residual DNA Testing
- All sample materials from raw material to all processing stages up to instant meals or health products
- All species (animals, plants, microorganisms, human)
- (Semi-quantitative) Meat testing for products such as sausages, minced meat including quantification
- Fish and seafood testing
- Authenticity testing of Basmati and Thai rice with high quantitative accuracy
- Authenticity testing of pine nuts
- Assay setup and validation in all stages, from marker discovery up to ISO 17025
- Establishment of new methods as a contracted and collaborative laboratory
- Consultancy
- Court expert witness service from highly experienced scientists
Accreditations:
- ISO 17025
- ISO 9001
- The laboratory is regularly audited by clients, including the biopharmaceutical industry and the food & feed industry
- Regular and long-term participation in numerous ring trials

Eurofins GfA Lab Service

With over 30 years of experience, Eurofins GfA Lab Service is the world’s leading dioxin laboratory.

The main focus of the analytical portfolio is the analysis of persistent organic contaminants (e.g. dioxins, PCB, flame retardants, PFCs, Stockholm POPs) on ultra trace levels. Representative for a number of parameters, polychlorinated dibenzodioxins and –furans (PCDD/Fs), polychlorinated biphenyls (PCBs), brominated flame retardants, per- and polyfluorinated alkyl substances (PFAS) as well as organotin compounds are examined in almost every matrix as e.g. food/feed, biota, environmental samples (water, waste, soil etc.), emission and ambient air samples and even human matrices (blood, serum, tissue etc.)

Eurofins GfA Lab Service GmbH is one of the few worldwide laboratories that is able to analyse all 27 POP substances banned or regulated in the Stockholm Convention in its own laboratory. Eurofins GfA Lab Service GmbH is also able to analyse all 209 PCBs incl. dioxin-like PCBs (DL-PCBs) and non-dioxin-like PCBs (NDL-PCBs, also called ICES6-PCBs), as required by the California Proposition 65. The scientists of this laboratory are sought-after experts in national and international standardisation bodies or other working groups. Numerous publications in the field of POP-analyses have been written or co-authored by employees of Eurofins GfA Lab Service GmbH. This is one reason why Eurofins GfA Lab Service GmbH is the POPs Competence Centre of the international Eurofins Group.

Eurofins GfA Lab Service GmbH is accredited according to the international ISO/IEC 17025:2005 standard. The overall capacity of dioxin and POP measurements of the Eurofins GfA Lab Service GmbH has been raised to >45,000 samples per year using high-end technical equipment (8 HRGC/HRMS systems (high resolution gas chromatography / high resolution mass spectrometers), 14 GC-MS/MS systems (gas chromatography / tandem mass spectrometers), 3 LC-MS/MS systems (liquid chromatography / tandem mass spectrometers), several GC-MS systems as well as the novel API-GC-MS/MS-technique). The highly experienced laboratory staff analyses all kinds of matrices both according to European guidelines and other regulations (US EPA etc.).

This state-of-the-art laboratory delivers rapid turn-around-times with the highest level of service and most advanced technologies (e.g. automated clean-up-systems) in line with the EU-Regulations No. 2017/644 and 152/2009 for analysis of dioxins and PCBs in food and feed samples. 48h-analytical services for dioxins and PCBs are possible for selected food and feed matrices.

In addition to the standardised services offered in our high performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures. Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

Provision of sampling kits:
- On top of carrying out different analyses, Eurofins GfA Lab Service GmbH also provides sampling material, especially for air-monitoring purposes such as cartridges filled XAD resin, pre-spiked or non-spiked, following the requirements of EN 1948 (part 1 to 3 (dioxins) or part 4 (PCBs)) or CEN/TS 1948-5.

Data Access Options beyond Electronic Analytical Reports:
- On-line Data Access: 24 hours a...
day, seven days a week through Eurofins’ secure internet access, EOL, which offers clients immediate access to final verified analytical results as analyses are completed and verified in the lab.

• Electronic Data Deliverables: Standard and custom formats available.

Accreditations:
• DIN EN ISO/IEC 17025:2005, D-PL-14629-01-00
• Officially acknowledged measuring site according to §29b Federal Emission Control Act (BImSchG), group I-Nr.1 and group IV for specific examination of substances requiring special complexity for sampling or analysis.
• Examination laboratory for soil and sewage sludge according to § 3 Sewage Sludge Ordinance (AbfKlärV)
• Officially acknowledged by the French environmental ministry for the measurement of PCDD/F in emission samples
• Analysis in compliance with EU-guidelines, international recognised standards, e.g. EN 1948, EPA and other accredited methods
• GOED member (Global Organization for EPA and DHA Omega-3)
• IFFO member (International Fishmeal and Fish Oil Organisation)
• Expert for official counter samples according to §43 LFGB, chemical-physical and microbiological examination of food
• QS approval as laboratory in the field of feed monitoring for the parameters, dioxins, PCBs, heavy metals, aflatoxins, DON, ZEA, PAH, animal ingredients, pesticides, salmonella, ochratoxins and methanol.

Eurofins Institute Dr. Appelt Hilter
Eurofins Institut Dr. Appelt Hilter GmbH carries out chemical, physical, sensorial and microbiological analyses.

Furthermore Eurofins Institut Dr. Appelt Hilter provides consultancy, label and declaration checks, marketability checks and certification on foodstuffs.

Services:
• Eurofins Institut Dr. Appelt Hilter assists producers, merchants, importers and exporters in questions regarding foodstuffs and animal fodder:
  • General food analyses
  • Hygiene testing
  • Consultancy for marketability and storage durability
  • Specialist analyses & consultancy for meat and meat products
  • Specialist analyses & consultancy for convenience products
  • Specialist analyses & consultancy for sweets and chocolates
  • Specialist analyses & consultancy for ice-cream and frozen products
  • Specialist analyses & consultancy for oils and fats and products derived from oils and fats (margarine) including the analysis of all relevant fat attending compounds and profiles; determination of adulteration, ageing, oxidization and microbial contamination
  • Specialist in microbiology testing (cultural, Petrifilm, PCR, species identification) and extremely rush routine release analyses for food (or feed) (e.g. routine Salmonella PCR within 20 h) limited just to the minimum technically required time
  • Specialist in the field of food law, labelling and questions concerning lab’s duty of informing authorities.

• Specialist analyses & consultancy for meat and meat products
• Specialist analyses & consultancy for sweets and chocolates
• Specialist analyses & consultancy for convenience products
• Specialist analyses & consultancy for ice-cream and frozen products
• Specialist analyses & consultancy for oils and fats and products derived from oils and fats (margarine) including the analysis of all relevant fat attending compounds and profiles; determination of adulteration, ageing, oxidization and microbial contamination

Europins Institute Dr. Appelt Hilter also provides assistance to companies in the food business with respect to selecting and coordinating analyses for their special needs. This includes designing sampling and inspection plans as well as setting up testing schemes as a basis for marketability certification or retailer's needs.

The company offers services from its authorised experts for double and cross checks and offers the special competence to provide certificates and judgements from its appointed and sworn chemist.

The laboratory is located in the northwest region of Germany and can provide collection services in a radius of 100 km (65 miles).

Accreditations:
• DIN EN ISO/IEC 17025:2005
• Official permission to work with pathogens according to § 44 IfSG
• Authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code)
• Appointed and sworn chemist

Eurofins Institute Dr. Appelt Leipzig

Eurofins Institute Dr. Appelt Leipzig provides analytical services through the whole supply chain. It is a testing laboratory for food, finished products, intermediates and raw products, drinking water and including release and rush analyses.

Services:
The laboratory offers a broad range of services to the manufacturing industry and food retailers including testing, expertise and sampling in the following fields:
• Chemical and microbiological testing of food
• Residue and contaminant analyses
• Chemical-physical analyses
• Molecular biological testing (Allergens, ELISA, PCR)
• Sensory testing
• Check on industrial hygiene

Our focus is offering integrated concepts for sampling, auditing, analytics and evaluation, consultation and training.

Eurofins Institute Dr. Appelt Leipzig has experience in labelling checks, site specific organization of seminars, audits and in-house trainings.

Accreditations:
• DIN EN ISO 17025
• Official expert for control tests according to §43 LFGB (German Food and Feed Code)
• QS acknowledge laboratories for food monitoring, investigation body for the BNN-Monitoring for the food groups B 1 to B2
• Investigation body for drinking water

**Eurofins BioPharma Product Testing Munich**

Eurofins BioPharma Product Testing Munich GmbH is an internationally operating testing laboratory offering comprehensive capabilities in safety and activity testing. With more than 30 years of experience, our team of scientists offers a broad scope of biological studies, which meet the international regulatory requirements of safety testing for feed, novel food, food additives, food enzymes and flavourings.

The identification of hazardous ingredients is mandatory for consumer protection. Toxicological testing is used to determine, whether food or feed products would pose any kind of risk to the health of consumers.

Eurofins BioPharma Product Testing Munich provides the full service to assess the biological and toxicological data under GLP-compliance according to the current European regulations (EFSA) and further international relevant guidelines (Redbook 2000).

Safety data for food/feed need to be generated by a basic set of toxicological studies. In addition further studies might be required on a case by case basis.

**Services:**
- Genetic toxicity e.g. AMES Test (OECD 471) and Micronucleus Study (OECD 487)
- Sub chronic toxicity e.g. 90-Day Oral Toxicity Study (OECD 408) [under consideration of specific adaptations laid down in more recent update of Guideline 407 (as required in EFSA Journal 2012; 10(7):2760: Guidance for submission for food additive evaluations)]
- Chronic toxicity / Carcinogenicity
- Reproductive and developmental toxicity (DART)
- Metabolism / Toxicokinetics

Besides the standard testing battery we offer individual advice concerning your specific project with regard to scientific and regulatory requirements. These customized test designs include neurotoxicity and immunotoxicity testing to address specific safety concerns.

**Accreditations:**
- Good Laboratory Practice (GLP)
- Good Manufacturing Practice (GMP)
- DIN EN ISO 17025
- FDA audited
- Listed by the World Health Organization (WHO)

**Eurofins Institut Nehring**

Eurofins Institut Nehring GmbH looks back over a company history of over 100 years.

Apart from the analytical, microbiological and organoleptic analysis of food, the assessment of the results with regard to the marketability of the product belongs to the core competences. With the knowledge based on experience gathered over decades, the analysis and assessment of canned goods including technological issues still is an important part of the institute’s portfolio.

The evaluation of the composition of polymeric materials, in particular coatings and sealing compounds, with regard to food contact legislation and the related compliance work including migration tests is another core competence of Eurofins Institut Nehring GmbH. The assessments are based on European as well as international legislations.

**Services:**

- The laboratory assists food producers, traders, retailers and importers in the following fields:
• Residual starting substance tests
• Organoleptic tests
• Statements regarding legal aspects
• NIAS-Test
• Specific migration tests
• Overall migration tests
• Composition check following:
  For food contact material Eurofins Institut Nehring GmbH offers the following:
  • Composition check
  • Overall migration tests
  • Specific migration tests
  • Residual starting substance tests
  • NIAS-Test
  • Organoleptic tests
  • Statements regarding legal conformity

Accreditations:
Eurofins Institut Nehring GmbH is accredited according to DIN EN ISO/IEC 17025:2005 and engages authorized experts for official counter samples according to § 43 LFGB (German Food and Feed Code).

Eurofins Food Integrity Control Services

In summer 2017 Eurofins Food Integrity Control Services (EFICS) started to operate in Ritterhude, near Bremen.

As the competence center for honey testing within the Eurofins Group EFICS offers a complete range of state-of-the-art techniques for authenticity testing, the determination of veterinary drugs, sensory testing, microscopic determination of the botanical and geographical origin of honey as well as quality parameters necessary for the international market.

Our experienced team of recognized experts actively participates in national and international working groups as DIN and gives guidance to the industry (e.g. German and European honey associations). EFICS offers an extensive and in line with demand service portfolio for the analysis, assessment and quality assurance of honey.

Services:
• Enzymatic, photometric, chromatographic, mass-spectrometry and high resolution mass spectrometry methods
• Stable isotope analysis (EA/LC-IRMS)
• Nuclear Magnetic Resonance Spectroscopy (NMR)
• Veterinary drugs (Multi methods by LC-HRMS)
• Botanical and geographical origin (Microscopy)
• Visual and organoleptic evaluation
• Compositional analysis according to Honey Directive 2001/110/EC
• Pyrrolizidine alkaloids
• Pesticides screening
• Heavy metals
• Genetically modified organisms (GMO)

Accreditations:
Eurofins Food Integrity Control Services is accredited according to DIN EN ISO/IEC 17025:2005

Eurofins GeneScan Technologies

Eurofins GeneScan Technologies is specialised in the production of kits and their application for the food and feed testing industry. Two decades of expertise in the development of molecular biology kits and their application in Eurofins laboratories on all continents have led to competitive products, which set standards worldwide.

Based on in depth knowledge of the current market situation and the requirements of the food and feed industry, Eurofins GeneScan Technologies adapts its kit portfolio to meet the most recent market demands. Laboratories all over the world trust in the quality of these products which help them to fulfill their customers’ demands.

Services:
• GMO testing kits: screening, identification, quantification with real-time PCR multiplex technology
• Plant pathogen detection kits
• Plant species identification kits: comprehensive screening and specific detection of defined plant species
• Animal species screening and identification kits: authenticity testing for most domestic animal species as well as taxonomic groups of animals
• Pathogen testing kits: fast and reliable detection of foodborne and waterborne pathogens
• Virus detection kits: complete workflow covering all steps for the specific detection of the most important food-related viruses
• DNA extraction kits: kits optimised for different food and feed matrices
• Application support on-site
• Customer trainings and webinars

Accreditations:
• ISO 9001:2015 certification
• AFNOR certified kits
• AOAC certified kits
• Eurofins GeneScan methods are found in national and international standards

Eurofins Q-Bioanalytic GmbH

Q-Bioanalytic GmbH was established in 2003. It is specialized in the analysis of pathogenic organisms in food or feed, with microbiological and molecular-biological methods.

It is an approved lab for water analytics, as well as an approved lab for the diagnostics of the koi herpes virus.

The special competence of the company lies in the area of the molecular-biological diagnostics. A focus is the development, validation and distribution of Real-Time PCR-analysis kits.

Q-Bioanalytic GmbH is permanently developing new PCR- and real-time
PCR-systems. As manufacturer of PCR-kits, Q-Bioanalytic GmbH owns the license for Real-Time PCR for the production and application of the kits in the food area.

The analysis kits are traded worldwide by VWR International as a main distributor or can be directly bought from our online store.

Q-Bioanalytic GmbH has profound knowledge in dealing with difficult food and feed matrices, different DNA-extraction methods as well as the PCR-analysis. Beside the kit production Q-Bioanalytic GmbH runs an ISO 17025 accredited service lab for food and water analytics with main focus on the PCR-analysis.

Furthermore, Q-Bioanalytic is involved in international research projects on foodanalytics. Development and validation of new qualitative and quantitative real time PCR-systems for the analysis of human-pathogens in food are one object of these projects. Q-Bioanalytic closely co-operates with national market leaders for fish and seafood.

**Services:**
- meat and sausages
- fish and seafood
- shellfish and shellfish products (seafood)
- poultry and poultry products
- eggs and egg products
- convenience foods and snacks
- milk and dairy products
- grain and bakery products (cereals)
- nuts, nut products and seeds
- herbs and spices
- soups, stock and sauces
- confectionery, honey and royal jelly
- desserts
- fruits and vegetables
- mineral-, tap- and drinking water
- Koi (Cyprinus carpio haematopterus, etc.)
- feed
- drugs

IRELAND

Eurofins Food Testing Ireland

Eurofins Food Testing Ireland is a specialist microbiology laboratory offering a wide range of accredited tests in the food and environmental sectors.

The laboratory is fully accredited by INAB (299T) to ISO 17025 and also by the Irish Department of Agriculture.

From simple routine testing of samples through to extensive shelf life and new product development testing, Eurofins Food Ireland provides local and international expert analysis and advice as well as commitment to deliver the best service and turn-around-time of results.

Eurofins Food Ireland’s main clients are food safety authorities, local authorities, food retailers, food processors and manufacturers, catering organisations and water treatment contractors.

Accreditations:
• ISO/IEC 17025: 2005 (Registration Number 299T)
• Tesco Laboratory Approval Scheme (TLA)
• Marks & Spencer PLC Independent Supplementary Audit.

ITALY

Eurofins Chemical Control

Eurofins Chemical Control carries out chemical, physico-chemical, microbiological and molecular biology analyses, research and consultancy on foodstuffs.

The laboratory is fully accredited by ACCREDIA in compliance with UNI CEN ISO/IEC 17025:2018 standard (laboratory no. 0490) and also by the Italian Ministry of Health, the Italian Ministry of University, Scientific and Technological Research and by the Japanese Ministry of Health.

Eurofins Chemical Control’s main clients are food industries and retailers.

Founded in 1979, Eurofins Chemical Control has a highly qualified staff (about 70 people) and technologically innovative analytical equipment with about 4,000 m2 of well-organized laboratories.

Services:
• Nutritional aspects and micro constituents analyses (minerals, additives, characteristic molecules)
• Shelf life studies
• Chemical contaminants residue analyses (pesticides, mycotoxins, heavy metals, veterinary drugs residues, acrylamide, furan and methylfuran, glycoalkaloids, hydrocyanic acid)
• Microbiological testing and detection of extraneous materials (Filtr test), merchandise quality tests
• ELISA determinations for allergens
• Molecular biology testing for allergens
• Setting up of new analytical methods (particular requirements, food alerts) and innovation of existing methods with validation of different food matrices
• Setting up of new analytical indexes
for an unbiased evaluation of technological and process parameters
• Technological consulting
• Planning and management of quality control plans
• Interpretation of analytical results with reference to legislation, bibliography, technological-process parameters
• Service of rush analysis by request

Accreditations:

Eurofins Pivetti

Eurofins Pivetti S.r.l. has been operating in the Parmigiano Reggiano, Grana Padano and Trentin Grana sector since 1968.

It performs chemical and microbiological analyses of milk and its derivatives, providing technological assistance to dairies at all production phases and to the finished product, up to the sale of cheese. It offers food, zoo-technical and hygienic sanitary advice and assistance to farmers, aimed at ensuring milk quality.

Our staff consists of 13 technicians, involved at various levels in milk analysis for more than 700 companies producing milk for Parmesan cheese. They follow Parmesan cheese production in 40 diaries, for a production of about 15,000,000 kg of cheese per year.

The lab became part of the Eurofins group in December 2012 and it has improved its microbiological laboratory, which now is fully accredited by ACCREDIA in compliance with UNI CEI EN ISO/IEC 17025:2005 standard (laboratory no. 0608)

Services:
Our analytical services for milk and its derivatives include:
• Microbiology: including pathogens, indicator & spoilage organisms
• Chemical: pH testing, cell counts, antibiotics research
• VERIX: x-ray machine service for monitoring cheese and commercial selections
• Livestock advice and cheese production as well as marketing consulting

Accreditations:
• UNI CEI EN ISO/IEC 17205:2005 (laboratory no. 0608)

JAPAN

Eurofins Food and Product Testing Japan
Food and Product Testing Japan provides a wide range of reliable analytical food testing services to clients across multiple industries from food producers to ingredient producers, trading firms and retailers. As a unique unrivalled laboratory as the only one foreign owned independent laboratory authorized by Ministry of Health, Labour and Welfare (MHLW) in Japan and with ISO/IEC17025 accreditation, it is also able to offer testing services for exporting as well as importing foods and other products.

Services:
• Pesticides
• Nutrition
• Functional foods/Metabolomics
• Tea profile
• Microbiology
• Foreign object
• Heavy metals
• GLP pesticide for registration

Accreditations:
• ISO/IEC 17025, Ministry of Health, Labour and Welfare (MHLW) in Japan

KOREA

Eurofins Korea Analytic Service Co., Ltd.

Eurofins Korea Analytic Service is a laboratory that has been providing analytical services since 2000, performing chemical, microbiological, organic, inorganic and toxicological analyses in environmental, food, cosmetics and consumer products.

Services:
Environmental Testing Services (water, soil, waste and atmospheric emissions):
• Dioxins and dioxin-like compounds, PCBs and related persistent organic pollutants (POPs)

Food and Livestock products Testing Services:
• Pesticide analyses for organic foods
• Pesticide analyses based on QUECHERS GC-MS & LC-MS/MS
• Nutritional fact analyses
• Microbiological analyses
• Heavy metals analyses

Cosmetics Testing Services:
• Chemical Testing
• Microbiology
• Safety Testing

Human Biomonitoring Service:
• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on human health

Accreditations:
• ISO/IEC 17025
• SAMM
• Ministry of Health Malaysia

MALAYSIA

Eurofins Food Testing Penang

Our well-trained team and laboratory setup ensures proper handling, preservation (if required) and storage of your samples to avoid degradation and cross-contamination. Due to the complexity of food sample matrices, food analyses are performed by food chemist and microbiologist for they have detailed understanding of the samples nature and thus able to obtain accurate results of your samples whether they are fresh/raw, cooked, processed, canned or preserved.

Routinely we receive food and drugs samples which are inclusive of solid food, semi-solid food, beverages and drinks, food supplements, traditional herbs, cosmetics and pharmaceutical products etc. Some of the commonly tested parameters are nutrition facts, heavy metals, preservatives, colourings, vitamins, antibiotics, fat, tests for the fulfilment of halal requirements, banned substances (melamine, saccharin, cyclamate etc), GMO (Genetically Modified Organism), microbiological testing etc.

NML is an authorized commercial laboratory by Ministry of Health Malaysia (MOH) for food testing and the issuance of health certificates. Building upon years of experience in food testing, our food consultants are able to advise you on analyses needed in accordance with most updated local requirements. In the case of food for export which overseas requirements are to be fulfilled, in the presence of respective documents from the country of interest (written in languages understandable by our team), our consultants are prepared to walk the extra mile to provide assistance and technical advices to you and your organisation.

Accreditations:

NEW ZEALAND

Eurofins Auckland

Eurofins Auckland offers its customers a state-of-the-art laboratory which includes microbiology, chemistry and soil testing in a large, facility with a total laboratory surface of over 3,700m².

Its continuous investment underpins our commitment to support the food and dairy markets of New Zealand. The increase in laboratory size and the added analytical methods have enabled us to expand the laboratory’s capabilities, focusing on a range of food and dairy matrices, including analyses for infant formula label claims for local and international markets.

Services:

• Dairy / Meat and Food microbiology
• Dairy / Meat and Food chemistry
• Stability testing
• Biopharmaceutical microbiology and chemistry testing
• Shellfish seawater testing
• Soil/Plant/Fertilizer testing
• Water testing
• Food Act Verification
• Dairy RMP Evaluation and Verification
• Engineering Evaluation and Verification
• Dairy Premises and Heat Treatment Evaluation
• Engineering Annual Heat Treatment Operational Checks & Tests
• Heat Treatment Training
• Non Regulatory Audits

Accreditations:

• ISO / IEC 17025
• ISO / IEC 17020
• GMP

Norway

Eurofins Food & Feed Testing Norway

The laboratories of Food Norway conduct a broad range of accredited chemical and bacteriological analyses of food and feed. We have specialists in aquaculture, and we perform tests for the fish farming industry, fish feed and fish oil producers.

We deliver all types of analyses to the Norwegian market. Many chemical analyses are performed at Eurofins competence centres and microbiology is performed closed to customers at both our main laboratory in Moss, and at all our local laboratories close to customers.

Eurofins Food & Feed Testing Norway arranges accredited proficiency testing programs of food and water microbiology. We have over 300 clients in more than 50 countries, and we are internationally acknowledged for our PT schemes.

Accreditations:
- NS/EN ISO/ IEC 17025

Poland

Eurofins Poland

Eurofins Polska Sp. Z o.o. is an independent and competent laboratory performing analyses of environmental samples, food and non-food products, and offering quality supervision and control services. We act in accordance with the PN EN ISO 17025:2005 quality management system, which has been certified by Accreditation Certificate No. AB 1334 by the Polish Centre for Accreditation.

Eurofins Polska Sp. Z o.o. is approved by the Chief Veterinary Officer for the analyses of animal feed and by the State District Inspector of the
Department of Sanitation for water sample collection and analysis.

Services:
Microbiological and physicochemical analyses are performed both in raw materials, semi-finished products, finished products, and environmental samples for the producers of dairy, fish, meat, fruit and vegetables, bakery and confectionery as well as in non-food products (household chemicals and cosmetics).

Analyses are performed in accordance with applicable methodological standards, and to individual customer specifications.

Marking and verification of labelling of food products, household chemicals and cosmetics is offered as well. Our experts assess the compliance of labelling with applicable laws and with the requirements of GDA labelling.

Audits of suppliers are conducted by experienced and highly qualified auditors that confirm compliance with the rules and standards by IFS, ISO 22000, HACCP, GHP and GMP.

Training topics are adapted to the needs and expectations of our customers. They concern areas related to hazards in the production process, legal regulations, food labelling, sensory analysis and many others. Trainings are given by experienced professionals from the field, acclaimed throughout the country.

After acquiring in 2014 the first laboratories of the Group (Applus agrifood testing labs), the growth of Eurofins Análisis Alimentario Holding España S.L. has been exponential, being currently the reference laboratory of the food sector in Spain:
• 2015: acquisition Laboratorios Laia (North of Spain)
• 2016: acquisition SiCa AgriQ (South of Spain)
• 2017: acquisition LDG (Feed Testing, Northeast of Spain)
• 2018: acquisition BioAccali (Certification, Center of Spain)
• 2018: acquisition Mas Control 3 Canarias (Canary Islands)
• 2018: acquisition Ecosur (East of Spain)

With the recent acquisition of Ecosur agri-food testing labs, we have become number one in the country, focusing mainly in the food and agro market. In the last 25 years, the food laboratory has turned into a leading supplier of food tests, with a high penetration in the industry sectors of Meat, Baby Food, Non-Alcoholic Drinks, Cereals and Pastries. The agri-food testing laboratories are also a local reference in agro-environmental testing, with specific competence in pesticides testing.

We operate 6 laboratory sites in Spain (Madrid, Barcelona, Almeria, Murcia, Pamplona and Tenerife) with 2 further satellite facilities in Spain and Portugal.

Services:

General Food Chemistry
• Chemical and nutritional testing of food products for industry and the retail sector.
• Determination of additives, preserving agents, colourings etc.
• Determination of mycotoxins, detection of melamine and
acrylamide.
• Determination of heavy metals (Pb, Cd, As, Hg).
• Determination of pesticides. Pesticide analysis with short turnaround time
• Vitamins (Group B, Liposolubles, vitamins C, A, E)
• Allergens (gluten, caseins etc)
• Hormones
• Antibiotics
• AIJN in juice analysis
• Dioxins

Microbiological analyses
• Microbiological analyses of all types of food products are performed for clients in the food industry, retailers and caterers.
• Microbiological testing of food and water as well as sampling. (Legionella spp)
• Macroscopic analyses, metrology, determination of defects.
• Microbiological analyses of food (Plate count, PCR, ELFA, from Salmonella, Listeria, enterobacteriaceae)
• Specific food testing: GMO, vegetal & animal species identification.
• Animal health testing: microbiology, PCR for BSE and animal blood testing

Agro-Environmental Testing
• Soils & Plants
• Organic waste & Compost
• Residual pesticides
• Water (irrigation, drinking water, waste water)

Audit & Inspection
• 3rd Party Audits
• Hygiene Checks
• Expert Sampling
• HACCP Consulting

Product Certification Body
• Spanish Ham (Jamon Serrano)
• Iberian Product Regulations

Accreditations:
The laboratories are accredited by ENAC, the Spanish accreditation organisation: UNE-EN ISO/IEC 17025: 2017
• QS-Gemüse-Kartoffeln OBST GMBH
• SGF International E.V SURE GLOBAL FAIR
• AIJN NGCS / RQCS European Fruit Juice Control System

SWEDEN

Eurofins Food & Feed Testing Lidköping

Eurofins in Sweden offers a wide range of accredited chemical and bacteriological tests in the food and feed sector.

Services:
• Pesticide residues
• Active & foreign substances in dietary supplements
• Contaminants
• Allergens
• Sugars & sugar alcohols
• Nutritional values
• Labelling
• Analysis of additives
• Microbiology
• Feed, Seed and Grain

Accreditations:
Accredited by SWEDAC (The Swedish board for Accreditation and Conformity Assessment) according to the ISO 17025 standard.

Switzerland

Eurofins Food Testing Switzerland

Eurofins Switzerland, founded in 2000, offers microbiological and chemical analyses of food, feed, as well as biopharmaceutical and environmental analyses. Important services are consulting and auditing-services for the food and feed industry, environment, cosmetics and the whole gastronomy segment.

Around 54 co-workers provide services in around 1000 m² lab-space. Labs are located in Schönenwerd. The laboratory has strong expertise in microbiological analyses (classical quantitative determination, detection and taxonomic characterization) for a wide range of microorganisms.

Furthermore Eurofins Scientific AG has implemented analyses based on the technologies PCR and Maldi-TOF

Services:
• Microbiological and chemical analyses of food, feedstuffs, water (drinking water, waste water)
• Support in food-labelling and conformity checks according to Swiss and European law. Special expertise is the management of retailers’ complex demands in the Swiss market.
• Consultancy and monitoring (food safety, restaurants, retailers, industrial production, biopharmaceutical industry etc.)

