

One-stop service - world-class, worldwide

Your partner for biodiversity services...

- Environmental and monitoring studies
- Taxonomy of mites, springtails, spiders, insects and other arthropods

One-stop service - world-class, worldwide

Field services

We have more than 20 years' experience in planning, performing, and reporting small to large scale field studies.

We offer customized project management for the full range of environmental studies: from long term monitoring studies to inventory studies of local fauna.

We use all sampling methods, from pitfalls to beating samples. In addition, we use in-house sampling methods such as mine traps for stratified sampling of soil fauna. All sample types are standardized for easy comparison and data analysis.

Trusted by

Taxonomy services

Our taxonomy team has decades of international renowned experience.

We cover a wide range of taxa including:

- Acari
- Beetles
- Spiders
- Diptera
- Collembola
- Hymenoptera

In addition, we have a state-of-the-art inhouse electronic counting system which allows us to process large number of samples in a standardized and time efficient manner.

Here to help you succeed...

Expertise

Our experts have gained experience through involvement in numerous projects, working with biopesticides, plant biostimulants and biofertilisers, for more than twenty years.

Eurofins Agroscience Services provides:

- Scientific, agronomic and regulatory guidance
- Advice on program design and methodology

Network

We have specialised staff with extensive technical know-how for both field and laboratory testing of your biological products.

Technology

Our experts use innovative tools for field and laboratory testing along with the state-of-the-art methodology, equipment and facilities.

Capacity

Eurofins Agroscience Services can offer high capacities and quick turnaround times for preliminary and large scale programs. Be assured of quality, reliability and stability from a leading global CRO.

Capacity
