

Study Management

Welcome to Eurofins Agrosience Services

We are a leading provider of product development consultancy and technical support to the crop protection industry. Our technical activities involve conducting field and laboratory studies to determine the safety and efficacy of new agrochemicals and crop varieties. With over 30 years of experience, Eurofins Agrosience Services offers outstanding technical knowledge and project management skills. By acquiring a carefully selected range of CRO's, we have created a unique portfolio of expertise that provides analytical, regulatory and field support to plant breeders, agrochemical, biopesticide, biocide and fine chemical manufacturers.

A dedicated point of contact

In today's environment, peace of mind is an increasingly important commodity. Be confident that our Study Directors are 100% onsite to ensure that all studies are compliant with your requirements and respect the OECD, EPA and EPPO regulations. Eurofins Agrosience Services uses knowledge and experience to optimize services:

- More than 120 experienced Study Directors and Project Managers across Western and Eastern Europe, North and Latin America, and South-East Asia
- Plant Protection Product, Biocide and Biotech studies, from early stage screening through to demonstration platforms in order to support sales
- From study set-up until completion, regular information on the progress of each study
- Visits and meetings to evaluate your products at critical stages of the development project
- Data analysis using specialized software such as ARM or other formats according to your preference
- Study reports delivered in accordance with your timelines, containing all information for dossier preparation

A flexible and reliable service

Study Management is integrated at global level to ensure a high quality service. We constantly adapt our offer and train our expert teams to exceed your expectations.

- Field studies designed according to local Good Agricultural Practices to ensure maximum use of the efficacy, residue and ecotoxicology data generated across our GLP and GEP certified global field network
- Phys-chem and analytical services, e-fate and ecotoxicology laboratory studies supervised by highly specialized Study Directors
- Involvement of local Study Directors for national studies and co-ordination of international multi-site studies through our centralized Study and Project Management teams
- Integrated databases designed for efficient communication. Our secure Global On-Line Data system (GOLD) is also accessible to customers for real-time access to efficacy study data.

Project management

Eurofins Agrosience Services offer a tailored approach to your specific requirements giving you as much, or little involvement as you want. We have established a strong group of senior staff to provide the best service possible:

- advice on development strategies in a regulatory context
- help for interpretation of study results and provision of solutions
- co-ordination in line with your requirements:
 - to your time scale and budget
 - by geographical spread
 - across specific areas of expertise
 - to your technical specification

In summary, we are proud to offer an easy, trouble free solution for managing your complex programs alongside our Study Directors. Fully integrated with your team, our Project Managers will free up your time to concentrate on future projects.

Eurofins Scientific Group

Eurofins Scientific is a life sciences company that serves a wide range of industries including the pharmaceutical, agricultural, food and environmental sectors.