Accreditations:
• ISO 17025
• ISO 17020

Thailand

Eurofins Product Service (Thailand)

The sales office was set up in March 2017. All the samples are sent to Eurofins group laboratories worldwide according to the testing matrix. We take care of all your testing needs and the logistics of the samples with our network of laboratories in the region.

Services:
• Allergen testing
• Dioxins, furans and dioxin-like PCBs
• Food irradiation
• Food law and labelling
• GMOs testing and specific gene
• Residual DNA testing
• Pesticides testing
• Mycotoxins
• Vitamins
THE NETHERLANDS

Eurofins Food Testing

Eurofins location in Heereneveen, former name Eurofins Analyticco Food, has an expertise on a wide range of parameters, including pathogens. Routine work is fully automated and highly efficient. Eurofins offers Legionella testing and risk-analysis. Focus on extensive nutritional analyses and contaminants including heavy metals and mineral.

Additional services are sampling, complete product labelling checks, hygiene inspections and training, courier services, on-line reporting and 24 hour availability.

Eurofins Carbohydrate Competence Centre is located in Heereneveen and has highly qualified and experienced graduates, all possible carbohydrate tests like high and low molar dietary fibres, starches, sugar profiles and many others, have been upgraded, implemented or are in development.

Services:

- Expertise on a wide range of parameters, including pathogens. Routine work is fully automated and highly efficient. Eurofins offers Legionella testing and risk-analysis.
- Focus on extensive nutritional analyses and contaminants including heavy metals and mineral.

Accreditations:

- ISO/IEC 17025: 2005
- GMP10 + Feed Safety.

Eurofins Rotterdam BV

Eurofins location in Barendrecht (near to Rotterdam), former name Eurofins LabCo, offers fast contaminant and nutrient analyses in food, feed, oils, fats, nuts, seeds, herbs and spices tailored to the needs of companies in the Port of Rotterdam and Amsterdam.

In addition, all Eurofins analyses are offered since the Rotterdam lab is your portal to the Eurofins network. The laboratory located in Barendrecht specializes in analyses with a very short TAT (generally 4-48 hours).

We use state-of-the-art laboratory equipment with methods such as: GCMS/MS, GC-FID, GC-ECD, GC-NPD, HPLC-FLD, HPLC-UV and GFAAS.

Services:

- Feed testing officially acknowledged by GAFTA (one of the four reference laboratories), VERNOF, CNGD, HAFU
- Edible oils and fats officially acknowledged by FOSFA and NOFOFA

They can also offer logistics services such as sample pick up and sampling according to EU or Codex Alimentarius regulations.

- Moisture, crude protein, crude fat, starch, raw fibre, ash, ash in HCl, fatty acid composition
- Mycotoxins: e.g. Aflatoxin, Ochratoxin, Deoxynivalenol, Zearalenon, Fumonis
- Fat content, mineral oil, impurities, ash, FFA, peroxide number, melting point, solid fat content, 3-MCPD, PAH, BAP,
- PCB’s, DPTG
- Organoleptic analyses as admixtures and damaged grain and seeds.

Accreditations:

- ISO17025
- GAFTA
- FOSFA
- NOFOFA
- VERNOF
- CNGD
- HAFU

Eurofins Lab Zeeuws-Vlaanderen (LZV) BV

Eurofins location in Graauw, former name Laboratorium Zeeuws-Vlaanderen (LZV), offers chemical analyses in agricultural, food and feed testing.

Because of the broad scope they can offer a huge range of food chain analyses. Besides analyses, they also takes care of sampling and have an advisory department.

Technologies used; GC-MS (MS), LC-MSMS, GC-FID, Head-space, NIR-analyser, Flow Injection Analysers, spectrophotometer, AAS, AES, ICP-AES, ICP-MS, Coulometer, calorimeter, titrators, CHNS-analyser.

Services:

- Fresh fruit and vegetables, herbs and spices, tea
- Multi and single pesticide residue analysis
- Dioxin, dl and ndl PCB’s in food/feed/environmental samples
- MOSH/MOAH
- Heavy metals
- Nitrate
- Sulphite, Morpholine and amines, QAC’s

Accreditations:

- ISO 17025
- Acknowledged by: QS, BNN and FAVV
Eurofins Food Safety Solutions

Eurofins Food Safety Solutions advises many food companies on food safety and hygiene problems and offers coaching on quality systems and monitoring.

**Services:**
- Inspections and Security check according NVWA
- Approved Locations
- Advice
- External posting of experts
- Training
- Sampling

Eurofins Bureau de Wit

One of the main laboratory service providers focusing on food and water safety testing for the food production, hotel and catering sectors in The Netherlands.

**EkoSmyrna Food Analysis**

kosmyrna Laboratories was Turkey Branch of Ecocur Group and established in 2013. It was acquired by Eurofins in 2018. It is a private laboratory authorized by the Ministry of Agriculture.

EkoSmyrna is a company that provides analysis, control, training and consultancy services on food safety, agricultural products, feed and feed additives. Molecular biology, chromatography, physical-chemical analysis and microbiology departments are available. The following analyzes can be made with GC-MS, HPLC and LC-MS. ICP etc. devices by using advanced technological devices and international methods.

**Services:**
- Microbiology: including pathogens, indicator & spoilage organisms,
- Nutritional fact analyses
- Physical & chemical analyses
- Vitamin analyses
- Heavy metals and minerals analyses
- Contaminants
- Mycotoxins;
- Food additives
- GMO qualitative analyses
- Some animal species
- Allergens
- Physical and chemical analyzes specific to the product

In addition to analysis services, Training, Process Validation and Consulting Services are also provided.

**Accreditations:**
- The laboratory is accredited by TURKAK, the Turkish accreditation organisation, in accordance with DIN EN ISO/EC 17025, under the reference AB-0529-T.
- Ministry of Agriculture and Forestry Turkey

**Eurofins Istanbul Food Control Laboratories**

The laboratory was initially established as Gözlem Food Control and Research Laboratories in 2002. It was acquired by Eurofins in 2017 and continues to its work as Eurofins Istanbul Food Control laboratories. It is a private laboratory authorized by the Ministry of Agriculture.

Eurofins Food Istanbul's main clients are food industries and retailers, Ministry of Agriculture, exporters, importers and catering organisations. Physical, chemical, instrumental, microbiological and molecular biological analyzes are carried out in the raw materials, auxiliaries, intermediates and end products for the food industry.

Many of the parameters specified in the Food Legislation or in the technical specifications of the companies can be analyzed. Analyses are performed in accordance with international standard methods. Expert opinion on the results obtained are provided.

UKRAINE
Eurofins Agro Testing Ukraine
We are a young (opened August 2014) yet experienced (working in the Ukrainian market since 2012) branch of the Eurofins group.

Services:
• SOIL:
  • Soil sampling
  • Agricultural and Environmental Testing
  • Fertilization advisory
  • Nutrients maps
  • Nematodes
  • Pesticides and heavy metal residue

• GRAIN and OILSEEDS:
  • Mycotoxins
  • Dioxins, Pesticides

• GMO – quantitative and qualitative analysis
• NIT grain network program
• Heavy Metals

OTHER:
• Plant tissue analysis, fertilization advisory for the top dressing
• Forage analysis for nutrients, toxins, vitamins, minerals, etc.
• Food analysis
• Water analysis
• Consumer goods testing
• Pharma testing

Over 150 000 analyses available on request

All samples are sent to the Eurofins group laboratories worldwide according to the testing matrix. We take care of all your testing needs and the logistics of the samples.

UNITED KINGDOM
Eurofins Food Testing Wolverhampton
Established in 2004, Eurofins Food Testing UK has a network of 10 sites across the UK offering testing and advisory services to customers throughout the food and feed supply chains; from primary producers, processors and manufacturers, to retailers, wholesalers and caterers.

Our laboratories hold UKAS accreditations and ensure the requirements of ISO 17025 are met on a daily basis to maintain the highest standard of quality. We comply with approval schemes from major retailers Tesco and M&S for our methodologies.

We offer a comprehensive range of state-of-the-art analytical techniques to support our customers’ increasingly stringent quality and food safety standards.

Services:
• Microbiology: including pathogens, indicator & spoilage organisms, shelf-life studies and audit advice
• Full range of nutritional analysis for labelling
• Contaminants
• Allergens
• Inorganics

Accreditations:
• Eurofins Wolverhampton is accredited by UKAS under registration number 0342 for microbiology and chemistry. Accreditation is to ISO 17025
• Tesco Laboratory Approval (TLA) Scheme
• Marks & Spencer PLC Independent Supplementary Audit.

Eurofins Nutrition Analysis Center

Recognised as a Centre of Excellence for Nutrition, the Des Moines laboratory specialises in analysing feed, commodities, pet food, human food and dietary supplements for nutritional content.

Services:
Areas of nutrition expertise include:
• Complete proximate testing (including total dietary fibre)
• Vitamins using LC, LC-MS/MS
• Amino Acids, Mineral and inorganic analyses using Atomic Absorption and ICP technology
• Lipid and fatty acid analyses using mainly wet chemistry and GC methodologies
• Centre of Excellence for enzyme testing for amylase, protease and phytase.

Accreditations:
This laboratory is one of only 13 Official Referee laboratories for soybean meal and oil certified by the AOCS and NOPA. It is an USDA inspected laboratory.

Eurofins Central Analytical Laboratories

Eurofins Central Analytical Laboratories is a food testing laboratory offering a variety of nutritional and residue testing methodologies in agricultural commodities and foods. The company has been in business in New Orleans since 1972.

Eurofins CAL is a certified laboratory under USDA, AOCS, FOSFA, and GAFTA and has a close working relationship with the US Food and Drug Administration.

Services:
• Contaminants Testing
• Antibiotic Residues
• Method Development
• FDA Detention Assistance
• Pesticide Residues
• Heavy Metals

Accreditations:
• ISO 17025

Eurofins Supplement Analysis Center

The Eurofins Supplement Analysis Centre was established in 1982 with a focus on natural product chemistry. It is a world leader in method applications for dietary supplements including the analysis of botanical, herbal, phyto-chemical, sports nutrition, and dietary supplement products.

It is also the Nutraceutical Centre of Excellence for Eurofins Scientific due to its highly recognised level of analytical expertise in the dietary supplement industry.
This facility is the contract laboratory leader in capillary electrophoresis method applications for dietary supplements.

**Services:**

- Determining the identity and purity of raw materials
- Quantifying active and target compounds in finished products (capsules, tablets, gel-caps, liquid extracts)

Instrumentation utilised includes GC, HPLC, FTIR, UV-Vis, and CE instrumentation

**Accreditations:**

- ISO 17025

**Eurofins Genescan**

Eurofins GeneScan is an ISO 17025 accredited commercial testing laboratory that specialises in GMO detection and applied molecular biology for the food, feed and seed industries.

Eurofins GeneScan also offers allergen testing, and detection of non-approved materials in meat and bone meal.

The laboratory provides qualitative and quantitative PCR analyses and ELISA testing. Also offered are consulting and auditing services for non-GM and identity preservation process control systems.

The laboratory, located in suburban New Orleans, has several years' experience providing GMO detection to the US food and agricultural market. It has consistently scored at the top of proficiency tests and ring trials and has been successfully audited by several large, multinational companies.

---

**Eurofins QTA**

Now part of Eurofins, the Quality Trait Analysis (QTA) System utilizes both mid, and near infrared spectroscopy, to provide analyses of the broadest range of materials, components and properties.

The Eurofins QTA business handles all the technical development, configuration, management and monitoring behind the scenes, enabling accurate quality testing by non-technical personnel, and freeing you up to manage your business.

**Services:**

- Complete service for infrared method development and validation
- Hassle-free implementation of infrared technology
- Implement Robust calibrations using patented Chingometrics
- Provide service to ensure the long term NIR/IR performance
- Centralized quality data management
- Remote method development, addition and modification
- 24/7 technical support for remote troubleshooting

Eurofins Genomics

Eurofins Genomics offers industrial scale production of DNA/RNA oligonucleotides, gene synthesis, DNA sequencing, Next Generation Sequencing, applied genomics, genotyping, and gene expression.

We offer one of the fastest turnaround times for sequencing in the country, the lowest error rate in the industry for oligonucleotides, and our approach is highly service oriented.

Services:

• DNA / RNA Oligonucleotides with a variety of options, purifications and modifications available.
• DNA Sequencing in tubes, plates and kits.
• Gene Synthesis & Synthetic Biology
• Gene Fragments
• Next Generation Sequencing
• qPCR and MGB-eclipse probes
• Library Assays
• Applied Genetics: Genotyping, Gene Expression & Microarrays
• Species and breed/variety identification
• Residual DNA Testing
• All sample materials from raw material to all processing stages up to instant meals or health products
• All species (animals, plants, microorganisms, human)
• Meat, fish and seafood testing
• Authenticity testing of Basmati, Thai rice, and pine nuts with high quantitative accuracy
• Assay setup and validation in all stages, from marker discovery up to ISO 17025
• Establishment of new methods as a contracted and collaborative laboratory
• Consultancy

Accreditations:

• ISO-17025
• Wisconsin DNR
• USDA for Soil, Meat Receipts
• Controlled Substance / DEA Licensed
• GLP/GMP-compliant (FDA registration pending)

Eurofins SF Analytical Laboratory

ESFA is the “lab to call” when you don’t know who to call. ESFA is the center for excellence for:
• Foreign material identification
• Off-Flavor, Off Odor and Flavor Scalping Analysis by GCMS
• Chemical Verification of Ingredients, Excipients to USP, FCC, NF guidance
• Special Investigations including Product Recall, Insurance or LEGAL projects
• Specialty wastewater analysis including Micro Plastics in Water

Accreditations:

• ISO-17025

Eurofins SF Analytical - GMP Microbiology

Eurofins SF Analytical (ESFA) - GMP Microbiology, formerly Eurofins QC Pharmaceutical Microbiology, has been servicing an extensive variety of industries with their microbiological services for two decades. ESFA GMP Microbiology transitioned to be under the Eurofins SF Analytical Labs umbrella (headquartered in New Berlin, WI) in 2018 in an effort to better align offered services with the needs of our clients.

Our scientists are skilled, adept and experienced in performing routine microbiology from USP Chapters 60, 61, 62, 2021, 2022, 1231, antibiotic or preservative efficiency analysis by USP 51, total organic carbon by USP 643 as well as special investigative projects, problem-solving work, and method development and suitability. Our teams work on a wide variety of matrices and under rigorous cGMP compliance (21 CFR part 210/211).

Eurofins Microbiology Inc. - Des Moines

Our state-of-the-art laboratories utilize the latest microbiology testing technologies that provide the robustness and sensitivity needed to rapidly quantify and detect pathogenic, spoilage, and probiotic microorganisms.

With substantial experience across all product categories, we deploy multiple advanced molecular methods for routine microbiology testing, including product screening and in-depth strain identification.

Our experts help customers resolve regulatory compliance and persistent contamination issues. We validate process and environmental controls, and help develop food safety management programs (HACCP, GMP, SSOP, FSMA, and EMP).

Services:

• Pathogen Tests
• Process Control, Quality & Spoilage
• Strain Identification
• FDA Detention Testing
• Environmental Monitoring Programs
• Shelf Life studies
• Special Projects

Accreditations:

• ISO 17025

Eurofins Grain

Eurofins operates one of the largest independent grain inspection services in the USA. Eurofins provides third-party grain inspection services to some of the largest companies in the grain and food processing industries and to their ingredient suppliers.

Services:

• Inspectors who are USDA Licensed Warehousemen extensively trained and tested employees that are knowledgeable about current inspection procedures
• Accuracy and precision
• Unbiased services
• Assurance that Eurofins has no affiliations that might introduce a conflict of interest with other companies in the grain inspection industry

Eurofins Craft Technologies

We specialize in the analysis of nutrients, vitamins, carotenoids, bioflavonoids and phytochemicals and we offer solid expertise in an ever-changing world of nutritional services.

This broad experience comes from years of testing a wide range of samples such as serum, tissue, dried blood spots, foods, feeds, raw materials, finished products and dietary supplements to the extreme, such as lizard eggs or bird feathers. Our ability to offer our clients this flexibility is one of our greatest assets.

Our experience provides our client’s and the public with confidence in label claims, quality consumer-products and accuracy in nutritional clinical studies. We are a client focused laboratory that prides itself in identifying the most appropriate and innovative methods of analysis. We strive to be the BEST at what we do.

VIETNAM

Eurofins SAC KY HAI DANG

Eurofins SKHD has invested in modern laboratory facilities in Ho Chi Minh City and Can Tho City, and a new laboratory newly opened in Ha Noi City, staffed with qualified technical personnel.

Services:
- Analyses for residues and contaminants: Pesticides; Antibiotics; Mycotoxins; Heavy metals
- Nutritional analyses: Vitamin testing; Carbohydrates testing; Amino acid profile analysis; Fatty acid analysis; Lipids; Inorganic components
- Microbiological
- Analysis of agro and aquatic products, processed food, animal and poultry feed...
- Environmental monitoring samples: water, air, soil, mud...
- Inspection & Audit services

Accreditations:
- Certificate of Accreditation No. VILAS 238 - ISO/IEC 17025:2017
- Ministry of Agriculture and Rural Development of the Socialist Republic of Vietnam assigned Eurofins Sac Ky Hai Dang as:
  - A food testing facility in charge of state food safety under the Decision No. 509/QĐ-QLCL
  - Animal feed testing's laboratory according to the Decision No. 329/QĐ-CN-TÂCN
  - A laboratory for agriculture and rural development in the field of fertilizer under the Decision No. 1754/QĐ-BVTV-KH
- Ministry of Health of the Socialist Republic of Vietnam has assigned Eurofins Sac Ky Hai Dang as Food Safety Testing Laboratory under the
Decision 265/QĐ-ATTP.
- The Ministry of Industry and Trade of the Socialist Republic of Vietnam has appointed Eurofins SKHD to perform food testing in charge of state management of food safety under the Decision 3070/QĐ-BCT.
- Certification of Ministry of Natural Resources and Environment of The Socialist Republic of Viet Nam about environmental monitoring (VIMCERT 020)
- Recognized as an inspection organization in accordance with ISO/IEC 17020:2012, VIAS 047.

NEW ZEALAND

Eurofins Food Analytics NZ

Eurofins New Zealand has over 30 years of experience in Agricultural and Horticultural testing. We currently work with clients across the agricultural and horticultural industries, including the commercial and research sectors, as well as direct to farmers.

Eurofins New Zealand testing services offer:
- Totally Independent and Science base testing - core testing performed have been thoroughly researched, developed and calibrated by industry scientists.
- Quality analysis – ISO 17025
- Flexible and Personalized to meet
Consultant and Farmers testing needs
  • Prompt turnaround times.

Services:
  • Soil Fertility and Soil Texture Analysis
  • Herbage and Crop Leaf Mineral Analysis.
  • Feed Quality Analysis
  • Fertiliser Analysis
  • Soiless Media and NFT Analysis

Accreditations:

Ukraine

Eurofins Agro Testing Ukraine

We are a young (opened August 2014) yet experienced (working in the Ukrainian market since 2012) branch of the Eurofins group.

Services:
SOIL:
  • Soil sampling
  • Agricultural and Environmental Testing
  • Fertilization advisory
  • Nutrients maps
  • Nematodes
  • Pesticides and heavy metal residue

GRAIN and OILSEEDS:
Sales parameters
  • Mycotoxins
  • Dioxins, Pesticides
  • GMO – quantitative and qualitative analysis
  • NIT grain network program
  • Heavy Metals

OTHER:
  • Plant tissue analysis, fertilization advisory for the top dressing
  • Forage analysis for nutrients, toxins,
vitamins, minerals, etc.
• Food analysis
• Water analysis
• Consumer goods testing
• Pharma testing

Over 150,000 analyses available on request

All samples are sent to the Eurofins group laboratories worldwide according to the testing matrix. We take care of all your testing needs and the logistics of the samples.

EUROFINS TECHNOLOGIES

Building on the experience and scientific excellence of the Eurofins Group, Eurofins Technologies is a fast growing provider of diagnostic technologies in the field of Food Safety and Environmental Safety. We currently offer solutions for Food Pathogens, GMO, Mycotoxins, Veterinary Drugs Residues, Allergens and Animal Species.

GERMANY

Eurofins GeneScan Technologies

Eurofins GeneScan Technologies is specialised in the production of kits and their application for the food and feed testing industry.

Two decades of expertise in the development of molecular biology kits and their application in Eurofins laboratories on all continents have led to competitive products, which set standards worldwide.

Based on in depth knowledge of the current market situation and the requirements of the food and feed industry, Eurofins GeneScan Technologies adapts its kit portfolio to meet the most recent market demands. Laboratories all over the world trust in the quality of these products which help them to fulfill their customers' demands.

Services:
- GMO testing kits: screening, identification, quantification with real-time PCR multiplex technology
- Plant pathogen detection kits
- Plant species identification kits: comprehensive screening and specific detection of defined plant species
- Animal species screening and identification kits: authenticity testing for most domestic animal species as well as taxonomic groups of animals
- Pathogen testing kits: fast and reliable detection of foodborne and waterborne pathogens
- Virus detection kits: complete workflow covering all steps for the specific detection of the most important food-related viruses
- DNA extraction kits: kits optimised for different food and feed matrices
- Application support on-site
- Customer trainings and webinars

Accreditations:
- ISO 9001:2015 certification
- AFNOR certified kits
- AOAC certified kits
- Eurofins GeneScan methods are found in national and international standards

ITALY

Eurofins Tecna

Tecna® develops and produces immunoassay kits for the detection of chemical contaminants in food and feed products.
With more than 20 years experience in the food diagnostics field and thanks to its internal R&D department, - ISO 9001 accredited since 2001 - Tecna® can provide any user with the most specific diagnostic solution as ELISA kits, lateral flow tests and immunoadfinity columns.

**Services:**

- Quantitative mycotoxins analysis in food and feed
- Veterinary drug residues detection in matrices of animal origin, food and feed
- Allergens detection in finished products and raw materials
- Quantitative detection of histamine in seafood

**Accreditations:**

ISO 9001

**Eurofins Ingenasa**

Ingenasa is a developer and manufacturer of diagnostic test kits with a broad range of applications in Veterinary Diagnostics and Food Safety. The company is based in Madrid, Spain and has 51 employees.

Over the last 30 years, Ingenasa has put a very strong focus on research and innovation and today provides its customers with a wide range of ELISA and PCR assays to detect viral and bacterial pathologies in both farm and companion animals.

In addition, Ingenasa further completes the offering of Eurofins Technologies in allergen detection.

**Services:**

- Veterinary diagnostics with the broadest catalogue in the market for diagnostic assays in veterinary medicine, with tools that help with both the health management of farms and the eradication of several diseases.
- Food safety: allergen detection with the ELISA-based Gluten detection method using the world renowned antibody R5, along with a range of Lateral Flow Devices and ELISA assays for the detection of Casein, Beta-Lactoglobulin and Ovoalbumin.
- Human diagnostic: development of a series of high interest reagents

**Eurofins Abraxis**

Abraxis develops and manufactures rapid environmental, food, and life sciences test systems, including immunochemistry products and methods, to meet the testing needs of industry, government and research. Through continuous collaboration with leaders in each of these areas, Abraxis has built up a strong expertise in custom assay development for the food safety and environmental testing.

Many of Abraxis’ methods are validated/verified by US federal agencies regulating food safety and environment protection, the Japanese Ministry of the Environment, and the World Health Organization (WHO). Abraxis holds, or is exclusive licensee, of several key technology patents, with additional applications in process.

**Fields of expertise are:**

- Field and lab based testing solutions for both fresh and marine water algal toxins, pesticides, GMO detection, veterinary residues, mycotoxins and the novel magnetic separation technology AbraMag
- ELISA assay development
- Antibody and antigen purification
- Monoclonal and polyclonal antibody production
- Bulk and custom magnetic particles

Eurofins Food Assurance is a global trusted partner supporting food and feed producers, manufacturers and retailers to identify and mitigate safety and integrity risks in their entire value chain.

High quality, safety and integrity of food and feed products can only be achieved by implementing robust and effective management systems and processes. Eurofins Food Assurance provides accredited certification and auditing services that are focused on food and feed safety management systems, process optimisation, risk and cost reduction in order to ultimately strengthen brand protection of its customers. The business line’s expert auditors offer strategic evaluation designed specifically to solve industry challenges and inform unbiased business decisions.

With its global network of experts, Eurofins Food Assurance also provides vulnerability assessment to tackle food frauds. In close cooperation with its unparalleled Food Authenticity Competence Centres, Eurofins food fraud consultants provide supply chain monitoring of fraud risks and help customers to build adapted mitigation strategy.

Eurofins Food Assurance also designs and promotes its own standards subject to certification audit, such as the Non GMO Identity Preservation standard. The IP standard is a set of physical and organizational measures that apply to all supply chain stakeholders to ensure their production is GMO free and appropriate measures are taken to avoid cross contaminations.

Customised training services support food and feed manufacturers and retailers in facing an ever evolving complex and demanding market. Consulting services are to help customers meet and anticipate current and coming regulations and international food and feed safety and integrity standards.

In addition, Eurofins Food Assurance experts offers food and feed labelling services to fulfil labelling requirements and support its customers complying with regulations in countries of destination, ensuring global market access to import and export food both locally and globally.

---

**Services:**

**Audits and Certifications:**

Thousands of food producers are audited every year, worldwide, on behalf of retailers, caterers, distribution centers, agents, importers and manufacturers.

- **Certification audits:**
  - Food Safety:
    - BRCGS
    - FSSC 22000
    - ISO 22000
    - SAFE FOOD SAFE FEED
    - SQF
  - Feed Safety:
    - ISF/SF/FAMI-QS
    - QS
    - SAFE FOOD SAFE FEED
  - Agri
    - Global G.A.P.
    - Food Integrity:
      - Artyisanal
      - ETS (Excellence Through Stewardship)
    - Gluten Free (AOECS, BRC Gluten Free, GFCP)
    - GMO Free (Identity Preservation)
    - Organic
    - Valid-IT: GMO & Illegal Dyes

**Desktop Audit**

- Quality Management Systems:
  - ISO 9001
- Second Party Standards:
  - Animal welfare
  - Distribution Center / Warehouse
  - Food Fraud Management Audit
  - GLP (Good Laboratory Practices)
  - GMP (Good Manufacturing Practices)
  - GMP for Dietary Supplements
  - HACCP ( Hazard Analysis and Critical Control Point)
- IFS (International Bottled Water Association)
- In-House Laboratory Audits: LabCred®
- Retailer Supplier Audits
  - Example: COSTCO

**Training, Consulting and membership:**

- Training, consulting and membership services support the implementation of processes, which comply with relevant international standards for food safety, quality and integrity.

**Consulting and membership programmes:**

- Food Fraud Management Services/Approach:
  - Food Fraud Database: Decernis
  - Food Fraud Database is a critical resource for industry, regulators, and other stakeholders to inform risk-based decisions on food fraud vulnerability and mitigation. As collaborators, Decernis and Eurofins have combined their expertise to assist the food sector with specific tools for combating food fraud.
  - Food Fraud Ingredient Vulnerability Screen
  - Food Fraud Management Systems: Vulnerability assessment and Mitigation Plans
  - Food labelling services
  - Allergen Labelling
  - EU Label Translation and Compliance

**Audits and Certifications:**

- Food Labelling
- Nutrition and Health Claims
- Specification writing and review
- Pack Copy and Artwork Approval
- Compliance review
- Food Law Advisory

**Systems:**

- Vigial (www.vigial.com): recognised and ergonomic database which allows customers to be proactive on a daily basis in their food safety watch.
- Gap Assessment
- Pre Certification BRCGS Assessment
- Pre Certification IFS Assessment
- Pre Certification SQF Assessment
- Pre Certification FSSC Assessment
- EMP Assessment
- HACCP Control Plan
- HACCP Plan Facilitation
- Outsourcing / Outplacement
- Programme Development
- BRCGS Programme Development
- IFS Programme Development
- FSSC Programme Development
- SQF Programme Development
- EMP Programme Development

**Trainings:**

- Food Fraud
- Food Labelling
- Food & Feed Safety:
  - EMP (Environmental Monitoring Programme)
  - Food Allergen
  - Food Plants, Microbiology and Hazards
  - Food Safety in Manufacturing
  - GLP (Good Laboratory Practice)
  - GMP (Good Manufacturing Practice)
  - HACCP
  - Internal Food Safety Auditor

**Programmes:**

- BRCGS
- FAMI-QS
- FSSC 22000
- IFS
- SQF

BRAZIL

Eurofins ASL

ASL is a laboratory that has been providing analytical services since 2002, performing physico-chemical, microbiological, organic, inorganic and toxicological analyses in environmental matrices such as water, effluents, soil, waste and atmospheric emissions.

Since the beginning of its activities, it has been acting with the highest analytical quality, providing state-of-the-art technology, highly qualified staff and personalized service. Currently it is among the three largest laboratories in Brazil with a structure of 2500 m² and one of the accreditation scope meeting ISO IEC 17025.

Accreditations:
- ISO IEC 17025

levels of government and the private sector. Our environmental services division processes hundreds of samples per week for a vast range of analytical parameters. The Ottawa Environmental lab occupies 11,000 square feet of customized space and employs roughly 50 dedicated specialists.

The Ottawa Laboratory is licensed by the Ministry of the Environment and Climate Change (MOECC) and accredited by the Canadian Association for Laboratory Accreditation (CALA), in accordance with the recognized International Standard ISO 17025:2005.

