

## Eurofins Training Academy

Our team at Eurofins PSS Consulting in Munich provides professional expertise in the field of medical device testing.

Beside our standard consulting services we offer our know how also in the form of sophisticated training courses. We will be glad to meet your individual needs with our public seminars and webinars or with a specific training for your employees only.

### Why Choose Eurofins PSS Consulting Munich?

- With more than 30 years of experience in the field of medical device testing our expert team provides you with the technical advice to ensure the success of your product development and trains your team accordingly.
- Choosing Eurofins PSS Consulting Munich, you will profit from our entire network of scientists and experts who will help you with advice and action. We know reliably which international guidelines apply to you, which information is crucial in the current problem situation, and where we have to start with our research in order to achieve the best solution for you.

### Our Training Modules

Our experts offer a wide variety of customized trainings and seminars. You can choose one of the following modules or just contact us: we will then discuss your specific needs and will find the appropriate solution for you.

- **In-house and in-company training**  
One of our core competencies is the tailor-made seminar concept. If you want to train several employees on the same topic, the company training is the optimal solution. Together with the expert team, you can develop your own agenda. The contents are designed individually and according to your needs. The possibilities range from individual seminars to complete tailor-made training packages. All trainings can take place or in our seminar rooms at Eurofins PSS Consulting in Munich or at your own facility.

- **Seminars**  
We offer various public seminars in the field of medical device testing in different languages and at different locations throughout the year.
- **Webinars**  
If you would like to train several employees on the same topic without stress directly on their PC, the webinars are the optimal solution. Together with the expert team, you can develop your own agenda. We only train the content that is really important to you.
- **Expert Groups**  
This training module offers the possibility to discuss sensitive questions in a closed group, moderated by one of our experts.
- **Guideline Updates**  
During these sessions planned changes to guidelines are discussed and their impact on licensing and audit strategy is mentioned.
