Country-specific laws, rules and regulations

- Water International Framework : Mining Code of the International Seabed Authority.
- Additional assignments - Technical specifications

And for your voluntary steps according to your specifications

Who are we ?

Eurofins Hydrobiologie France is organized in competences centers laboratories in France and in Europe, to propose to its customers a complete technical high-level range of analyzes.

Our laboratories lean on qualified experts able to intervene on crossfunctional themes, on innovative material, and on strong investment policy.

An expertise for all your needs

- Complete services: Sampling, treatment, analysis and interpretation / results exploitation.
- Adapted equipments: SIG mapping, communication media, spatial and temporal comparisons, statistical analyses...
- A personalized monitoring and customer-specific offers like Oil & Gas study and impact assessment
- A qualified and experimented team (up to 10 years of experience in hydrobiology).
- From development to innovation:
 - Methodological developments for specific studies
 - R&D projects like environmental DNA
 - Partnership with innovative companies

A quality service

Cofrac accredited for the IBGN, IBGWFD, n°1-6428, n°1-6429, and n°1-6430. Cofrac accredited for IBD indexes, n°1-6428 and n°1-6430 list of sites and available reaches on www.cofrac.fr

Participation of the AGLAE interlaboratories tests in hydrobiology.

Our assets

- A capacity of action throughout France from 4 sites of intervention
- A unique partner for the whole monitoring of your site
- A dedicated interlocutor to advise you and to propose you adapted solutions to your needs in answer to the statutory context
- Specialized Lab and sample sites for more reactivity