In addition, EETC has Ontario Environmental regional offices in the Greater Toronto Area, Thorold (Niagara Falls) and Kingston. Both locations are able to coordinate business development and client services for the Southern Ontario region.

EETC’s laboratories on the island of Montreal and near Quebec City carry a combined laboratory setting of nearly 45,000 square feet with roughly 150 dedicated employees.

EETC’s St. Bruno, stack sampling and emissions monitoring team provides world-leading technical support. These programs are tailored to meet each individual client’s specific needs and are overseen by field teams backed by engineers, chemists and technicians. With our comprehensive and state of the art range of testing equipment, we ensure stack sampling programs are based on internationally recognized protocols. St. Bruno’s mobile lab units provide a clean environment for the preparation and recovery of samples from sites, without interfering with the clients routine business operations. All stack sampling and emissions monitoring programs include modified methods for special applications.

EETC’s Quebec laboratories are recognized as one of the leaders in providing work that conforms to ISO-IEC 17025 along with the "Centre d’expertise en analyse environnementale du Quebec" (CEAEQ) which is an agent of the Minister of Sustainable Development, Environment and the fight against Climate Change (MDDELCC). This accreditation accompanies with it the ability to test for environmental contaminants across 60 domains which include drinking water,
groundwater, surface and waste water, soil testing, sediments, solid waste, drilling water, ambient air quality testing, asbestos and stack testing.

Services:

EETC is recognized in the environmental industry for scientists who have a wide range of environmental expertise in testing soil, water, air and materials for organic and inorganic contaminants including:

• Routine analysis of potable water, ground water and waste water monitoring.
• Soil analysis related to oil and salt spills, petroleum storage tank sites, sulphur and contaminated materials, pipeline disturbances, soil reclamation and soil quality litigation.
• Analysis of lake and stream nutrients, effluent and groundwater monitoring, drilling sump treatment and tailing pond management.
• Toxicity bioassay services.
• Drilling waste analysis.
• Composting.
• Hazardous waste classification and landfill criteria.
• Environmental microbiology

CROATIA

EnvironeX Croatiakontrola Ltd. performs sampling, chemical and microbiological analyses of various matrices. We provided services to government, science and private sector.

Services:
- Analysis of drinking water, mineral water, groundwater, surface water, wastewater for organic and inorganic contaminants, heavy metals, flame retardants, ecotoxicology testing
- Analysis of waste, soil, sludge, sediment, digestate and compost
- Analysis and classification of solid recovered fuels (SRF) according to EN 15359:2011

Accreditations:
- Most of our testing methods are accredited according HRN EN ISO/IEC 17025:2007

DENMARK

EnvironeX Galten

EnvironeX Miljø and EnvironeX VBM perform sampling, laboratory analyses and consultancy services focusing on the environment and geotechnical investigation. Modern laboratories in Vejen, Rødovre, Aabybro, and Galten service a broad range of companies, authorities and organisations. The
laboratories are appointed as national reference laboratories within specific areas of expertise.

Services:

- Environment sampling and analyses: chemical and microbiological testing of air, water, contaminated soil, sludge, sediment and biota for routine parameters like heavy metals, TPH, PAH, PCB and VOCs, as well as non-standard parameters like pesticides, degradation products, glycols, phthalates, amines, polyamines, flame retardants and other POPs applying a range of modern techniques, including ICP-MS, HR-ICP/MS, GC/MS, GC/MS/MS, HPLC, LC-MS, LC-MS/MS.

- Air monitoring and occupational health and safety: monitoring analyses, tests, and consultancy within stack emission, occupational health, indoor air, personal protection, noise, handling of chemicals, recycling of chemicals, compressed air, ventilation etc. Geotechnical and Geo-environmental In-situ and Laboratory Investigations: Compaction test, particle size distribution, quality and environmental control of recycled material

Accreditations:

- ISO 17025

Eurofins Sorbisense
Sorisense is a knowledge based company that develops, manufactures and markets a novel patented technology for water quality monitoring. These are our SorbiCells, a new type of passive samplers that enable in-situ continuous sampling over time.

Our technology enables high-quality monitoring of nitrate, phosphorous, and xenobiotics (pesticides, PAHs, PCBs VOCs, and heavy metals) in: groundwater, drains, drinking water, lakes, ponds and streams, industrial wastewater.

ESTONIA

Eurofins Environment
Testing Estonia

Eurofins Environment Testing Estonia OÜ joined the Eurofins Group in 2017 and mostly specializes in environmental chemical analyses, such as local testing of contaminants in soil, sediment, sludge, water and different other matrices, but also covers testing of food and feed, agro samples, construction materials, consumer products and many more by intercompany sales throughout the global network of Eurofins’ laboratories.

Customer service: +372 58875015
Customer service (for Russian speakers): +372 58870132
Laboratory: +372 58837202
Sander Sannik: +372 53002316

Services:

Example of analyses:

- Heavy metals and elements
- Polycyclic aromatic hydrocarbons (PAHs)
- Polychlorinated biphenyls (PCBs)
- Chlorobenzenes
- Benzene, toluene, ethylbenzene, xylenes (BTEX)
- Hydrocarbon oil index C10-C40
- Aliphatic and aromatic hydrocarbons C5-C35
- Total petroleum hydrocarbons C5-C35
- Volatile organic hydrocarbons (VOCs)

Accreditations:

The laboratory acts in accordance with EN ISO/IEC 17025 quality management system and is accredited by Estonian Accreditation Centre (EAK).
Eurofins Ahma Rovaniemi

Eurofins Ahma Oy provides environmental analytical services and expert services for environmental monitoring. Laboratory units are located in Rovaniemi, Oulu and Seinäjoki.

Services:

- Inorganic and organic environmental testing of water, soil and sediment
- Microbiological testing of water
- Biological testing of water
- Environmental expert services incl. planning and monitoring
- Sampling and field services for environmental monitoring

Accreditations:

- T131 SFS-EN ISO/IEC 17025:2005 (FINAS)

Eurofins Ahma Jyväskylä

Eurofins Ahma Oy, Jyväskylä offers wide range of physical, chemical, and microbiological analyses from water, ambient air, indoor air, soil, biota, waste material and by products and fuels.

In addition to analyses services our experience covers Biodegradability tests, Quality and Technical Audits, Cost effiency Evaluations, Method Development and Transfers. Especially power plant laboratory offers also personnel leasing all over the world
The Kokkola laboratory unit is located in the Kokkola Industrial Park, providing Eurofins entry into the country’s fastest-growing port. The Kokkola laboratory unit has developed strong inroads with the largest customers in the chemical industries and environmental sector.

Services:
- Wide range of industrial analyses from difficult matrices (gas, acids, chemical products, fertilizers)

Eurofins Nab Labs Oy, Kokkola

The Kokkola laboratory unit is located in the Kokkola Industrial Park, providing Eurofins entry into the country's fastest-growing port. The Kokkola laboratory unit has developed strong inroads with the largest customers in the chemical industries and environmental sector.

Services:
- Physical and chemical properties of solid biofuels, solid recovered fuels, solid wastes, coal and peat, boiler sand, limestone, fly and bottom ashes, soil improvers and growing media.
- Emission factor analysis and calculations
- Laser diffraction (wet/dry) analysis for various materials and industries

Accreditations:
Most of our testing methods are accredited methods or done according to valid standards. We offer to customers all the necessary analytics to accommodate their needs, guiding them to select the most suitable methods for their requirements.

We are active member of standardization (CEN/TC 335) national groups TO25 (EN ISO/IEC 17025)

Eurofins Nab Labs Jyväskylä

The Nab Labs Jyväskylä provides accredited emission measurement services. The main focus for Kärsämäki is consultation on, and implementation of emission measurements, as well as the quality assurance of customers own fixed flue-gas monitoring devices – both as demanded by national regulations.

Services:
- Emission measurements from industrial processes
- QAL2 / AST calibration of stack analysers
- Indoor and occupational health related measurements
- Environmental air and indoor health consulting incl. spread-out calculations and noise modelling, bioindictor research, odor, noise and particle measurements

Accreditations:
- T111 SFS-EN ISO/IEC 17025:2005 (FINAS)

Eurofins Nab Labs Oulu

The Nab Labs Oulu sites add strong insight in chemical industry related services to Finnish Eurofins family. Nab Labs Oulu has two laboratory facilities in the main industrial areas of Oulu, Nuottasaari and Takalaanila. Both facilities are located inside industrial estates as a vital part of customers own operations. Nab Labs Oulu sites give fast-cycle customer service, not only in routine analytics but in demanding special analytics, to several industrial customers.

Services:
- R&D services incl. analytics of trial runs and method development
- Quality control of raw materials, process samples and products
- Occupational health related daily measurements in the production environment
- REACH and problem-solving services

Accreditations:
- T111 SFS-EN ISO/IEC 17025:2005 (FINAS)

Eurofins Nab Labs Rauma

The Nab Labs Rauma site gives Eurofins strong insight to forest
industry services. Rauma site is located in Western Finland, together with its remote site Pori laboratory. Nab Labs Rauma site is in UPM-Kymmene mill area close to the operations of several industrial companies. This site provides fast-cycle customer service in to the forest industry and customers related to it.

**Services:**
- Physical properties of pulp and paper incl. pulp refining, preparing hand sheets, physical testing
- Chemical analysis of woodchips, pulp, paper, cardboard and water
- Microscopic evaluations
- Analysis of tall oil, liquor, condensate, filtrates and biomass
- Trouble shooting analyses
- Power Plant process analyses

**Eurofins Labtium Espoo**

Eurofins Labtium Espoo provides expert and laboratory services for the bioforest industry. Our long experience in forest industry R&D projects related to pulping, bleaching and chemical recovery, to name a few has given us competence to support the industry with chemical means both in traditional applications and in new innovations.

Our versatile laboratory and expert services cover the needs for pulp and bio-product industry from raw materials to end products without forgetting the side streams and environmental aspects.

**Eurofins Labtium Espoo**

**Eurofins Labtium Sodankylä**

Eurofins Labtium Sodankylä can provide a wide range of services for mining and metallurgy. In addition to the preparation and analyses of exploration and grade control samples, we analyse process samples from different stages of the mineral processing including independent party and umpire analysis. Our diverse sample preparation equipment enables us to greatly customise our services in accordance with the customer’s needs, the strategic project phase and the characteristics of the ore. Moreover, we can design and implement laboratory services for mines with the mining company serving as the operator or outsourcing all of the services from us, either on-site or through our comprehensive laboratory network.

Eurofins Labtium Sodankylä is one of the first geoanalytical laboratories worldwide to be granted accreditation as early as in 1994. Today, we are accredited according to ISO/IEC 17025 by FINAS (Finnish accreditation service. Testing laboratory T025) and most of our routine methods have accreditation status. For the evaluation of mineral resources and mineral exploration, we have a comprehensive selection of sample preparation and analytical methods in line with internationally approved best practices and reporting requirements e.g. Canadian NI 43-101 and Australian JORC codes.

**Eurofins Labtium Sodankylä**

**FRANCE**

**Eurofins Analyses pour l’Environnement France**

With laboratory space of 5,500 m², Eurofins in Saverne provides a large part of our environmental analytical capabilities in France.

Solid, air and ground water matrices are analysed and the nature of analyses performed is very diverse: contaminated soil, sludge, clinkers and sediment, air monitoring (emission air, work air, internal air), underground and waste water.

This laboratory also provides microbiology analyses like legionella, hospital hygiene or air parameters. We can also provide material testing (building materials, water, polymer expertise)

This laboratory also provides material testing (building materials, water, polymer expertise)

**Services:**
- Chemical and microbiological testing of air (emission air, working air, soil gas and internal air), soil, sludge, sediments, clinkers, hospital hygiene, underground, clean and waste waters
- EXXON approval.

Eurofins Analyses pour le Bâtiment Ile de France

This entirely refurbished 600 m² laboratory with more than 15 years of experience is our centre of excellence for asbestos analysis in air, for which it services the French and international market from the centre of Paris.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Nord

This 1,000 m² laboratory specialises in asbestos analysis in building materials. With more than 10 years of experience, the laboratory staff also has expertise in the analysis of asbestos in air for which it serves the market in Northern France.

Services:
• Asbestos testing in material and air
Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Nord
557, chemin de Noyelles - PA du Pommier

Eurofins CEBAT
Since 2002, this laboratory has developed a strong expertise in the analysis of asbestos in air and also in building materials.

Services:
Analysis of asbestos in air and materials

Accreditations:
• COFRAC
• ISO14001 & OHSAS18001

Eurofins Analyses pour le Bâtiment Ouest
This laboratory specialises in asbestos analysis in building materials. With more than 10 years of experience, the laboratory staff also has expertise in the analysis of asbestos in air for which it serves the market in the West of France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Sud-Est
This laboratory specialises in asbestos analysis in building materials. The laboratory staff also has expertise in the analysis of asbestos in air for which it serves the market in the South East of France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Sud-Ouest
This brand-new laboratory specializes in asbestos analysis in building materials. The laboratory staff also has expertise in the analysis of asbestos in air for which it serves the market in the West of France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Est
With our extensive experience and reputation gained in asbestos fibre identification over many years, our 1,000 m² laboratory provides a fast and reliable response for all asbestos, man-made mineral fibres, refractory ceramic fibres and lead paint analytical needs.

Services:
Asbestos analysis can be performed in all types of materials, air, soil, waste and water

Eurofins Analyses pour le Bâtiment Sud-Ouest
This laboratory specializes in asbestos analysis in building materials and analysis of asbestos in air for which it serves the market in the South of France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Sud
This laboratory specializes in asbestos analysis in building materials and analysis of asbestos in air for which it serves the market in the South of France.

Services:
• Asbestos testing in material and air
Eurofins Hygiène Hospitalière Sud

This lab specialises in the management of the infectious risk associated with the use of complex reusable medical devices and hospital environment. Eurofins Hygiène Hospitalière Sud is the essential partner for healthcare facilities.

Services:
Education / Training

Our education/training programs in hygiene are designed for all medical and paramedical staff including:
• Physicians
• Pharmacists
• Nurses, Hygienists

Microbiological sampling

Healthcare facilities and some structures receiving public have an obligation to monitor and control infectious risk. We assist you in the process of microbiological surveillance of the environment:
• Microbiological monitoring of the environment (air, water, surface…)
• Medicals devices sampling (endoscopes, endoscope drying/storage cabinets, automatic endoscope reprocessors)

Medical Device Evaluation

In collaboration with the health industry, we act as an independent testing laboratory for the analysis of the risk factors in the design and validation stages of a medical device:
•

Medical Devic Safety
• Type Testing
• Performance Qualification

Eurofins Hygiène Hospitalière Sud

Services:
Sample taking and analysis for:
• Ground and surface water
• Drinking water
• Technical water
• Bottled water / Mineral water
• Sparkling water
• Waste water

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for the approval of materials in contact with drinking water
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Centre Est

With a laboratory of 4,500m², this high-performance production environment offers a broad spectrum of water analyses with the best possible delivery times

Services:

Eurofins Hydrologie Est specialises in water analysis, focusing on sanitary water, groundwater, surface waters, residual waters and also industrial waste water.

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for the approval of materials in contact with drinking water
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Ile de France
Eurofins Hydrologie Ile de France specialises in water analyses, from drinking water quality testing to water hygiene ( legionella) and waste water.

Eurofins Hydrologie Ile de France is able to offer quality, flexibility and optimised services. The staff carries out sampling across Ile de France and results can be supplied in 24 hours.

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for the approval of materials in contact with drinking water
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Nord
Eurofins Hydrologie Nord provides a wide range of analysis for all kind of water and specialises in salted water and microbiology specialities.

Services:
• Potability
• Search for Legionella
• Enterobacteriaceae
• Pesticides and other chemicals

Accreditations:
• COFRAC accreditation for various tests
• French Health Ministry agreement for sanitary control on water
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Sud Ouest - Poitiers
This laboratory specialises in water analysis (sampling, microbiology, and basic chemistry), for waste water, drinking water quality testing, water hygiene (legionella).

Services:
Sampling and chemical and microbiological testing of water, air and surfaces

Accreditations:
• COFRAC accreditation for various tests
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Ouest - Caudan
This laboratory specialises in water analysis (microbiology and basic chemistry), for waste water, drinking water quality testing, water hygiene (legionella) and has significant experience of dealing with official testing regimes for water quality.

Services:
Sampling and chemical and microbiological testing of water, air and surfaces

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for the approval of materials in contact with drinking water.
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Sud Ouest - Nantes
This laboratory specialises in water analysis (sampling and basic chemistry), for waste water, drinking water quality testing, water hygiene (legionella).

Services:
Sampling and chemical testing of water

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for the approval of materials in contact with drinking water.

Eurofins Hydrologie Sud
With its 3 proximity labs dedicated to water testing, Eurofins Hydrologie Sud
provides a wide range of analysis: sanitary testing, environment & natural resources monitoring, clinical environment testing and dialysis water analysis.

**Services:**

- Chemical testing
- Microbiological testing
- "Same-day" analysis delivery
- Tests on all kind of water
- Water sampling
- Specialized on mineral & thermal water

**Accreditations:**

- COFRAC accreditation for various tests
- Recognised by the French Health Ministry for the approval of materials in contact with drinking water
- French Environment Ministry agreement for various tests on water

**Eurofins Hydrologie Sud - Mougins**

Water Testing laboratory

**Services:**

- Chemical testing
- Microbiological testing
- "Same-day" analysis delivery
- Tests on all kind of water
- Water sampling
- Specialized on mineral & thermal water

**Eurofins Hydrologie Sud-Ouest**

Eurofins Hydrologie Sud Ouest is a regional sample taking and sample analysis lab offering a local service in the South West of France.

**Services:**

- Laboratory specialises in water analysis (basic chemistry and microbiology) on all water matrices.
- Also specialising in Hospital Hygiene.

**Accreditations:**

- COFRAC on all water matrices

Eurofins Eichrom Radioactivity

Eurofins Eichrom laboratories are specialized, for more than 15 years, in radioactivity measurements in all type of matrices (water, soil, food…) and we offer a large range of accredited parameters for radiological measurements.

Services:

• Radiological measurements (gross alpha, gross beta, gamma emitters, 3H, 14C, 90Sr, uranium, plutonium…) • asbestos on radioactive (or potentially radioactive) samples and in a near future chemistry on radioactive samples

Accreditations:

• ISO 17025 Equivalence COFRAC

Eurofins Eichrom Asbestos

Eurofins Eichrom Asbestos was created in 2015 within Eurofins Eichrom laboratories.

Eurofins Eichrom Asbestos are recognized for the quality of their asbestos analyses on radioactive and potentially radioactive samples.

Services:

Eurofins Eichrom Asbestos performs asbestos analyses, on various matrices such as:

• Mixes • Materials • Filters

Accreditations:

• ISO 17025 Equivalence COFRAC

Eurofins Umwelt Nord Hamburg

Eurofins Umwelt Nord is a laboratory with more than 25 years experience in the environmental business, accredited according to DIN EN ISO/IEC 17025.

Services:
Sampling and analysis of a large range of organic and inorganic parameters

Accreditations:
• State accreditation as an investigation body of the water and waste disposal supervision
  Überwachung (§ 125 NWG, § 44 NAbfG)
• Accredited according to DIN EN ISO/IEC 17025.

Eurofins ht-analytik Mönchengladbach

Eurofins ht-analytik GmbH is a domestic engineering service company providing comprehensive consulting and support with regard to implementing drinking water laws. It is the prime concern of Eurofins ht-analytik to assure drinking water quality by preventing the distribution of legionella, which poses a threat to human health.

Services:
Eurofins ht-analytik offers services corresponding to individual needs: technical survey, sample taking and logistics, examination and report, documentation and communication as well as elimination of defects.
Eurofins Institut Jäger Tübingen

Institut Prof. Dr. Jäger was founded in Tübingen in 1977 by Prof. Dr. Walter Jäger and is one of the leading providers of environmental services in Southern Germany. Institut Prof. Dr. Jäger is prepared to solve almost any kind of problem in the environmental sector. The Environmental Analysis Competence Centre is your partner for all issues in this field.

Institut Prof. Dr. Jäger is accredited for more than 390 testing procedures according to the international ISO/IEC 17025 standard

Services:

- Mineral water: Support and advice for the development of wells and the concurring authorisation process; full analytical service
- Analysis of drinking water, water for industrial use, water used for swimming pools
- Calculations needed for the mixing of different types of well waters intended for human use
- Federal programmes on the analysis of subsoil waters
- Microbiology
- Analysis of communal and industrial waste waters, refuse analysis
- Elemental analysis
- Pesticides in water
- Biopharmaceutical residues in water
- Legionella
- Microbiology in water
- Indoor air measurement

Accreditations:

- ISO/IEC 1702
- Investigating body according to §15, subsection 4, sentence 2 of the German drinking water regulation of 2001
- Board of experts in water management (subject module water) for the fields of waste water, surface water and ground water
- Admission of the French ministry of Environment for investigations of water quality by sanitary inspection
- Investigating body for the analysis of perfluorated tensides (PFT) in water and sewage sludge
- Acceptance as a testing agency in waste management (waste module) for the sewage sludge section, soil and waste oil
- Acceptance of QS society of fruit-vegetables-potatoes GmbH as investigating body for the QS residue monitoring section
- GMP-confirmation of inspection activities as provided for § 14 subsection 4 No 3 Medicines Ordinance
- Permission for activities with pathogens due to § 44 German Law on the Prevention and Control of Infectious Diseases
- Acceptance as a testing agency for tests of products as part of the certification procedure DIN CERTCO
• Analysis of swimming and bathing pool water
• Microbiological analysis of bathing water and industrial water
• Microbiological and selected chemical and sensory parameters according to German drinking water regulation
• Sampling of raw and drinking water
• Sampling of swimming and bathing pool water

Eurofins Umwelt Ost Jena

With more than 25 years of experience in environment analysis today Eurofins Umwelt Ost GmbH offers a wide range of chemical, physical and biological analyses.

Services:
• Industrial waste, drinking, surface, ground and sewage water
• Analyses of soil, sludge, waste, compost
• Special experience in analyses for agriculture
• Special analysis of priority substances corresponding to the EU water framework programme
• Bio and solid fuels
• Coal, bio fuels, bio ethanol, and wood pellets
• Bio-toxicity tests
• Tests of bio-gas formation (GB21): material waste, agriculture products and animal excrement
• Test of AT4 (activity of breathing in 4 days for waste and soil)
• Degradability tests
• In-Situ chemical oxidation (ISCO)
• Nmin

Accreditations:
• Drinking water regulation
• Self-control regulation for waste water
• Self-control regulation of Landfill Ordinance
• Waste sewage sludge ordinance
• Bio-waste ordinance
• Fertilizer ordinance
• Federal soil protection regulation
• § 25 Regional waste law NRW

Eurofins Umwelt West

Eurofins Umwelt West, formerly known as Analytis, was founded in 1980 and has been performing environmental analysis for more than 20 years.

The laboratory performs chemical, physical, biological, microbiological and toxicological analyses of soil, water and air.

Eurofins Umwelt West also performs analyses of specialty samples according to the needs of industrial customers.

Services:
Sampling and analysis of a large range of organic and inorganic parameters:
• NSO-heterocycles,
• Soil gas analysis
• PFC

Accreditations:
• Accreditation by DIN EN ISO/IEC 17025 by DAkkS
• Evidence for confirmation of competence within the framework of the BAM-OFD agreement on the investigation of contaminated sites
• Listed as investigating body according to § 15 section 4 of the German Drinking Water Ordinance (TrinkwV 2001)
• Admission pursuant to § 25 LAbfG NRW for different subsections
• Admission as investigating body pursuant to § 18 sentence 1 BBodSchG and § 17 section 1 LbodSchG NRW
• Admission as investigating body within the sense of § 3 section 5 and 6 of the sewage sludge regulation
• Admission as investigation body according to self-inspection guidelines (EKVO) of the Saarland
• Admission as federally recognized investigative body for waste water analysis for the subfield “carrying out laboratory tests”(self-inspection guidelines laboratory - EKVO laboratory)
• Admission as federally recognized investigative body for waste water analysis for the subsection “EKVO Überwachungstatelle” according to § 10(4) No 4 EKVO in Hessen
• Approval as inspection body for aptitude and verification tests and referee purposes and external monitoring for water management characteristics of road construction
materials (RAP Stra)
• Admission pursuant to the law of 21 April 1993 for the implementation of technical research and control data in the environment section in Luxembourg

ANECO Institut für Umweltschutz GmbH & Co

Services:
Air Monitoring
Eurofins GfA Lab Service

With over 30 years of experience, Eurofins GfA Lab Service is the world’s leading dioxin laboratory.

The main focus of the analytical portfolio is the analysis of persistent organic contaminants (e.g. dioxins, PCB, flame retardants, PFCs, Stockholm POPs) on ultra trace levels. Representative for a number of parameters, polychlorinated dibenzodioxins and -furans (PCDD/Fs), polychlorinated biphenyls (PCBs), brominated flame retardants, per- and polyfluorinated alkyl substances (PFAS) as well as organotin compounds are examined in almost every matrix as e.g. food/feed, biota, environmental samples (water, waste, soil etc.), emission and ambient air samples and even human matrices (blood, serum, tissue etc.).

Eurofins GfA Lab Service GmbH is one of the few worldwide laboratories that is able to analyse all 27 POP substances banned or regulated in the Stockholm Convention in its own laboratory. Eurofins GfA Lab Service GmbH is also able to analyse all 209 PCBs incl. dioxin-like PCBs (DL-PCBs) and non-dioxin-like PCBs (NDL-PCBs, also called ICES6-PCBs), as required by the California Proposition 65. The scientists of this laboratory are sought-after experts in national and international standardisation bodies or other working groups. Numerous publications in the field of POP analyses have been written or co-authored by employees of Eurofins GfA Lab Service GmbH. This is one reason why Eurofins GfA Lab Service GmbH is the POPs Competence Centre of the international Eurofins Group.

Eurofins GfA Lab Service GmbH is accredited according to the international ISO/IEC 17025:2005 standard. The overall capacity of dioxin and POP measurements of the Eurofins GfA Lab Service GmbH has been raised to > 45,000 samples per year using high-end technical equipment (8 HRGC/HRMS systems (high resolution gas chromatography / high resolution mass spectrometers), 14 GC-MS/MS systems (gas chromatography / tandem mass spectrometers), 3 LC-MS/MS systems (liquid chromatography / tandem mass spectrometers), several GC-MS systems as well as the novel API-GC-MS/MS-technique. The highly experienced laboratory staff analyses all kinds of matrices both according to European guidelines and other regulations (US EPA etc.).

This state-of-the-art-laboratory delivers rapid turn-around-times with the highest level of service and most advanced technologies (e.g. automated clean-up-systems) in line with the EU-Regulations No. 2017/644 and 152/2009 for analysis of dioxins and PCBs in food and feed samples. 48h-analytical services for dioxins and PCBs are possible for selected food and feed matrices.

In addition to the standardised services offered in our high performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures. Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

Provision of sampling kits:
• On top of carrying out different analyses, Eurofins GfA Lab Service GmbH also provides sampling material, especially for air-monitoring purposes such as cartridges filled with XAD resin, pre-spiked or non-spiked, following the requirements of EN 1948 (part 1 to 3 (dioxins) or part 4 (PCBs)) or CEN/TS 1948-5.

Data Access Options beyond Electronic Analytical Reports:
• On-line Data Access: 24 hours a day, seven days a week through Eurofins’ secure internet access, EOL, which offers clients immediate access to final verified analytical results as analyses are completed and verified in the lab.
• Electronic Data Deliverables: Standard and custom formats available.

Accreditations:
• DIN EN ISO/IEC 17025:2005, D-PL-14629-01-00
• Officially acknowledged measuring site according to §29b Federal

Human Biomonitoring Service:
• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on humans
    o Assessing the effects of eating habits i.e. the impact of eating harmful substances on the human body
    o Special studies on humans who are extremely exposed to hazardous substances.

Special Project-based Services:
• In addition to the standardised services offered in our high performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures. Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.
Emission Control Act (BImSchG), group I-Nr.1 and group IV for specific analysis of substances requiring special complexity for sampling or analysis.

- Examination laboratory for soil and sewage sludge according to § 3 Sewage Sludge Ordinance (AbfKlärV)
- Officially acknowledged by the French environmental ministry for the measurement of PCDD/F in emission samples
- Analysis in compliance with EU-guidelines, international recognised standards, e.g. EN 1948, EPA and other accredited methods
- GOED member (Global Organization for EPA and DHA Omega-3)
- IFFO member (International Fishmeal and Fish Oil Organisation)
- Expert for official counter samples according to §43 LFGB, chemical-physical and microbiological examination of food
- QS approval as laboratory in the field of feed monitoring for the parameters, dioxins, PCBs, heavy metals, aflatoxins, DON, ZEA, PAH, animal ingredients, pesticides, salmonellae, ochratoxins and methanol.

Eurofins City Analysts Dublin
City Analysts has rapidly grown over the last 16 years into Ireland's leading environmental analysis laboratory. Now operating from two main labs in Dublin and Shannon we provide a full range of accredited chemistry and microbiology analysis for three key areas of water, soil, food. Our Shannon facility has recently been accredited for Legionella testing. This site has is also our main hub for toxicological testing. Through both facilities we are able to reach a countrywide client base while also maintaining the highest standards achievable.

