

## Online Data Access with LabAccess.com<sup>SM</sup>

LabAccess.com, Eurofins Medical Device Testing's innovative online data access tool, offers you a timely and secure window into comprehensive laboratory information as your project progresses. With LabAccess.com, you can view extensive, live project information such as submitted samples, analyst's notebooks, chromatograms, approved test results, Certificates of Analysis, raw data packages and invoices.

### Choose Eurofins Medical Device Testing to help you:

- Gain 24/7 secure access to your testing data. from real-time progress updates to due date.
- Retrieve past project information as easily as your current data.
- Access an exclusive Shelf Life Study management tool.
- Access your data easily on computers, tablets and mobile devices.

Eurofins Medical Device Testing provides you with the most innovative, comprehensive and user-friendly data management tool in the industry, giving you the ability to save valuable time and manage your projects with maximum efficiency. With more than 11,500 registered users, LabAccess.com offers:

### The Stability Calendar

This exclusive feature allows you to view your shelf life studies in progress. Calendar items have detailed links to information posted; you can link to a sample number and see live data. Additionally, you can link to your overall protocol plan in our document control system, ensuring perfect synchronicity to your requirements and scientific procedures.

### Exporting of Results

LabAccess.com enables you to view the results for multiple tests and download them as either a Microsoft Excel Workbook or a Comma Separated

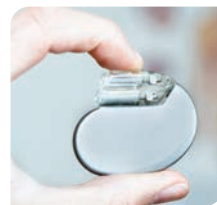

Value (CSV) file. You can export your data to perform your own comparisons or to study trends. This enables you to evaluate your product performance over time and compare data sets to statistically evaluate data points. LabAccess.com is designed to give you the information necessary to look at your performance over time and compare data sets to statistically evaluate data points.

Eurofins Medical Device Testing recently released several LabAccess.com updates with enhancements to improve the overall website experience, including:

**A new look and navigation** – a new site design, including vertical menu for intuitive navigation on the left panel, as well as a new LabAccess.com logo to align with Eurofins' global brand.

**Quotations** - Quotations from our LIMS system are now available to view or download. Please note any quotes that begin with "NQ-" are not available as these are part of our legacy LIMS.

**Purchase Orders** - All purchase orders managed in the eLIMS-BPT system are now available to view or download. Users also have the ability to track the fund availability on a real-time basis.

### **Investigations (Exceptions)**

eLIMS-BPT closed Exceptions (i.e. Exceptions that begin with "EXC") are now available to view or download and can be sorted by certain information such as initiating event.

Note: any Exceptions beginning with "EX" will only be available on LabAccess through the data packages.

**Documents** - Effective client specific documents are now consistently available on the Documents page.

**Release Date** - The Estimated Release Date now consistently displays on the Sample Group Detail Page for all Sample Groups

**Stability Details** - The sample stability time point and storage condition now consistently displays on the Sample Detail Page for all stability studies stored at Eurofins.

*Please note that quotations, purchase orders and investigations will require special permissions. If you would like to have access to these documents, please contact your client service representative for access.*
