

One-stop service - world-class, worldwide

**1,000** sqm laboratory  
microbiology and molecular tests

**500** sqm phytotrons  
controlled growing conditions

**300+** Fungi

**120+** Bacteria

**200+** Virus/Viroids/Phytoplasmas

On a large range of vegetables,  
fruit and field crop species

Constantly expanding  
our services and  
technologies to help  
you outperform.

Here to help you  
succeed...

Reliability Fast turn around time Flexibility

From a leading  
global independent  
contract research  
organisation

One-stop service - world-class, worldwide

## Your Trusted Partner for Seed and Plant Health

### Phytosanitary Quality Control

- Detection of seed-transmitted pathogens
- Genetic analysis for purity and fingerprinting
- Seed/Plant diagnosis for viruses, bacteria, fungi

### Certifications

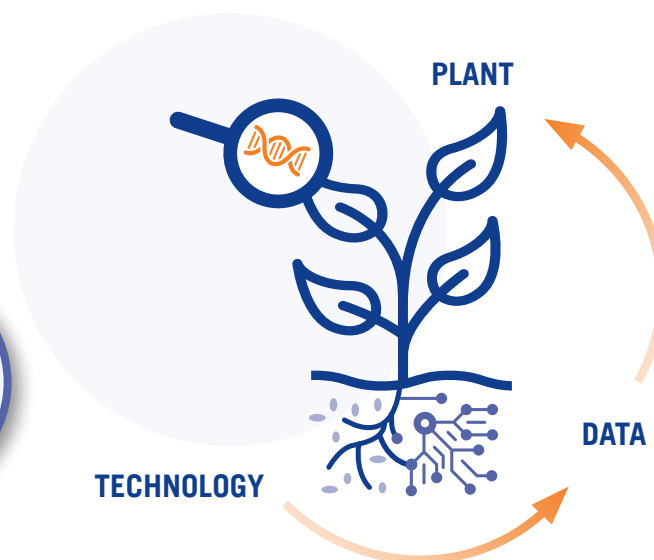

- Official Laboratory designated by the Italian Ministry of Agriculture
- Accreditation UNI CEI ISO/IEC 17025:2018
- GSPP laboratory for the detection of *Clavibacter michiganensis* subsp. *michiganensis* (Cmm) on tomato seeds

### Marker Assisted Selection & Resistance Screening

- Selection of resistant genotypes
- In vivo bioassays in controlled conditions
- Artificial pathogen inoculation
- No seasonal limitations

### Accelerate your go-to-market

- Validated protocols with high reproducibility
- New method development for emerging diseases
- Direct access to the Eurofins field and lab network
- Confidentiality & IP protection