Accreditations:
- INAB
- ISO14001
- OHSAS 18001

Eurofins Nihon Soken

Founded in 1971, Nihon Soken is one of Japan’s leading environmental testing service providers with a strong focus in pollution analysis, and is the largest laboratory serving the Fukushima prefecture. Nihon Soken employs 112 staff.

Services:
• Asbestos
• Air and exhaust gas
• Noise and Vibration
• Water quality
• Soil
• Radiation testing
• Infrared outer wall diagnosis
• Environmental Assessment
• Environmental impact studies
• Waste Consulting

Eurofins Korea Analytic Service Co., Ltd.

Eurofins Korea Analytic Service is a laboratory that has been providing analytical services since 2000, performing chemical, microbiological, organic, inorganic and toxicological analyzes in environmental, food, cosmetics and consumer products.

Services:
Environmental Testing Services (water, soil, waste and atmospheric emissions):
• Dioxins and dioxin-like compounds, PCBs and related persistent organic pollutants (POPs)

Food and Livestock products Testing Services:
• Pesticide analyses for organic foods
• Pesticide analyses based on QUECHERS GC-MS & LC-MS/MS
• Nutritional fact analyses
• Microbiological analyses
• Heavy metals analyses

Cosmetics Testing Services:
• Chemical Testing
• Microbiology
• Safety Testing

Human Biomonitoring Service:
• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on humans

Accreditations:
The laboratory is accredited by KOLAS, the Korea accreditation organization, in accordance with ISO 17025.
• Ministry of Food and Drug Safety : Food, Livestock Products, Cosmetics
• National Institute of Environmental Research : POPs Sampling & Analysis, Waste Analysis(General, PCBs), Air pollutant
• National Agricultural Products Quality Management Service : Safety Inspections
In 1997, NML engaged in providing an environmental monitoring and industrial hygiene service to the manufacturing industries in Penang.

Today, our customers are not limited to the manufacturing companies from various industries nationwide but they are inclusive of water treatment companies, properties development and land exploration firms, as well as new investors in Malaysia.

NML has a team of highly experienced consultants, highly-skilled technical team to carry out field works and competent chemists to analyse the environmental samples. NML consultants inclusive of Registered Assessors, Hygiene Technicians, Noise Competent Persons etc. are not only well-versed in respective technical knowledge and regulations but they are also keeping abreast of the new regulations development and new enforcements in the country.

Services:

- Sampling and analysis of natural water, processed water, waste water
- Industrial effluents (Industrial Effluent Characteristic Study, I ECS)
- Solid waste, contaminated soils
- Ambient air, chimney and stack gas emission (iso-kinetic and non-isokinetic)
- Boundary noise, vibration test
- Chemical Health Risk Assessment (CHRA)
- Chemical Exposure Monitoring
- Local Exhaust Ventilation (LEV) Inspection & Testing
- Noise Exposure Monitoring
- Indoor Air Quality Assessment

Accreditations:

- ISO/IEC 17025
- SAMM
- Ministry of Health Malaysia

Eurofins RadonLab

Radonlab was started by Dr. scient. Aleksandar Birovljev, who previously established laboratories at the Statens strålevern and Teknologisk institutt. Radonlab offers reliable radon measurements, investigations, products, and solutions for the protection against radon and moisture, including track-etch detectors and electronic instruments for measuring radiation from radon.

In terms of radon mitigation, we have many years of experience in remediation of buildings with elevated radon levels. We have a selection of proven solutions and products, such as our RadonSug, Guard MiniVent and climate systems.

Secondly, we develop and test new ideas for reducing radon levels indoors. We offer courses and training in radon monitoring and mitigation. Our services and products can be used by both professionals and others, who wish to carry out cost-effective measurements and action against radon.

Our track-etch laboratory is classified as class A by the HPA (former National Radiological Protection Board) in the UK, which performs international comparison tests annually.

Eurofins OBIKS

Fully accredited environmental laboratory (Chemistry and Microbiology)
PORTUGAL

Eurofins Lab Environment Testing Portugal

The facility is located in Paredes, near Porto. We provide asbestos analysis in building materials and in air, but we also provide you with environmental analysis. The high quality service is performed according to the ISO 17025 standard.

Services:
• Physical-chemical analyses, determination of heavy metals, pesticides, silicate analysis, polyaromatic hydrocarbons, polychlorinated biphenyls, extractable and non-polar extractable compounds in all kinds of water samples, solid samples: soil, earth, sludge, waste, fertilizer, compost, peat, minerals, rocks
• Life and working environment: noise in the environment and work environment, vibrations transmitted to hands and whole body, heat-moisture microclimate, artificial light intensiveness, solid aerosol, chemical and carcinogenic factor, concentrations of toxic gases (NO, NO2, CO, CO2, SO2, H2S, Cl2, O3), samples taken using a sampling bio-impactor.

Accreditations:
• STN EN ISO 17 025:2005 accredited by SNAS (SK) accreditation bodies

SPAIN

Eurofins Analytico Spain

Eurofins Analytico is a fully accredited, high-tech production driven laboratory that can deliver a wide range of environmental analytical tests in soils, groundwater, wastewater, construction materials and residues.

Eurofins Analytico can test for routine parameters like heavy metals, TPH, PAH, EOX, aromatics, VOCs and pesticides, as well as non-standard parameters like glycols, phthalates using a wide range of modern techniques including ICP-AES, ICP-MS, (LVI)-GC/MS, HPLC and LC-MS.

A personal approach and high quality service are top priority at Eurofins Analytico. Delivery time, reliability, sophisticated logistic solutions and electronic data exchange are important issues. The standard delivery time is 5 working days, but results can be supplied in as fast as 48 or 24 hours, even overnight if required. Clients have the opportunity to use the Internet-based PAIS (Professional Analytical Information System) for full digital communication with the laboratories of Eurofins Analytico.

Over time Eurofins Analytico has become a leading environmental testing laboratory, serving major engineering consultants, project developers, and industries and building contractors all over the world.

Accreditations:
• Eurofins Analytico is accredited against ISO/IEC 17025 by the Dutch Accreditation Council RvA.
• Eurofins Analytico is recognized by the Netherlands Ministry of Housing, Spatial Planning and the Environment (VROM) as a qualified analytical laboratory for the "Analysis of soil with respect to environmental hygiene" (AS 3000) and for the "Analysis of building materials" (AP04).

SWEDEN
Eurofins Environment Testing Sweden AB
Eurofins Environment in Sweden offers a wide range of accredited chemical and bacteriological tests within the environmental, solid fuel and indoor air sectors.

Services:
Eurofins Environment in Lidköping analyses organic and inorganic parameters on a wide range of matrices like soil, sediment, sludge, construction materials, drinking water, groundwater, waste water, process water, etc.

Eurofins Environment specializes in heavy metals and solid fuels. For routine parameters, like oil, PAH and heavy metals on soil, the delivery time is very important. Standard delivery time for the routine parameters is 2 working days, but results can also be delivered overnight.

Accreditations:
• ISO 17025
• ISO 9001
• ISO 14001

Eurofins Pegasuslab AB
Eurofins Pegasuslab AB offers a wide range of chemical, asbestos and microbiological analysis of room air and materials sampled from damaged or sick buildings. Eurofins Pegasuslab AB has high skills and more than 25 years of experience in this sector, and also offers consulting and training.

Services:
Core services in the field of indoor environment: chemical, asbestos and microbiological analysis of room air and materials sampled from damaged or sick buildings.

**Eurofins Sanitas**
Laboratorium Zeeuws-Vlaanderen (LZV) was founded in 1991 and joined Eurofins in 2013. LZV has over 90 employees.

**Services:**
The chemical analyses offered are: agricultural, environmental and food and feed testing. Because of the broad scope they can supply the entire food chain with analyses. Besides analyses, LZV also takes care of sampling and has an advisory department.
Technologies used: GC-MS (MS), LC-MSMS, GC-FID, Head-space, NIR-analyser, Flow Injection Analysers, spectrophotometer, vlam-AAS, AES, ICP-AES, ICP-MS, Coulometer, calorimeter, titrators and CHNS-analyser.

Services:
Environmental testing (sampling, analysis and advice):

• Soil, sludge
• Water
• Analyses (amongst others); dry matter, organic matter, heavy metals, PAH, mineral oil, OCB, PCB, pH, EC, (un)dissolved particles, BOD, COD, head and trace elements

Accreditations:
• ISO 17025
• Acknowledged by: QS, BNN and FAVV

Eurofins Air Toxics, Inc. is an analytical laboratory, founded in 1989, specialising in the analysis of vapour-phase organic chemicals air using a wide range of EPA, ASTM and in-house developed methods. Our capabilities extend from trace level measurements required for indoor air testing to identifying and quantifying organics in high-level sources.

An on-going investment in media and instrumentation, a continuing commitment to customer service and quality, and a team of experienced chemists have made Eurofins Air Toxics the premiere test facility for the analysis of air samples.

With over 4,400 Summa canisters and 1,800 flow controllers, we maintain the largest single location canister inventory of any laboratory in the United States. In addition to our canister capabilities, Eurofins Air Toxics is the industry leader in both passive and active sorbent-based methods supporting regulatory development and industry acceptance with on-going research and performance evaluation.

**Services:**

- Soil gas surveys
- Vapour intrusion investigations
- Ambient air monitoring programs
- Indoor air quality assessments
- EPA Method 325/Fence line Monitoring

Our routine analyses include: EPA TO-Compendium Air Methods such as TO-15, TO-3, TO-17, TO-13A and ASTM methods, such as ASTM D1945 and ASTM D1946. Specially developed products include a modified TO-15 method using a custom GC equipped with multiple columns to chromatographically isolate trace level compounds from interference and using a TOF-MS for target compound detection. In addition, our laboratory has developed passive sorbent methods using samplers such as the Radiello and Waterloo Membrane Sampler (WMS).

**Accreditations:**

Eurofins Air Toxics operates under NAICS code 541380 and holds NELAP accreditation through Oregon Environmental Laboratory Accreditation Program and DoD-ELAP and ISO/IEC 17025 accreditation through ANAB. The laboratory also participates in the following state accreditation programs: Arizona DOH, Florida DOH, Louisiana DEQ, New Jersey DEP, New York DOH, Texas CEQ, Utah DOH, Virginia and Washington DEC.

**Eurofins Calscience**

Eurofins Calscience, Inc. has been providing quality analytical services to consultants, private industry and government agencies since 1986. Eurofins Calscience operates out of three facilities which incorporate 70,000 square feet of laboratory and office space.

We are an industry leader in California, employing nearly 180 professionals and technicians. As a full-service environmental testing company, we offer analysis of groundwater, storm water, soil, hazardous waste, marine chemistry, and soil vapor/ambient air/indoor air.

We pride ourselves in providing the highest level of customer service in the industry because we truly believe “the difference is service”.

All of our operations are focused on meeting the demands of our customers, in terms of quality, deliverables, schedules and costs. We are organized and staffed to be able to respond to quick turnaround-time projects and we pride ourselves on our on-time delivery.

Eurofins Calscience focuses on servicing the environmental engineering community, not only to provide reliable data, but to help our customers meet their goals in terms of project profitability and timely completion.

We offer a full range of analytical methods and data deliverable products to meet the requirements of numerous environmental regulatory programs. Our staff of environmental professionals and project managers can assist clients with regulatory issues and are available to consult with clients to choose the appropriate test methods for their projects. We are committed to staying current with new technologies, adding instrumentation and expanding capabilities to meet the needs of our clients.

With our expansive instrument inventory we have the capacity to meet the demands of the most rigorous field schedules.

Eurofins Calscience has gained expertise in testing for constituents of concern for various regulatory programs and emergent chemicals.

Throughout our history, we have always been committed to quality, high ethical standards, and operating in a socially responsible manner.

**Services:**
• Air/Vapour
• Emergent Chemicals
• Hazardous Waste
• Landfill Monitoring
• Marine Chemistry

Accreditations:
Eurofins CalScience is certified under the National Environmental Laboratory Accreditation Program and in the States of California, Arizona (air/ vapor only), Hawaii, Nevada, Oregon and Washington as well as in Guam. In addition to these accreditations and certifications, we also accept and analyse samples from other U.S. States, Territories and Foreign Entities which do not have formal certification programs for air, soil and non-potable water samples. We continue to add certifications to meet the needs of our clients.

Eurofins Eaton Analytical
Indiana

Eurofins Eaton Analytical, LLC. located in South Bend, IN and Monrovia, CA, is an analytical laboratory focused on the analysis of water for a full range of chemical, microbial and radiological contaminants. Using methods from the USEPA, Standard Methods and in-house techniques, Eurofins Eaton Analytical provides clients with high quality, low reporting limit data to assess water quality.

Eurofins Eaton Analytical also assists clients with quality assurance consulting and development of internal quality standards. Eurofins Eaton Analytical is NELAP and ISO17025 accredited and offers comprehensive drinking water and bottled water compliance testing throughout most of the United States and its territories, in additional to more than 40 other countries. The lab stays on the leading edge of both compliance and emerging contaminant analyses by partnering with USEPA and instrument manufacturers on method development and validation projects.

Eurofins Eaton Analytical delivers reports 24/7 via web access. Final verified analytical results are delivered to clients via web push format (cap.eatonanalytical.com). The lab also operates service centers in Scottsdale, AZ, Arvada, CO, Raleigh, NC and Beaverton, OR.

Services:
• Drinking water
• Bottled water
• Reuse or recycled water
• Seawater
• Groundwater
• Surface water
• Water as a component in food, beverages or manufacturing

Analytical services include:
• Volatiles (EPA 524.2, 524.3, edb/dbcp, epichlorohydrin, 1,2,3-trichloropropene)
• Semi volatiles (EPA 525.2, 525.3, 625)
• Pesticides / Herbicides (EPA 505, 515.3, 515.4, 531.2, 547, 548.1, 549.2, 536, 538, 540)
• Metals (EPA 200.8, EPA 200.7, EPA 245.1)
• Anions and other inorganics
• Nutrients (nitrogen, phosphorus, silica, total organic carbon)
• Asbestos by TEM (EPA 100.2)
• Microbiological (coli forms, plate count, Giardia/Cryptosporidium by EPA 1623, coliphage, pseudomonas, yeast and mold, Legionella)
• Radionuclides (alpha/beta, radium 226/228, uranium, tritium, radon)
• Dioxin (EPA 1613)
• Disinfection by-products (Bromate, chlorate, chlorine, THMs, Haloacetic acids -HAA, Chloral hydrate, aldehydes, haloacetonitriles, total organic carbon-TOC, total organic halogen-TOX)

SPECIALTY ANALYTICAL AND CONSULTING SERVICES INCLUDE:
• Algae and algal toxins including microcystins, anatoxin-a, and cylindrospermopsin (by flow cytometry, ELISA, and LC-MS-MS)
• Biopharmaceuticals, hormones, artificial sweeteners, and personal care products (LC-MS-MS)
• Emerging Contaminates (1,4-dioxane, chromium-6, chloride, hormones and PFAS compounds; EPA 537 and 537.1)
• UCMR4 compounds (alcohols, pesticides, semivolatile acids, metals, algal toxins)
• Taste & Odor (MIB and Geosmin)
• EDTA / NTA
• Acrylamide
• Nitrosamines, including NDMA
• Perchlorate (by IC and LC-MS-MS)
• Quality Assurance consulting
• Sampler training
• LIMS consulting
• Regulatory consulting
• Development of water quality standards

Accreditations:
Accredited under the National Environmental Accreditation Program in multiple states and holds drinking water approval in 50 US states and Puerto Rico.

Eurofins Frontier Global Sciences

Eurofins Frontier Global Sciences is an analytical laboratory specializing in mercury, trace metals and metals speciation analysis. Since 1991, our expertise in measuring metals has produced innovative and reliable analytical methods that are currently utilized around the world.

Our services cover multiple industries including: Environmental, Power Plant Emissions, Consumer Products, Dietary Supplements, Food Products, Biological Tissue (fish/animal), and Natural Gas and Petroleum, making us experts in the field of metals speciation including Arsenic, Selenium, Mercury, Chromium, Cobalt, Vanadium and Molybdenum

Services:
Located on a 49-acre campus in Lancaster, PA, Eurofins Lancaster Laboratories Environmental is the largest single-site environmental laboratory in the US with state-of-the-art technology and instrumentation housed in a 330,000 square-foot modern facility.

**Services:**
- Environmental Testing Services
  - Vapor & Air Analyses
  - Petroleum-Related Analyses
  - Drinking Water
  - Volatiles
  - Semi volatiles
  - Metals
  - Pesticides / PCBs / Herbicides
  - Waste Characterization
  - Water Quality
- Environmental Specialty Services
  - Sediment & Tissue Testing
  - Method Development
  - PFAS (Per and Poly fluorinated compounds)
  - 1,4-Dioxane
  - Method 25D
  - Alkyl PAHs
  - Dioxins and Furans
  - PCB Congeners
  - Explosives

**Data Access Options**
- On-line Data Access—24 hours a day, seven days a week through Eurofins Lancaster Laboratories’ secure internet access, myEOL, which offers clients immediate access to final verified analytical results as analyses are completed and verified in the lab.
- Electronic Data Deliverables—Over 200 standard and custom formats available.
- Electronic Analysis Reports—Data reporting system reports analytical results with information needed to meet regulatory guidelines for Superfund, RCRA, UST, or State programs.
- Data Packages on CD—Eurofins Lancaster Laboratories offers a wide range of data packages to meet reporting and data validation needs with several state specific formats, including NJDEP, TRRP-13, as well as, CLP Level 4 equivalent packages.

**Markets Served**
- Holding NELAP, A2LA and DoD ELAP accreditations and more than 40 state certifications, Eurofins Lancaster Laboratories successfully completes the most demanding environmental testing projects for leading private-sector engineering and consulting firms and Fortune 100 Industrial companies. With one of the lowest employee turnover rates in the industry, Eurofins Lancaster Laboratories gives clients confidence that they receive the same consistent level of expertise and service year after year.

**Service Models**
- Fee for Service: Eurofins Lancaster Laboratories Environmental's staff performs work on a project-by-project basis.

**Eurofins QC**
- Eurofins QC, Inc. is a full-service environmental testing laboratory that has been providing analytical chemistry, microbiological and field services and aquatic toxicology testing to a diverse range of clients since 1943.
- Conducting operations in Horsham, PA, Eurofins QC is focused on providing testing services that enable clients to meet their regulatory and monitoring commitments. Analytical data is produced within a quality system framework that provides clients with an accurate and representative portrayal of a sample’s constituents.
- Housed in an 25,000 square ft facility, Eurofins QC provides chemistry and microbiology capabilities in support of the federal water, waste water and solid and hazardous waste regulations and derivative state regulations in PA, NJ, NY, DE, MD and VA.

Eurofins Spectrum Analytical Massachusetts

Eurofins Spectrum Analytical, Inc. specializes in providing quality analytical data and exceptional customer service for a wide variety of environmental interests.

We offer a full range of test methods for sediments, soils, sludge, solid waste, hazardous waste, drinking water, groundwater, industrial wastewater, plant and animal tissue and air.

Our labs, located in Agawam, MA, are equipped with state-of-the-art technology to automate analysis deliverables, ensure data accuracy and make results readily available to clients.

Eurofins Spectrum Analytical is committed to providing clients prompt, reliable results. Our commitment to quality includes the utilization of reliable and technically sound instrumentation, the employment of experienced chemists and the use of a highly trained support staff.

Our laboratory has been an active participant in the EPA CLP program for over a decade and is consistently ranked as one of the best laboratories in the program by EPA contracted auditors and quarterly blind proficiency test studies.

Eurofins Spectrum Analytical is committed to providing clients prompt, reliable results. Our commitment to quality includes the utilization of reliable and technically sound instrumentation, the employment of experienced chemists and the use of a highly trained support staff.

VIETNAM
Eurofins SAC KY HAI DANG
Eurofins SKHD has invested in modern laboratory facilities in Ho Chi Minh City and Can Tho City, and a new laboratory newly opened in Ha Noi City, staffed with qualified technical personnel.

Services:
• Analyses for residues and contaminants: Pesticides; Antibiotics; Mycotoxins; Heavy metals
• Nutritional analyses: Vitamin testing; Carbohydrates testing; Amino acid profile analysis; Fatty acid analysis; Lipids; Inorganic components
• Microbiological
• Analysis of agro and aquatic products, processed food, animal and poultry feed...
• Environmental monitoring samples:
water, air, soil, mud…
• Inspection & Audit services

Accreditations:

• Certificate of Accreditation No.
  VILAS 238 - ISO/IEC 17025:2017
• Ministry of Agriculture and Rural Development of the Socialist Republic of Vietnam assigned Eurofins Sac Ky Hai Dang as:
  o A food testing facility in charge of state food safety under the Decision No. 509/QĐ-QLCL
  o Animal feed testing's laboratory according to the Decision No. 329/QĐ-CN-TĂCN
  o A laboratory for agriculture and rural development in the field of fertilizer under the Decision No. 1754/QĐ-BVTV-KH
  • Ministry of Health of the Socialist Republic of Vietnam has assigned Eurofins Sac Ky Hai Dang as Food Safety Testing Laboratory under the Decision 265/QĐ-ATTP.
  • The Ministry of Industry and Trade of the Socialist Republic of Vietnam has appointed Eurofins SKHD to perform food testing in charge of state management of food safety under the Decision 3070/QĐ-BCT.
  • Certification of Ministry of Natural Resources and Environment of The Socialist Republic of Viet Nam about environmental monitoring (VIMCERT 020)
  • Recognized as an inspection organization in accordance with ISO/IEC 17020:2012, VIAS 047.

BIOANALYTICAL SERVICES

Eurofins Pharma Bioanalytical Services is a biologics-focused, global leader in bioanalytical solutions providing over 15 years of industry-leading scientific expertise. We specialize in comprehensive PK/TK, ADA, Nab, Biomarker assays and sample analysis for the world’s largest pharmaceutical and biopharmaceutical companies.

Our mission is to extend our clients’ capabilities of improving global health by combining scientific knowledge, capacity, regulatory expertise and flexibility to provide the trusted, relevant information required for the drug approval process.

At the forefront of employing novel approaches to overcome the most complex assay challenges and industry-leadership in developing and performing immunoassays on human and animal specimens, we offer trusted bioanalytical solutions to support studies ranging from preclinical non-GLP to IND enabling Tox studies to multi-national Phase III clinical trials. We can take your biologic drug from research through development to FDA regulatory submission.

- Over 15 years of industry-leading global Scientific Expertise supporting the widest breadth of Biologics’ clinical trials with PK/TK, ADA, Nab and Biomarker assays and sample analyses.
- Versatile Performance to adapt to a client’s specific needs. Clinical or preclinical, regulated or non-regulated, assay development, qualification or validation; we custom design our support to match the client’s program.
- State-of-the-art laboratory facilities in Oxford, UK and St. Louis, USA providing Global Reach and Capacity to address clients’ needs while simultaneously offering regionally-based solutions.

FRANCE

Eurofins ADME BIOANALYSES

Eurofins ADME BIOANALYSES is a powerful and complete laboratory for bioanalysis, pharmacokinetics and immunogenicity.

Our bio-analytical team supports discovery, preclinical and clinical studies with method development, validation, and sample analysis in biological matrices for both small and large molecules (proteins, Peptides, Antibodies) with LC-MS/MS, Immunoassays and Immunogenicity assessment studies.

The laboratory is equipped with a LIMS Watson® coupled with ReportDesigner®.

Services:

- Analytical method development using LC-MS/MS or ligand binding assays
- Validation of analytical methods for the determination of small and large molecules
- Bioanalysis to support discovery, preclinical and clinical development
- Pharmacokinetic calculation and interpretation
- Immunogenicity assessment studies (ADA)
- Cell based assay for neutralising test
- Complete platform for ADC (LC-MS/MS and immunoassays available on site)

Accreditations:

- Good Laboratory Practice (GLP)
- FDA inspected

Viracor
With over 30 years of specialized expertise in infectious disease, immunology and allergy testing for immunocompromised and critical patients, Viracor Eurofins is committed to helping medical professionals, transplant teams, reference labs and biopharmaceutical companies get results faster, when it matters most.

Viracor is passionate about delivering value to our clients by providing timely, actionable information — never losing sight of the connection between the testing we perform and the patients you serve.

Services:
Clinical and BioPharma laboratory testing services in the areas of Infectious Disease, Immunology, Allergy, Transplant Testing.

Accreditations:
- CLIA
- CAP

Also accredited by the following state agencies for clinical lab testing: New York, Florida, California, Maryland, Pennsylvania and Rhode Island.

PHARMA DISCOVERY SERVICES

The Eurofins Pharma Discovery Services business cluster, of Eurofins Scientific, was built by bringing together the market leading expertise of Panlabs (acquired in 2012 from Ricerca), Cerep (acquired in 2013) and EMD Millipore’s Discovery & Development Solutions business (acquired from Merck KGaA in 2014). The combined expertise, knowledge and skill set of these companies brings our clients the additional benefit of a comprehensive portfolio of potency/efficacy, safety, and ADME-Tox assays supplied by a single provider. For >40 years, Eurofins Pharma Discovery Services has been a trusted CRO supporting Drug Discovery from Target Id through to Candidate Selection by offering a comprehensive package of >3000 drug discovery products & services, including in vitro pharmacology products & services, cell-based phenotypic assays, in vitro ADME-Tox, in vivo drug safety & efficacy services, and custom proteins & assay development services.

FRANCE

Eurofins Cerep

Eurofins Cerep was founded in December 1989 in Poitiers, France, as a service company to provide solutions for drug profiling and drug screening in pharmacology, allowing faster and cost-effective drug discovery by identifying at early stages the most promising drug candidates, as well as eliminating those compounds likely to fail in development. Eurofins acquired Cerep in March 2013. Since 2014, Cerep, Panlabs and Discovery Services have merged into Eurofins Pharma Discovery Services.

Indonesia

Eurofins Advisus

A premier preclinical contract research company for regulatory Toxicology (Safety Assessment), CMC services, DMPK and Analytical R&D Services. With over 30 years of GLP compliance and certification, Eurofins Advisus serves diverse industries such as Biotech, Pharmaceutical, Biological, Agrochemical, Nutraceutical and Cosmetic. Eurofins Advisus has submitted over 60+ end-to-end IND enabling packages to global regulators such as USFDA, EMA, MHRA, Health Canada and others.

TAIWAN

Eurofins Panlabs Taiwan

Eurofins Panlabs Taiwan Ltd was founded in Taiwan in 1970, and is a pioneer global contract research organisation focused on providing drug discovery services using molecular/cellular and pharmacology assays.

Our scientific portfolio consists of over 1,350 biological tests ranging from molecular assays, to cell-based models, through proof of concept determinations. Eurofins acquired this entity in 2012. Since 2014, Cerep, Panlabs and Discovery Services have merged into Eurofins Pharma Discovery Services.

PHARMA EARLY DEVELOPMENT

Preclinical drug development is a complex, regulatory and strategy-driven process. The most important element of the preclinical process is to select the best new molecular entities to enter into the clinical trials and to limit failure in full development. With its countless years of professional experience in drug development, Eurofins is well positioned to offer a holistic approach of the compound development in order to maximize the chances of success in the clinical phases.

Our network of expertise and full service is not only a matter of convenience but also an issue of confidence and security to succeed with your project. Our clients select Eurofins for this distinctive match of expertise, flexibility and full service. This beneficial setting explains why we work for 8 out of the 10 biggest Pharma companies.

FRANCE

Eurofins ADME BIOANALYSES

Eurofins ADME BIOANALYSES has been a Eurofins expert in pharmacokinetics and metabolism since 1987.

The laboratory is equipped with a LIMS Watson® coupled with ReportDesigner®.

Our bio-analytical team supports discovery, preclinical and clinical studies with method development, validation, and sample analysis in biological matrices for both small and large molecules (proteins, Peptides, Antibodies) with LC-MS/MS, Immunoassays and Immunogenicity assessment studies.

Services:

- Bioavailability and Blood Brain Barrier permeability screening tests
- ADME studies with radiolabelled molecules (14C or 3H)
- Development and validation of analytical methods in biological fluids and tissues according to FDA and EMA guidelines
- Bioanalysis to support pre-clinical and clinical trials for both small and large molecules
- Pharmacokinetics calculation and interpretation

Immunogenicity

- Specific expertise on bioequivalence studies and drug-drug interaction studies
- Dermal distribution and absorption studies on Franz cells or Bronaugh cells

Specific expertise:

- Analysis of Nicotine, Analysis of vitamins such as Calcitriol, 25-OH D2 and 25-OH D3
- Dermal distribution and absorption studies

Accreditations:

GLP compliant - successfully inspected by FDA on a bioequivalence study and inspected every two years by EMA.

Eurofins Genomics

Eurofins Genomics offers a comprehensive services portfolio for the entire drug development process, from preclinical research to clinical phase III trials.

The drug development service portfolio for the modern biopharmaceutical industry includes an exclusive marker set for the general identification of responders/non-responders in the scope of clinical studies and expert consultation by an academic partner in pharmacogenetics. In the field of GMP manufacturing we also offer solutions that can be addressed with genomics technology.

Together with other Eurofins companies like Eurofins Global Central Laboratory, Eurofins Optimed Clinical Research, and Eurofins BioPharma Testing Services a complete service package for even worldwide multi-central registration studies is offered.

