

Wine & Spirits Authenticity Testing Issues

Eurofins Solutions

Webinars on January & February 2017

Eurofins, Food Integrity Testing specialist and historical expert in wine testing

Integrity & Authenticity testing of Wine were at the origin of Eurofins. The laboratory was founded in 1987 to market the SNIF-NMR[®] technology. This innovative solution has been recognized as an official method by the European Union and the OIV to control wine chaptalisation. Since several decades, Eurofins continues to support Wine and Spirits producers, with our very wide portfolio of dedicated testing.

Aims of the webinar:

- To present our know-how and especially our innovative new method, Proton Nuclear Magnetic Resonance Profiling (¹H-NMR) Wine Screener, providing grape variety, geographical origin or vintage verifications
- To reply on line to your wine & spirits integrity issues.

Who should attend: wine & spirits' producers, traders or retailers
