

## Contributing to circular economy

**SCIP is the database for information on Substances of Concern In articles as such or in complex objects (Products) established under the Waste Framework Directive (WFD). SCIP notification comes into force on January 5, 2021**

Companies supplying articles on the EU market, containing **substances of very high concern (SVHCs)** included in the REACH candidate list, in concentrations over 0.1% weight by weight (w/w), will have to submit information on these articles to ECHA, as from 5 January 2021.

### How can Eurofins support SCIP?

From dossier preparation all the way down to submission and reporting, our expert teams provide you with full assessment at every stage of the process, saving you from the heavy workload in a cost-effective way.

### Automated SCIP submission

Eurofins, in partnership with CIRS, have upgraded the REACH compliance and chemical assessment service tool, now renamed to Green Product Management (GPM), by including a System-to-System (S2S) functionality for automated submission for SCIP notification.

Our tool previews future new SVHC additions to the list, on top of its standard functionalities, such as: supply chain survey, automated verification, risk assessment for new SVHCs, bulk notification and more.

### 5 good reasons to partnership with Eurofins, for SCIP submission

- International State-of-the-art laboratory network with product and regulatory experts in 40+ countries
- Over 10 years experience with ECHA submission
- Thousands of REACH and SVHC testing, assessments and report verifications, over the years
- Pioneers in the industry: Completed the first SCIP domestic automatic notification in June 2020
- Frequent on-line trainings to suppliers (standard or bespoke)
