

# Virtual Training

November 2020

ENROL

10 Nov 2020 10:00am (CET)

## Environmental Management System (EMS) and overview of environmental laws in textiles production countries

This two-hour virtual training course on Environmental Management System (EMS) will help you understand the importance of EMS and provide fundamental understanding of environmental laws in key textiles production countries. A robust EMS is a key driver toward success of a business' environmental policy. To implement EMS efficiently and purposely, engagement from top management, clear roles and responsibilities plan, as well as resources allocation plan are just some of the consideration required. Together with environmental law knowledge, the course will support you in enhancing your environmental policy through proper EMS implementation.

### Training scope

1. Introduction to the international standard for the Environmental Management System (ISO 14001)
2. Environmental Management System key points in terms of leadership & roles, planning, operational controls and monitoring
3. Environmental laws and regulations in key textiles production countries

## 10 key points for a robust Wastewater & Effluent Treatment Plant management

This two-hour virtual training course on Wastewater and Effluent Treatment Plant (ETP) management will help you understand common wastewater & ETP management challenges faced by the factories. With 10 well-structured key points, the course will also help you to assess and improve the current wastewater and ETP management practice at the factory effectively.

### Training scope

1. Introduction about common wastewater & ETP management problems faced by the factories
2. Presentation of Eurofins 10 key points checklist for wastewater and ETP management

## What is included in the virtual training?

Participants will benefit from a 2-hour virtual lesson and live QA with an experienced Eurofins trainer. After the training, you will have the opportunity to work on a personalized assignment where you will be able to apply the acquired knowledge directly to your work environment. Then, you will be awarded a digital completion certification of participation. All training materials from the course can also be downloaded.

## Why learn with us?

- Our trainers possess significant field experience and an academic background in all chemical and environmental aspects of business
- Small-size virtual classes guarantee engagement opportunities and QA
- Online networking opportunities with peers and relevant practitioners
- Direct application of learning through practical assignments and personalized feedbacks
- Optimised virtual learning schedule to meet demands of hectic schedules and enable more effective learning
- Unlimited access to training materials, recordings and examination material for participants

## Who should attend the training?

- Management of textile factories, suppliers, vendors, brands or retailers
- Compliance/ CSR/ EHS/ Chemical In-charge in organisations in the textiles and footwear industry
- Students of fashion or design
- Anyone interested in gaining insights in this area

## What is the course fee?

The course fee is 140 usd per person.

## How does the virtual training work?

## See what other participant has said about our training!

*"The course on "Responsible buying practices" was great for me to get fundamental knowledge and understanding to better communicate with factories and the internal buying department. Apart from practical tips, the training also inspired me to work on a more collaborative and mutual way with my suppliers. The two hours were well spent on an interactive session with a knowledgeable trainer!"*