Services:

- DNA-RNA-extraction, e.g. for biobanking
- GLP compliant genotyping and sequencing
- High-throughput genotyping
- SNP, mutation and biomarker analysis
- Analysis of candidate genes
- Expression analysis by Real Time PCR
- Microarrays, e. g. SNP analysis and gene expression
• Biological safety testing, e.g. residual DNA testing or analysis of production strains and cell banks
• Next Generation Sequencing (NGS), like adventitious virus testing, tumour profiling/ cancer sequencing, exome sequencing, whole genome sequencing, transcriptome analysis
• Bioinformatics
• Virus and microbiological diagnostics: Virus load determination, genotyping, sequencing and quantitative analyses of viruses and bacteria
• Metagenomic analysis
• Oligo and Gene Synthesis
• Assay development and validation
• Scientific consultancy
• Comprehensive and well-founded consultancy prior to all projects/studies
• Professional project management during the complete project/study
• Dedicated project managers and study directors as competent and reliable contact persons
• Expert advice on the evaluation and interpretation of results
• DNA / RNA Synthesis
• DNA Sequencing
• Gene Synthesis & Synthetic Biology
• Next Generation Sequencing
• Applied Genetics: Genotyping, Gene Expression & Microarrays

Accreditations:
• CLIA accredited
• CAP accredited
• ISO 9001:2008
• ISO 13485:2003
• FDA 300982691 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD products

Eurofins Genomics specialises in pharmacogenetics and pharmacogenomics. In these areas Eurofins Genomics offers a comprehensive services portfolio for the entire drug development process, from preclinical research to clinical phase III trials.

The drug development service portfolio for the modern biopharmaceutical industry includes an exclusive marker set for the general identification of responders/ non-responders in the scope of clinical studies and expert consultation by an academic partner in pharmacogenetics.

Together with other Eurofins companies a complete service package for even worldwide multi-central registration studies is offered.

Services:
• DNA / RNA-extraction, e.g. for biobanking
• GLP compliant genotyping and sequencing
• High-throughput genotyping
• SNP, mutation and biomarker analysis
• Analysis of candidate genes
• Expression analysis by Real Time PCR
• Microarrays, e. g. SNP analysis and gene expression

Reliable, high quality laboratory data is pivotal to the success of clinical trials. Since laboratory testing is our sole focus, we go above and beyond to provide an array of services to ensure that any clinical trial sample is collected, transported, managed, analysed, reported and stored to meet the objectives and purpose of your study. We are dedicated to providing the most cost effective and efficient solutions to pharmaceutical and biotech companies, and CROs alike.

Eurofins Central Laboratory supports its customers across its wholly-owned CAP accredited laboratory facilities in the United States, Europe and Asia. Our harmonized laboratories operate as one. All of our laboratories are connected to one global LIMS and are using the same global standard operating procedures and global reference ranges through the deployment of uniform instruments, reagents, and analytical methods to provide one global data set for submission to health authorities worldwide.

Services:

- Global Clinical Safety and Specialized Testing

A full package of routine and non-routine laboratory testing, including:

- Allergy Testing
- Biomarkers
- Chemistry
- Coagulation
- Endocrinology
- Flow Cytometry
- Genomics
- Haematology
- Immunology
- Immunohistochemistry
- LCMS/MS
- Microbiology
- Molecular Diagnostics
- Pathology
- Serology/Virology
- Spectrophotometry
- Toxicology
- Biomarker Services
- PD - target engagement biomarkers, proof-of-mechanism and proof-of-concept biomarkers
- Biomarkers in clinical trials (exploratory and clinical end-point)
- Fit-for-purpose validation and analysis of commercially available biomarker assays
- Biomarker analysis in non-conventional biological matrices
- A broad range of applied technologies: ELISA, MSD, Luminex, Flow cytometry and LC-MS/MS
- Global Infectious Disease Services
- Central laboratory microbiology to support clinical trials
- Clinical virology services
- Scientific consultancy

Clinical trial supporting services
- Logistics Support and Courier Management
- Global footprint to ensure specimen integrity and optimal turnaround time
- One logistical operating procedure for all laboratory testing applications
- Dedicated specimen kit production facility

Customized collection kits
- Electronic requisition forms
- Customized Investigator Manuals
- Specimen shipping procedure, materials and courier contact information
- Track and trace
- Import and export license coordination
- Investigator Site Support
- Study specific investigator laboratory manual
- Study and visit specific specimen collection kits
- Summary flow charts for experienced users
- Visit specific test schedules
- Multilingual helpdesk for global support
- Daily results reporting by web, email or fax
- Access to real-time global results database via secured electronic requisition forms
- Sample Management and Storage
- Dedicated sample management department
- Registration in LIMS (double entry)
- Barcode labelling for sample tracking and automated results reporting into LIMS
- Third party lab shipment management
- Sample storage at 2-8 °C, -20°C and -80°C and liquid nitrogen storage
- Short and long term storage
- Project Management
- Global study set-up
- Study specific materials including investigator laboratory manual, specimen kits, shipping materials
- Training investigator sites
- Single point of contact for Monitor
- Monitoring timelines
- Issue management, query solving
- Budget management

Ensure all key deliverables are met

- Trend analysis tools
- Study specific, customized analysis tools upon request
- Global Quality Assurance
- Annual process audits cross inspecting all Eurofins Central Laboratory facilities worldwide
- Data integrity audits
- Study specific audits
- Global document control
- Building and maintaining global standardized operating procedures
- Issue management coordination, analysis and improvement programs
- Key performance indicators

**Accreditations:**

The QM/QA-system of Eurofins Genomics is certified according to ISO 9001, including the requirements of ISO 13485 (medical devices requirements). Furthermore we are accredited according to ISO 17025 covering molecular testing methods like Sanger sequencing (e.g. for genotyping within clinical trials), quantitative Real-Time PCR, fragment length polymorphisms analysis and mass spectrometry-based DNA analysis. In addition ISO 17025 accreditation covers next generation sequencing with Illumina technologies.

Eurofins Genomics is also certified for the principals of Good Laboratory Practice (GLP) and compliant with Good Clinical Practice (GCP). We are consistently audited by clients from the pharmaceutical industry according to these GxP regulations. We also regularly perform facility and process audits. We are participating in external proficiency testing (ring trials) on a regular basis.

For further information on the broad portfolio of Eurofins Genomics please have a look on the International Business Line "Genomic Services" section/ Germany in this Group Directory.

**THE NETHERLANDS**

**Eurofins Central Laboratory - Netherlands**

At Eurofins Central Laboratory, we are the End-to-End solution to the BioPharma industry!

With our four standardized, wholly-owned global locations [US, Netherlands, Singapore, China] and a back office in India, we provide CAP/CLIA certified analytical services in both a GCP & GLP environment.
This allows us to combine safety and efficacy analysis with Biomarker Services embedded within one laboratory, introducing cost efficiencies into Sponsor study budgets, and increasing specimen integrity by reducing unnecessary transport. Reliable, high quality laboratory data is pivotal to the success of clinical trials.

It’s the RESULTS THAT MATTER.

Since laboratory testing is our sole focus, we go above and beyond to provide an array of services to ensure that any clinical trial sample is collected, transported, managed, analyzed, reported and stored to meet the objectives and purpose of each study. We are dedicated to providing the most cost effective and efficient solutions to pharmaceutical and biotech companies, and CROs alike.

What differentiates Eurofins from the rest?

Innovation. Whether that is our specimen visibility tool, EzRF (web based requisition), our home based, virtual trial patient specimen collection kits or our mobile laboratory technician service for standardized CAP certified on-site analysis of rapid analytical TAT requirements (PBMC, semen analysis, virology specimen processing), Eurofins Central Laboratory is your analytical solution for Phase 1 to 4 clinical trials.

Services:
- Safety Testing
- Efficacy Testing
- Biomarkers
- Microbiology
- Flow Cytometry
- PBMCs
- Mobile Lab Techs (onsite, standardized analytical services)
- Kits & Logistics
- Sample Management
- Data Management
- Investigator Services.

Eurofins BioPharma Product Testing is the largest network of harmonized bio/pharmaceutical GMP product testing laboratories worldwide providing comprehensive laboratory services for the world's largest pharmaceutical, biopharmaceutical and medical device companies.

Our service offerings are fully comprehensive and include testing of drug substance, final product, intermediates, and starting materials for both small and large molecule drug products.

Our laboratories offer a broad range of methodologies under GMP authorization, ISO 17025 accreditation and ISO 9000 certification. All analyses are performed according to European and British Pharmacopeia (EP), United States Pharmacopeia (USP) and Japanese Pharmacopeia (JP), as well as specific customer methods.

With a global capacity of more than 1,600,000 square feet/ 150,000 square meters and facilities located in Australia, Belgium, Canada, Denmark, France, Germany, India, Ireland, Italy, Japan, Netherlands, New Zealand, Spain, Sweden, Switzerland, UK and US, our network of GMP laboratories operates under the same strict quality procedures, LIMS and centralized billing system across 34 locations worldwide.

Eurofins Lancaster Laboratories - Portage

Accreditations:
A shared ambition: to offer all our patients the best possible care

Clinical diagnostics at the heart of the healthcare system

Clinical diagnostic tests are a key factor in 70% of medical decisions.

A central element in healthcare, clinical diagnostic testing today contributes to every stage of patient care: predisposition testing, prevention, diagnostics, theranostics and of course monitoring of treatments.

Innovating today for the health of all tomorrow

Eurofins stands for a conception of clinical diagnostics entirely focused on excellence, innovation and technological investment.

Genetics and genomics are gradually marking out the new outlines of tomorrow’s clinical diagnostics and our labs are investing heavily in these advanced technologies (NGS, i.e. Next Generation Sequencing), which already have a large number of applications for many people from NIPT (Non Invasive Prenatal Testing) to predictive genetics of cancers or in personalized medicine that can offer patients individualized treatment based on their genetic and metabolic profiles.

The commitment of our laboratories: to work for public health

A healthcare service available to all

With tens of thousands of clinical diagnostic tests every day, the laboratories of the Clinical Diagnostics division strive to ensure that every patient, wherever he or she lives, is assured of access to the most specialized and most innovative techniques for diagnosis, monitoring and therapeutic adjustment.

With our logistics expertise and our daily sample collection and delivery network, we can guarantee perfect continuity in the provision of care, the same quality and the same access to innovation across all the regions that we serve, to the benefit of patients and the medical profession.

Our local laboratories, our technical platforms and our high specialized clinical testing platforms are thus working in the service of public health, focusing on improving the quality and effectiveness of clinical diagnostics and giving all our partners access to state-of-the-art clinical biology, the biology of today and tomorrow in the service of a more personalized medicine.

Enabling equal access to the most innovative tests

Offering the most innovative tests to the wider population at a cost that is affordable for society, this is our mission.

While promoting prevention and screening, earlier and more accurate diagnoses, more efficient, faster and safer therapeutic management, and at the same time reducing diagnostic and therapeutic error and side effects of treatments, our laboratories also respond to the need to control health spending.

We therefore work closely with the health authorities, clinical pathology professionals and clinicians as well as with public and private hospitals to monitor developments in medicine and to reflect on the positioning, financing and innovation in clinical biology in the service of public health.

Eurofins LifeCodexx

Headquartered in Konstanz (Germany), Eurofins LifeCodexx has been developing innovative and clinically validated non-invasive diagnostic tests based on the newest molecular analytical methods since 2010.

With the PrenaTest®, Europe’s first non-invasive prenatal test (NIPT) for the determination of the most common chromosomal disorders in unborn children, launched in 2012, Eurofins LifeCodexx has been changing prenatal diagnostics considerably.

The test is performed within Germany in strict conformity with the highest quality standards as per the European Directive on In-vitro Diagnostic Medical Devices.

IRELAND

Eurofins Biomnis Ireland

Accredited to the ISO 15189 medical testing standard, Biomnis Ireland Medical testing (formerly Claymon Laboratories) is the leading independent provider of medical laboratory testing services in Ireland.

We are proud to offer our clients an accredited pathology service which uses the most sophisticated diagnostic equipment and techniques in all fields of pathology, including a dedicated pathology transport service, expert medical pathologist support and novel IT connectivity solutions to meet all of your pathology needs.

Biomnis processes over 250,000 patient tests per week, providing rapid turnaround times for over 2,500 clinical tests across all biomedical disciplines.

Services:

- Autoimmunity
- Allergy
- Microbiology
- Infectious serology
- Haematology
- Specialised biochemistry, physical chemistry and toxicology
- Immunochemistry
- Endocrinology
- Antenatal diagnostics
- Cytogenetics
- Histopathology & Cytopathology
- Fertility Testing

Accreditations:

- ISO 15189

Japan

Eurofins Clinical Genetics
Japan

Eurofins Clinical Genetics K.K. is a clinical laboratory working with cutting-edge technology and providing new testing services in Japan.

The company was established in 2015 and started a non-invasive prenatal genetic testing (NIPT) service in 2016 by next generation sequencing (NGS).

Eurofins Clinical Genetics K.K. always offers the best quality service to support our customers.

Services:

Eurofins Clinical Genetics K.K. is providing NIPT services. We can handle samples from all over the world in our laboratory.

Accreditations:

Our laboratory is accredited by the College of American Pathologists (CAP). We also obtain the PrivacyMark system of Japan Information Processing Development Corporation (JIPDEC).

Spain

Eurofins Megalab
(Laboratorio Central)

Since our inception in 1988, we have worked to consolidate day as a large clinical laboratory. After 25 years of experience and a proven track record, Megalab is currently one of the largest laboratories in Spain.

We are a national leader in services, information, management and diagnostic tests clinical analysis and pathology. We also lead the management of intra-hospital laboratories in the country, with presence in 54 private hospitals that serve more than 4,500 beds.

We have a network of 60 laboratories covering the entire national territory and offer our services to all medical societies, health centers and hospital management companies. More than 500 centers send samples to our headquarters in Madrid, where we carry out about 10,000 tests per day.

We provide our customers with the latest technological advances in order to provide an effective response and quality service to our patients.

Accreditations:

• ISO 9001
• ISO 14001

Eurofins Clinical Diagnostics Dubai

We are a comprehensive pathology and diagnostic testing centre of choice for providers who value patient-center care.

Backed by a team of highly qualified and certified American doctors and experienced professional technical team brought state of the art technologies to Dubai Health City. Qualified and motivated staffs are our most important assets.

Our management creates and maintains an environment in which employees can devote their efforts whole heartedly to the objectives of our company.

We have in-house Comprehensive coverage of all the departments of pathology.

Eurofins Biomnis UK

With a menu of over 2,500 assays, Eurofins Biomnis laboratories has established its reputation for the development of novel tests and the availability of routine and esoteric tests. As a partner of first-line medical laboratories, Biomnis provides its highly skilled expertise to all its stakeholders (both private and hospital-based laboratories) on a daily basis.

Services:
• Biochemistry
• Virology
• Serology
• Allergies
• Autoimmunology

Eurofins County Pathology

Boston Heart Diagnostics

Boston Heart is transforming the treatment of cardiovascular disease by providing healthcare providers and their patients with novel, personalized diagnostics and reports with integrated, customized lifestyle programs that have the power to change the way clinicians and patients communicate about disease and improve heart health.

Services:

Eurofins ViraCor

With over 30 years of specialized expertise in infectious disease, immunology and allergy testing for immunocompromised and critical patients, ViraCor Eurofins is committed to helping medical professionals, transplant teams, reference labs and biopharmaceutical companies get results faster, when it matters most.

ViraCor is passionate about delivering value to our clients by providing timely, actionable information — never losing sight of the connection between the testing we perform and the patients you serve.

Services:
Clinical and BioPharma laboratory testing services in the areas of Infectious Disease, Immunology, Allergy, Transplant Testing.

Accreditations:
• CLIA
• CAP

Also accredited by the following state agencies for clinical lab testing: New York, Florida, California, Maryland, Pennsylvania and Rhode Island.

Eurofins Diatherix

Based in Huntsville, Alabama, Diatherix Eurofins is a highly-specialised laboratory providing cutting-edge molecular diagnostic testing services to hospitals and physicians using proprietary TEM-PCR™ (Target Enriched Multiplex Polymerase Chain Reaction) technology for precise detection of infectious diseases at high levels of sensitivity and specificity, and at very short turnaround times.

TEM-PCR™ is a breakthrough molecular multiplex technology that allows not only rapid DNA/RNA identification of multiple pathogens in
a single sample, but also specific genetic drug resistance diagnostic, in as little as 6 hours. Diatherix has developed several diagnostic panels to identify multiple organisms in samples quickly and accurately, helping physicians and healthcare providers choose more effective antimicrobial therapy and improve patient outcomes. The company's service offering and expertise therefore fits perfectly with Eurofins’ recent acquisition of ViraCor and its core competence in infectious diseases, immunology and transplant cases.

Eurofins Genomics

Eurofins Genomics is accredited for ASRs and IVD applications through our cGMP facility in Louisville. We offer cGMP certified DNA/RNA oligonucleotides, and CLIA and CAP accredited sanger sequencing. In addition, our products and services include library assays, Next Generation Sequencing, gene synthesis, gene fragments, applied genomics, genotyping, and gene expression.

For GMP projects, we work with the client to provide custom solutions and custom down-stream processes to meet your regulatory needs.

Services:
• cGMP DNA / RNA Oligonucleotides
• Each GMP project receives a devoted project manager
• Kit packing
• DNA Sequencing in tubes, plates and kits.
• Gene Synthesis & Synthetic Biology
• Gene Fragments
• Next Generation Sequencing
• qPCR and MGB-eclipse probes
• Library Assays
• Applied Genetics: Genotyping, Gene Expression & Microarrays

Accreditations:
• ISO 9001:2008
• ISO 13485:2003
• CLIA accredited
• CAP accredited
• FDA 3009882691 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD products

Eurofins Labs Inc. Colorado
We hold an extensive list of registrations, accreditations and licensures. The testing services provided by LABS have been inspected by various regulatory and accrediting agencies for more than 30 years to ensure our services aid in providing quality outcomes to our valuable customers.

Accreditations:
International Standard ISO / IEC 17025
ISO 9001
**Germany**

**Eurofins Genomics**

Eurofins Genomics offers a comprehensive services portfolio for the entire drug development process, from preclinical research to clinical phase III trials.

The drug development service portfolio for the modern biopharmaceutical industry includes an exclusive marker set for the general identification of responders/non-responders in the scope of clinical studies and expert consultation by an academic partner in pharmacogenetics. In the field of GMP manufacturing we also offer solutions that can be addressed with genomics technology.

Together with other Eurofins companies like Eurofins Global Central Laboratory, Eurofins Optimed Clinical Research, and Eurofins BioPharma Testing Services a complete service package for even worldwide multi-central registration studies is offered.

**Services:**

- DNA/ RNA-extraction, e.g. for biobanking
- GLP compliant genotyping and sequencing
- High-throughput genotyping
- SNP, mutation and biomarker analysis
- Analysis of candidate genes
- Expression analysis by Real Time PCR
- Microarrays, e.g. SNP analysis and gene expression
- Biological safety testing, e.g. residual DNA testing or analysis of production strains and cell banks
- Next Generation Sequencing (NGS), like adventitious virus testing, tumour profiling/cancer sequencing, exome sequencing, whole genome sequencing, transcriptome analysis
- Bioinformatics
- Virus and microbiological diagnostics: Virus load determination, genotyping, sequencing and quantitative analyses of viruses and bacteria
- Metagenomic analysis
- Oligo and Gene Synthesis
- Assay development and validation
- Scientific consultancy
- Comprehensive and well-founded consultancy prior to all projects/studies

**Accreditations:**

The QM/QA-system of Eurofins Genomics is certified according to ISO 9001, including the requirements of ISO 13485 (medical devices requirements). Furthermore we are accredited according to ISO 17025 covering molecular testing methods like Sanger sequencing (e.g. for genotyping within clinical trials), quantitative Real-Time PCR, fragment length polymorphisms analysis and mass spectrometry-based DNA analysis. In addition ISO 17025 accreditation covers next generation sequencing with Illumina technologies.

Eurofins Genomics is also certified for the principals of Good Laboratory Practice (GLP) and compliant with Good Clinical Practice (GCP). We are consistently audited by clients from the pharmaceutical industry according to these GxP regulations. We also regularly perform facility and process audits. We are participating in external proficiency testing (ring trials) on a regular basis.

For further information on the broad portfolio of Eurofins Genomics please have a look on the International Business Line “Genomic Services” section/ Germany in this Group Directory.

**India**

**Eurofins Clinical Genetics India**

Eurofins Clinical Genetics India (ECGI) is working with Next Generation Technologies for molecular genetic testing and carrier screening for patients care.
Over the past decade, next-generation sequencing (NGS) has led to an exponential increase in our understanding of the genetic basis of disease, which has provided insights into molecular based prognosis & diagnosis.

ECGI’s integrated approach is to create comprehensive map of genetic disease using automations and high through-put sequencing, genotyping & microarray tools to revolutionize the patient care. ECGI strive to make the genetic testing process affordable, efficient with actionable information to our researchers, clinicians and patients.

The ECGI team and its collaborators across the globe have rich expertise and experience in implementation of Omics technologies to create innovative solutions for Clinical Genomics and Genetics.

### Services:
- Non-Invasive Prenatal Testing (NIPT)
- Medical Exome Sequencing
- Multigene NGS panel for Molecular Genetics Testing
- Genetic Carrier Screening

### Accreditations:
(In Process)
- ISO 9001: 2015
- ISO/IEC 17025 (NABL Accredited Medical Testing)

**EGL Genetics**

EGL Genetics specializes in diagnostic testing for the more common genetic disorders to the ultrarare. Industry differentiators include a comprehensive test menu spanning preconception testing to adult-onset genetic disorders; 3 labs in 1; molecular genetics, biochemical genetics, and cytogenetic testing performed under one roof; board-certified laboratory directors and genetic counselors reporting out each case; and 47 years of clinical experience, making EGL the oldest clinical genetics laboratory in the United States.

With more than 500 US-based and international clients, EGL Genetics has a global reputation for quality.

Also accredited by the following state agencies for clinical lab testing: New York, Florida, California, Maryland, Pennsylvania and Rhode Island.

---

**Eurofins Clinical Molecular Testing Services**

Eurofins Clinical Molecular Testing Services Laboratory provides clinical Sanger sequencing and clinical next generation sequencing for the identification and confirmation of human genetic variants.

#### Services:
DNA extraction from whole blood, buccal swabs and saliva; design and validation of Sanger sequencing assays for SNPs and small insertion or deletion variants; design and validation of fragment size and microsatellite assays; next generation sequencing cystic fibrosis mutation panel. Fast turn-around-time; customized patient reports.

#### Accreditations:
- CLIA, CAP

---

**Eurofins Transplant Genomics**

Transplant Genomics Inc. (TGI) aims to improve organ transplant outcomes through molecular diagnostic tests that detect early signs of graft injury, differentiate among actionable causes and enable optimization of therapy.
MEDICAL DEVICE TESTING

From implants and instruments, to single-use and combination products, as well as active electronic devices, Eurofins Medical Device Testing provides the optimal strategy for all types of medical devices and delivers rapid turnaround times with the highest level of service and most advanced technologies.

With extensive knowledge of the commercialization process, regulatory requirements and scientific trends in the Medical Device Industry, our scientists and engineers have been assisting companies, large and small, with developmental testing and regulatory submissions for more than 25 years.

Our 16 state-of-the-art facilities throughout North America, Europe and Asia Pacific offer extensive capacity and the highest level of instrument technology, enabling us to provide the full scope of testing services required by the Medical Device Industry.

Eurofins Medical Device Testing can help develop and execute your test plans and navigate the regulatory pathway to market anywhere in the world. Our laboratories maintain quality systems compliant with cGMP, GLP, and ISO 17025, and conducts testing in accordance with ISO, ASTM, ANSI, AAMI standards, as well as custom test methodologies to meet the unique needs of our customers.

Eurofins Alphora

A full service contract research, development and manufacturing organization (CRDMO) for complex and niche small molecule active pharmaceutical ingredients (APIs)

EUROFINS CDMO (Contract Development & Manufacturing Organization) helps pharmaceutical and biopharmaceutical companies move rapidly from research stage of NCE/NBE development to clinical stages with integrated and time-efficient services to help compress timelines to market.

From formulation screening and development, to sterile and non-sterile manufacturing, IND/IMPD and NDA/CTD services, as well as clinical trial material including packaging and logistics, Eurofins CDMO delivers comprehensive solutions to streamline the development and manufacturing of a variety of product types, delivery systems and dosage forms.

With 13 state-of-the-art facilities in the US, Europe and India and global regulatory expertise, Eurofins CDMO provides high-quality, customized solutions for complex products and unique production processes, specializing in the development of innovative formulation technologies and solutions to enhance bioavailability and control drug release for difficult-to-formulate drug candidates.

KOREA

Eurofins Korea Analytic Service Co., Ltd.

Eurofins Korea Analytic Service is a laboratory that has been providing analytical services since 2000, performing chemical, microbiological, organic, inorganic and toxicological analyzes in environmental, food, cosmetics and consumer products.

Services:
Environmental Testing Services (water, soil, waste and atmospheric emissions):
• Dioxins and dioxin-like compounds, PCBs and related persistent organic pollutants (POPs)

Food and Livestock products Testing Services:
• Pesticide analyses for organic foods
• Pesticide analyses based on QUECHERS GC-MS & LC-MS/MS
• Nutritional fact analyses
• Microbiological analyses
• Heavy metals analyses

Cosmetics Testing Services:
• Chemical Testing

• Microbiology
• Safety Testing
Human Biomonitoring Service:
• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on humans

Accreditations:
The laboratory is accredited by KOLAS, the Korea accreditation organization, in accordance with ISO 17025.
• Ministry of Food and Drug Safety:
  Food, Livestock Products, Cosmetics
• National Institute of Environmental Research:
  POPs Sampling & Analysis, Waste Analysis (General, PCBs), Air pollutant
• National Agricultural Products Quality Management Service:

ROMANIA

EUROFINS EVIC PRODUCT TESTING ROMANIA SRL

Eurofins EVIC Romania was founded in 2004 in Bucharest and it is ever since a reference center in the area for testing topical products.

Currently, the lab is a pharma-oriented experimentation center having 15 years of experience and characterized by continuous education and pursuing new developments. The center is specialized in testing borderline products and applied research, known and appreciated for the capacity of developing and performing
customizable and high complexity projects.

The center is capable of working 100% GCP compliant, with the closest standards to pharma industry. Among the portfolio of Eurofins Evic Romania, there are edge-projects which include professional techniques (biopsy, tattooing etc.).

The team of professionals which include physicians and nurses, the benefit of a large and diverse subjects database, with access to specific criteria, as well as the setup of the laboratories, define the center as a state-of-the-art research facility.

Services:
• Documentation
• Clinical Safety Studies
• Clinical Efficacy Studies
• Consumer Tests
• Sensory Evaluation
• Clinical Microbiology

Accreditations:
• OHSAS 18001

THE NETHERLANDS

Eurofins Bactimm

Eurofins Bactimm is a microbiological contract laboratory with a focus on the pharmaceutical and medical device industry. Eurofins Bactimm also provides microbiological testing services to the health care and cosmetics industry.

Eurofins Bactimm was founded in the eighties, originally as a manufacturer of microbiological culture media, specifically for clinical purposes.

Over the years, Eurofins Bactimm introduced testing services for the medical devices, food and veterinary industries as well as for hospitals. In
2000, EU-GMP certification was acquired in Nijmegen and a broad range of microbiological tests were introduced to the market, including testing of pharmaceuticals, suitability testing, qualification of irradiation processes, disinfectant testing and container closure testing.

In 2010, Eurofins Bactimm moved to newly build cleanroom facilities.

Services:
- Microbiological Quality Control Testing - AI's, raw materials, finished products and medical devices in compliance with cGMP
- Analytical Method Development and Validation
- Disinfectant Efficacy Studies
- Microbiological Contamination Control in Cleanrooms

Accreditations:
- GMP compliant
- ISO 9001: 2008
- ISO 13485: 2003
- GGO

Eurofins CRL (Piscataway)

Eurofins CRL operates as an independent contract laboratory providing a wide range of clinical safety and efficacy testing to the cosmetic, beauty products, personal care and pharmaceutical industries.

Located in central New Jersey, CRL is dedicated to conducting human clinical test procedures to determine the safety and efficacy of cosmetic, personal care, and OTC drug products. The company focuses its clinical expertise in the areas of dermatology, photobiology, ophthalmology, bioinstrumentation, microbiology, cosmetology, clinical trials, and associated services.

CRL operates a 22,000 square foot clinical testing facility with approximately 75 employees in Piscataway, NJ.

CRL was founded in 1992. The objective in starting the business was to develop a leading independent laboratory for in vivo clinical testing, providing clients with customised
safety and efficacy testing programs for consumer and pharmaceutical products.

The company maintains a database containing over 25,000 panellists, each having completed a comprehensive medical history and product usage survey. CRL can design clinical trials utilising over 30 different study-related variables, which include age, race, sex, skin type, and product usage practices using its existing panellist relationships.

CRL has completed over 20,000 clinical testing studies for more than 300 different businesses and has established long-term contracts with some of the largest consumer product companies in the world. The company routinely conducts studies in relation to anti-aging claims, SPF efficacy, acne treatment and a variety of other cosmetic product categories. The company has established a reputation for excellence in clinical studies and testing.

