

IECEx Service Facility Scheme

International Electrotechnical Commission system for certification to standards relating to equipment for use in explosive atmospheres (IECEx System) developed the service facility scheme which can be used to attest that a service facility has been independently assessed and found to have appropriate equipment, competent staff and operate procedures to do repair, overhaul or modification work in compliance with IECEx requirements and IEC 60079-19.

Who can apply to be a certified service facility?

Workshop doing repair, overhaul and reclamation of Ex equipment.

How does a workshop get a certified service facility?

- Application to Eurofins Electric & Electronic Product Testing AG
- Initial assessment done by a local Eurofins representative
- Equipment, staff, quality and final repair control shall be according IEC 60079-19 and IECEx OD's
- Annual routine assessment showing the on-going conformity with the rules

What is the advantage of being IECEx certified service facility?

- Internationally accepted certification and registered on the IECEx webpage <https://www.iecex-certs.com/search>
- Independent third party assessment of repair process and due to that reduction of risk of compensation for damages
- Proven repair process for equipment with type of protection "d", "e", "i", "n", "m", "p"
