

Safety First!

Eurofins Lab Testing Europe

N.º 6 - November 2017

The end of the year it's almost there. The Christmas eve, the light's, the gifts. It's a good season, but with a lot of dangers! With the hurry and the enthusiasm we forgot the safety issues, like turn of the Christmas lights, the speed limits on the road...

So, to make that season great, we recommend to everybody that keep in mind the safety rules and drive carefully!

Implementation of the new model of the Safety Cross. Update of Environmental monitoring instruction, fire safety instruction and evacuation plans. Update of risk assessment

Safety First!

LAST NEWS

PORTUGAL

This month we create a new activity, a game: the Safety Trivial! It's a game for all employees to play, to help them to understand better some Safety questions but in a easy way.

And we can say that we were very surprised, because they know a lot about safety!

It's true that we work every day to teach them and keep them aware about everything on the lab, but people have to be open to learn, it's a team work. And they are!

Once again this team deserves the congratulations!

That wins the best!

POLAND

The HR Department made an evaluation of the satisfaction of our employees. We achieved an excellent result: 100% of our employees are satisfied about their work in the laboratory.

New employees had been trained in asbestos and chemical hazardous situations.

ONGOING/ FUTURE PROJECTS

October was a month to re-evaluate the Safety Management System, in Portugal and Poland.

Although the good results, there is always something to improve.

So let's keep the focus and keep on move!

Remember, better is always possible!
