

# EU Regulation:

## Your packaging solutions PPWR ready?

**Effective date**  
**12 August 2026**

The EU Regulation on Packaging and Packaging Waste (2025/40 - PPWR) will introduce stricter requirements for packaging materials.

## EU Regulation:

### Packaging and Packaging Waste (2025/40 – PPWR)

This new regulation presents companies with major challenges:

Stricter requirements for material composition, recyclability, and documentation – all within increasingly shorter innovation cycles.

As Eurofins Consumer Product Testing, we support you in bringing your packaging into the future quickly, safely, and in full compliance.

## Our Analytics for PPWR-Compliant Packaging – Your Advantages:

- Precise chemical analyses for material identification and substance verification
- Detection of critical substances and comparison with limit values, such as TOF and PFAS
- Fast turnaround times that accelerate your projects
- Comprehensive reporting formats that can be used directly for regulatory documentation

## Why Eurofins?

As one of the globally leading networks in Consumer Product Testing, we offer scientific precision, regulatory experience, and the assurance that you can operate audit-compliant at all times under the new PPWR standards.

## Ready for the future of Packaging?

Let us make sure together that your products meet the new requirements – quickly, compliantly, and with a forward-looking approach. We look forward to supporting you!
