

Introduction of a Next Generation GLP eArchive Solution

Eurofins Agrosience Services has launched its next generation electronic GLP Archive solution. Our new eArchive is a cloud-based solution, designed and developed to fulfill all requirements of digital archive solutions according to the OECD17 guideline.

Key Features and Advantages

- Successful **GLP Audit** without findings
- **Fully audit trailed** (file data, user actions and system settings)
- Comprehensively **validated according to OECD 17** (incl. Supplement 1) for application, deployment, platform
- Upload of **any files types** and completed folder structures
- Capturing of **file meta data** and tagging of files – stored independently from files
- Data integrity ensured by **checksum verification** – stored independently as reference
- **Full version management** in case of re-upload of modified files
- **No deletion** of any files (before end of minimum archiving period, currently 15 years)
- No modification of any data in the system but **secured file download** from the system based on permissions
- **Defined workflow** from Data Collection to Pre-Archive and Facility Archive
- Access based on **role-based permission** for each individual user on study
- Documented **consultation access** of data during archiving period

One-stop service - world-class, worldwide