CRL performs a wide range of clinical safety and efficacy testing which can be categorised into three primary areas including: (i) Repeated Insult Patch Test (“RIPT”) which is the industry standard for dermal sensitisation testing; RIPT is used predominately for skin care products, color cosmetics, woven and non-woven fabrics and fragrances, (ii) In-Use Safety Studies which allow product vendors to make dermatological safety in-use claims such as “Dermatologist Tested” and “Safe for Sensitive Skin” or any other substantive safety claims, and (iii) traditional efficacy and safety assessments that provide evidence of the efficacy of a particular consumer product and product claim substantiation and authentication.
HEALTHCARE

ASSURANCE

Eurofins Healthcare Assurance is a global trusted partner providing business assurance services to identify and mitigate risks in the entire supply chain of customers in the cosmetic/personal care, pharmaceutical, medical devices and food supplements.

High quality, safety and integrity of healthcare products can only be achieved by implementing robust and effective management systems and processes. Eurofins Healthcare Assurance provides audit and certification, training and consulting services focused on safety management systems, process optimisation, risk and cost reduction and brand protection.

A large team of Eurofins experts can assist customers in the cosmetic/personal care, pharmaceutical, medical devices and food supplements to face the increasingly demanding and complex regulatory environment in which they operate, solving industry challenges and informing unbiased business decisions.

Healthcare Assurance services are provided by a team of specialists from the Eurofins network and external qualified partners. Auditors are based in more than 25 countries, in North America, Europe and Asia, where healthcare manufacturers and their supply chains are located.

Services:

AUDITS

Eurofins Healthcare Assurance’s experts provide supply chain and distribution audits in a cost-effective and time saving manner for customers and audited sites with:

- Individual audits: carried out on behalf of one customer only, with our network of local auditors;
- Shared audits: reduced price when number of customers increases, less audit sessions per audit sites;
- Possibility to purchase existing reports which allow more customers to obtain assurance on their supplier sites without rescheduling or redoing an audit (following agreement with the audited site and owner of the report);
- Supply chain audits (suppliers and CDMO) and distribution flows, based on regulatory, international or customer standards:
  - GLP: Laboratories used to perform all non-clinical safety studies which are intended to support research permits or marketing authorisation;
  - GCP: Clinical Research Organisation, Investigation Center, Data Center;
  - GMP: Finished Products, APIs and Excipients, Cosmetic Ingredients, Medical Device Components, Dietary Supplement Ingredients, Packaging Materials, Service Providers for Analytical Testing, Sterilisation, Maintenance, Validation…
  - Distribution and post-market surveillance:
    - GDP: Distribution centers, transportation;
    - GVP: Service providers for Pharmacovigilance activities.

In addition, our team provides:

- Internal audits programmes;
- Health Canada Audits for OTC;
- Due Diligence Audits;
- RGPD audits.

CONSULTING:

- Gap-analysis, definition of CAPAs and support in implementation.
- Support in the implementation of new standards or regulations, and in preparation for an inspection by health authorities or customer audits.
- Improvement of Quality Systems (CAPA, Deviation, Change control, Batch records, OOS, Risk Analysis…).
- Support on Quality Investigation, when industrial issues occurs.
- Support in validation and regulatory filing requirements.

TRAINING:

- Training in technical and quality standards;
- In-house, classroom, webinar and e-learning options;
- Customised or standardised, in English or local languages where applicable.

Accreditations:

Auditing activities are compliant with EU, US, Canadian, Australian and Japanese regulations.
GENOMIC SERVICES

With facilities in Europe, the United States and Asia, Eurofins’ genomic services deliver frequently used services such as DNA & RNA oligos and synthetic genes right through to genotyping, next generation sequencing and transcriptomics. The Eurofins’ genomic services stand out for innovative technologies in the life science arena especially for pharma, diagnostics, food, agriculture, biotechnological and research markets.

CANADA

Eurofins Genomics

Eurofins Genomics offers a wide array of genomics services including DNA sequencing, DNA / RNA synthesis and bioinformatics for academic and industrial research.

We offer one of the fastest turnaround times for sequencing in the country, the lowest error rate in the industry for Sanger sequencing and oligonucleotides, and our approach is highly service oriented.

Services:
• DNA extraction and Purification available
• DNA / RNA Oligonucleotides with a variety of options, purifications and modifications available.
• DNA Sequencing in tubes, plates and kits.

Eurofins GenoSkan A/S

GenoSkan A/S uses a variety of advanced biotechnologies for genotyping and sequencing.

The Infinium HD assay technology from Illumina is a flexible platform which makes it possible to genotype a large amount of SNP markers for one individual at a time.

With this technology it is possible to use both customized SNP assays and to design own SNP assays.
GenoSkan A/S offers customized SNP-assays for most species (human, cattle, pig, sheep, dog etc.)

GERMANY

Eurofins Genomics Germany

Eurofins Genomics is globally known for its innovative technologies in the life science arena including academic institutions, biotech and the pharmaceutical industry. The company has established an outstanding team of more than 600 talented genomics experts and a broad range of technologies in the field of genomic services, forensics, agroscience, pharmaceutical, environmental, food and feed testing at our fully automated production facilities in Europe, USA, Japan and India.

This unique team supports Eurofins Genomics’ approach to offer best practices and flexibility for all clients – from academic institutions to large companies around the world.

Services:
Eurofins Genomic Markets
Pharma & Diagnostics

Eurofins Genomics has extensive experience in applying the different genetic analysis methods and techniques which are crucial for the entire drug development and production process:
• Preclinical phase through all phases of clinical trials (phases I, II and III)
• Quality control for production of biologicals

Comprehensive services are available for all your study or project needs in the field of analysis, research and development. Amongst others the Eurofins Genomics services portfolio covers DNA/RNA extraction for bio-
banking, GLP-compliant genotyping and sequencing, biomarker analysis, residual DNA testing, adventitious agent testing via NGS or analysis of production strains and cell banks. These services are available from single sample analysis all the way through to the high throughput levels involving several thousand samples.

Agriculture & Food

Important traits in agricultural plants and livestock such as yield, drought resistance, pathogen resistance, feed efficiency and quality linked parameters are genetically encoded. Eurofins Genomics agrigenomics services support:
• Plant breeding
• Farm animal & pet breeding
• Food production & authenticity testing

Eurofins Genomics provides a flexible, competent service with global reach, high industry standards and scalable capacity. One of the in-house experts will be assigned as your project manager ensuring excellent support and communication. Together you will find the perfect solution for your genomic characterisation and marker identification projects by integrating the latest technologies for sequencing and genotyping.

Industrial Biotechnology

Eurofins Genomics can offer you individual genomics solutions from the companies’ industry leading service portfolio. These include:
• DNA & RNA extraction services
• Genomic, metagenomic & genetic characterisation
• Characterisation of genetic variability
• Residual host cell and pathogen DNA & RNA analysis
• Design and production of synthetic genes, gene fragments and gene evolution libraries
• GMO & genetic insert characterisation
• Assay design & validation

Research

From frequently used services such as DNA & RNA oligos and synthetic genes right through to genotyping, next generation sequencing and transcriptomics, Eurofins Genomics can offer you a broad portfolio of solutions and services for your research:
• DNA & RNA Oligonucleotides
• Custom DNA Sequencing
• Next Generation Sequencing (NGS)

• Gene Synthesis & Molecular Biology
• Genotyping & Gene Expression Services

With a great deal of expertise and experience in handling all types of research projects, the Eurofins Genomics expert team employs more than 80 Ph.D.’s in all disciplines related to genomics to make your project a success.

INDIA

Eurofins Genomics India

Eurofins Genomics India is a leading provider of genomic services in India. Many of the top life science companies and academic research institutions in private and public sector are clients of Eurofins India.

Our focus is on customer convenience and providing high quality service. With a team of experienced and skilled manpower, Eurofins Genomics India has gained an excellent reputation as a reliable source of genomic products and services.

Services:
• Custom Oligonucleotide Synthesis
• DNA Sequencing
• Next Generation Sequencing
• siRNA
• Gene Synthesis
• Microbial Identification
• Fragment Analysis
• SNP Genotyping
• Microsatellite Analysis
• RAPD
• RFLP
• BAC DN

Blue Heron Biotech
Blue Heron Biotech has been leading the gene synthesis industry since the very beginning. In 1999 we had one goal, to make gene synthesis an accessible service for the research community and beyond. Our sole focus is gene synthesis and cloning, providing you with a fully customizable experience and a dedicated team who specializes in difficult to build genes.

Our proprietary GeneMaker multi-technology platform enables us to synthesize nearly any construct, while online ordering and flat rate pricing provide a straightforward process.

Services:
Blue Heron Biotech has been providing customers solutions for complex DNA synthesis for nearly two decades. Since 1999, Blue Heron has delivered millions of base pairs of perfectly accurate genes to customers worldwide.

Using our proprietary GeneMaker® multi-technology platform, Blue Heron
will synthesize nearly any gene. Our history of delivering high quality DNA synthesis products to our customers, including top 20 pharma and biotech companies, has established Blue Heron as the gold standard in gene synthesis.

Our partnership with OriGene allows us to use their collection of expression vectors combined with Blue Heron’s gene synthesis capacity. Located in Bothell, Washington, Blue Heron Biotech provides dedicated customer service, strict confidentiality, exceptional synthesis standards, and products made entirely in the U.S. Whether you need one gene or one thousand, the simplest sequence or comprehensive codon substitutions, our experts will deliver.

Utilizing multiple design techniques, we provide the right synthesis solution for challenging sequences. Blue Heron Biotech specializes in synthesis of complex DNA, including designs with hairpins, repeats, GC rich regions, and lengths over 20Kb.

We provide an unmatched level of service and attention to detail to give you the assurance that your project will be delivered as ordered and on time.

Eurofins BioDiagnostics
With extensive in-field knowledge of agriculture and the seed industry, as well as experienced analysts and state-of-the-art testing equipment and methodologies, BioDiagnostics serves the specific and changing needs of seed producers, seed retailers, plant breeders and those assessing the quality of seed, grain and oil.

Helping customers troubleshoot, ensure the high quality of their product, develop more precise, effective plant-breeding programs and more, we offer testing in a full range of need categories.

Services:

- Adventitious Presence
- Event ID and Zygosity
- Fatty Acid Profiling
- Genetic Fingerpointing
- Genetic Purity
- Germination, Vigour and Physical Purity
- Molecular Breeding
- Seed Treating
- Seed Treatment Analysis
- Trait Confirmation, Consulting

**FRANCE**

**Biomnis**

Biomnis has a specialised genetic fingerprinting laboratory with all the equipment and accreditations necessary to perform such tests (which are subject to very particular legal constraints). Legal experts from the genetic fingerprinting laboratory are consulted in a variety of different fields, including evidence samples analyses (exhibits), profiles for the Criminal Registry, mitochondrial DNA sequencing and paternity tests.

**Services:**

The Biomnis Genetic Fingerprinting Department has special skills in a number of areas:

- Trace analysis: this activity consists of simple isolated trace amounts (officially sealed exhibit samples) specimens follow orientated testing to define the human biological nature of the trace (with BlueStar® staining and specific CrimeScope® illumination); Genotyping of the trace on at least 15 sequences; Contact traces (material which cannot be seen by the naked eye) are harvested and their genetic material is concentrated to determine its nuclear DNA and genotype.
- Profiling for the Criminal Registry (the national genetic fingerprint database) and of other individuals: double amplification and genotyping in distinct reactions for all identifications, even of homozygotes and those with a mutation in a priming sequence.
- Mitochondrial DNA: MDNA sequencing from an isolated trace or from a sample of saliva or blood.
- Paternity tests: civil and criminal cases with direct genotyping to confirm or rule out direct parentage, brother- or sisterhood and even more distant relationships.
- Material from a prematurely terminated pregnancy to confirm or rule out direct parentage.
- Complex evaluations, specific procedures, emergency treatment, etc.

**Laboratoire Toxlab**

Toxlab is one of the leading independent analytical laboratories within France specialising in the provision of an unparalleled range of toxicology testing and support services to police & governmental institutions:

- Post-mortem toxicology
- Road Traffic Accidents
- Doping
- Investigation in Drug-Facilitated Crimes and Drug-Facilitated Sexual Assault
- Expert Witness interpretation in toxicology
- Analysis of seized street drugs. Detection of traces of narcotics on different materials (banknotes, cell phones, clothes)
- Workplace drug testing and toxicological analysis in occupational medicine (metals in blood, urine and hair, solvents)

With over 20 years’ experience in toxicological analysis in a variety of matrices, especially for forensic cases, our ISO/CEI 17025:2005 accredited laboratory undertakes a comprehensive range of scientific analysis in accordance with...
Laboratoire Chemtox

Chemtox is a pioneer in the toxicological analysis of blood, urine, oral fluids and hair for the characterization and determination of a wide range of chemical compounds.

The ISO 17025 accredited laboratory provides services to the criminal justice and industrial clients throughout Europe, and delivers solutions and expertise with:

- Toxicological analysis for forensic investigation
- Expert Witness interpretation in toxicology
- Detection and quantification of pesticides
- Analyses of biopharmaceutical drugs, hormones and therapeutic agents
- Detection and quantification of volatiles substances (solvents, hydrocarbons) and gases
- Detection and quantification of metals and trace elements in blood, urine and hair

Services:

At the heart of the activity of the laboratory are forensic activities for French and European police and Courts of Justice in order to determine cause of death, screen for various toxins, alcohol use, drug searches or highlighting doping or food contamination.

Skills and experience in forensics allows for diversification of analyses to suit industrial sectors:

- Cosmetics: traces of heavy metals, toxicity
- Biopharmaceuticals: identification of undesirable compounds
- Food: detection of toxic contaminants, controlled substances (drugs, doping)
- Environment: environmental toxins and exposure of employees

Accreditations:

- NF EN ISO 17025

Eurofins IFEG

Eurofins IFEG is involved in DNA Forensic analysis for the justice as well as evidences from crime scene and paternity testing.

Accreditations:

- NF EN ISO/CEI 17025

Germany

Eurofins Medigenomix Forensik

Eurofins Forensik was split from Eurofins Medigenomix in 2012 in response to continued growth and to better serve the highly specialised DNA forensics market. In DNA forensics and human identity testing, Eurofins Forensik is the leading private laboratory in Germany and one of the top laboratories in Europe for paternity testing.

We are part of the international Eurofins Forensics laboratory network (www.eurofins-forensics.com). Our specific strengths are high-quality, cost-efficient high-throughput analyses and our team of experienced experts. At our DNA campus in Ebersberg/ Germany, we have access to state-of-the art equipment and to a wealth of methods and new techniques which go far beyond the capabilities of other Forensics and Paternity Testing Laboratories

Services:

Our services are demanded by a wide range of national and international clients such as police forces, courts, lawyers, the legal system, industry, R&D organisations, academia and private persons.

- DNA profiling for inclusion into national DNA databases
- DNA profile interpretation and comparison for suspects - scene linkage and multiple scenes - incident

Eurofins Workplace Drug Testing

Eurofins Workplace Drug Testing offers a complete service for pre-employment, random, for cause workplace screening, and abstinence monitoring, with expert interpretation, and the ability to find and associate other important signs to substantiate results.

We provide our services across a wide range of markets including construction, aviation, utility, maritime, ground transportation and defence. In addition, our forensic science business provides the majority of the Toxicology analysis for Police and Courts. As a result, we are able to apply a wealth of experience, scientific techniques, skills, and expertise to help organisations minimise the risk in the workplace from drug and alcohol misuse.

Services:

- Drug and alcohol testing
- Drug and alcohol policy advice
- Sample collection network
- Point of Care Testing Collection Kits
- Training and education
- Medical Review Officer (MRO) provision
- Forensic expert witness

PRODUCT TESTING

The Eurofins Group provides testing, certification, and consulting on the quality and safety of products to manufacturers, distributors and retailers. Our expertise encompasses a multitude of national and international specifications and regulations. The Group applies the highest technical standard to ensure impartial testing and independent judgement.

The Consumer Product Testing (CPT) Division covers the needs of retailers, brand owners, manufacturers and providers of raw materials, components and any other economic agent throughout the supply chain. The service scope of the Division ranges from regulatory support or assessment during the product development stage, to factory audits facilitating manufacturer consideration, all the way through testing, product validation, documentary checks, and certification during the pre-production and mass-production stages, down to inspections and pre-shipment testing before expedition or warehouse inspections, control plans and failure analysis once the products are in market.

The Consumer Product Testing Division comprises several separately-managed “International Business Lines”. These International Business Lines group together laboratories that are focused on the same specific industries, for example:

- Cosmetics & Personal Care
- Digital Testing & Cyber Security
- Digital Media
- Electrical & Electronics and Industrial Services
- Softlines & Leather

For information on laboratories serving the above listed business lines, please refer to the corresponding section in this Directory.

In this section, named “Consumer Product Testing”, you will find the laboratories in the Division which are not specific to any of the above business lines, but instead serve multiple industries and therefore cover a vast array of consumer products, including most product ranges in industries including:

- Household products (furniture, decoration, bazaar, hygiene, detergency, appliances, lighting, kitchen and tableware, etc.)
- Toys and childcare
- Outdoor (camping, luggage, sports, garden products, etc.)
- DIY / Home improvement

In other words the Eurofins CPT Division cares for the safety, quality and compliance of any product you might find in your house or garden.

CHINA

Eurofins Product Testing Service (Shanghai) Co., Ltd.

Eurofins Consumer Product Testing Shanghai provides a variety of different tests supporting the activities of international buyers when they source from China.

The main product categories covered by Eurofins Consumer Product Testing Shanghai include:

- Construction & DIY
- Cosmetics
- Detergents, Maintenance Chemicals, Biocides
- Garden
- Household & Bazaar
- Hygiene, Paper & Pulp
- Miscellaneous, Raw materials, Natural, Synthetic
- Packaging
- Personal Protective Equipment
- Sport & Leisure
- Textile, Leather & Related
- Toys & Childcare
- Ex equipment
- Digital, Media, Software
- Electrical & Electronics
- Furniture
- Household Appliance
- Lighting/Luminaire
- New Energy
- Power Supply
- Power Tools
- Industrial

Services:

- Electrical Safety
- EMC Test
- Performance Testing
- Physical & Mechanical Analysis
- Inspection & Audit Services
- Energy efficiency and ERP testing
- Physical & Mechanical testing
- Flammability Testing
- Chemical Testing
- Performance Benchmarking

- Test Plans
- Training
- Regulatory assessment
- Markings, Labeling, Instruction Manual Review

Accreditations:

- Large scope under ISO17025
- IECCE CB Scheme
- ZLS approval for GS certification
- CPSC approval for the US market
- UKAS approval for the EU market
- ENEC approval for EU market
- SASO approval for GCC
- Mutual acceptance with many national certification bodies worldwide

Eurofins Testing Technology (Shenzhen)

Eurofins Product Testing Shenzhen provides a variety of different tests supporting the activities of international buyers when they source from China.

The main product categories covered by Eurofins Product Testing Shenzhen include:

- Toys
- Hardlines
- Textiles & Footwear
- Food Contact Products
- Cosmetics
- Household Electrical Products
- Writing & Marking Instruments
- Ceramic Ware
- Candles & Candle Containers
- Indoor Air

Services:

- Physical & Chemical Analysis
- Flammability Testing
- VOC Emission
- Electrical Safety
- Inspection & Audit Services

Accreditations:

- CNAS ISO/IEC 17025
- CMA Accreditation
- CPSC approval for the US market

Eurofins Consumer Product Testing (Hangzhou)

Eurofins Consumer Product Testing Hangzhou provides a variety of different tests supporting the activities of international buyers when they source from China.

The main product categories covered by Eurofins Consumer Product Testing Hangzhou include:
- Textiles & Footwear
- Toys
- Electrical & Electronic Products
- Children & Childcare Products
- Food Contact Materials
- Hardlines

Services:
- Performance testing
- Chemical analysis
- Physical & mechanical analysis
- Flammability testing
- Children Safety testing
- Consultancy
- Regulatory & compliance
- On-site training

Accreditations:
- Large scope under ISO17025
- CPSC approval for the US market
- Mutual acceptance with many national certification bodies worldwide

Denmark

Eurofins Product Testing Denmark

Eurofins Product Testing A/S specialises in the testing, consultancy and certification of the chemical safety of consumer products all over the world.

The laboratory offers a broad range of services to the manufacturing industry and importers including:
- Building Materials
- Furniture
- Food Packaging Materials
- Polymers & Rubber
- Gloves
- Toys
- Detergents, Hygiene Products & Cosmetics
- Non-food & DIY Retail

Services:
- VOC emission testing is the main focus of Eurofins Product Testing Denmark (A/S). The laboratory is a global market leader both in its field and within the Eurofins Group network. Eurofins Product Testing Denmark’s internationally-recognised experts operate the highest number of emission test chambers world-wide, documenting product performance relative to national VOC regulations and various labels, e.g. EMICODE, Blue Angel, LEED, AFSSSET, U Mark/AgBB and Eurofins Indoor Air Comfort.

Other services include:
- Factory Inspection, Auditing & Certification
- Migration Analysis
- Chemical Content Analysis
- Troubleshooting
- Consultancy in relation to food contact materials, product marketability and labelling, GHS/CLP, Reach, toys, cosmetics, eco-labelling, environmental declarations and chemical risk assessment.

Accreditations:
- ISO 17025 accreditation (DANAK)
- CPSC (Pb analysis)

FRANCE

Eurofins ATS

Eurofins ATS specialises in Consumer Product Testing, having worked with major European retailers, manufacturers (national brands, raw materials and private label) and consumer organisations for over 30 years.

The laboratory’s main field of expertise is the development of “in-use aptitude and performance tests” with a focus on “perceived quality by the consumer”.

Product categories:
- Cosmetics & Toiletries
- DIY
- Toys
- Paints, Coatings, Varnishes, Adhesives, Glues
- Detergents
- Hygiene & Paper
- Hardlines & Household Product

Services:
- Performance Tests
- Chemical & Physical Analyses
- Clinical Studies
- Expert Panels & Consumer Studies
- Technical Assistance, Consultancy and Complementary Services in Legal/Regulatory Assistance

Accreditations:
GERMANY

Eurofins Consumer Product Testing Germany

Eurofins Consumer Product Testing GmbH specialises in the analysis of products for the following industries:
- Cosmetics
- Hygiene & Paper Products
- Biocides
- Detergents
- Toys
- Food Contact Materials (FCM)
- Household Products

A highly skilled and experienced team of chemists, food chemists, biochemists, and engineers is specialised in analysing samples using accredited methods. The laboratory focuses on chemical testing by applying state-of-the-art techniques such as GC-MS/MS and LC-MS/MS. CPT’s expert team evaluates your testing results in order to meet the current national, international, and European legislation.

Furthermore, CPT’s experts provide solutions tailor-made to your specific needs. Due to analytical test reports CPT supports the complete international supply chain: supplier of raw materials, producers, importers, as well as retailers, consumer organisations, and authorities.

Services:
- Chemical & Physical Analysis
- Migration Tests (OML, SML, NIAS)
- Biocides
- Detergents
- Toys
- Food Contact Materials (FCM)
- Household Products

Accreditations:
- DIN EN ISO/IEC 17025:2005 (DAkkS)
- ILAC-MRA (DAkkS) • CPSC
- Authorised Expert for Cross Checks for Cosmetics and Detergents

INDIA

Eurofins Product Testing India

Eurofins Product Testing India provides high-quality standard assurance and control services, including testing, certification, inspection, audits, technical and regulatory services to manufacturers, brand owners, distributors and trading companies, buying associations, consumer associations, and retailers worldwide for the wide range of Textiles, Leather & Footwear, Toys, Cosmetic & FCM products they produce.

JAPAN

Eurofins Product Testing Japan

Chemical Testing for Products/Materials conforms to Japanese legislation and guidelines

Services:
- RoHS(Directive 2011/65/EU)
- Food Sanitation Act (Toys & Food Contact Materials)

Accreditations:
- VOC (JEITA & Automotive)
- Cosmetics (Siloxane & Others)

Spain

Eurofins Product Testing, Cosmetics & Personal Care Spain

Eurofins Product Testing, Cosmetics & Personal Care Spain, S.L.U has over 25 years’ experience in providing analytical control services to raw material manufacturers, suppliers, finished article producers (brand and private label) and retailers.

Our highly skilled and experienced team of chemists and engineers is specialised in analysing samples using accredited methods and evaluating the results according to relevant Spanish and European legislation, including respective guidelines and recommendations.

Eurofins Product Testing, Cosmetics & Personal Care Spain, S.L.U has specialised experience in Cosmetics, Detergents, Food Contact Material, Sensory Analysis and Technical Regulatory Consultancy.

Services:
1. TESTING:
- Food Contact (overall migrations)
- Performance Testing - Detergents
- Eco-label Performance Testing
- Performance Testing - Household
- Cosmetics Testing - Performance, Security & Control
- Detergent, Paper & Polymeric Materials Biodegradability
- Qualitative Studies
- Packaging Testing
- Concept Acceptance Testing
- Developing Consumer Insight
- Screening Testing
2. LEGAL AND TECHNICAL CONSULTANCY FOR PRODUCT LABELLING:

- Adaptation of the DSD/DPD classification and labelling system to the new CLP requirements; reducing adaptation process costs to the retail sector
- Labelling development based on MSDS
- Technical label translation to Spanish and Portuguese
- Label revision to detect and ensure that any national requirements shall be applied to commercialize in the Spanish and Portuguese market.
- MSDS (Material Safety Data Sheet)
- MSDS adaptation to CLP regulation
- Classification of chemical substances and mixtures
- Technical MSDS translation to Spanish and Portuguese
- Revision to detect and ensure the application of all national label requirements for the Spanish and Portuguese markets

3. INSPECTION AND AUDIT:

- Product inspection and auditing of suppliers’ quality system

Eurofins Consumer Product Testing Turkey

Eurofins Consumer Product Testing Turkey has the required accreditation to provide technical competence and perform textile, leather, footwear and fashion accessories products testing.

Ministry of Trade Footwear Testing

Eurofins Consumer Product Testing Turkey facilitates Phthalates, Chromium VI and Organic Tin Compound testing on behalf of the Turkish Republic Ministry of Trade according to Communiqué on Import Supervision of Some Consumer Products (Product Safety and Inspection: 2018/18) by the Ministry of Economy General Directorate of Product Safety and Inspection, published in the Official Gazette (Issue 30286 Reps) on 31 December 2017 by the Import Inspections Department.

Services:

- Chemical
- Azo Dyes
- Formaldehyde
- Allergenic Disperse Dyes
- Lead & Cadmium Content
- Nickel Release
- Heavy Metals
- Phthalates
- Chromium VI
- Chlorinated Phenols
- Organic Tin Compounds
- Polycyclic Aromatic Hydrocarbons (PAH)
- Alkylphenols / Alkylphenol Ethoxylates (APEO)
- Chlorinated Organic Carriers (COC)
- Others
- Mechanical
- Fibre Content
- Colour Fastness Tests
- Pilling Resistance
- Abrasion Resistance
- Tear Strength
- Tensile Strength
- Flammability
- Seam Slippage
- Dimensional Stability
- Zipper Slide Fasteners
- Flammability

Accreditations:

- Nº AB-1356-T for textile and leather materials, issued by the Turkish Accreditation Body (TÜRKAK), according to the ISO/IEC 17025:2012 standard

DIGITAL TESTING & CYBER SECURITY

BELGIUM

Eurofins Digital Testing - Belgium

Originally established as a spin out from Philips in 1997, and formally known as Testronic Labs, the Hasselt lab was acquired by Eurofins in 2015, and renamed Eurofins Digital Testing Belgium.

The company is part of the Eurofins Digital Testing organisation and offers hardware certification services, various software testing solutions and test automation products.

Services:
- Digital testing services
- Digital test tools (off the shelf and custom)
- Digital testing resources

Accreditations:
- ISO 17025
- Malaysian DVB-T2 Testing

HONG KONG (CHINA)

Eurofins Digital Testing - Hong Kong

The Hong Kong facility of Eurofins Digital Testing originally opened in 2009, is now based in Cheung Sha Wan in Kowloon. This facility serves as testing services, technical support and local sales for APAC customers.

Services:
- TV and Set Top Box Testing: CI+, HbbTV, Conax, DVB, ATSC and various country certification
- Others: Qi wireless power charging, Amazon Alexa AVS

SWEDEN

Eurofins Digital Testing Sweden

The Sweden-based facility of Eurofins Digital Testing provides a combination of testing solutions including professional services, managed services and test automation in the media sector and other industries. Eurofins Digital Testing Sweden aims to reduce the cost of quality defects for its customers.

GERMANY

Eurofins Cyber Security Germany

Eurofins Cyber Security Germany offers a full range of cyber security services to support any company in Europe to assess their risk, meet compliance obligations, develop effective security programs, train their employees and test their products for vulnerabilities.

Services:
- GDPR assessments
- Cyber security assessments
- Penetration testing
- Red teaming

HONG KONG (CHINA)

Eurofins Digital Testing - Hong Kong

China

Eurofins Product Testing Service (Shanghai) Co., Ltd.

Eurofins Consumer Product Testing Shanghai provides a variety of different tests supporting the activities of international buyers when they source from China. The main product categories covered by Eurofins Consumer Product Testing Shanghai include:

- Lighting & Luminaires
- Household Appliances
- Power Tools
- Power Supply
- Industrial Equipment
- New Energy
- Textiles & Footwear
- Toys
- Juvenile Products
- Food Contact Materials
- Hardlines
- Construction Material

Services:
- Electrical Safety
- EMC Test
- Performance Testing
- Chemical Analysis
- Physical & Mechanical Analysis
- Flammability Testing
- Inspection & Audit Service
- Energy efficiency and ERP testing

Accreditations:
- Large scope under ISO17025
- IECEE CB Scheme
- ZLS approval for GS certification
- UKAS approval for the EU market
- Mutual acceptance with many national certification bodies worldwide

GERMANY

Eurofins Product Service Germany

Eurofins Product Service GmbH is a test laboratory and certification body for electric and electronic products.

