

Testing for Pesticide Residues

To meet the expectations of consumers, supermarkets and regulations farmers employ a range of pest control measures to ensure that produce is plentiful and free of blemishes, insects and mould. With hundreds of pesticides available and the increasingly stringent controls and regulations, it is essential that comprehensive pesticide residue testing is carried out to ensure the safety of our food.

Targeted detection

From our site in Wolverhampton, Eurofins can offer a range of pesticide residue detection services including:

- Extensive multi residue determinations
- Comprehensive list of single analyte targeted methods
- Actives tested within the Pesticide Residues in Food (PRiF) annual surveillance programme
- Compounds commonly found in products imported from both within and outside the EU

The service includes:

- Individual reporting of multi residue actives against current GB and EU Regulations
- UKAS accredited tests UK matrices (raw fresh/frozen fruit, vegetables, herbs)
- EU competence centres accredited testing to support complex sample types
- Preparation of sampling plans and risk assessments

Fast reliable service

Eurofins has an unrivalled track record in the consistent delivery of accurate results to an agreed turnaround time. To meet the demand for rapid results needed for positive release of product, we can now offer a same-day and next-day reporting service across the whole of the UK pesticides screening. In addition, are options for 3-day and 5-day reporting service across the whole of the UK residues testing. Our current target is 5-7 days standard TAT reporting to support due diligence programmes.
