

Eurofins Supply Chain Control

**Know your product before
it arrives.**

The Challenge

- Seamless supply chain monitoring is required for global supply chain flow, rapid turnaround times and to meet increasing demands from customers and legislators.
- The procurement of foods as raw, semi-finished and finished products is complex to implement and presumes up-to-date legislative and logistics knowledge.
- Compliance with national specifications may necessitate the engagement of an on-site, independent third party.
- Customs clearance when sending samples, special legal constraints and the international labelling of foods require customs issues and legal barriers.
- Linguistic and cultural differences further increase complexity.

The Eurofins solution

Comprehensive supply chain monitoring

- ✓ Representative sampling in the country of origin
- ✓ Proven international sample logistics
- ✓ Reliable and rapid laboratory results
- ✓ Loading checks, audits and pre-shipment inspections
- ✓ Independent local contact persons

The **global** supply chain package

Valuable knowledge regarding global supply chains

We operate a wide network of inspectors and laboratories in the important procurement and productions markets. A continuous exchange of experience facilitates competent consulting through up-to-date expertise about food product safety. We keep this knowledge state-of-the-art through our membership in national and international professional organisations, committees and associations as well as through cooperation with leading research institutes.

International network for food safety

Local contact persons guarantee efficient communication and expertise on site

Access to all up-to-date knowledge at any time

Central support from internationally-experienced Eurofins product experts

Representative sampling and logistics

Representative and independent sampling worldwide and rapid analysis results provide you with all the relevant information well before the import of goods. We look after all the logistics of the samples, including customs clearance when sending them. Established processes ensure rapid delivery and affordable conditions.

Field sampling and loading checks

Food safety inspections, traceability systems

Container inspection (fumigation, humidity control)

Reliable and advance product release in the country of origin

Rapid and reliable laboratory analytics

As a leading national and international full-service provider for laboratory analytics and consulting, we globally deliver you all the analyses that you require: from the basic monitoring to special analytics. We are present in all procurement and production markets with more than 800 laboratories in 47 countries. We develop customised solutions that accurately meet your requirements using state-of-the-art technologies.

Investigation for residues and contaminants

Authenticity verification

Testing for GMOs (genetically modified organisms)

Microbiological tests

Make progress with this service

Inspections

We work with continuously-trained inspectors from around the world. These inspectors take the representative samples, carry out the classic pre-shipment inspection (PSI) and create a report in accordance with agreed specifications.

Audits & consultings

We are able to carry out several audits in different countries thanks to our global Network of experienced and accredited auditors – in accordance with international standards such as ISO 22000, FSSC, IFS or with unique customer specifications.

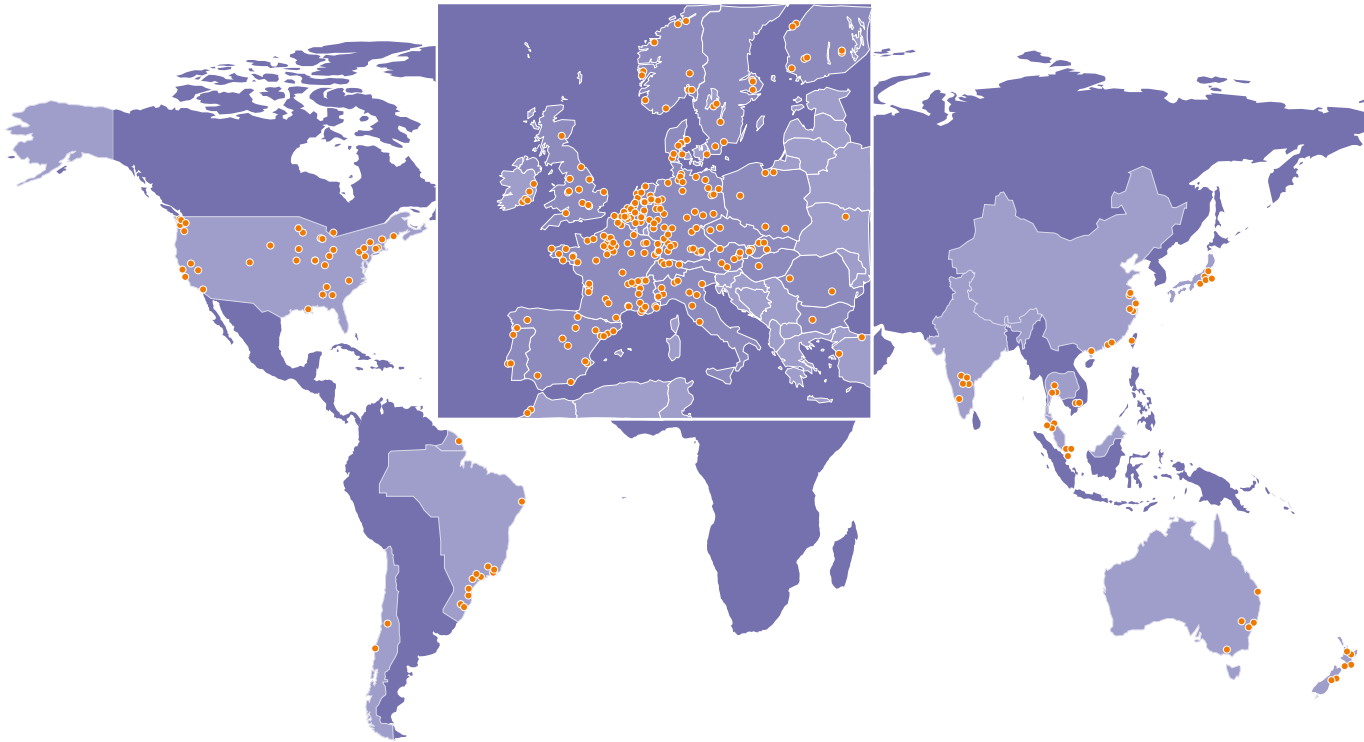

Eurofins OnLine (EOL)

EOL gives you 24/7 access to your samples and analysis results. You obtain an online overview at all times from registration up to the creation of the test report. EOL is free of charge for Eurofins customers to use.

International label inspection

In cooperation with our partners in over 35 countries worldwide we offer the labelling control and translation of food labels as well as check of analytical results.