Our service includes tests according to various standards and customer specifications as well as certification and approval support for more than 180 countries.

Services:
• conformity assessment (CE-mark) according to European Directives: R&TTE (RED), EMC, LVD, MDD, ErP-directive
• environmental simulation e.g. vibration, temperature, shock, salt fog, flammability, humidity, dust and water density tests
• tests according to DO-160
• tests of active medical devices (e.g. IEC 60601)
• PTCRB-tests
• Bluetooth SIG
• E1-mark
• MET-mark
• GS-mark (Geprüfte Sicherheit)
• TCB-Service for FCC
• FCB-Service for ISED (IC) Canada
• Test and Certification according to CB-Scheme
• International Type Approval support in over 180 countries worldwide (e.g. Russia, China, Brazil)
• Notified Body (0681) services according to RED (Radio Equipment Directive) and MDD (Medical Device Directive)

Accreditations:
• Accredited test laboratory DIN EN ISO/IEC 17025 by DAkkS (German Accreditation Body) and A2LA (American Association for Laboratory Accreditation)
• Accredited certification body DIN EN ISO/IEC 17065 and DIN EN ISO/IEC 17021-1 by DAkkS (German Accreditation Body)
• Notified Body for Medical Devices Directive 93/42/EEC
• TCB (Telecommunication Certification Body) for USA and FCB (Foreign Certification Body) for Canada
• GS-Body authorised for granting GS-Mark (Geprüfte Sicherheit)
• NCB (National Certification Body) within the IECCE CB-Scheme
• KBA/NSAI recognised Technical Service

Eurofins Product Testung Italy

Eurofins Product Testing Italy is a leading Italian laboratory which specialises in many sectors of product safety conformity assessment, specifically Electrical & Electronic, Mechanical & Environmental and Acoustic testing and phonometers and accelerometers calibration testing. Eurofins Product Testing Italy has been acknowledged as a Product Testing & Certification Center of Excellence according to International regulation & standard and European Directives.

Services:
• Medical Device
• Personnel Protective Equipment
• ATEX and IECEx, Machinery
• Pressure Equipment
• Transportable Pressure Equipment & Electrical Installations
• Lift Safety and Conformity Testing
• Noise Emission
• EMC
• Radio

Accreditations:
• Accredited test laboratory DIN EN ISO/IEC 17025 by DAkkS (German Accreditation Body)
• Notified Body for Medical Devices Directive 2014/53/EU
• Notified Body for Medical Devices Directive 93/42/EEC
• TCB (Telecommunication Certification Body) for USA and FCB (Foreign Certification Body) for Canada
• GS-Body authorised for granting GS-Mark (Geprüfte Sicherheit)
• NCB (National Certification Body) within the IECCE CB-Scheme
• KBA/NSAI recognised Technical Service

Eurofins Modulo Uno Turin

Eurofins Modulo Uno is a recognised Italian Inspection body that assesses the safety conformity of in-service products, machinery, equipment and installations.

Services:
• Safety & conformity third party inspections on Lifts, Cranes, Pressure Equipment, Transportable Pressure Equipment & Electrical Installations
• Voluntary inspections on Gates, Bank Safety Systems
• Thermographic analysis

Accreditations:
• UNI CEI EN ISO/IEC 1702
• UNI EN ISO 9001:2008

UNITED KINGDOM

Eurofins York Ltd

Eurofins York Ltd was founded in 1995, with its origins in the University of York’s Department of Electronics, is a trusted global provider of product testing, certification, consultancy, training and instrumentation services. Eurofins York Ltd operates across four sites in the UK which include three United Kingdom Accreditation Service (UKAS) accredited test laboratories and our York office which is home to our Expert Services and Test Instrumentation businesses.

Services:

1) Testing (Bristol, Castleford and Grangemouth Laboratories)

Accredited testing services to enable CE marking and global market access
- Electromagnetic Compatibility (EMC Directive)
- Wireless (Radio Equipment Directive)
- Electrical Safety (Low Voltage Directive)
- Electromagnetic Fields (EMF Directive and Health and Safety at Work legislation)
- Shielding Effectiveness Measurements
- On-site EMC and EMF Testing at Customers' Premises
- Electromagnetic Site Surveys (UK-wide and globally)
- Railway Specific Measurements

2) Expert Services (York Office)

Consultancy and research in the fields of regulatory compliance and management, bespoke testing and RF engineering:
- EMC Management
- Railway EMC Compliance
- Bespoke Electromagnetic (EM) Measurements
- RF Research including Novel and Bespoke Solutions
- Standards Gap Analyses
- Technical Documentation
- Electromagnetic Modelling
- Product Compliance Reviews
- Test and Measurement Facility Reviews
- Notified Body services for 2014/30/EU

3) Test Instrumentation (York Office)

A range of Radio Frequency (RF) verification and measurement equipment:
- Dual Mode Comb and Continuous Broadband Noise Sources
- Continuous Broadband Noise Emitters
- Comb Generators
- Harmonics and Flicker Generators
- Compact Emissions Measurement Antenna
- Cable Coupling Clamp

4) Training Courses (York Office)

Training for a range of regulatory aspects associated with CE Marking directives and RF engineering; available as scheduled, in-house, bespoke and online courses:
- EMC Management and Control
- EMC Testing
- EMC Design
- Railway EMC Management
- Understanding Antennas and Electromagnetic Theory
- EMC Directive 2014/30/EU
- Low Voltage Directive 2014/35/EU
- EMF Directive 2013/35/EU

Accreditations:

- ISO/EN 17025 (UKAS)
- IECEE CB Scheme
- FCC
- MET Laboratories (including factory audits)
- VCCI
- Mutual acceptance with many National Certification Bodies
- ISO 9001
- RISQS, CIRAS, PTS (Transport industry)

Certification Management Limited

Certification Management Limited (CML) was established in June 2013. Offering a complete range of compliance services, we are an EU Notified Body (No 2503) for the European Union Directive 2014/34/EU (ATEX). This is supported by our UKAS accreditation (No 8175) to ISO/IEC 17025 and ISO/IEC 17065 and our full scope of accreditation allows us to issue any type of certificate. Appointed in 2014, we are also an IECEx Certification Body (ExCB) and Test Laboratory (ExTL) with the full scope of standards.

Additionally, CML B.V. a subsidiary of CML UK, is an EU Notified Body (No 2776) for European Union Directive 2014/34/EU (ATEX). It is supported by its RvA Accreditation (No C640) to ISO/IEC 17065. CML B.V.’s full scope of ATEX notification can be found on the EU Nando website.

In line with our growth we maintain the right technical mix and number of staff and this has grown from the initial 2 founding directors to 33, including 16 certification engineers and 7 laboratory technicians. A vital part of our growth is played by our large laboratory capacity with highly accurate and high quality equipment.

Our first ATEX and IECEx certificates were issued in September 2013 and April 2014 respectively and we have issued over 2,500 certificates to date.

Eurofins MET Baltimore

Eurofins MET Baltimore has provided diversified testing, certification, and compliance solutions, across the world, for 60 years.

Services:
Eurofins MET Baltimore is the global service leader in product safety approvals and the regulatory certification of electrical products, supporting products to get to market as fast as practicable.

Eurofins MET Baltimore is certified as an NRTL to certify products in over 200 UL Standard categories and can test up to an additional 230+ standards for the U.S. market. For Canada, Eurofins MET Baltimore maintains a wide scope of SCC accreditations and also offers expert third-party testing for almost any product safety standard for the European Union or Asia Pacific.
Our engineering team are locally based and have an in depth knowledge of the compliance market in North America and are highly experienced in both ATEX and IECEx approvals.

CHINA

Eurofins Consumer Product Testing (Hangzhou)

Eurofins Consumer Product Testing Hangzhou provides a variety of different tests supporting the activities of international buyers when they source from China.

The main product categories covered by Eurofins Consumer Product Testing Hangzhou include softlines and leather and other product categories.

Services:

- Testing
- Physical & Mechanical Testing
- Chemical Testing
- Flammability Testing
- Consultancy

Accreditations:

- Large scope under ISO17025
- CNSA/CMA/AQSIQ approval for Chinese Market
- CPSC approval for the US market
- UKAS approval for EU market
- Mutual acceptance with many national certification bodies worldwide

Eurofins Consumer Product Testing (Shanghai)

Eurofins Consumer Product Testing Shanghai provides a variety of different tests supporting the activities of international buyers when they source from China.

The main product categories covered by Eurofins Consumer Product Testing (Shanghai) include softlines and leather and other product categories.

Services:

- Testing
- Physical & Mechanical Testing
- Chemical Testing
- Flammability Testing
- Consultancy

Accreditations:

- Large scope under ISO17025
- CNSA/CMA/AQSIQ approval for Chinese Market
- CPSC approval for the US market
- UKAS approval for EU market
- Mutual acceptance with many national certification bodies worldwide

Eurofins Testing Technology (Shenzhen)

Eurofins Testing Technology Shenzhen provides a variety of different tests supporting the activities of international buyers when they source from China.

Services:

- Chemical Testing:
  - Flame Retardants content in Textile (PBBs, TDBPP, TEPA)
  - AZO Dyes
  - Polycyclic Aromatic Hydrocarbons (PAHs)
  - Pentachlorophenol Content (PCP)
  - Organotin Compounds Content
  - Perfluorooctane Sulfonates (PFOS)
  - Formaldehyde in Textiles (HCHO)
  - Allergenic & Carcinogenic Dispersion Dyes content (ADD & CDD)
  - pH value
  - ASTM F 963 Heavy Metal Testing for Textile Material
  - Inspections

Accreditations:

- CNAS ISO/IEC 17025
- CMA Accreditation
- CPSC approval for the US market
- Mutual acceptance with many national certification bodies worldwide

**GERMANY**

**Eurofins WKS Labservice**

Eurofins WKS Lab service GmbH is a joint-venture between Eurofins and WKSTextile solutions, located in Wilsum, Germany. Eurofins WKS Labservice provides lab testing for the textile and clothing industry, namely testing of fibres, yarns, fabrics, clothing/apparel and similar products. The laboratory is accredited according to DIN EN ISO/IEC 17025. Eurofins WKS Labservice customers benefit from the combined knowledge of the global Eurofins textile laboratory network and the unique and deep textile knowledge of WKSTextile solution, which goes far beyond routine textile testing and includes specialised textile know-how, damage analysis and troubleshooting and repair services on fabrics and ready-made articles.

**Services:**
- Testing
  - Physical Tests
  - Colour Fastness Tests
  - Washing Trials
  - Dimensional Stability to Washing/Ironing
  - Abrasion & Pilling
  - Fibre Composition Tests
  - Strength Tests, Elongation, Elasticity
  - Fit-for-use Tests
  - Standardised Chemical Dry Cleaning
  - Labelling
  - Fabric Inspection (length and defect control on fabrics)
  - Certification Approval

**Accreditations:**
- DAkkS (ISO 17025)
- Members of Industry Associations: German Fashion, DTB, DTV, BSR, DGQ, VDTF

**INDIA**

**Eurofins Product Testing India**

Eurofins is a leading international third-party testing, inspection and certification body and a provider of risk control management solutions. Relying on our internationally authoritative, elite technical team, Eurofins is specialized in localized innovative services, providing expert quality management support for “Make in India” and “Made in India” products.

It is our endeavour to be a Quality Assurance and Quality Control solution provider for the business involved in retail, import and manufacturing of wide variety of consumer products.

**Services:**
- Relevant tests in textile, shoes and fashion complements:
  - Physical Tests: Evaluation of the aspect of the fabrics and garment during the life cycle
  - Pilling Resistance
  - Abrasion Resistance
  - Water Repellence Test
  - Absorption Capacity
  - Tensile Strength
  - Tear Strength
  - Bursting Strength
  - Elasticity and Remaining Deformation
  - Seams Resistance and Slippage
  - Mechanical Test; evaluation of the strength and durability
  - Laundering; evaluation of the behaviour of articles on domestic laundry processes
  - Colour Fastness; evaluation of colour against physical and chemical agents
  - Accessories Testing
  - Flammability; evaluation of fire behaviour on fabrics and garments
  - Inspections

**Accreditations:**
- NABL (ISO 17025)
- CPSC

Sales Office
Spain

Eurofins Textile and Footwear Spain

Eurofins Textile and Footwear Testing Spain is one-of-a-kind testing laboratory focused on a complete range of product categories within the fashion and retail industry testing apparel, children’s wear, footwear, bags, belts, accessories (jewellery, sunglasses, etc.) from raw material stage (chemical products, fabrics, leather, trimmings..) to final product.

Located in Alicante, one of Spain’s most dynamic and diversified industrial areas. Eurofins Textile and Footwear Testing Spain has developed strong competences in different areas of their field of expertise (Mechanical & Chemical Testing, Children Safety etc), with access to an outstanding global network of services in heavily manufacturing countries (China, India, Vietnam and Turkey) and technical support in labelling, compliance and market access.

Eurofins Textile and Footwear Testing Spain has extensive testing experience in Textiles, Footwear, Leather, Bags, Belts & Accessories, Metal & Hardware, Chemicals and Childwear Safety. As a Eurofins competence centre, Eurofins Textile and Footwear Testing Spain provides local expertise in their specific field to the international Eurofins laboratory network, contributing to the Group’s global offering. As such, Eurofins Textile and Footwear Testing Spain is well-positioned to provide a compelling offering to its clients, providing a one-stop, customised and seamless service.

Services:
- Chemical
- Azo Dyes
- Formaldehyde
- Allergenic Disperse Dyes
- Lead & Cadmium Content
- Nickel Release
- Heavy Metals
- Phthalates
- Chromium VI
- Chlorinated Phenols
- Organic Tin Compounds
- Polycyclic Aromatic Hydrocarbons (PAH)
- Alkylphenols / Alkylphenol Ethoxylates (APEO)
- Chlorinated Organic Carriers (COC)
- Others
- Mechanical
- Fibre Content
- Colour Fastness Tests
- Pilling Resistance
- Abrasion Resistance
- Tear Strength
- Tensile Strength
- Flammability
- Seam Slippage
- Dimensional Stability
- Zipper Slide Fasteners
- Flammabilit

Accreditations:
- Nº AB-1356-T for textile and leather materials, issued by the Turkish Accreditation Body (TÜRKAK), according to the ISO/IEC 17025:2012 standard

Turkey

Eurofins Consumer Product Testing Turkey

Eurofins Consumer Product Testing Turkey, located in Mahmutbey, Istanbul, is a one-of-a-kind testing laboratory focused on a complete range of product categories within the fashion and retail industry including; apparel, footwear, toy safety, accessories and the safety of children’s products, from raw material stage to ready-to-wear/use stage.

As is required by law, consumer products must be safe for users. Eurofins has extensive knowledge of the legislation which is required and applicable to various products across many markets.

Eurofins Consumer Product Testing Turkey has the required accreditation to provide technical competence and perform textile, leather, footwear and fashion accessories products testing.

Ministry of Trade Footwear Testing

Eurofins Consumer Product Testing Turkey facilitates Phthalates, Chromium VI and Organic Tin Compound testing on behalf of the Turkish Republic Ministry of Trade according to Communiqué on Import Supervision of Some Consumer Products (Product Safety and Inspection: 2018/18) by the Ministry of Economy General Directorate of Product Safety and Inspection, published in the Official Gazette (Issue 30286 Reps) on 31 December 2017 by the Import Inspections Department.

Services:

KOREA

Eurofins MET Labs Korea

Eurofins MET Laboratories has come to be synonymous with outstanding customer service and an unwavering commitment to excellence in our over 50 years of existence.

Eurofins MET Labs Korea continues that tradition by providing excellent customer oriented service in the Korean market. We understand the importance of time when it comes to exporting your products to the market outside of Korea.

At Eurofins MET Labs Korea, our goal is not to meet our customers’ expectations, it’s to exceed them. We view our customers as our partners and we have succeeded in providing them a place to fill all of their compliance needs. We will continue to strive to make a difference in the testing industry and to Certify the World, One Product at a Time.

Services:
- Product Safety Certification for North America
- NRLT, Canada SCC, and IECEE-CB Scheme and EU-CE
- Field Evaluation service
- SEMI S2, S8, S22 and F47 for evaluation report
- Reliability test Service
- EMC and FCC

Accreditations:
- Nationally Recognized Testing Laboratory (NRTL) – OSHA
- Inspection Body for Product Safety and Certification Body – SCC
- CB Scheme accredited Safety Test Laboratory (CBTL)

Eurofins EAG St Louis
Formerly known as CHEMIR Analytical Services, this 20,000 sq. ft. laboratory was founded in 1959. EAG scientists at this location specialize in investigative analytical chemistry to solve difficult problems, including deformation, plastic testing and coatings testing. They are also experienced with providing litigation support and expert witness services.

The St. Louis laboratory offers scientific solutions to a wide variety of industries, including consumer products, industrial goods, pharmaceuticals, medical devices and basic materials.

Accreditations:
This location is cGMP Compliant, ISO 9001:2008 Registered, FDA Registered and DEA Licensed.

Eurofins EAG Raleigh
Featuring advanced microscopy techniques, our Raleigh, NC laboratory is 9,600 sq. ft. It began in 1989 as Materials Analytical Services (MAS) – Semiconductor and Microelectronics Services Operations and was acquired by EAG in 2006.

This facility serves the semiconductor, aerospace/defense, medical device industries and more.

Services:
• Custom Synthesis
• Surface Analysis
• Materials Characterization
• Composition & Materials ID
• Contaminant Identification
• Trace Elemental Analysis
• Failure Analysis
• Metallurgical Analysis
• Polymer Chemistry

Eurofins EAG Phoenix
This facility specializes in quadrupole Secondary Ion Mass Spectrometry (SIMS) technique.

Services:
• Semiconductors
• Electronics
• Solar/PV
• Lighting & LED
• Data Storage
• Energy Storage & Batteries

Eurofins EAG Minneapolis
Our laboratory in the Minneapolis, MN area (located in Chanhassen) began in 1999 and is over 11,000 sq. ft. in size. The facility offers surface analysis and materials characterization for many industries, including medical devices, semiconductors, aerospace and more.

Services:
• Surface Analysis
• Materials Characterization
• Contaminant Identification
• Custom Synthesis
• Composition & Materials ID
• Trace Elemental Analysis
• Polymer Chemistry
• Deformulation

Eurofins EAG Santa Clara
Our Santa Clara location offers semiconductor and microelectronics services, ATE production test and development, burn in and reliability qualification, ESD testing and latch up testing and PCB design and assembly to support new product development, debug and ongoing production. Custom engineering and turnkey, managed projects are a key part of the integrated support model offered.

Services:
• ATE Test & Engineering
• Burn-in & Reliability
• ESD & Latch-up Testing
• PCB Design & Assembly

Eurofins EAG Princeton
Our Princeton location sits in East Windsor NJ and offers surface analysis and materials characterization services to many industries.

Founded in 1987, this laboratory is 20,000 sq. ft. in size and serves a wide variety of industries including semiconductors, medical devices, aerospace/defense and more.

Services:
• Surface Analysis
• Materials Characterization
• Failure Analysis
• Contaminant Identification
• Custom Synthesis
• Composition & Materials ID
• Trace Elemental Analysis
• Advanced Microscopy
• Deformulation

**Eurofins EAG Los Angeles**

Formerly known as SEAL Laboratories, this location in the Los Angeles (El Segundo) area has been solving challenging projects requiring expertise in materials science, electronics, failure analysis, metallurgical testing, residual gas analysis (RGA), and destructive physical analysis (DPA) since 1972. Scientists and engineers at our Los Angeles and other locations offer years of experience providing litigation support and expert witness services.

We perform failure analysis and product improvement for metal components in the aerospace, transportation, consumer products, construction and medical device industries. Our experts utilize multiple techniques for metallurgical analysis to solve problems as:
• Fractures fracture and failure modes and origins
• Fatigue and other slow crack growth mechanisms
• Brittle and ductile overload failures
• Stress corrosion and hydrogen embrittlement failures
• Corrosion/oxidation problems
• Contamination problems
• Wear failures
• Heat treatment problems
• Design/stress related failures
• Plating problems

Additionally, we have assisted with product design, material selection, product improvement, and quality assurance programs for metal components.

Legal Consulting: Product Liability and Patent Infringement Cases From investigating defective aircraft landing gear to determining cause of airbag failures, our engineers and scientists have been at the forefront of providing scientific expertise, data interpretation and expert testimony for hundreds of legal cases, including:
• Product defect investigations
• Determination of initiating causes of failure
• Product construction analysis and specifications
• Materials and contamination analysis
• Fire investigations
• Manufacturing/quality control issues

The Los Angeles location (formerly SEAL Laboratories) also has specialized services for the electronics and aerospace industries. As experts in Residual Gas Analysis (RGA) of electronics components, we not only provides internal gas and water vapor content in microelectronic components, but also troubleshoots “problem” internal gasses and provide corrective actions. We support MIL-STD-883, Method 1018 and MIL-STD-750, Method 1018. Destructive physical analysis (DPA) is performed on materials used in aerospace, commercial, military, and government applications. As DLA (Defense Logistics Agency) certified for various MIL-STD testing requirements, our DPA capabilities include Fine Leak, Gross Leak, Die Shear, Bond Strength, P.I.N.D. Testing, Radiography, SEM inspection, Microsectioning, and DLA Certified RGA Testing.

**Services:**
• DPA
• RGA
• Metallurgical Analysis
• Consulting & Expert Testimony
• Failure Analysis - Materials
• Materials Characterization
• Surface Analysis

**Eurofins EAG Irvine**

Located in the high tech hub of Irvine, Orange County, CA, this location is 35,000 sq. ft and began in 1995 as Micro Electronics Failure Analysis Services. (MEFAS).

Focused on evaluating microelectronics testing and engineering, our Irvine facility offers failure analysis, electrostatic discharge, or ESD testing and reliability testing and other microelectronic services to support new product development, debug and ongoing improvement.

**Services:**
• Failure Analysis
• Burn-in & Reliability
• ATE Test & Engineering
• ESD & Latch-up Testing
• FIB Circuit Edit & Debug
• Advanced Microscopy
• PCB Design & Assembly

**Eurofins MET Baltimore**

Providing the global marketplace with diversified testing, certification, and compliance solutions for 60 years.

**Services:**
MET is the global service leader for product safety approvals and regulatory certification of electrical products — With facilities, accreditations, and 60 years of experience to get your products approved and to market faster.

We are qualified to NRTL certify products in over 200 UL Standard categories and can test up to an additional 230+ standards for the U.S. market. For Canada, we maintain a wide scope of SCC accreditations and also offer expert third-party testing to almost any product safety standard for the European Union or Asia Pacific.

AGROSCIENCE

SERVICES

With over 25 years of experience in the crop protection industry, Eurofins Agroscience Services offers outstanding technical knowledge and project management skills. Our service offering is continuously developed by knowledge transfer initiatives between the Group’s various centres of expertise across the globe.

By acquiring a carefully selected range of CRO’s, Eurofins Agroscience Services has created a unique portfolio of expertise that provides analytical, regulatory and field support to plant breeders, agrochemical, biopesticide, biocide and fine chemical manufacturers.

AUSTRALIA

Eurofins Agroscience Testing

Eurofins Agroscience Testing is a contract laboratory specialising in the analysis of agrochemicals, veterinary medicines and their residues in crops, animal tissues and environmental samples.

The team at Eurofins Agroscience Testing has experience with the analysis of most developmental agrochemicals and hence is in a position to offer sound advice for the analysis of the same compounds in food and environmental samples.

Services:
• Residue Field studies (GLP)
• Veterinary Drug Residue studies (GLP)
• Method Development and validation
• Pesticide analysis of fruit, vegetables
• Formulation analysis (GLP)
• Storage Stability studies (GLP)
• Physical Parameter Testing (GLP)

Accreditations:
• OECD GLP
• ISO 17025
• APVMA licensed
• AQIS facility

Eurofins Animal Health

We are a leading provider of veterinary research services and technical support to the global animal health industry. We conduct preclinical and clinical studies to GCP and GLP standards, as dictated by the regulatory authorities. Our technical activities involve the conduct of clinical field, pen and laboratory studies to determine the safety and efficacy of new products designed to improve animal health and welfare.

Our company has experience and expertise in veterinary chemicals, pharmaceuticals, veterinary medicines, in planning and conducting of R&D programs, primary screening, individual field, pen and laboratory experiments, and of-out-season field and laboratory testing for northern hemisphere clients. We specialise in the design, management and execution of preclinical and clinical studies in Production and Companion animals.

Accreditations:
• Eurofins Agroscience Australia is GLP recognised by NATA and conducts residue and safety studies to the OECD Principles of Good Laboratory Practice where required by the relevant regulatory bodies.

Clinical efficacy studies are conducted according to the VICH guidelines on Good Clinical Practice (GCP).

All studies are authorised and approved by the SAEC or our internal AEC (Animal Ethics Committee)

Eurofins Agrisearch

Eurofins Agrisearch is part of the Eurofins Agrosciences global network. It has provided services to agrochemical, biopharmaceutical and veterinary health industries since 1970.

There are ten field research facilities spread across all agricultural and climatic zones of Australia. They are located at: Orange, Gosford, and Narrabri in New South Wales; Toowoomba, Bundaberg and Innisfail in Queensland; Shepparton and Horsham in Victoria, Adelaide in South Australia and York in Western Australia.

Core activities include efficacy, safety and residue studies in plants and animals, crop and variety evaluation including GMOs, "off-season" testing and regulatory science consulting.

In late 2013, Eurofins Agrisearch opened a new state-of-the-art PC2 quarantine facility located at Toowoomba. The facility is equipped with the latest environmental monitoring and control features and has a 10,000 plant capacity. The facility mainly caters for corn, cotton, sorghum, sunflower and pulse seeds.

Eurofins Agrisearch is the only CRO in Australia that is able to conduct GLP compliant research for both the field and analytical phases of crop and animal residue studies.

Services:
• Crop and animal efficacy studies
• Variety evaluation including GMOs
• Regulatory science consulting
Residue and safety studies
Pharmacokinetic studies
Soil dissipation/accumulation studies
Worker exposure studies
Field technical services
Project and study management
Processing studies
Glasshouse/quarantine studies
Public/environmental health studies

Accreditations:

- GLP (crops, animals)
- GCP (animals)

Eurofins Agrisearch Shepparton

Services:
From the Shepparton facility we can conduct many different trials including:
- Horticulture efficacy, safety and residue studies (including processing studies)
- Cropping efficacy, safety and residue studies
- Plant variety evaluations for winter and summer crop types
- Work health and safety studies (mixer, loader, applicator)
- Animal health efficacy and safety studies

A variety of equipment is available, comprising of a range of sprayers, seeders and harvesters to simulate most agricultural practices.

Eurofins Agrisearch Horsham

Services:
From the Horsham facility we can conduct a range of trials including:
- Cropping efficacy, safety and residue studies
- Plant variety evaluations for winter crop types
- Agronomy field studies
- Animal health efficacy and safety studies

A variety of equipment is available, comprising of a range of sprayers, seeders and harvesters to simulate most agricultural practices.

Eurofins Agrisearch Adelaide

Services:
Trial work conducted from our Adelaide facility includes:
- Horticulture efficacy, safety and residue studies
- Cropping efficacy, safety and residue studies
- Animal health efficacy studies

Staff within our Adelaide team have specialist training and experience in GLP residue study management, mite taxonomy, entomology, plant pathology and cropping agronomy.

A variety of equipment is available, including small plot seeding and harvesting equipment, and a range of small and large plot sprayers.

Eurofins Agrisearch Toowoomba

Services:
From the Toowoomba facility we can conduct a range of different trials including:
- Winter and summer crops - efficacy, safety and residue studies
- Plant variety evaluation for winter and summer crop types
- Agronomic field studies
- Horticulture efficacy, safety and residue studies
- Animal health efficacy studies
- Post entry quarantine studies with summer crops in a newly built glasshouse
- Work health and safety studies (mixer, loader, applicator)

A variety of equipment is available, including a range of sprayers, precision trial-plot seeders, harvesters and all the equipment necessary to conduct high quality studies that simulate most agricultural practices.

Eurofins Agrisearch Gosford

Services:
From the Gosford facility we can conduct many different trials including:
- Public and environmental health field efficacy studies
- Horticulture efficacy, safety and residue studies

A variety of equipment is available, comprising of a range of sprayers to simulate most agricultural practices, special measurement devices and all equipment necessary to conduct high quality public and environmental health and horticulture studies.

Eurofins Agrisearch
Bundaberg

Services:
From the Bundaberg facility we can conduct many different trials including:
• Efficacy/Bio Equivalence studies
• Palatability studies
• Knockdown/Mortality studies
• Direct spray/Residual control studies
• Attractiveness/Repellency studies
• Bioassays/Insect field resistance studies
• Barrier potential/Vertical soil infiltration rate studies
• Bait preference/weathering potential studies

A variety of equipment is available, comprising of a range of sprayers to simulate most agricultural practices, special measurement devices and all equipment necessary to conduct high quality public and environmental health and horticulture studies.

Eurofins Agrisearch
Launceston

Eurofins Agroscience Services Graz Austria

Eurofins Agroscience Services Austria GmbH was opened in January 2013 with locations in Graz and Gleisdorf. The facilities are based on the border between EPPO Zones Maritime and South East.

