Testing Services for Novel Food, Feed and Additives

we offer **more**

Human Safety Testing

Human Safety Testing

Get your products to market faster than ever. A rapid turnaround in testing your products saves you money, time and resources. A world class service ensures your most valuable business assets are in good hands and enables you to confirm rapidly the quality of your dairy, beverage, food and feed. Exactly what you need to make sure no time is wasted bringing your products to the shelves.

Testing Services for Food and Feed

As a producer of food ingredients or novel food, you are required to comply with the standards for customers' health protection. The identification of hazardous ingredients is mandatory for consumer protection. Toxicological testing is used to determine, whether your products would pose any kind of risk to the health of consumers. Eurofins provides the full service to assess the toxicological data under GLP-compliance according to the current requirements of the European authority (EFSA) and further international relevant guidelines (Redbook 2000, FDA).

Eurofins delivers you more by providing you with a wide range of services landing value straight on your bottom line.
