

Eurofins Medical Device Services Europe acquires German Laboratory ac.biomed

Munich, 13 October 2025 – Eurofins Medical Device Services Europe, a leading provider of comprehensive testing and consultancy services for medical devices, alongside sterile packaging services, is proud to announce the acquisition of ac.biomed GmbH, a specialised testing laboratory for cardiovascular medical devices based in Aachen, Germany.

This strategic acquisition reinforces Eurofins' commitment to expanding its expertise in medical device safety and performance testing and strengthens its presence in the European market. ac.biomed, with over 30 years of experience and active representation in standardisation committees, is the only European laboratory offering the full scope of testing according to the ISO 5840 family. In addition, ac.biomed is the only European ISO 17025 accredited lab providing safety and performance testing for oxygenators, blood pumps and cannulas.

Peter Knipp, Managing Director of ac.biomed, shared:

"Joining Eurofins marks a new chapter for ac.biomed. We are excited to integrate our deep expertise in performance testing with Eurofins' global network and resources. This partnership will allow us to continue delivering high-quality, tailored testing services while expanding our reach and capabilities."

Dr Peter Havel, Managing Director of Eurofins Medical Device Services Europe, added:

"ac.biomed's reputation for excellence and innovation in cardiovascular testing perfectly aligns with Eurofins' mission to provide precise, proficient, and proximity-driven services. This acquisition enhances our ability to support medical device manufacturers throughout the product lifecycle, from design to regulatory approval and beyond."

With this acquisition, Eurofins continues to build on its legacy of scientific excellence and customer-focused service, offering clients a broader portfolio of consultancy and testing solutions, sterile packaging services, and faster access to market.

About ac.biomed GmbH

Founded in 2008 and based in Aachen, Germany, ac.biomed is one of Europe's leading testing laboratories for cardiovascular medical devices. The company offers a full range of testing services in compliance with international standards and under full accreditation to the ISO 17025 standard. ac.biomed supports manufacturers from early-stage development through clinical approval and production, with a strong focus on cardiovascular devices such as heart valves, oxygenators, blood pumps, cannulas and other devices including custom test setups. Its location in the vicinity of RWTH Aachen University and the University Hospital Aachen ensures access to cutting-edge technologies and scientific expertise.
