

# A complete service at the highest quality standards

Eurofins stands for a conception of clinical diagnostics entirely focused on excellence, innovation and technological investment. Eurofins clinical diagnostics offers testing services in all medical specialties, from routine testing to esoteric testing including genetic testing.

Genetics and genomics are gradually marking out the new outlines of tomorrow's clinical diagnostics and our labs are investing heavily in advanced genetic technologies. Eurofins Clinical Diagnostics has a broad portfolio of genetic tests with well-known applications such as Non Invasive Prenatal Testing (NIPT), the prediction of hereditary cancers, cardiovascular disease predisposition, rare diseases diagnosis, and personalized medicine applications that can offer patients individualized treatment based on their genetic and metabolic profiles.

# Eurofins Clinical Diagnostics at the heart of the healthcare system

As a central element in healthcare, clinical diagnostics contributes to every stage of patient care: predisposition, prevention, diagnosis, treatment monitoring and prognosis.

With hundreds of thousands of clinical diagnostics tests performed every day, the laboratories of the clinical diagnostics division strive to ensure that every patient, wherever he or she lives, has access to the most specialized and most innovative techniques for diagnosis, monitoring and therapeutic adjustment. Our logistics expertise and our daily sample collection and delivery network, guarantee perfect continuity in the provision of care while ensuring the same standard of quality and access to innovation across all the regions we serve.

## Bringing efficiency to referral testing services

Our laboratories respond to the need to control health spending. We bring efficiency to referral testing services while reducing costs and improving quality.

### Maximal efficiency

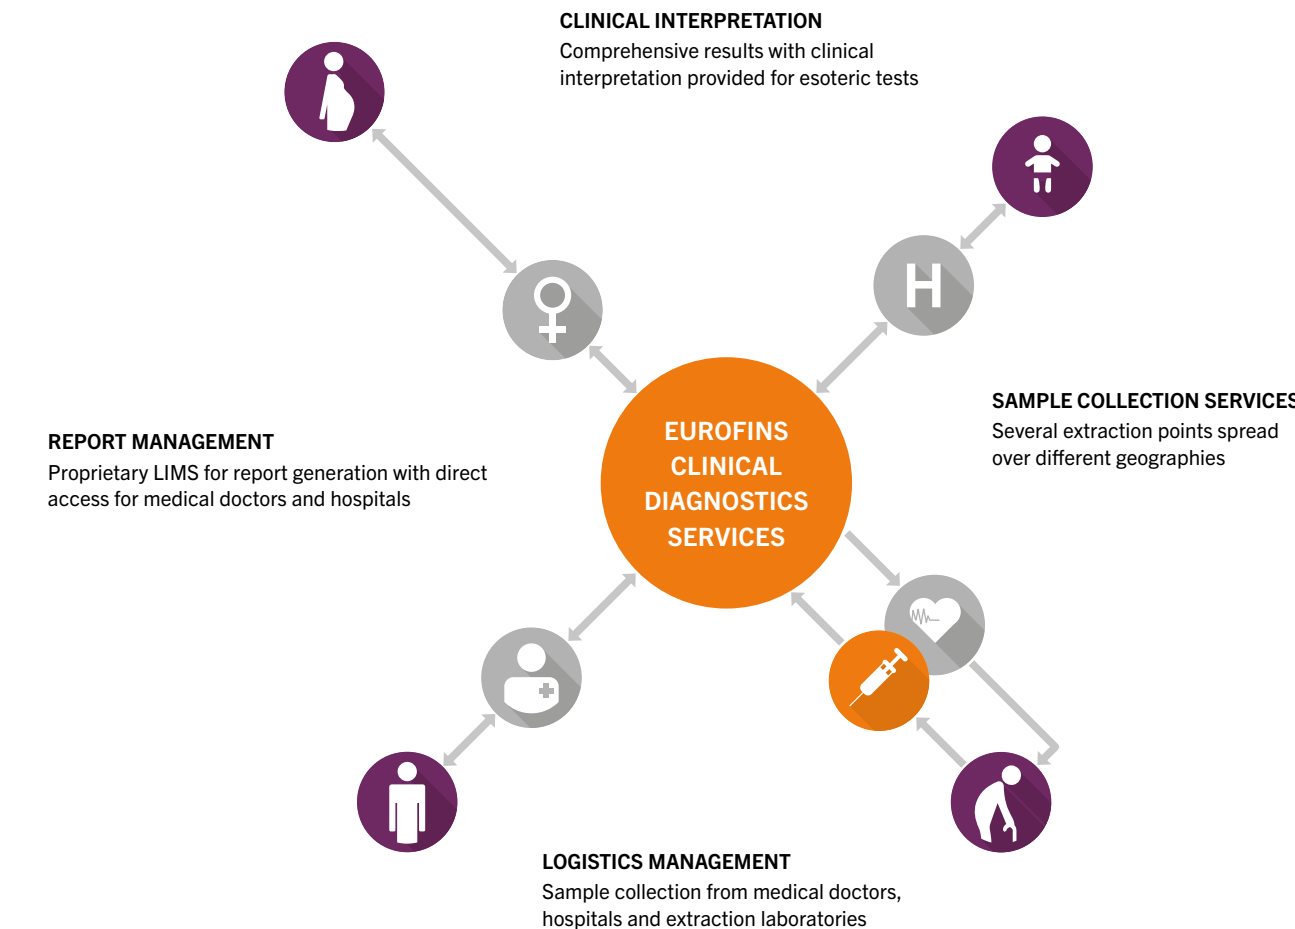

- Access to a wide range of innovative tests through a unique laboratory
- Competitive turnaround times due to large testing volumes
- Tailor-made solutions to meet the organization's requirements for sample referral
- Results with fully EDI solution available (HL7 / Npex)

### Cost-effectiveness

- Attractive pricing based on volume
- Including logistics management
- Time savings due to sample referral, electronic results retrieval and invoice control

### Highest quality

- ISO15189 and/or CAP accredited laboratories fulfilling international & national quality requirements
- Regular review of KPIs to adjust the service where needed

# Eurofins Clinical Diagnostics present at every stage of patient care

## 2. PREVENTION

For people predisposed to suffer certain diseases, Eurofins offers clinical testing services to follow up closely on the possible development of the condition. In that way, diseases can be treated early, with better care and prognosis as a consequence

## 3. DIAGNOSIS

Eurofins offers clinical diagnostics testing in all medical specialties, from routine testing to highly specialized testing services