Services:
• GLP residue and soil dissipation trials
• Crop Efficacy and Selectivity Testing (GEP)
• Demo trials

Accreditations:
• GLP (EAS Germany)
• GEP

BRAZIL

Eurofins Agroscience Services LATAM

Eurofins Agroscience Services LATAM is part of the Eurofins Agroscience Services global network, performing field and laboratory studies to support the screening, development and registration of agrochemicals, biopesticides, professional products and new plant varieties.

The site was established in 2008 and is based in Indaiatuba/SP, near important airports and easy access to agricultural areas. Full “in house” GLP field and laboratory studies can be provided.
Experience in conducting studies in Brazil, Chile, Peru, Costa Rica, Guatemala, Ecuador and Mexico, and able to work in any LATAM country.

Services:
• Open and semi field ecotox studies
• Feeding studies
• Extended Laboratory studies
• Efficacy studies
• Soil dissipation studies
• Processing studies
• Residue studies
• Rotational Crops
• Pollinator Studies
• Analysis of Pesticide Residues
• Analytical method development and validation
• Sample homogenisation
• Study Management
• General Consulting
• Logistic

Accreditations:
• GLP

BULGARIA

Eurofins Agroscience Services Bulgaria

Eurofins Agroscience Services EOOD in Bulgaria forms part of the Eurofins Agroscience Services global network, providing field and analytical studies to support the screening, development and registration of agrochemicals in Bulgaria.

For more details on the service portfolio, please see Group description under Eurofins Agroscience Services in the UK and Germany.

We currently have three facilities in Bulgaria

Services:
• Efficacy of pesticides (GEP) crops
• Permanent crops
• Field crops
• Vegetable crops
• Greenhouse crops
• Selectivity safety cultures
• Residue of pesticides (GLP)

Accreditations:
• GEP
• GLP

FRANCE

Eurofins Agroscience Services France

There are ten facilities in France, spread across many of the regions. For more details on the service portfolio, please see Group description.

Services:
• Crop Efficacy Testing (GEP)
• Crop Residue studies (GLP)
• Ecotox studies
• GM studies
• Large Plot Efficacy
• PGW (Prospective Groundwater studies)
• Pollen and Nectar samplings
• Phytoxicity studies
• Processing studies
• Soil Dissipation and Accumulation studies
• Study Management
• Worker (Operator) Exposure
• Regulatory Affairs

Accreditations:
• GLP
• GEP

Eurofins Agroscience Services Seeds France

There are ten facilities in France, spread across many of the regions. For more details on the service portfolio, please see Group description.

Services:
Site dedicated to seeds operations: Hybrids trials, Pollinating nurseries, pathology nurseries, seeds productions, Sweet corn trials.

Eurofins Agroscience Services Normandy

PHYLIAE is a service company specialising in GEP experimentation and the management of research and development projects in the sector of plant protection.

Established since 2008, PHYLIAE offers GEP biological tests for a wide range of crops and prides itself on exceptional project management skills.

Services:
• Crop Efficacy Testing (GEP)
• Large Plot Efficacy
• Phytoxicity studies
• Processing studies
• Study Management

Accreditations:
• GEP
Eurofins Agroscience Services Sene

There are ten facilities in France, spread across many of the regions. For more details on the service portfolio, please see Group description.

Services:

• Crop Efficacy Testing (GEP)
• Large Plot Efficacy
• Phytoxicity studies
• Processing studies

Accreditations:

• GEP

Eurofins Agroscience Services Benfeld

There are ten facilities in France, spread across many of the regions. For more details on the service portfolio, please see Group description.

Services:

• Crop Efficacy Testing (GEP)
• Large Plot Efficacy
• Phytoxicity studies
• Processing studies
• Study Management

Accreditations:

• GEP

Eurofins Agroscience Services Gennes

There are ten facilities in France, spread across many of the regions. For more details on the service portfolio, please see Group description.

Services:

• Crop Efficacy Testing (GEP)
• Large Plot Efficacy
• Phytoxicity studies
• Processing studies
• Study Management

Accreditations:

• GEP

Eurofins Agroscience Services Rouvres St Jean

There are ten facilities in France, spread across many of the regions. For more details on the service portfolio, please see Group description.

Services:

• Crop Efficacy Testing (GEP)
• Crop Residue studies (GLP)
• Large Plot Efficacy
• Processing studies
• Soil Dissipation and Accumulation studies
• Study Management

Accreditations:

• GLP
• GEP

Eurofins Agroscience Services Uchizy

There are ten facilities in France, spread across many of the regions. For more details on the service portfolio, please see Group description.

Services:

• Crop Efficacy Testing (GEP)
• Large Plot Efficacy
• Phytoxicity studies
• Processing studies

Accreditations:

• GEP

Eurofins Agroscience Services Orange

There are ten facilities in France, spread across many of the regions. For more details on the service portfolio, please see Group description.

Services:

• Crop Efficacy Testing (GEP)
• Large Plot Efficacy
• Phytoxicity studies
• Processing studies

Accreditations:
• GEP

Eurofins Agroscience Services Chem SAS is part of the Eurofins Agroscience Services global network and has provided services to biopharmaceutical and agro-chemical companies since 1987.

The laboratory is compliant with GLP and GEP. Highly trained staff and industry experts allow Eurofins Agroscience Services Chem SAS to offer quality, flexibility and reliability.

Services:
• Metabolism studies with radio labelled molecules (14C or 3H)
• Residue studies
• Analytical support for Ecotox and E-fate studies
• Analytical method development and validation
• Operator exposure studies
• Skin permeation studies with radio labelled (14C or 3H) or non-radio labelled preparation

Accreditations:
• GLP
• GEP

Eurofins Agroscience Services Bernau

Services:
• Field trials of crop protection compounds for efficacy, selectivity, vigor and residual activity (GEP)
• Field part of residue studies (OECD GLP)
• Soil dissipation studies
• Project Management

Eurofins Agroscience Services Detmold

Services: Eurofins Agroscience Services in Detmold is specialised in efficacy trials covering herbicide, fungicide, insecticide, crop safety and seed treatment trials.

Eurofins Agroscience Services Gross Schenkenberg

Eurofins Agroscience Services Groß Schenkenberg was established in 2012. The field station is based in Groß Schenkenberg near Lübeck in the South West of Schleswig Holstein, the most Northern German federal state, with access to Western Mecklenburg-Vorpommern.
**Eurofins Agroscience Services Markgröningen**

**Services:**
- Crop Residue Studies (GLP)
- Crop Efficacy Testing (GEP)
- Equipment for seeding and harvesting
- Greenhouse Studies
- Soil Dissipation Studies
- Ground Water Monitoring Studies

**Eurofins Agroscience Services Osnabrück**

**Services:**

Eurofins Agroscience Services in Osnabrück is specialised in efficacy trials including crop safety, herbicide, insecticide and fungicide trials.

The station is supported by the facility in Stade for residue trials, ecotox studies, groundwater monitoring, rotational crop and soil dissipation studies, which are often conducted in the Netherlands.

**Eurofins Agroscience Services Wiesloch**

**Services:**
- Crop Residue Studies (GLP)
- Crop Efficacy Testing (GEP)
- Greenhouse Studies (four own foliage tunnels are available)
- Soil Dissipation Studies
- Project Management

**Eurofins Agroscience Services Zwickingau**

**Services:**

The field station in Neukirchen / Zwickau focuses on efficacy studies under GEP

**Eurofins Agroscience Services Dresden**

**Accreditations:**
- GLP

**Eurofins Agroscience Services Ecotox**

Eurofins Agroscience Services Ecotox GmbH is part of the Eurofins Agroscience Services global network, providing laboratory and field ecotoxicological studies to support the worldwide development, registration and stewardship of test substances.

The company offers all ecotoxicological studies and scientific services required for the registration of agrochemicals, chemicals, biocides, cosmetic and veterinary/human medicinal products globally. All studies are performed in compliance with GLP certified by the respective national authorities.

**Services:**
- Non-Target Arthropods, Honeybees, Bumble Bees, Solitary Bees, Non-Target Plant, Earthworms and Soil Organisms, Aquatic-Toxicology and microbiological testing
- Standard laboratory to field testing with NTA and soil organisms
- Aged residue and semi-field NTA studies
- Residue studies with several bee and bird food matrices
- Honeybees, bumble bees and solitary bees lab, brood, tunnel and field studies
- Predatory mite field studies
- Full fauna NTA and soil organism in-field and off-crop studies
- Earthworm and soil organism lab and field studies
- Algae & aquatic macrophytes
- Aquatic Invertebrates (Daphnia and Chironomus)
- Aquatic vertebrates: fish acute (5 species) as well as early life stage, juvenile growth and bioaccumulation studies
- Biodegradation
- Micro-cosm (indoor) and mesocosm (outdoor in cooperation with a partner) studies
- Lumbriculus testing
- Microbiological testing
Eurofins Agroscience Services EcoChem

Eurofins Agroscience Services EcoChem GmbH is part of the Eurofins Agroscience Services global network, providing analytical studies to support the screening, development and registration of test substances in Europe, the US and beyond according to international guidelines.

The company offers all analytical studies and scientific services required for the registration of agrochemicals, chemicals, biocides and veterinary/human medicinal products globally. Every study is performed in compliance with GLP certified by the national authorities.

Services:
- Physico-Chemistry:
  - Determination of physico-chemical properties of Active Substances and Formulations
  - Storage Stability studies
  - 5-batch studies, Change Control Analytics
  - Inorganic Analysis by ICP-MS

Residue Analytics:
- EFate Residue Analysis for field studies in soil, water and groundwater
- Crop Residue Analysis, multi-residue and analyte specific
- Method development and validation, including ILV
- Analytical exposure analysis for all ecotoxicological studies in laboratory and field

Environmental Fate & Metabolism:
- 14C / environmental fate and metabolism studies in water, soil, air
- Metabolism studies in plants and animals
- Leaching, persistence, accumulation in soil and water
- Bioaccumulation studies

Accreditations:
- GLP

Eurofins Agroscience Services Chem

Eurofins Agroscience Services Chem GmbH provides comprehensive analytical support for crop residue studies, soil studies and bee-related matrices.

The laboratory performs method validations for crop matrices, animal tissues, soil and water, as well as residue storage stability studies. It has special expertise in multi-residue methods such as DFG S19 or QuEChERS and in diithiocarbamate analysis using method DFG S15.

Eurofins BioPharma Product Testing Munich

Eurofins BioPharma Product Testing Munich GmbH is an internationally operating testing laboratory offering comprehensive capabilities in safety testing.

With more than 30 years of experience, our team of scientists offers a broad scope of biological studies, which meet the international regulatory requirements of human safety testing for plant protection products and biocides.

Besides the standard toxicology testing battery, we offer additional studies and individual advice concerning your specific project with regard to scientific and regulatory requirements. These customized test designs help to address specific safety concerns (e.g. Mode of Action studies).

Eurofins EAG Laboratories – Ulm, Germany

Our Ulm location is a full service analytical laboratory focusing primarily on pesticide, pharmaceutical, biocide and chemical registration studies (OECD, EPA, REACH, etc.) performed under GLP. Newly relocated and expanded (2,800 sqm or 30,000 sq. ft), we are conveniently located near the A8 Autobahn, midway between Munich and Stuttgart.

Founded in 1992 as PTRL Europe, the laboratory became a part of EAG in 2012. Recognized as the premier provider of residue chemistry and non-radiolabeled fate and metabolism studies within the European Market, the Ulm, Germany laboratory has been delivering first-in-class service for over 25 years. More recently, the Ulm laboratory has become a key supplier for target compound and
multiple residue analysis of pesticides in pollinators and testing of biocides.

Services:

• Residue chemistry
• Environmental fate
• Metabolism studies
• Product chemistry
• Pollinator testing

HUNGARY

Eurofins Agroscience Services Hungary

Eurofins Agroscience Services Kft. in Hungary is part of the Eurofins Agroscience Services global network and offers residue, environmental and efficacy field trials for agrochemicals and soil sampling for control of fertilisation status in Hungary and Romania.

Services:
- Crop Residue studies (GLP)
- Crop Efficacy Testing (GEP)
- Selectivity Trials
- Soil Dissipation and Accumulation studies
- Groundwater studies
- Ecotoxicology studies
- Soil sampling services
- Soil sampling services and fertiliser use recommendation services
- Sowling conservation services
- Soil mapping and GIS services

INDIA

Eurofins Agroscience Services India

The site was established in Q1 2014 and is based near Coimbatore in Tamil Nadu State. From here, a wide range of crops are available including plantation crops like tea, coffee, cardamom.

Services:
- Field trials for bio-efficacy, selectivity, vigour and residual activity
- Soil Dissipation
- Resistance Monitoring
- Residue studies
- Ecotoxicology studies
- Green House / Pot culture studies
- Insecticide Resistance Monitoring / Management
- Mass rearing of insects viz., Helicoverpa / Spodoptera /DBM / BPH for R-Monitoring

Accreditations:
GLP
AAALAC

Eurofins Advinus

Eurofins Advinus is one of India’s leading Contract Research Organizations. We support the development and testing of all varieties of insecticides, pesticides, herbicides, fungicides, industrial chemicals and other specialty chemicals for global registration. We have 25+ years of proven track record in offering agrochemical development services to our clients worldwide.

Services:
The range of services include conducting physico-chemical studies, 5 batch analysis, e-fate studies, safety assessment, ecotoxicology, field trials, residue/ persistence studies, plant/animal metabolism studies and process development/optimization and scale up of active ingredients.

We also provide REACH compliance testing services.

**ITALY**

**Eurofins Agroscience Services Italy**

Eurofins Agroscience Services Srl in Italy is part of the Eurofins Agroscience Services global network, providing field, post-harvest and analytical studies to support the screening, development and registration of agrochemicals in Italy.

In total, there are three facilities in Italy, including the headquarters in San Giorgio di Piano (Bologna) Fondi (Latina) and Catania (Sicily).

**Services:**
- Crop Residue Studies (GLP)
- Crop Efficacy Testing (GEP)
- Fruit Post Harvest
- Soil dissipation and Accumulation Study
- Selectivity Study
- Ecotox Study
- Herbicide Study
- Biostimulants
- Demo Trial

**Accreditations:**

**Eurofins Agroscience Services Catania**

The south of Italy is well known for its cropping capabilities. Due to Sicily’s particular climatic conditions, the island is able to produce a wide range of crops such as citrus, vineyards, olives, vegetables and cereals.

The Catania base was inaugurated in 2011 with the aim of exploiting good weather almost all year round. This extended season allows increased trial periods, thus allowing more data availability and the opportunity to offer out of season trials to clients.

**MOROCCO**

Eurofins Agroscience Services Maroc

**Services:**
Services offered from our Moroccan facility include Screening, Demonstration and Registration trials. These are conducted with insecticides, fungicides, herbicides and nematicides and as root, foliar, fruit or soil treatments.

Specialist fertiliser services are also offered; effect on germination, vigor of growth, photosynthesis, yield, fruit quality, protein quality and more.

**NEW ZEALAND**

Eurofins Agroscience Services NZ

Eurofins Agroscience Services NZ is a contract research organisation that offers a range of scientific research and development, consulting and testing services in agriculture and horticulture.

The main facility is located at Hastings, in the southeast of the North Island, but there is the ability to conduct field research throughout New Zealand.

Core activities include efficacy, safety and residue studies in plants, crop and variety evaluation, "off-season" testing and regulatory science consulting.

Eurofins Agroscience Services NZ is the only CRO in New Zealand that is able to conduct GLP compliant research for the field and analytical phases of crop residue studies.

PORTUGAL

Eurofins Agroscience Services Portugal

The facility at Moncao was established in 2004. Initially offering field trials, mainly GEP trials, the facility now has extensive and broad experience in field studies such as efficacy, residue, ecotoxicology, soil dissipation and ground water monitoring.

Services:
• Crop Residue studies (GLP)
• Crop Efficacy Testing (GEP)
• Ecotox Trials - earth worms
• Downy mildew and late blight trials
• Soil dissipation studies
• Ground water studies
• OPEX studies
• Post harvest studies
• Study Management

Accreditations:
• GEP
• GLP

### SPAIN

#### Eurofins Agroscience Services Zaragoza

Our offices are easily accessible and feature an equipment store, contamination free room, freezer, the chemical store and weighing room. On the first floor, there are offices for the staff, a meeting room and storage area for office supplies, dedicated field equipment, processing area and GM and non GM seeds storage area.

**Services:**  
- Operator Exposure Studies  
- GMO Studies  
- Project Management  
- Ecotox studies  
- GEP and GLP in greenhouse or field conditions  
- Ground water monitoring studies  
- Soil dissipation studies  
- Study management  

**Accreditations:**  
- GEP  
- GLP

#### Eurofins Agroscience Services Seville

The facility was set up in 1996 with two staff who mainly carried out GLP trials. The site was officially recognised by the Spanish Ministry of Agriculture for efficacy trials in 1997 and in 1998 was fully accredited for GLP trials by ENAC. In July 2014, the facility moved to the new site which saw increased capacity and improved our service offering. The facility is located in Camas which is in the farming heartland of Seville, Spain and also has easy access to most of the public transportation such as railway station and airport.

**Services:**  
- Operator Exposure Studies  
- GMO Studies  
- Project Management  
- Ecotox studies  
- GEP and GLP in greenhouse or field conditions  
- Ground water monitoring studies  
- Soil dissipation studies  
- Study management  

**Accreditations:**  
- GEP  
- GLP

#### Eurofins Agroscience Services Valencia

The base was opened in 1996 with three people. The site was officially recognised by the Spanish Ministry of Agriculture for efficacy trials in 1997 and in 1998 was fully accredited for GLP trials by ENAC. In April 2018, the facility moved to the new site increasing capacity and resources to our service offering. The facility is located in Beneixida which is strategy located to cover a broad range of crops including cereals, citrus, vegetable crops (indoor and outdoor), grape (table and wine) and some others.

**Services:**  
- Efficacy trials, open field and greenhouse conditions.  
- Biostimulants trials, open field and greenhouse condition.  
- Dumping-off trials in control conditions.  
- Residue trials, open field and greenhouse conditions.  
- OPEX trials.  
- Groundwater monitoring studies  
- Soil dissipation studies  
- Study Management  
- Post-Harvest efficacy and residue trials  
- Dust drift residue trials

**Accreditations:**  
- GEP  
- GLP

#### Eurofins Agroscience Services Regulatory Spain SL

In a dynamic and complex regulatory environment, our priority is to support clients through every stage of their registration requirements.EAR is supported by a global network of field stations, laboratories and carefully selected partners. We are committed
to advising on the best registration strategies and to compile registration documentation in line with current and upcoming regulatory guidelines.

EAR is constantly expanding its capacity and capabilities across the globe. With extensive experience in the various regulatory arenas, the team have worked under a range of partnership models over many years of active operation.

EAR are able to provide support in the following industries:
• Crop Protection
• Biocides (including microbials)
• Environmental Risk Assessment (pharmaceutical and veterinary medicine)

Services:
Regulatory consultancy for agrochemicals, biological and biocides

• GLP

De Bredelaar

De Bredelaar was founded in 1988 and is an independent research institute specialised in crop protection in agriculture and horticulture. Areas of expertise include efficacy, phytotoxicity and residue studies in various crops along with demonstration trials. De Bredelaar is both GEP and GLP certified.

Field trials are carried out either on-site (fields and glasshouses) or at nurseries and arable farms throughout the Netherlands.

Services:
• Efficacy & Crop safety research
• Residue & Exposure studies
• Demonstration & Platform trials
• Tuber- and seed treatment trial

Accreditations:
• GEP

UNITED KINGDOM

Eurofins Agroscience Services UK

Eurofins Agroscience Services in the UK forms part of the Eurofins Agroscience Services global network.

There are six strategically based field locations in the UK offering full geographical coverage and a state of the art analytical laboratory in Derbyshire.

EAS has the following field locations in the UK:
• Headquarters in Wilson, Derbyshire
• Beverley, East Yorkshire
• Downham Market, Norfolk
• Colchester, Essex
• Mawdesley, Lancashire
• Willand, Devon

Services:
• Laboratory, grow room, glasshouse and field screening
• Crop Efficacy studies (GEP)
• Biological Assessment Dossiers
• Project and Study management
• Crop Residue studies (GLP)
• Full analytical services for analysis of residues in crops, water, soil, and air and other matrices
• Analytical method development
• Independent Laboratory Validations
• Import tolerance studies
• Baseline resistance monitoring
• Insect and pathogen cultures
• Effects of pesticides on rotational and replacement crops
• Soil dissipation/accumulation
• OECD 208 studies
• Varietal evaluation
• ELISA [protein expression & viral quantification]
• Real time PCR
• Nematode laboratory
• Evaluation of the rainfastness and wash-off of products
• Exposure studies including operator, worker re-entry, and dislodgeable foliar residues
• Ecotoxicology field studies
• Independent Laboratory Validations

Accreditations:
• GEP
• GLP

Eurofins Agroscience Services Prospect Hill Research Facility

The Prospect Hill Research facility consists of offices and laboratories. It is the primary location for honey bee, non-target organism lab studies, urban entomology research and new formulations/products development.

Services:
- EU and EPA import tolerance studies
- Quantification of dislodgeable foliar residues
- Baseline resistance monitoring
- Effects of pesticides on rotational and replacement crops
- Quantification of dissipation/accumulation of pesticides in soil
- Evaluation of the rain fastness of products
- Ecotoxicology studies
- Independent Laboratory Validations
- Study management

Accreditations:
- GLP
- GEP

Eurofins Agroscience Services Jeffersonville Research Facility

The Georgia research station located in Jeffersonville has soils typical of the southern growing region. The station is located in the EPA growing region 2. The Georgia research station is located in Twiggs County and is close to the geographic center of the state of Georgia. We conduct work with all major southern crops and turf.

Services:
- GLP/Residue Studies
- Efficacy studies
- Environmental Fate Studies
- C14 Studies- field and greenhouse
- GMO studies
- Pollinator studies
- DFR Studies
- Worker Exposure Studies
- TTR Studies

Accreditations:
- GLP

Eurofins Agroscience Services Sanger Research Facility

The Sanger research station located in Sanger, CA has soils typical of the Central Valley in California. Only 8 miles East of Fresno, it conducts work with all major California crops.

Services:
- GLP/Residue Studies
- Efficacy studies
- Environmental Fate Studies
- GMO studies
- Pollinator studies
- DFR Studies
- Worker Exposure Studies

Accreditations:
- GLP
Eurofins Genomics offers a wide array of products and services for the agroscience industry. We work with many companies in this industry for plant and seed related applications. Related products and services include DNA / RNA synthesis, Synthetic Biology, Next Generation Sequencing, Genotyping, Gene Expression, Microarrays, and bioinformatics for academic and industrial research.

We offer competitive prices, one of the fastest turnaround times for sequencing in the country, and the lowest error rate in the industry for oligonucleotides.

Services:
- DNA / RNA Oligonucleotides with a variety of options, purifications and modifications available.
- DNA Sequencing in tubes, plates and kits.
- Gene Synthesis & Synthetic Biology
- Gene Fragments
- Next Generation Sequencing
- qPCR and MGB-eclipse probes
- Applied Genetics: Genotyping, Gene Expression & Microarrays

Accreditations:
- CLIA accredited
- CAP accredited
- ISO 9001:2008
- ISO 13485:2003
- FDA 3009882691 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD product

Eurofins EAG Hercules
Formerly known as PTRL West, this San Francisco Bay area laboratory features studies to meet regulatory requirements in the areas of environmental fate, metabolism, and analysis of agrochemicals, industrial chemicals and pharmaceuticals. Our Hercules, CA 19,000 sq. ft. facility was built in 1987.

Services:
- Environmental Fate
- Plant & Animal Metabolism
- Residue Chemistry
- MD & MV
- Product Chemistry
- Aquatic Toxicology
- Terrestrial Toxicology
- Avian Toxicology
- Pollinator Testing
- Field Management

Eurofins EAG Gainsville
Our newest laboratory offers pollinator testing capabilities, featuring honeybee hives and bumble bee colonies, with ample capacity for culturing quality larval stock. Located in Florida, this optimal latitude allows almost year round pollinator testing. Capabilities at this site include all five core studies required by the EPA, with developing capabilities to work with native species.
from either St. Louis, MO or Kansas City, MO. Founded in 1968, these laboratories employ over 400 scientists serving the agrochemical, crop biotechnology, pharmaceutical, biopharmaceutical and medical device industries.

Since 1968, our Columbia location has been delivering analytical expertise in support of product development. Through development know-how, cross-disciplinary technical expertise, and applied experience with multiple regulatory frameworks, we deliver a broad array of GLP and cGMP-compliant product development and analytical testing services to the pharmaceutical, biotech, animal health, crop protection, consumer products and chemical industries. This cross-industry, cross-regulatory experience adds value to the process of product development—and will become increasingly important as public scrutiny and global regulations converge on the interrelationships between human, animal and environmental health.

Our mission is to become a trusted extension of our client’s product development teams, helping them meet the global demand for safer, more effective products. Our approach to doing business promotes relationships beyond a simple transaction. It facilitates collaboration, promotes quality, makes better use of resources, and helps us develop the right talent and resources when and where our clients need them. This, in turn, improves decision-making, expedites development and reduces risk.

Services:

- Analytical MD & MV
- Stability & QC Release
- Functional Assays
- Animal Metabolism
- Impurities Analysis
- Extractables & Leachables
- Biopharma Analysis
- Biopharma Characterization
- Reference Standard Management
- Reverse Engineering
- Custom Synthesis & GMP Radiolabeling
- Protein Expression Analysis
- Nutritional Equivalency
- Assays & Bioassays
- Plant Metabolism
- Residue Analysis
- Allergenicity Profiling
- Crop MD & MV
REACH SERVICES

Eurofins is a global service provider to the chemical industry, offering a comprehensive range of testing and consulting services for REACH and its worldwide relatives.

Eurofins REACH Services covers the full testing portfolio according to Annex VII-X of the REACH directive, as required for the registration of chemicals within the EU. All studies are performed in compliance with GLP for which we have a certificate since many years. In addition, our experienced regulatory team provides support for all steps of the regulatory and registration process. This includes both phase-in and non-phase-in substances.

For clients dealing with articles or finished goods, the following services can be provided from Eurofins Consumer Product Testing Division (Check section "Consumer Products Testing" in this directory):

- BOM/BOS Chemical Assessment (HENZ System): our laboratories can help to manage and monitor your supply chain by helping to collect BOM (Bill of Materials) and BOS (Bill of Substances) from your suppliers. This information is essential in the process of controlling the occurrence of any SVHC or other chemical restricted substance through your supply chain. Based on collected BOM/BOS information, our Chemical Assessment Service (HENZ System) can help to assess your product and evaluate the likelihood of containing any SVHC or any restricted chemical in any of the components of the product, hence, helping companies to optimize testing efforts and quality budgets by creating targeted testing plans focusing on those specific components that would have been evaluated as risk materials during the assessment.
- SVHC and Restricted Substances Testing: Either in conjunction with the Chemical assessment service (for targeted testing programs after assessment) or independently, Eurofins offers a wide range of analytical tests to screen for candidate list substances (SVHC) and to cover specific restricted substances under REACH Annex XVII.

General contact for services regarding REACH in articles: product-testing_reach@eurofins.com

Services:
- Physico-chemical properties
- Toxicology
  - Skin and eye irritation/corrosion
  - Sensitisation
  - Genotoxicity
  - Acute and repeated dose toxicity
  - Reproductive and developmental toxicity (DART)
  - Carcinogenicity
  - Toxicokinetic behaviour
- Ecotoxicology
  - Aquatic toxicology
  - Terrestrial toxicology
  - Environmental fate/Biodegradability
- Analytical services
  - Product testing for SVHC’s
- Consulting services
  - Advice on registration and testing
  - Waiving strategies
  - Literature searches, data evaluation and data gap analysis
  - Technical dossier preparation & submission in IUCLID 5
  - Member dossier preparation
  - Risk assessments, Chemical Safety Reports (CSR), Higher tier assessments
  - Post submission support

Accreditations:
- GLP
- AAALAC (Partner Laboratory)

GermANY

Eurofins REACH Services

Eurofins supports clients with the registration of their chemical substances under REACH by offering the full testing portfolio, required acc. to Annex VII-X of the REACH regulation.

Services:
- Toxicology
- Ecotoxicology
- Physical Chemistry
- Analytics
- SVHC testing

Accreditations:
- GLP
- AAALAC

INDIA

Eurofins Advinus

Eurofins Advinus is prepared to meet all the physiochemical, toxicity and environmental fate testing needs with highest quality and in a cost effective manner.

Services:
Physical-Chemical Properties, Toxicology Studies and Ecotoxicology studies.

Accreditations:
Our labs are GLP and AAALAC certified.

INDIA

Eurofins IT Solutions India

Eurofins IT Solutions India (EITSI) is a full owned subsidiary of Eurofins Scientific Services. This Global Delivery Centre (EITSI) was established in 2012 at Bangalore, India to be the largest IT Solutions group within Eurofins and exclusively cater to Eurofins Global IT business needs.

The main focus for EITSI is to create and provide world-class, high-quality IT Solutions and Services with a special focus on next generation Laboratory Information Management System (LIMS) in addition to creating and delivering various internal applications and IT products for the Eurofins Group.

Accreditations:
• CMMI Level 3 Certified – By CMMI Institute
• Great Place to Work 2019
• Certified by GPTW Institute
