Veronika Vratheva, Quality Assurance Manager -Mid-Atlantic
Eurofins Built Environment Testing East LLC - Cary NC (Lab #10150)
730 SE Maynard Road
Cary, NC 27511

Dear Veronika Vratheva:

The Missouri Department of Natural Resources has received an application for reciprocal certification for Eurofins Built Environment Testing East LLC - Cary NC to conduct chemical analyses for public water systems in Missouri. Based upon the review of this application and the recommendation of the department's Laboratory Certification Officer, the department hereby reciprocally certifies Eurofins Built Environment Testing East LLC of Cary, North Carolina under the provisions of the Missouri Safe Drinking Water Regulations to perform chemical analyses for public water systems in the state of Missouri.

Enclosed please find a certificate of approval and a certified parameter list for your laboratory. The certified parameter list references the parameter and method of analysis that the department has approved. Your certification will expire on October 31, 2028. This three-year certification is contingent upon the laboratory's demonstration of proficiency, no changes to the approved methods or equipment, and maintaining certification from the primary certification authority, the New York Department of Health.

Thank you for your efforts to comply with Missouri's laboratory certification requirements. Should there be any changes to your certification status, please notify this office within 30 days. Direct any notifications or inquiries related to the approval to Scott Weckenborg of my staff, who may be reached at P.O. Box 176, Jefferson City, MO 65102, or by telephone at 573-526-1124.

Sincerely,

WATER PROTECTION PROGRAM

David J. Lamb
Public Drinking Water Branch Chief
