## Informations according to the certified reference material:

<u>Description</u>
Bovine milk from Danish Dairies.

CRM has preservative added.

The certified values are calulated based on results from chemical analysis.

Because of the short validy period, reference analyses is carried out at one laboratory only, but in several determinations and batches for statistical robustness.

Homogenity iscontrolled on data from both chemical and FTIR analysis. Stability has been calculated for a representative batch.

\*Following changes to the above methods have been made.

Fat: The drying is with a constant time instead of constant weight.

Protein: The destruction does not take place at lower temperatures, but starts at 420°C.

Dry matter: Single-use vials without lids are used instead of vials with lid, and the samples are not pre-dried before placed in the oven.

The Samples are calculated with following expanded uncertanity U9

	U%
Fat	1,5%
Protein	1,5%
Lactose	2,0%
Dry Matter	1,0%

<u>Instruction for handling and use:</u>
Place the CRM at room temperature for 60 min, then heat in water bath to 38°C for 20 min.

Gently invert the CRM 20 times and measure immediately on FTIR equipment

Samples can't be reused. Once heated, please discard any remains after measurements have finished.

Sample size: Approx. 50 mL.

Period of validity:
14 days at 4°C ± 2°C from production date.

Storage information: Store at 4°C ± 2°C until use.
