

One-stop service - world-class, worldwide

AgTech Field Trial Platform for Europe

Scientific validation of agricultural technologies in real field conditions.

Vision

Support sustainable farming practices, ensuring that the agricultural data-driven decision-making tools are responsible, validated, and **trusted** by farmers, industry, and policymakers alike.

Engagement

Active collaboration within the **DIN/ISO TC 347 for smart farming standards**, to develop relevant protocols and establish a robust testing framework for quality, validity and broad-scale applicability.

Diversity of crops and agroclimatic conditions. Options for multi-sites, multi-sessions, validation ring tests.

Expertise & Quality

Scientific protocols

Standardized trial design, and traceability

Dedicated field platforms

Precision sowing, structured plots

Experienced agronomists

Precise, repeatable, robust evaluations

Trusted reports and insights

Detailed performance and validation data

Wide Range of Applications

Sensors & Cameras for Add-on Devices

Data accuracy, real-time sensing reliability, sensor-to-platform compatibility, correlation to lab analysis.

Drones & Autonomous Devices

Mapping precision, image quality, correlations, weed/pest detection rates.

AI-Based Decision Support & Predictive Apps

Recommendation accuracy, economic/environmental impact, weather/event prediction.

Image Processing & Satellite Technology

Resolution quality, image latency, canopy/soil health correlation, soil/climate predictions.

Other Digital Innovations

Ease of integration, user interface quality, operational scalability for automation tools and connectivity platforms.

About Eurofins Agrosience Services

90+ field stations, 400+ agronomists, and decades of experience in field trials and digital tool validation, to provide unmatched environment for Agtech validation services.

The company holds GLP and GEP certifications and operates under OECD, EPPO, and ISO guidelines, ensuring compliance to quality standards, globally.

Service Launch in 2025

In Germany, with planned future expansion to France, Italy, Spain, Hungary, Netherlands and the UK.
