## GENETICALLY MODIFIED FOOD PROFICIENCY TESTS

Nearly 40 years after the first product trials, GM foods and crops remain a topic of much discussion, with some territories embracing the technology widely, some restricting the use and cultivation of GM crops and others continuing to ban their use in agriculture.

Currently there are 32 approved GM crop plants, from alfalfa to wheat, and more than 49 countries with GM crop approvals relating to traits such as modified yield, disease and pest resistance, herbicide tolerance and more. (www.ISAAA.org GM Approval Database 2024)
