

SEV Certification scheme

Mark of Conformity

Certification is a very important step for increasing the value and the quality of your products. Our Certificate gives the manufacturers this kind of possibility and the visibility on the market and assures the conformity to the European requirements.

The Eurofins Electrosuisse Product Testing AG Certificate allows you to mark your products with the SEV Mark of Conformity. This marking gives visible guarantee for Authorities, Customs and Consumers that the products have been evaluated by a certification body, conducting all tests according to the Low Voltage Directive (LVD) and optional also to the Electromagnetic Compatibility Directive (EMC). The production is subject to continual surveillance.

Eurofins Electrosuisse Product Testing AG provides product certification for the following sectors or product groups:

- Electrical Household appliances;
- Industrial equipment, tools;
- Medical and laboratory equipment;
- IT and entertainment electronics;
- Industrial electronics;
- Machinery and systems;
- Lighting;
- Electric installation materials;
- Cables.

Advantages

- Possessing a Swiss Mark of Conformity, which is internationally recognized;
- Quick and easy access into the European market;
- Internationally recognized tests = avoiding repeating of tests;
- Reduction of conformity check costs during the production;
- Conformity to the European Directives;
- Provides a means of proof in the event of product liability related to type test claims.

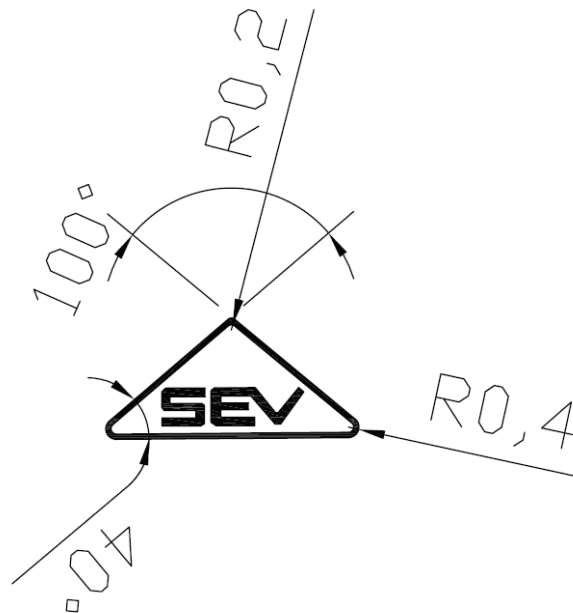

How to obtain the Eurofins Electrosuisse Product Testing AG Certificate

To obtain the Eurofins Electrosuisse Product Testing AG Certificate you have to demonstrate that the product has been tested and has fulfilled all requirements of the Low Voltage Directive (LVD). The Eurofins Electrosuisse Product Testing AG Certificate allows you also the possibility to integrate the Electromagnetic Compatibility Directive (EMC).

Eurofins Electrosuisse Product Testing AG can assist you and carry out all required tests directly in our accredited and recognized laboratories.

The factory inspection is carried out by our accredited Inspection Body or designated partner in your country to ensure ongoing product compliance.

SEV Mark

In case of reduction or enlargement of the SEV-mark, the proportions must be kept within the pictured pattern.
