

Eurofins BioPharma – Auditing Services

Eurofins CANADA offers consulting services to specialize in effectively servicing clients to assist in achieving a spectrum of certifications through our comprehensive auditing programs. Our team has an established successful history in partnering with market authorization holders (MAH), importers, wholesalers, packagers, testers, manufacturers, and industry related companies. **Beyond compliance is to assess strategic risks.**

Consultants are highly experienced in executing a strategic approach through the inspections and investigations, providing thorough GAP analyses and offering tailored corrective and preventative actions (CAPA) programs. Consultant retention is also available for added value and sustained support.
