

Fast and reliable marketability evaluation

The easy way to ensure your non-food products are in line with regulations when launching them on the EU and Swiss market.

A conform product documentation – the key to market success

The legal requirements for a smooth launch of your products on the market are both complex and demanding. Anyone aiming to sell a wide range of products requires in-depth knowledge of the applicable laws and latest standards in the corresponding markets. Non-adherence to these requirements can lead to product liability claims, sales bans or product recalls.

Eurofins is familiar with the laws and standards seen in Swiss and EU markets and has years of experience in the verification of product documents.
